Hey Twisted, if they want to pay for the trip
i will gladly come down to Florida and look
for you.
PS....what kinda rod and reel should i bring?!
Haaaaaaaaaaaaa! Road trip !!!!!!!!!!

"Got RF?"

No, I had a hard time calling my hotel to cancel. I punted
because I didn't want to trailer that Plymouth thru a blacked
out town. It was really bad around here, no traffic lights and such.

We went to wooster instead this year, -I'll be back-
and I'm not even running for Governor.

Like the floating kilo's when your off shore.
A couple years ago, while at Cabo on our
yearly trip, we came across a 100 kilos floating
approx 65 miles off shore. The captain said
that's not unusual, drug runners often miss some
of the drop during the night.

> A short range radio, with fewer channels, is likely to be very usable.

OK, but can you reccommend a model? What are we taking about here?
Surely not an FRS radio? Then what?

Look at what happened during the backout in New York: cellphones had a
very time working because of powerfailures and saturated circuits. So
I would not count on cell phones too much in case of problems.

Which channels do would make it possible to call the police or the
coast guard? Are there other, non CB, emergency radios out there?

Why Thank you Frank for confirming that it's George.
No where in this thread did he say it was George, nor
did his name ever get mentioned by BrainBuster. Only
Anonymous whatever he wants to call himself was responded
to, so since you have just confirmed what everyone else
already knew that George is that person, is posting via AOL and doing all this BS,

Thanks!!!!!
It had looked as though things had died down a bit. I would click on the group, it would say
20 then show maybe 15
posts, so I figured that you could be pulled out of the file,
but I was wrong.
Please spew your normal BS, it does seem to
make people laugh, you are a funny person <G>
Ciao and thanks again for confirming George's
AOL account and his constant trolling.

2585. ARRL Dilemmas (Representative KC8LDO a problem-operator)

Newsgroup: rec.radio.cb
Date: 2003-08-20 14:57:52 UTC
From: twistedhed@webtv.net
Message-ID: <12757-3F438C70-36@storefull-2317.public.lawson.webtv.net>
Source record: 164070

If you are a ham radio operator and a member of the ARRL, you may want to think about contacting them and including some their self-professed represenative's (KC8LDO) more colorful posts where he utilizes their insignia to further his personal agenda of harassment of the cb group and all that eludes his intellect. I have all his old posts pertaining to myself and some pertaining to the group in general,,forges, death threats, threats of violence, threats against the group of spamming us with pornography, etc,,,,the list is endless. This operator was informed several times that his behaviors reflect on the ARRL as a whole. Ring the term "jock" or "jockstrap" through google under groups in "rec.radio.cb", along with "Leland C. Scott" and one will find the ARRL sig in the body of the majority of this errant operator's harassing posts to the usenet group rec.radio.cb. All were forges of myself, which is why the forge exists nowhere on any internet archives. The only place this forge is found is in the body of KC8LDO's many, many, posts, all bearing the ARRL sig.

Operators such as this utterly undermine all the efforts the ARRL has set forth. KC8LDO has a penchant for turning all his discussions on usenet to one of a personal nature. He suffers from a comunication deficit so great that he is unable to separate topics from people. Make a post he disagrees with, YOU suddenly become the problem and his object of attack. His obsession with personalites is evident with his hundreds of posts returned with the term "jock" via the google search.

Operators like KC8LDO seriously harm the league's stated goal and hammies reputations in the eye of the public. The ARRL has a defined purpose and goal. 5 minutes of viewing KC8LDO's posts and you can view for yourself if this no-code is contributing to the "Betterment of Amateur Radio, or if he is part the scourge, the cancerous infected part of the hobby that doesn't care for anyone but himself, and will use the league, and it's name, as a tool of harassment toward cbers for merely discussing different aspects of radio. KC8LDO has appointed himself official representative of the ARRL, judge, jury, and executioner against freedom of speech. Mere talk and discussion about anything that KC8LDO deems illegal IF put into practive is enough to send this communication-challenged individual into seizure-like spasms and instant-attack and threaten mode. KC8LDO has an ego so heavily involved in his quest for power and authority that the use of the ARRL tag in his internet endeavors gives him a sense of permission, rationalizes his behavior, as if his harassments are endorsed by the organization. Operators such as this are the exact opposite of the goal of the ARRL. The KC8LDO's of the world are out there. Their behavior will not be tolerated by those seeking to advance the hobby for good. Let the ARRL know what you think. They need to be informed when they have intentional

strife-causers among their ranks. Then again, it could be intentional sabotage to blacken the reputation of the ARRL, which is why KC8LDO may continue to utilize their sig when harassing and forging cbers. Nevertheless, the ARRL may wish to be informed.

> Surely not an FRS radio? Then what?

FRS will allow you to keep your group in contact over short ranges.
I would expect 1-2 miles.

> Look at what happened during the backout in New York: cellphones had a
> very time working because of powerfailures and saturated circuits. So
> I would not count on cell phones too much in case of problems.

Absolutely.

> Which channels do would make it possible to call the police or the
> coast guard? Are there other, non CB, emergency radios out there?

Ham radio solves my needs, with bands from 2MHz through 24GHz.
The 2 meter band is the most popular, and is supported by repeaters with
large coverage areas (10 - 50 mile diameter coverage into a handheld
depending on antenna and terrain)
You need a licence to play though, and that seems to upset people,
especially in CB land.

We use ham radio here in conjunction with Skywarn, to warn of severe
weather, like tornadoes.
Cell phones flake out immediately, as the network overloads with everyone
calling everyone else to see if they are ok too, and the first hit of bad
weather usually takes the sites offline entirely when the power drops. Our
repeater has battery backup, and we have an alternate repeater site a few
miles away that we can activate in case our primary is taken out by
lightning.

Starter radios can be had on ebay for $50 and up, with reasonable features.

As for calling police, that's still an iffy proposition. In our county, when
severe weather hits, or some other widespread problem is happening, our
people are in at the county EOC, and a call on our repeater for any
emergency services will result in a note passed down the hall to the 911
dispatchers. Many counties have similar groups in place, and the more urban
you are, the more I would expect that to be the case. One of the most
active groups in the country is in Orange county California
http://www.ocraces.org/ We're not that big here :)

Calling ham radio an "emergency radio" is doing it a dis-service though. I use it almost every day, mostly just to chat with others in our group while driving, and keep up on current events.

My particular vice is called Slow Scan TV, which allows me to send a picture in about 30 seconds, over a range of about 20 miles with simple low cost equipment on the 2 meter band, and worldwide on HF like 14.230 MHz http://www.kenwood.com/i/products/info/amateur/vch1.html is what I use in the car, and at the EOC we have a computer running MMSSTV, a sound card program to send and receive SSTV pictures. It's freeware, which is nice, and any laptop with a sound card can play. Simple interface cable required, but that's easy :)

We also can do conventional TV on the higher bands (we call it "fast scan TV") but the power and equipment requirements are much higher to get any real range, that's just the nature of the mode.

Is a CB worth that much to repair?
Over here, you can buy another for that price... only a real good radio
would be worth that much to repair, and it would have to be a serious
problem.

What do you mean by "most parts"? Does that mean that $45 is the minimum,
but it could still cost more?
And, is that:
$45 (including most parts) + shipping.
or
$45 (including most parts + shipping).

Regards,

Peter.

We are due to have the licence requirement removed, so things are expected
to pick up a certain amount.
I expect that, once the old UK only frequencies are illegal, people will
suddely want to use them.

West Coast Radio wrote in message ...
>
>In most cases, these little radios would work for less than a tenner.
>The fianl or driver in such case, but the labor is what eats em up.

Also, you have to consider overheads, as well as direct costs. People just don't realise that there are other costs, they think that it only costs you the price of the parts. They never see the cost of delivery, solder, electricity, tools, test equipment, calibration, paper work, etc.

>If your willing to work on stuff for free and spend your money on
>others parts, then go for it. I used to fix rigs for free except for
>parts, but it got to hectic with all them running in. But when you say
>$25.00 to add channels and Peak, they run the other way.

At least as far as the next fool who will work for nothing.
This is why it is so hard to get paid for the work. But, when the "rig doctors" cannot do a repair, they will come running back to you with it.
Then you find all the local "rig doctors" bringing the dificult ones to you, so you end up with all the sh*t jobs, while they get the easy ones... making you seem expensive.

>I always found it funny when someone wants a radio fixed so bad that
>they say I will pay whatever to repair it (thinking $10) and when they
>find out that parts alone will cost more than that, then the labor,
>They just say keep it.

I have even had this happen with televisions, videos, etc.
In one case, the customer was told exactly what it would cost, with the line output transformer knackered.
They said to go ahead, even though the cost of the transformer alone was more than the TV was worth. He was even in such a hurry that he expected me to get the part and fix it that day, on a bank holiday when all shops and component dealers were closed.
They never did return to collect it.

Regards,

Peter.

As a experienced directional finding experimenter and signal searcher. You give NO info on looking for this person. You give no info on the malicious transmissions. If you are hell bent on finding the orgination of the signals then you need to give the 411 on how a first timer woud look for the signals.

2591. Tampa Bay Radio Pirate Is Licensed Captain

Newsgroup: rec.radio.cb
Date: 2003-08-20 17:44:31 UTC
From: maketwistypay@yahoo.com
Message-ID: <12f0139b.0308200944.4859c3f1@posting.google.com>
Source record: 164072
Cross-posted to: rec.radio.cb,alt.fishing,rec.boats.cruising,rec.boats

(rec.radio.cb,alt.fishing,rec.boats.cruising,rec.boats)

You can join the search to gather evidence against a "problem"
pirate radio operator in the Tampa Bay area....

-His name is unknown, but he goes by the handle of "Twistedhed".

-He is white male, 5'10", receding hairline, wears a captains cap.

-There is evidence he is a licensed captain operating Sat. and Sun.
fishing charters from a Tampa Bay public launch.

(You may have been, or know someone who has been on a
charter with a captain that answers this description)

-He is an illegal radio bootlegger operating on unauthorized
goverment allocated frequencies at or above 27.555 mhz.

-Not only has he refused to cease operation, he has posted taunting
Usenet messages that defy the FCC to catch him.

This Saturday, August 23, beginning at 7AM EST, at least one volunteer
boat will be cruising the Tampa Bay area. Please join us in our
effort. You will be helping to contribute to the public good. Such
"radio pirates" often interfere with health and safety communications
and emergency transmissions.

To catch Twistedhed on the freeband and get him "FCC busted",
we will need to have solid evidence. One way is to photograph
him on his boat with a telephoto lens. Get the boat's name and
reg. number also in the photo. At the same time a recording
must be made of the operator illegally transmitting. It may be
difficult but it CAN be done. This method has been proven
successful by hams in North Carolina for catching illegal
truckers on 10 meters.

Be advised this is NOT stalking or harassment, simply a legal
effort to gain evidence and merely OBSERVE a crime being
committed. These are PUBLIC waterways and ALL boaters are
permitted to be there. We urge you NOT to confront Twistedhed.
Leave that to the FCC and the courts. You are just there to gather
evidence.

You will need a CB or shortwave receiver capable of receiving 27.555
mhz. This is above the CB frequency band.

You will also need a LORAN or GPS.

We have confirmed these coordinates around Tampa Bay as "likely" areas
that he frequents:

The Ice Box is a large area that starts about 8 Nautical miles west
of Casey Key and 10.11 miles at a 209? mc from New Pass.
He is sometimes in this location.

Cuda Hole GPS: 2714.398 - 8245.326:
This ledge is called Table Rock and is one of many in the Cuda
Hole area that he goes to often.

Gully Loran C: 2715.002 - 8246.890:
Another large area with ledges he fishes at. A 259? mc for
10.29 miles out of New Pass will put you in the area that Twistedhed
frequents.

Swiss Cheese Loran C: 2712.031 - 8254.902:
This is a hard bottom area. A 250? mc for 18 miles out of
New Pass will get you started on locating him.

Old Barge GPS 2709.694 - 8253.053:
The Old barge is very old and in 80' feet of water. A 249.6? mc
for 17.69 miles from the New Pass sea marker is the Range
& Bearing. This is a Twistedhed favorite.

Point of Rocks GPS 2714.224 - 8231.829:
Warning, this place has large rock just under the waters surface
for some ways out from the beach. Please be careful. We joke about
this man but the truth is that he IS a pirate operator, which
means he does not recognize the laws of the USA, so he may
try and run you aground if you get too close and he sees that you
are attempting to surveil him in the act of freebanding. Please
use CAUTION at all times.

Please send all tapes and photos to maketwistypay@yahoo.com.

>did his name ever get mentioned by BrainBuster. Only
>Anonymous whatever he wants to call himself was responded
>to, so since you have just confirmed what everyone else
>already knew that George is that person, is posting via AOL and doing all this BS,
Thanks!!!!!

You're quite welcome. But before you hand me all the congratulations, better look at all the other countless threads where you automatically assume that anybody who speaks out against keyclowns and isn't clearly recognizable as to their identity must be "George", including the person in question. Also notice that I used the name "George" in quotation marks, mainly because I have no idea who is making those posts, or even if it's one person or many. I simply use the name that you have used so many times.

Look before you leap, Hypocrite Landshark.

> It had looked as though things had died down a bit. I would click on the group, it would say
>20 then show maybe 15
>posts, so I figured that you could be pulled out of the file,
>but I was wrong.
> Please spew your normal BS, it does seem to
>make people laugh, you are a funny person <G>

Why thank you, Hypocrite Landshark. You provide a few laughs yourself as your ability to think clearly and logically is progressively smothered by your obsession with "George".

> Ciao and thanks again for confirming George's
>AOL account and his constant trolling.

Hehehe.... the only confirmation is that you are losing your grip on reality. Keep it up and you will need to check yourself into the Twistedhed Institute for the Hopelessly Obsessed.

Containment of malice ranks right there with lack of self-control for
you. Neither fare thee well.

>what did this asshole say ?

Nice try assclown that was Friday, and I was asking the group what you
said.
So where are all theses posts I made about you? Is that the best you got LOL

Is this your proof of me posting about you all weekend ...
YES or NO

2600. FREQ COVERAGE OF VOYAGER VR-9000

"Twistedhed" <twistedhed@webtv.net> wrote in message
news:1514-3F42BDAA-12@storefull-2317.public.lawson.webtv.net...

Truth is my friend,,,Truth is N3CVJ breaks federal law to get his kicks
listening to underaged teenstalk about sex.
Truth is Lelnad forging cbers in hammie rooms.
Truth is,,,you're insane.

>Plus he uses an illegal radio to talk thier so his
>attempt to lie is once again brought to light.

LOL,,yea,,,my ten-tec is really illegal,,not.
****
>LOL. NOT wrong again on the freeband and CB Band your radio is illegal..

But YOU claimed I use it there,,,not I,,,just like all your other
claims,,,,,all lies.
****
Any radio you use to freeband is illegal, your the assclown who mentioned
the ten tec, what do you use that radio for then?

_
I own many radios. Unlike
yourself, because I mention a single brand, doesn't mean it's all I have
or use, but attempted education of an insane person is useless.

>Real easy question name one radio that is legal on the freeband?

still waiting on this answer.

But I'm not the one crying about the freeband law,,you are.
****

Answer the question, name one radio that is legal for you to use on
freeband?
I don't expect you to cry and trust me I am not crying either, when you are
caught you
will bre the crybaby.

_
But let's run with that, Geogre,,,,my Galaxy freeband activity is so
much
worse than N3CVj's
****
>Yes you are right it most certainly is, that may become a new sig file

Yupp,,it just may,,,,,"WA3MOJ claims
barefoot freebanding on 27 megs worse than pedophilia."

****

assclown you made the statement ""my Galaxy freeband activity is so
much worse than N3CVj'"

admitted fetish listening illegally to cordless phone conversations
of underage teeney-bopper girls talking about their sexual experiences
to each other...
****
>Off topic

But I didn;t bring it up,,,
****

Go take your medicine, how did this post turn into a Dave Hall thread, and
you most certainly brought it up You spastic asswipe.

N3CVJ brought it up,,HE mentioned it, HE
posted how much pleasure he finds in such perversions and acts and in
breaking federal communication law. That he is a licensed hammie makes
it all the worse,that you seriously are defending such actions is really
placing you in an ugly light,,then again, you admittted you are of the
belief such acts against children are somehow ok. You really are
insane...touched upstairs. Anyone that defends pedophilia such as you
have done has serious deep-rooted problems.

****
You have problems assclown, do stay on topic,
I will not have you change the topic of this thread and instigate and
distort what you have said.

_
and your continued attempted persecution of another for freebanding on a
galaxy radio while defending and condoning acts that reek of pedophilia
is what we are beginning to expect from yourself,
****
>Who have I condoned and defended?

First,,,Lelnad,,you claimed you knew for certain it wasn't him
****

Provide Proof of this claim, I asked you to yesterday and you still havent,
you lying again ,as usual.

and you
pulled a Bush-like move and attempted a flip-flop and said you now
"don't know" if it was him,
****
Provide proof of your accusations that I said I know it is not Leland.

Geogre, Go on,,tell me how bad my acts are in comparison to this
lid,,
****
>Yours are Illegal by FCC Rules

So is N3CVj's.
****
Provide statutes by the FCC

Not at all,,you indeed claimed he was NOT involved then you flip-flopped
when it was pointed out you most definitely slipped by admitting you
KNEW. Tut-tut, Geogre,,,your slip is showing..LOL.
****
Provide proof of me ever saying or insisnuating this your lying again.

> what is the observer part you speak of? leland is an OO?

What is it? I dunno...ask him,,,,,he's the one playing radio-Kop and
representing himself as the ARRL guy in rec.radio.cb to attack cbers
that clean his clock on a regular and semi- enjoyable basis.
****

Provide positive proof that leland is representing the ARRL

SO are N3CVJ's,,you aren't getting out of it, Geogre, ,,,,,,,that you
selectively target me to cry about freebadning when there are sexual
deviants among your rank and file that admit not only breaking federal
law, but laws regarding minors,,,,,

****
What does dave Hall have to do with your lies regarding leland and myself?
Nothing your a troll and a Bad one at that.
No one has selectivly targeted you you are an admitted FCC rule breaker and
confirmed Liar .

>You also have used an amplifier,

Yes,,,OH MY!! LOL!
****
Yes oh my another lie on your part then, you said your only guilty of a
little barefoot freebanding
another lie your caught in.

So has N3CVJ in addition to his deviant
behavior,,,,but you are ok with such whackos and their sexual
sicknesses, so go ahead and let him around the children in your family.
****

I wont comment any further at all on dave hall since you have continualy
tried to change the topic
and avoided any question posed to you to provide proof of your lies.

Exactly,,,but mentioning God while harassing cbers for a true victimless
crime (cite a single victim,,,,,,,just one,,and the source, from
freebanding activity) is akin to blasphemy, but you don't have God in
your life,,it's obvious.]
****
There are victims you don't see or know about when you freeband and blast
the airwaves with illegal power,
your DXing is interfering with local communications when legal cbers are

trying to talk local. plenty of victims but you are one selfish bastard. And your right religon is for week minded individuals, you need something to believe in and pray to

And claiming such freebanding activity is worse
than your close pal's shared and posted pedophilia activity is a
surprise Geogre,
****
Typical distorted facts, and lies by you I dont know dave hall and have never had any form of communication with him.
Go tell another lie Pinochio your nose must be 5' long by now.

>Ohhh shucks we will have to wait several months?

(shrug) Depends what Riley decides to do.
****
>No you said we will see lelands name on the rain report are you back
peddling?

No,,I didn't say that at all,,,I asked you if you wanted to wager
it,,,,,,,,placing words in my mouth won't make it so,
****
Are you really that stupid, if your willing to wager, then what are you
betting on then? That his name will appear on the rain report, therefore
you said it.

_
He may brush it aside.
****
>Why if it is any type of violation why would he?

Priorities, Oh, you appear to be under the impression I meant
"ignore",,,,LOL,,,,,no, I promise you he will not ignore it. May take
some time, but it will be addressed. And that's a twisted promise....how
do you like me now? :)
****

You still suck hind tit.

_
He may just send you a letter,
****
>I will bet you I don't get a leter from riley.

If you are who you say you are, I will hedge you are contacted by the
FCC for supplying an incorrect address.
****
Who have I said I am? I have told you I am not wa3moj, you tell me I am you
call me george, but
wa3moj may be just a made up scree nic like twistedhed.

but I think he was advised, as a federal agency, to check with
another federal agency where your monthly
disability checks go,,,,,chances are the address they are mailed to is
your
real address
****

>LOL too funny first I thought you didnt care about my address? LOL see
above.

You too.
****

Me too what you said you didnt care then you post "chances are the address
they are mailed to is
your real address " LOL you do care LOL quite comical

>2) I am not on disability, you fool i work everday unlike you.

If you are WA3MOJ, you receive disability.
****
Your pretty certain I am him aren't you? Otherwise you wouldn't have gone to
all the trouble to look up info on who you think I am.

>LOL yeah ok

Who's laughing now? LOL...
****
>I am laughing so hard you can't imagine...

>ROFLMAO please stop it is making

>my sides hurt

Nervous laughter.
****
LOL hahahahaha Nervous about what? a NH punch clown who collects jockstrap's

_
Let's see,,I am on the same ISP,,,
****
>So am I dick face

You lost web2news same day Lelnad did. You going to deny it, Geogre?
****
>Yes I have never ever had web2news, I told

>your stupid ass that before. Your to dumb to

>realize

You also lied to the group and told them you didnt have AOL]
****

I dont have aol and never will keep saying that I do if it makes you feel
better

but several have shown you do,,
****

Really how did they show it with thier imagination. Is this the same way I
showed Landshark posting from aol as FRENCHY

you slipped up several times,,
****

LOL I did? show me where

its your main reason
you have such a hard-on for Sharky,,,,
****

Wow you ar clueless sharky got his tit in a wringer when Frank showed he was
a blatant homo posting in Transexual Ng's
but that is ok I dont expect you to know any better.

he was the first to prove you had an aol account,,
****

He didnt prove anything, he was so bent outta shape that he was caught
in those Transexual groups looking for guys he made up the wa3moj @ aol
name
in an attempt to deflect away from himself classic queer move. I wouldnt put
it past him.

his sharp eye caught your screw up and you never did it
again, but your campaign of malice toward him had begun.
****
Proven lie again, he brought up this after he was firmly backed into the
transexual NG's
and wanted in the worst way to get back at me for posting his name etc...
Classic pussy move.

The lies were initiated by yourself, the moment you became nervous. You
alluded to how quiet it has been over the weekend,
****
>Just because you can't understand dontt put

>words in my mouth, I didnt say it was quiet in

>here over the weekend, I said it has been

>quiet in here lately.

Yes,,and it wasn't quiet in HERE at all,,,you made tons of posts, most
of them full of anger and cursing at several, and,Lelnad made a barrage
of angry posts,,,,see,,it's your communication deficit acting up
again,,has nothing to do with understanding you, and even if it did, you
have such a hard time with proper communication technique and effective
debate, it's your fault for not having the know-how to properly convey
what it is you think you're trying to say.

>You assumed what you wanted, I never

>alluded to that thats your brain storm.

No,,,YOU assumed,,,I KNEW you referred to in HERE when you said it was
quiet. It was an outright lie.
****

I won't even debate this with you it is so easy to prove the amount of posts by the regualrs the past few weeks are way down, yes that means it has been quiet in here, now go fuck yourself again.

UPDATE ON TAMPA BAY RADIO PIRATE

We have been contacted by a number of concerned boaters and offered their assistance in identifying a radio pirate operating in the Tampa Bay area known as "Twistedhed". As the following new information has come to light it is even more urgent to locate this individual.

He defies FCC rules (unlicensed radio transmissions are prohibited on 27.555 mhz US Government frequency allocation) and so he cannot be relied upon to follow federal and state laws, namely, the ones governing requirements for USCG licensed charter boat captain.

Drug laws pertaining to vessel operation are very strict, and when found, "Twistedhed" may be subject to drug testing and penalties.

Pinellas, Hillsborough, Manatee, and Pasco counties. All USCG licensed charter boat captains must be certified "Drug Free" by:

- having a physician submit a completed Drug Free form after a SAMHSA approved drug test or

- submitting a letter stating the applicant is currently enrolled in a Coast Guard required random drug testing program.

The following enforcement actions may be taken for noncompliance with the Coast Guard chemical testing regulations:

1. Certificate of Inspection (COI) may be removed or not issued;
2. Civil Penalty may be assessed of up to $5,000.00 per violation, per day;
3. Suspension & Revocation (S&R) proceedings may be initiated against an individuals license, MMD, or COR
4. Captain of the Port (COTP) order may be issued (prohibiting the operation of the vessels involved until compliance is gained);
5. Letter of Warning;
6. CG-835 (deficiency ticket) may be used.

If you are not already on the email list, send a note to twistywillbebustedsoon@yahoo.com

By that logic, since I regularly exceed the legal speed limit on the asphalt slough, my professional licenses should be immediately revoked; if I am such a scofflaw with respect to legally posted speed limits, then it's only logical that I'll embezzle money, and worse.

You really do have a hardon for this guy, don't you.

Truth is my friend,,,Truth is N3CVJ breaks federal law to get his kicks
listening to underaged teenstalk about sex. Truth is Lelnad forging
cbers in hammie rooms.
  Truth is,,,you're insane.

>Plus he uses an illegal radio to talk thier so his
>attempt to lie is once again brought to light.

LOL,,yea,,,my ten-tec is really illegal,,not.

****
>LOL. NOT wrong again on the freeband and

>CB Band your radio is illegal..

But YOU claimed I use it there,,,not I,,,just like all your other
claims,,,,,all lies.
****
> Any radio you use to freeband is illegal,

That wasn't your original claim at all. Need see it again? You claimed
my radio was "illegal"..inferring that all, or even the majority my
radio activity consist of freebanding...not true at all,,not even close.

>your the assclown who mentioned the ten tec,

>what do you use that radio for then?

LOL,assuming status as one who foot stomps and demands that other's
behaviors concern you when the don't is cute.

_
I own many radios. Unlike
yourself, because I mention a single brand, doesn't mean it's all I have
or use, but attempted education of an insane person is useless.

>Real easy question name one radio that is

>legal on the freeband?

>still waiting on this answer.

Never claimed any radio was legal on the freeband,,,,,,,,this is a new
addition to the
thread and was entered by yourself.

But I'm not the one crying about the freeband law,,you are.
****
>Answer the question, name one radio that is

>legal for you to use on freeband?

Again,,,I never made such an inference or claim. Non-Sequitor.

>I don't expect you to cry and trust me

Don't worry. I won't cry, and I certainly won't trust you, as will anyone else on this group. Trust me.

>I am not

>crying either,

Sure are. About another talking about his freebanding activities.

> when you are caught you

>will bre the crybaby.

Caught WHAT, Geogre? Why would I get caught? I do nothing that causes a problem or attacks attention,,but let;s run with that. No, I won't cry,,,,I;'ll pay my fine and move on. I take responsibility for my actions when the need arises, unlike some cowards who must use camoflauge, smoke, mirrors, threats, and anything else their tiny minds will allow.

But let's run with that, Geogre,,,,my Galaxy freeband activity is so much
worse than N3CVj's
****
>Yes you are right it most certainly is, that may

>become a new sig file

Yupp,,it just may,,,,,"WA3MOJ claims
barefoot freebanding on 27 megs worse than pedophilia."
****
>assclown you made the statement ""my

>Galaxy freeband activity is so

>much worse than N3CVj'"

LOL,,,no, I made no such comment, YOU selectively and intentionally snipped my sentence to change the meaning and the context..a Lelnad tactic at best. Go back and reread the post in it's entirety and you will see I said no such thing.

–
admitted fetish listening illegally to cordless phone conversations of underage teeney-bopper girls talking about their sexual experiences to each other...
****

>Off topic

But I didn;t bring it up,,,
****
>Go take your medicine,

Check your communication deficit and the need for condescension due your inner ire, self-loathing, battered self-esteem and destroyed ego, at the door.

> how did this post turn into a Dave Hall thread,
>and you most certainly brought it up You

>spastic asswipe.

N3CVJ brought it up,,HE mentioned it, HE posted how much pleasure he finds in such perversions and acts and in breaking federal communication law. That he is a licensed hammie makes it all the worse,that you seriously are defending such actions is really placing you in an ugly light,,then again, you admittted you are of the belief such acts against children are somehow ok. You really are insane...touched upstairs. Anyone that defends pedophilia such as you have done has serious deep-rooted problems.
****
>You have problems assclown,

I'm not the one making homosexual laden comments every other line,,,you are, Geogre, Any educated mind will see the problem is with yourself.

>do stay on

>topic, I will not have you change the topic of

>this thread and instigate and

>distort what you have said.

You have no choice or say what I do,,,this is one of your dilemmas,,,,pathetic, isn't it? LOL! Hall posted it,I merely used it as an example to illustrate how you have no interest or care about what you thinly disguise as concern for alleged radio "victims" or for radio operators vioating the law. Your interest is me,,,mememememmeememmememememmemememe! LOL! Couple this with your repeated homosexual comments, ad hominems and referalls, in addition to you claiming freebanding is a more pressing concern to yourself than behavior construed by many moral, responsible adults as pedphilia, and again,,it is of "no surprise" as one of your fans so adeptly put it.

_
and your continued attempted persecution of another for freebanding on a galaxy radio while defending and condoning acts that reek of pedophilia is what we are beginning to expect from yourself,
****
>Who have I condoned and defended?

First,,,Lelnad,,you claimed you knew for certain it wasn't him, then
Hall with your defense of his amp usage,,,you forget quickly.
****
>Provide Proof of this claim, I asked you to

>yesterday and you still havent, you lying again
>,as usual.

Nope...YOU provide proof to YOUR claim of "interference to emergency
ops" and "victims",,as I already gave you one proof you asked
for,,,,,your tunr, geogre.

_
 and you
pulled a Bush-like move and attempted a flip-flop and said you now
"don't know" if it was him,
****
>Provide proof of your accusations that I said I

>know it is not Leland.

See above.

Geogre, Go on,,tell me how bad my acts are in comparison to this lid,,
****
>Yours are Illegal by FCC Rules

So is N3CVj's.
****
>Provide statutes by the FCC

LOL,,,you are claiming your call is WA3MOJ yet you are looking to a cber
for education that the FCC prohibits the intentional monitoring of
private phone calls? LOL..OH Geogre,,how low is that self-esteem,,,,are
you callously ignorant or helplessly ignorant concerning this issue?

_
Not at all,,you indeed claimed he was NOT involved then you flip-flopped
when it was pointed out you most definitely slipped by admitting you
KNEW. Tut-tut, Geogre,,,your slip is showing..LOL.
****
>Provide proof of me ever saying or

Certainly,AFTER you provide your proof....

>insisnuating this your lying again.

You DO ahve proof Geogre, such as a site, URL and credible American news
source, do you not....YES.....or no? <g>

>what is the observer part you speak of? leland
>is an OO?

What is it? I dunno...ask him,,,,,he's the one playing radio-Kop and
representing himself as the ARRL guy in rec.radio.cb to attack cbers
that clean his clock on a regular and semi- enjoyable basis.

****
>Provide positive proof that leland is

>representing the ARRL

Certainly,,,but there is that tiny little matter you must attend to yourself,,,sting proof prior to asking another for it,,,,LOL!

_
SO are N3CVJ's,,you aren't getting out of it, Geogre, ,,,,,,,that you selectively target me to cry about freebadning when there are sexual deviants among your rank and file that admit not only breaking federal law, but laws regarding minors,,,,,
****
>What does dave Hall have to do with your lies

>regarding leland and myself?

There were no lies concerning Leland and yourself. Again, you don't think about what you post prior to posting,,,Frank said it was you,,and now,,,YOU claimed they were LIES against Lelnad AND yourself. The ONLY manner in which YOU can positively say this with absolute truth and certainty, is if YOU are involved and know exactly where the misery originates,,,,,,LOL,,Either way,, you're filthy dirty involved, Geogre. Get over your baaaad self..LOL!
Concerning Hall'spost,, it illustrates niceley that your agenda is not one of concern for radio operators breaking rules, nor for "victims" as you lie about,,,,,,your agenda is the same as Lelnads,,and N8s. Live with it. Deal with it. Accept it. Then again, perhaps you HAVE accepted it,,,,,,it's why you are full of self-loathing.

>Nothing your a troll and a Bad one at that.

>No one has selectivly targeted you you are an

>admitted FCC rule breaker and confirmed Liar .

Not true,,,when YOU claim that Hall's acts of perversion and of breaking federal law are less damaging than my barefoot freebanding on 27 MHZ, and you utilize MY admition of talking skip as a means to harass me, but ignore N3CVJ's sicko behavior AND federal law breaking, you most certainly are practicing selective targeting, as again , it illustrates your hypocrisy and lies that you are somehow concerned with radio violators and alleged "victims".

>You also have used an amplifier,

Yes,,,OH MY!! LOL!
****
>Yes oh my another lie on your part then, you

>said your only guilty of a little barefoot

>freebanding

No,,I never said of " a liitle barefoot freebanding",,this is more iled obfuscation attempts on your sorry insane, behalf. I do "alot" of barefoot skip, not a little, and I invoke the same reasoning and defense Hall did,,that my amp usage was in the past,,,,and it was ONLY 100 (read ONE HUNDRED) watts, as several credible sources on this group can attest.

>another lie your caught in.

Not at all, You set forward something I never said. Semantic games you are playing.

_
 So has N3CVJ in addition to his deviant behavior,,,,but you are ok with such whackos and their sexual sicknesses, so go ahead and let him around the children in your family.
****
>I wont comment any further at all on dave hall

>since you have continualy tried to change the

>topic

LOL,,and WHAT is your topic, Geogre,,,illegal radio operators? Law breakers,,,,,or me? LOL!
No need to comment any further, Your opinion is forever etched in stone concerning his behavior.

> and avoided any question posed to you to

>provide proof of your lies.

Oh no,,I provied proof for Lelnad's denial lie and claim that he never had Bignet. Did you see that Geogre? Did you see your bud's lie? Does that not constitute a lie to you, Geogre? LOL. I also provided prrof that YOU asked me for with "Show me one SINGLE post I directed toward you over the weekend", which you tried to change your claim AFTER the fact, as you are indeed a slimey one. No, Geogre,,the proof providing is now your turn. Still waiting,,,,do you have a proof of thes einterference to emergency ops as you claim and these victimes? URL and credible media source.......YES,,,,,,or no......LOL!

_
Exactly,,,but mentioning God while harassing cbers for a true victimless crime (cite a single victim,,,,,,,just one,,and the source, from freebanding activity) is akin to blasphemy, but you don't have God in your life,,it's obvious.]
****
>There are victims you don't see or know about

LOL,,then HOW do you know they exist? Hahaha!

>when you freeband and blast the airwaves

>with illegal power,

I don't blast the airwaves with illegal power, Geogre, but you need to use my past admittance of using an amplifier as your "proof" that i do it now, despite over 4 years of my posts prasing the virtue of barefoot LP DX. You;re a loser, Geogre,,a total loser. Keep reaching and crying with your insanity.

_
>your DXing is interfering with local

>communications when legal cbers are trying to
>talk local.

Those that suffer from no communication deficits do not attempt to talk local when skip is running. This shows how little you know of HF and propagation. See Geogre,,,when the DX is running on 27 MHZ, the man across the country is going to be louder to my locals than myself. You ought be embarassed about your lack of knowledge while holding such a call,,,,,wait a sec..YOU ARE! LMAO!

>plenty of victims but you are one selfish

>bastard.

No, I'm one magnificent bastard.
And don't you ever forget it,,,,,ah,,i need not worry,,,you won't,,,you CAN'T! LOL!

>And your right religon is for week minded

>individuals,

Another claim I never made.
Religion is for God fearing folks, Each post you make sheds more and more light on your inner sanctum of personal hell we call your soul.

> you need something to believe in and pray to

I believe I'll watch you carry on about happenings in my life in which your impotence shines brilliantly, and of which you obsess and dwell.

_
And claiming such freebanding activity is worse than your close pal's shared and posted pedophilia activity is a surprise Geogre,
****
>Typical distorted facts,

What was distorted Geogre?
YOU snipped my posts to claim that my activity was worse,,,,and you concurred. yo;re insanse.

>and lies by you I dont know dave hall and

>have never had any form of communication

>with him.

Then why the quick jump to proect his amp usage in the Davemade discussion? Huh? Why? Huh? Tell us,,,LOL!

>Go tell another lie Pinochio your nose must be
>5' long by now.

That's the list of new email friends you have made me in just the last week. Appears your cross posts are telling you what I have been telling you all along,,,,my pulse is more in common with the public than yours, or your lid pals of Lelnad, Hall, and N8, will ever be....none of you see yourself as the rest of the world does,,,it's your collective massive deficits in communicaton, and why you get along so well, and why Voobsie named you exact lids as lids that this group will have to "contend with". You're angry, have low-self-esteems, and your egos are so heavily involved that you are in way too deep now and have no recourse but to attack the snake that bit you when you picked it up from it's peaceful resting place under the rock and proceeeded to squeeze it, despite several rattles of it's tail..

>already admitted his guilt to the world.

LOL,,,courts have already been down that road a million times, Educate
yourself, slick, You;re totally clueless. There is no way they can prove
who made what posts from a home, let alone one's place of business..oh
Gee,,,wait a sec,,,you mean you didn't know that webtv is portable one
could take WEBTV on vacation with them and to a bar, party, friend's
house etc? Anyways,,in several libel cases, minus copyright
infraction-involved cases, cases have ALWAYS been thrown out when
"reasonable doubt" exists as to who made the posts,,guess what the
courst have found creates reasonable doubt? More than one person at the
address at the same time....,LOL,,yup,,you;re imbecility makes you
clueless, but you're all mine.

>As a experienced directional finding

>experimenter and signal searcher. You give

>NO info on looking for this person.

He could try asking. We can meet on channel 6 AM or a SSB channel. He's looking for someone that is out in the open,..heheh!

>You give no info on the malicious

>transmissions.

There are no mailicious transmissions and never were.

>If you are hell bent on finding the orgination of

>the signals then you need to give the 411 on

>how a first timer woud look for the signals.

It would be much easier just to ask my 10-20, 10-4? Then again, he wouldn't be in such an embarassing predicament if he wasn't 10-100'ing on himself daily. There are a total of 3 places I can be any given weekend, depending on the time of year: in the Bay, in the Gulf, or up the rivers. canals, and intercoastal waterways. Hey, just ask,,,I'll tell ya',,,unless the fish are smoking hot..but then again you won't hear me on the radio at these times. A boatload (hyuk) of us have our own freqs to stay in touch, ahead of the tourists and party cruise boats, out of reach from the drunken masses. Local tournaments are in full swing and we have averaged flotillas of up to 50 to 75 crafts in large, sporadic circles and semi-circles....there is always a tournament on the weekends SOMEWHERE in the bay area,,,,to suppose that an unidentified, unfamiliar craft can merrily cruise into such activity and broach what registered participants consider hallowed ground is wishful, blissful ignorance at its finest, but then again, you pointed that out in your own manner. 3s.

From: twistywillbebustedsoon@yahoo.com (NAL TWISTEDHED)
UPDATE ON TAMPA BAY RADIO PIRATE
>We have been contacted by a number of

>concerned boaters and offered their

>assistance in identifying a radio pirate

>operating in the Tampa Bay area known as

>"Twistedhed".

LOL,,sure you have. All the support on your crossposts prove it. What's hilarious, is you have no clue what bond boaters, especially fisherman, let alone Captains share among each other. And you never will! Just another in a long line of things you are clueless about..

>As the following new information has come to

>light it is even more urgent to locate this

>individual.

Correct. You have lost 12 yahoo groups because of HIM, not because of your refusal and defiant action to obey internet laws and regs and rules.

>He defies FCC rules (unlicensed radio

>transmissions are prohibited on 27.555 mhz

>US Government frequency allocation)

Nope,,,,,55 is not a government freq anymore,,,it's why you no longer are permitted to post your call,,your ignorance as a hammie preceded your reputation, so you are reduced to cleaning up after our,,,er,,,,horses,,LOL!

>and so he cannot be relied upon to follow

>federal and state laws, namely, the ones

>governing requirements for USCG licensed

>charter boat captain.

Hoo Boy! Then your refusal to follow yahoo terms and services, and 12 pulled groups and pages in less than a week, constitute that you are a less than savory character and your word is not to be trusted nor respected.

>Drug laws pertaining to vessel operation are

>very strict,

Yes, they are. So are alcohol laws.

>and when found, "Twistedhed" may

>be subject to drug testing and penalties.

No problem. Ring my ntag through google along with the term "alcohol" or "drugs" and you will find years upon years of posts by myslef singing the praises of alcohol and a drug free life. It's why I look so damn good and young, am healthy as a horse, and can out run, Free-dive or swim 99 percent of people my age AND many much younger. I am NOT a gambling man,,but THIS, is a wager I will accept from anyone. Kids wanted me to do the Bay-to-Bay race (a swim form one side of the bay to the next) again this year with them....hint: look at past years contestants.....each year I have competed, I have not only finished, but PLACED.

>Pinellas, Hillsborough, Manatee, and Pasco

>counties. All USCG licensed charter boat

>captains must be certified "Drug Free" by:

>- having a physician submit a completed Drug

>Free form after a SAMHSA approved drug test
>or

>- submitting a letter stating the applicant is

>currently enrolled in a Coast Guard required

>random drug testing program.

You do have a point, other than attempting to imply that illegal narcotics are a part of my life and the one on top your head?

>The following enforcement actions may be

>taken for noncompliance with the Coast Guard
>chemical testing regulations:

Wait a second, slick, if one doesn't comply , one doesn't get the license. You're clueless again.

>1. Certificate of Inspection (COI) may be

>removed or not issued;

>2. Civil Penalty may be assessed of up to

>$5,000.00 per violation, per

>day;

>3. Suspension & Revocation (S&R)

>proceedings may be initiated against an

>individuals license, MMD, or COR

>4. Captain of the Port (COTP) order may be
>issued (prohibiting the operation of the vessels
>involved until compliance is gained);

>5. Letter of Warning;

>6. CG-835 (deficiency ticket) may be used.

Just like cb, you cite what could happen if someone were to violate the laws. Big deal. You;re impotent. Is that what has you menstruating all over usenet about me? LOL!

>If you are not already on the email list, send a

>note to twistywillbebustedsoon@yahoo.com

Can I join? Or are you a communist group that censors those who illustrate your ineptness daily?

2620. TAMPA BAY RADIO PIRATE SEARCH- 8/23-8/24- FINAL INSTRUCTIONS

Newsgroup: rec.radio.cb
Date: 2003-08-21 01:21:41 UTC
From: maketwistypay@yahoo.com
Message-ID: <12f0139b.0308201721.121499c6@posting.google.com>

TAMPA BAY RADIO PIRATE SEARCH- 8/23-8/24- FINAL INSTRUCTIONS

This is in regard to the search to gather evidence
against a "problem" pirate radio operator in the
Tampa Bay area. Such "radio pirates" often
interfere with health and safety communications
and emergency transmissions.

This is a community effort and we welcome the help
of those equipped with a vessel capable of GPS and
LORAN navigation and able to receive radio transmissions
at 27.555 mhz or above. The individual in question has
made it his business to defy federal (FCC) law and operate
on government assigned frequencies without authorization
and in direct violation of federal mandates.

-His name is unknown, but he goes by the handle of "Twistedhed".

-He is white male, 5'10", receding hairline, wears a captains cap.

-There is evidence he is a licensed captain operating Sat. and Sun.
fishing charters from a Tampa Bay public launch.

-He is an illegal radio bootlegger operating on unauthorized
goverment allocated frequencies at or above 27.555 mhz.

-Not only has he refused to cease operation, he has posted taunting
Usenet messages that defy the FCC to catch him.

-He is known to operate in the Bay, in the Gulf, or up the rivers,
canals, and intercoastal waterways.

-He is known to frequent fishing tournaments and hide
his vessel in flotillas of up to 50 to 75 craft.

****

NOTE TO TAMPA BAY RESIDENTS

You may have been, or know someone who has been on a
charter with a captain that answers this description. You may
have been on a charter and overheard someone referring to
"Twistedhed". Or you may have information about someone
who has bragged about illegal radio operation in Tampa Bay.
Or you may be a local charter boat skipper who knows
"Twistedhed" and would prefer one less competitor to
contend with.

If you have any information we ask that you respond to:

tampabayradiosafety@yahoo.com

All responses will be kept STRICTLY CONFIDENTIAL.

****
WARNING

Be advised this is NOT stalking or harassment, simply a legal effort to gain evidence and merely OBSERVE a crime being committed. These are PUBLIC waterways and ALL boaters are permitted to be there. We urge you NOT to confront Twistedhed. Leave that to the FCC and the courts. You are just there to gather evidence.

****

THIS WEEKEND

This Saturday, August 23, beginning at 7AM EST, at least one volunteer boat will be cruising the Tampa Bay area. A number of shore-based monitors equipped with scanners will also participate. We ask that you LISTEN and take VIDEO or PHOTOS and also record "Twistedhed's" radio transmissions. This evidence will be forwarded to the FCC (Federal Communications Commission) in Washington, DC.

All further instructions and volunteer information will be issued from this mailing list until further notice:

tampabayradiosafety@yahoo.com

2621. Re: best emergency handheld CB

Newsgroup: rec.radio.cb
Date: 2003-08-21 01:31:07 UTC
From: Jim Hampton <aa2qa@frontiernet.net>
Message-ID: <uhV0b.102129$Yo2.51491@news02.roc.ny>
Source record: 164155

Handheld 27 MHz cb transceivers have two problems:
1) horribly inefficient antennas (very small compared to a quarter wave whip which would be around 9 feet long)
2) even less efficient grounds (simply the capacitance between the handheld and your hand. You act as the ground. Exceedingly inefficient. Range would likely be no more than FRS and very likely less.
There is a possible 3rd problem. If BPL becomes a reality, expect your range to be maybe 500 feet at most. I'm not kidding.

For license free, MURS would offer a detachable antenna and you would likely have a 5 mile range to another handheld.

For real range, I don't see a real alternative to getting an amateur license. The repeaters make up for the lack of height of your antenna. I've taken my handheld to work here in Rochester, NY, and chatted during lunch with hams in Toronto via a repeater. That is quite a few miles (check a map). My reliable range is 30 miles to a repeater; from there I can expect another 20 miles or so to another handheld and up to 60 additional miles to a mobile. I have, when up on a high-rise locally, used repeaters directly in Buffalo (60 miles) and opened a repeater in Pennsylvania (probably over 100 miles away). Most repeaters have backup and will not fail during a blackout. We have repeaters that are not even connected to the mains (solar and wind powered). Although a test and license are required, you can't touch that kind of distance nor reliability any other way.

73 from Rochester, NY

Can you operate a GMRS radio without FCC license? A friend of mine is doing it and I was surprised to know it. I always thought to send/receive signals on GMRS frequencies requires some kind of unique code being passed around.

"Twistedhed" <twistedhed@webtv.net> wrote in message
news:3323-3F440DA3-15@storefull-2316.public.lawson.webtv.net...

That wasn't your original claim at all. Need see it again?
****
Not at all I know what was said, you may need to reread it and not imply
something
that wasn't said. My claim is that you use an ilegal radio to talk on the
freeband, you brought up the ten tec which is illegal in any fashion on CB
so keep digging yourself a deeper Hole.

Here is my original quote:
"Plus he uses an illegal radio to talk thier so his attempt to lie is once
again brought to light.

You claimed
my radio was "illegal"..inferring that all, or even the majority my
radio activity consist of freebanding...not true at all,,not even close.
****
Yes your radio is illegal, and my inference was you use an illegal radio to
talk on the (thier)freeband

Here is my original quote:
"Plus he uses an illegal radio to talk thier so his attempt to lie is once
again brought to light

>your the assclown who mentioned the ten tec,

>what do you use that radio for then?

LOL,assuming status as one who foot stomps and demands that other's
behaviors concern you when the don't is cute.
****

As expected, no answer it is used for freebanding isn't it

_
I own many radios. Unlike
yourself, because I mention a single brand, doesn't mean it's all I have
or use, but attempted education of an insane person is useless.
****

You named TenTec, you cannot use that at all on CB band or Freeband
You freeband name a legal freeband radio? So it doesnt matter how you spin
it you use an illegal radio to freeband,
I don't have to mention any brand name you did it for me. So what do you use
the tentec for CB or Freeband?

>Real easy question name one radio that is

>legal on the freeband?

>still waiting on this answer.

Never claimed any radio was legal on the freeband,,,,,,,,this is a new
addition to the thread and was entered by yourself.
**********]

Read your bullshit below then your getting yourself all twisted up

"You claimed
my radio was "illegal"..inferring that all, or even the majority my
radio activity consist of freebanding...not true at all,,not even close."

"I own many radios. Unlike
yourself, because I mention a single brand, doesn't mean it's all I have
or use, but attempted education of an insane person is useless. "

>>>But I'm not the one crying about the freeband law,,you are.
>**********
>>Answer the question, name one radio that is legal for you to use on
freeband?

>Again,,,I never made such an inference or claim. Non-Sequitor.
****

Then you answer your own question fruit loop,

"You claimed my radio was "illegal"..inferring that all, or even the
majority my
radio activity consist of freebanding...not true at all,,not even close.
==========

But let's run with that, Geogre,,,,my Galaxy freeband activity is so
much
worse than N3CVj's
****
>Yes you are right it most certainly is, that may

>become a new sig file

Yupp,,it just may,,,,,"WA3MOJ claims
barefoot freebanding on 27 megs worse than pedophilia."
****
>assclown you made the statement ""my

>Galaxy freeband activity is so

>much worse than N3CVj'"

LOL,,,no, I made no such comment,
****

You sure did you stone liar, That is word for word from your post, you lieing sack of shit.

YOU selectively and intentionally
snipped my sentence to change the meaning and the context..a Lelnad tactic at best. Go back and reread the post in it's entirety and you will see I said no such thing.
****
I did no such thing those words were verbatium from your post. The only person who does that is you I have never seen anyone purposly take peoples word out of context more than you

I'm not the one making homosexual laden comments every other line,,,you are, Geogre, Any educated mind will see the problem is with yourself.
****

Your an assclown, it is not a homosexual reference if you didnt hang out with Landshark you would think
like every normal person would. So if you feel a little homophobic look at the company you keep it doesnt suprise me in the least.

Nope...YOU provide proof to YOUR claim of "interference to emergency ops" and "victims",,as I already gave you one proof you asked for,,,,,your tunr, geogre.
****
ASSCLOWN, you gave proof of nothing as usual here come the twisty song and dance when pressed for proof.

Geogre, Go on,,tell me how bad my acts are in comparison to this lid,,
****
>Yours are Illegal by FCC Rules

So is N3CVj's.
****
>Provide statutes by the FCC

LOL,,,you are claiming your call is WA3MOJ
****
I never claimed any such thing, you seem to have all the info on me right I am disabled right damn someone must really bother you to search out that info in fact Ill bet it was queershark.

_
Not at all,,you indeed claimed he was NOT involved then you flip-flopped when it was pointed out you most definitely slipped by admitting you KNEW. Tut-tut, Geogre,,,your slip is showing..LOL.
****
>Provide proof of me ever saying or

Certainly,AFTER you provide your proof....

>insisnuating this your lying again.

You DO ahve proof Geogre, such as a site, URL and credible American news source, do you not....YES.....or no? <g>

****

Yawn, the Twisty shuffle has begun ... Provide proof ... watch him dance

_
SO are N3CVJ's,,you aren't getting out of it, Geogre, ,,,,,,,that you
selectively target me to cry about freebadning when there are sexual
deviants among your rank and file that admit not only breaking federal
law, but laws regarding minors,,,,,
****
>What does dave Hall have to do with your lies

>regarding leland and myself?

There were no lies concerning Leland and yourself. Again, you don't
think about what you post prior to posting,,,Frank said it was you,,
****
There sure are lies you lieing that I was involved. Frank said it was me
what if frank said it was you would he be right? Since when do you believe
frank
Landshark said it was me you said it was me., where is any proof from any of
you? Remember these words"

"Just because you say it doesn't make it so"

and
now,,,YOU claimed they were LIES against Lelnad AND yourself.
****

the only lies are the ones you spew.

The ONLY manner in which YOU can positively say this with absolute truth
and
certainty, is
****
If I know I wasn't involved I would know for sure who wasn't involved.
ME, you
Dickface

if YOU are involved
****
Yeah and "If" the queen had balls she would be king. Thats all you have
twisteddick,
If this , if that I think this I think that, you don't know Jack shit about
anything let alone anything that concerns me.
Now Fuck Off and Die

and know exactly where the misery originates,,,,,,
****
Dickface I know where it didnt originate you stupid fuckhead.

>Nothing your a troll and a Bad one at that.

>No one has selectivly targeted you you are an

>admitted FCC rule breaker and confirmed Liar .

Not true,,,

True face it assmunch

when YOU claim that Hall's acts of perversion and of breaking
federal law are less damaging than my barefoot freebanding on 27 MHZ,
****
you admitted it I never said anything wanna see your words again?

>You also have used an amplifier,

Yes,,,OH MY!! LOL!
****
>Yes oh my another lie on your part then, you

>said your only guilty of a little barefoot

>freebanding

>another lie your caught in.

Not at all, You set forward something I never said. Semantic games you
are playing.
****

yes you know them well

> and avoided any question posed to you to

>provide proof of your lies.

Oh no,,I provied proof for Lelnad's denial lie and claim that he never
had Bignet. Did you see that Geogre? Did you see your bud's lie?
****

Sorry leland is not my bud I dont know him nor have I ever talked or emailed
with him. another lie on your part

Does
that not constitute a lie to you, Geogre? LOL. I also provided prrof
that YOU asked me for with "Show me one SINGLE post I directed toward
you over the weekend",
****
Yes, you are caught lieing again, you didnt provide proof of anything
snapperhead,
If the post your trying to say I made was directed towards you it would have
said . "what did you say Twistedhed?
Not "What did that asshole say" , problem with semantics again?
What about all these other posts I supposedly made to you Over the weekend,
where are they, your gonna try and claim some type of victory
for that one post I made friday, where you had claimed I possted all
weekend about you. You have got tot be kidding me right?

LOL,,then HOW do you know they exist? Hahaha!
****
Prove they don't

>when you freeband and blast the airwaves

>with illegal power,

I don't blast the airwaves with illegal power, Geogre, but you need to
use my past admittance of using an amplifier as your "proof" that i do
it now,
****
your words not mine I thought you lived up to your guilt and were
responsible? guess not

>your DXing is interfering with local

>communications when legal cbers are trying to
>talk local.

Those that suffer from no communication deficits do not attempt to talk
local when skip is running. This shows how little you know of HF and
propagation. See Geogre,,,when the DX is running on 27 MHZ, the man
across the country is going to be louder to my locals than myself.
****
No shit sherlock what do you think I said, you are ruining local comms by
DXing. If you werent shooting skip, with 100 watts or whatever you use
there would be locals talking to each other. You wuldnt be as loud as them.
Go wash off again you stink

Then why the quick jump to proect his amp usage in the Davemade
discussion? Huh? Why? Huh? Tell us,,,LOL!
****

>Go tell another lie Pinochio your nose must be
>5' long by now.

That's the list of new email friends you have made me in just the last
week. Appears your cross posts are telling you what I have been telling
you all along,,,,
****
Another lie on your part you wont stop the lies will you, I havent cross
posted anything Pinochio
Provide Proof ... Ohh wait if forgot you have none.

It means that $45.00 will cover the repair and most parts like
transistors, diodes, resistors, most IC's. The return shipping is
based on the size of the radio whether its a base or mobile.

These repairs are mainly intended for the more pricy export radios
like Galaxy, Connex, Cobra etc... AM/FM/SSB or similar.
Most of the cheaper radios that are AM only arent really worth
spending that much on like a Cobra 19 DX II.

Not that I operate on this frequency, But who actually operates a
radio there nowadays? Most public services or whatever you call them i
hear on UHF/VHF frequencies. So may I ask, what is the real purpose in
finding this guy? Is it an ego trip? Or is the frequency actually in
use there? Please fill me in!

I suggest looking for an HR-2600 or HR-2510 by President. Some have
hard mods allready done to them and some use a chipswitch. Both mods
have pros and cons, but the chipswitch is the best and most reliable.
If you find one stock, look for the chipswitch at www.chipswitch.com
if it is still a live link. Or you can do the hard mods and find alot
of info by doing a search on Google

You may also may find one on eBay or Yahoo! auctions.

Except that he misrepresented a couple of things.. the first and most
glaring error is in his stating that there's a code requirement for a
Tech class license. There is no such requirement.

Personally, I hope they never do away with the code requirement, but
that's personal opinion.

Where exactly in Michigan? It's a large state, looking at it from a 2M perspective....

Oh, by the way, I just found out that in the 1830's, a war.. that's right.. a war was fought between Ohio and Michigan over possession of Toledo.

Michigan won.

One thing's for sure, Twirted will be so busy looking over his shoulder
this weekend he won't have time for reading any posts.

>>
>>Have a hard on for "Twisty"... huh.
>
>Have a hard on for "George"... huh.

Again, try looking at the posts on this group.
He is doing nothing but attacking Twist... that seems to be ALL he is here
for.

Now look at how little time I waste on George.
I suppose that you will never see anything wrong with your boyfriends, no
matter how stupid they look... you will always love and defend them.

>If you don't like the people of this group,

Oh, but I do... I just find the few trolls quite amusing at times.
Let's face it, they are in the minority, just a very noisy minority.

>Oh, and keep your prime minister to yourself

I have no control over where he goes, and who's arse he is up.
I think that you will find that he is more popular over there than he is
here, and the things are not looking good with the "sexing up" enquiry.

> we have enough homocidal politians in this country.

That is why Blair seems to fit in better over there. When he gets kicked out, you can have him.

Brainbuster.

isnt 11metres allocated to Citiezen band radio service in US? it in
Australia and because its called citiezen band anyone can use it without
fear of prosecution...

good luck with the hunt.....

Um, this is one of those things where the "hunter" could become the hunted. My understanding of "pirates", is that they sometimes make the loser "walk the plank". So, think about it, is it worth the risk?

WA3MOJ wroted:
>Is this your proof of me posting about you all

>weekend ... YES or NO

_
No. It's my response to your cry and plead of "Show me ONE post I
directed at you over the weekend."

>2 points you need to understand,

That's it? Just two? What about the entire lessons in life you have yet
to learn, like the Golden Rule? You're a hypcritical lying lid,,you
attack good folks DAILY, Geogre,,,,DAILY,,and when you get it back, you
cry like a little girl...you can dish it, but you sure can't take it.

>that post was not directed towards you

You called me an asshole for reasons only known to your insanity. It was
the weekend. You, as usual, drew first blood for no reason other than
your Tourettes was acting up again and you needed a target.

>it was a question to the group asking what you

It was an unprovoked insult not even thinly disgusied as an insult.
No,,you could have asked a question with out being rude, condescending,
and cursing.

>said. Nothing more

But it WAS more,,,you could have asked a question without your ad
hominem remarks (well, perhaps YOU can't) but you failed.

>nothing

>less

>spin it anyway you like strapper and besides

>when is friday nite all weekend

You are blending separate posts. In one post I asked what you refer to
all the posts direceted toward myself ALL weekend, since you don't
consider them troll posts..In another, I said you made posts OVER the
weekend about me and you asked me to cite JUST ONE SINGLE post yo made
having to do with "Anything about you (ME)". I did just that where you
called me an asshole. Hey, I have no problem with your name calling,

it's necessary for your ego and self-esteem, condescension toward others is the only way you know,,,you were never taught any better. It's the only thing that brings you serenity. Yea,,I don't mind a jerk-off like yourself, I don't mind lids like yourself,,,but I hate liars.,,they're the lowest form of scum and as you feel it falls to yourself to take up the cause of illegal cb, I feel it falls to me to point out you lying lids on usenet in rec.radio.cb, and I will continue to do so,,and you know what? There ain't a damn thing you or yellow "Nad (Bignet liar, forge liar, liar liar) can do about it, except continue to lose yahoo after yahoo after yahoo account. Quite pleasurable that the one who is worried about MY obeying of the rules can't obey the rules for a mere 12 hours straight.,,,quite the hypocrite, eh Geogre?
Wonder what AOL would say if they were to see their darling has 12 cancelled yahoo accounts for TOS violations in the last 6 days..LOL! Hey Geogre,,,,,why did you snip the post where you give your call? I need to post it again in it's entirety for all to enjoy your lies as much as I do. Stay close.

What's your call? Lead by example.
wa3moj.... who is next? perhaps you could get dickie boy cranium to give
us his next.

_
Gee,,KC8LDO Lelnad denies all involvment, then lies to the world about
his bignet account. YOU deny all involvment then lie about your call
sign. Once a liar always a liar. You're both a couple of lying lids out
here starting trouble,,it's why 12 yahoo accounts violating TOS were
puled in less than a week. You guys are nothing but trouble.

well you wouldn't believe it if i told you but here goes......this guy has been on rec.radio.cb for about three or more years doing this stuff, which makes you think he obvioulsy doesn't have much else to do .....he is a ham radio operator hanging around on a cb newsgroup whining about illegal radio usage.....this guy twist, uses a wide band radio and gets up in areas that are supposedly illegal..........the rub is , he gets on his boat and talks skip on it, while doing his fishing guide thing....since you can get out pretty good on water, due to the ground wave effect of water.......he talks on his radio and the radio is low power and hardly bothers anyone.......this guy , georgre, whines about it and can't seem to one up twist on here, so he starts this crap......i mean for all the fcc probably has to do, this guy is on some kind of one man crusade to bother old twist....so that is about it.........i am sorry you guys on the boat thing have been bothered by this twit but don't worry about him...we all know who he is and what he is and that in and of itself speaks volumes.......hope this helps...........

"The United States Supreme Court has held repeatedly that there is no
constitutional right to use radio facilities without a license. See Red
Lion Broadcasting Co. v. FCC, 395 U.S. 367, 388 (1969); and National
Broadcasting Co. v. United States, 319 U.S. 190, 227 (1943)."
_
Gee Lelnad,,,you just gonna slither away, no acknowledgement at all?
See, you'd be better off admitting your personal problems and moving
on,,see, the world can forgive mistakes, even jerk-off intentional moves
like you pull, but one thing the public can't stand is a liar, one who
not only doesn't admit their faults, CAN'T admit them, but lies about
them when confronted. A perfect illustration of someone who can't and
won't accept responsibility and personal accountability. That's just
what we have come to expect from you, slick. You owe the group a huge
apology for attempting to perpetuate such malice and lies here for your
personal agenda. Perhaps you should just leave the group permanently,
all you do is cause strife and you have no friends here, even Geogre
said you weren't his friend..,,imagine how your self-esteem must feel
NOW!
On a lighter note, I heard that greatest hits thing is in the works and
word is, it's gonna be the MOAB! Since it's such high quality stuff,
it's gonna take awhile longer, but rest assured, it's gonna be the talk
of the hammie world from what the buzz is,,,,,DJ's in all the right
places are poised and waiting to get a copy!! LOL!

Yup, hes wrong, you do need one. But with the proliferation of these radios
at hardware stores, walmarts, ect I doubt very many people actually get the
$75
license. I'm betting this requirement will go away someday.

If youre looking for 28.5 covrage, you must have youre ticket,
so how about an IC-706MKIIG? You can cover allthe CB bands with
that one.

yeh twistie, when you see georgre.......be sure and pull along side
his john boat with you dhow and give him a freeking broadside with
your 5 inch starboard deck gun.......and naturally load up on the
grapeshot for the prick.......

hey twist i think lelnadski ought to worry about his overpriced, book
learning at that ghetto college instead of hanging around here
starting shit......oh and another thing.......is this the same guy
that used to complain about women all the time when he first got on
here......now fast forward to him chasing 20 year old skirt at his
hood college.....ain't that a kick in the pants.????

no that isn't gilligan......gilligan is frankenstein.......he lives in
washington state.........no this is georgre , our resident pa pussy
and number 1 reason why we hate hamsters.............i think however
an interesting question would be if twist , upon hearing of a distress
call from georgre, taking on water in his john boat.........now
then,.....would twistie respond or ignore said call...hmmm????

he is on a mission from riley hollingsworth , to catch this wascally
twist talking skip on his ship radio.....and perhaps you are right,
he is such a underhanded conniving twit, he might do a damn good job
being a shoe shine boy and gopher for those true blue patriots in the
homeland security department.....

2680. Re: WA3MOJ CLAIMS "NEVER SAID I WAS WA3MOJ"

Source record: 164214

Easy solution to this problem.. If you think he's not WA3MOJ, write
the real WA3MOJ a snail-mail letter. If you get one back from him
denying any involvement with this newsgroup, then you have a 50/50
chance of knowing it's not him. If you get nothing back, you have a
50/50 chance of knowing it's not him.. That's 25% more than you knew
before.

Of course, if you send some newsgroup article printouts along with it,
and send two copies, one to WA3MOJ and one to Riley, then something
might get done about the situation.

Just a thought.

I guess it is also OK with him that anyone who crosses swords with
Twirted in the newsgroup "mysteriously" gets his amateur callsign
used on "freeband" and a wrong-address complaint lodged
with the FCC.

While you're at it, send Riley copies of posts where Twirted
hints at harassing amateurs by using their callsigns on "freeband"
and filing wrong-address "nuisance" complaints with the FCC.

2694. UHF CB Radios: Are they still alive in NZ?

Newsgroup: rec.radio.cb
Date: 2003-08-21 23:50:35 UTC
From: Fred <fredshere@fredsplace.net>
Message-ID: <r_c1b.13054$9f7.1532486@news02.tsnz.net>
Source record: 164230
Cross-posted to: nz.general,rec.radio.cb

I am interested in buying a portable UHF CB radio, which operates between the 476.425 and 477.400 MHz frequency range. I have had a listen to these frequencies on my Yaesu Communications Receiver and I haven't yet heard anyone using them. Is CB radio fairly dead in NZ these days? Apparently the 26 MHz sets are being phased out, but you used to be able to find dozens of people to talk to on the 26.330 to 26.570 MHz range a few years ago. I do quite a bit of tramping about the hills and I thought a CB set might give a bit of added security, but there don't seem to be many repeaters available yet, and if hardly anyone is listening to the UHF channels, I guess a CB set would be a bit useless for security purposes?

Is there a calling channel on the UHF sets that most people use? It seems that CB radio these days is confined to talking between two people who are situated close to each other, that is, within about 3 to 5km. In addition, the other person would need to know when to listen out for you, because it seems you are not likely to come into contact with someone you don't know because there are so few people on the air.

Another question, can the signal from a 5 watt CB set travel two and a half times further than the signal sent from a 2 watt set? Two watt sets are advertised as having a maximum range of about 4 kms (on the flat and without major obstructions like hills and high buildings), so would a 5 watt set have a maximum range of 10kms, or don't radio waves travel in an exact proportion to the power output?

I am looking at buying either the Uniden UHO44 XR (2 watts) or the Uniden UHO52 XR (5 watts). Are these good sets?

Thanks, Fred

26/27meg sets still crop up regularly on trademe, so some folks must still
be using them.
Odd aside - hams are dropping the need for cw, I've heard. So there could be
more folks heading in that direction (and away from CB).

well i am sure mr twist doesn't need anyone else backing him as it
were, but i have to say , it seems everytime he says something about
you akc lid types he backs it up with proof...which is more than i can
say about you guys......would you mind backing up your statement about
twist using some lid's callsign on the freeband with some kind of
proof please..........????

the bullet is for him.....doncha know.....in case he gets caught
working on his secret fcc mission, he is to put that bullet in his
rusty ole 25, pull the slide back, load that baby in the chamber and
put that barrel up against his lid headenski and pull that ever lovin
trigger, doncha know....

well that is grounds for a friendship georgre...you two guys are lids
of a feather and a real honest to goodness positive force to be
reckonded with in the hamster community and like jimbo says you boys
make him real proud.......why don't give lelnadski a call.........he
might accept the charges considering you don't have any money and your
mommie had the long distance call feature blocked on her phone so her
stupid son, wouldn't use it to make harrassing calls, doncha
know...........

sir the real aaron h voobner , aka dwight stewart has retired from
that character study, and perhaps got bored from hanging around here
bothering anyone that would listen to his nonsense.........i mean only
a dumbass like you would continue this farce for as long as you
have......besides i thought aaron was going to become european
aaron......but it would appear that his best laid plans for de-assing
the kakilaki area have been put on hold for a while......besides dummy
he might have decided it was time to grow up......hell, son , try it,
you might like it, doncha know..... besides are you going to
tell me you can't get a hot date with one of those skanky allentown
streetwalkers?????

For what it is worth, a commercial license has not been necessary since
sometime in the late 70s or very early 80s.

No lie Twirt. As I said I have never had a BigNet
account of mine. I'll let you ponder how that can
be true. Maybe you'll surprise me, but most likely
you're a bit too slow, IQ deprived, to figure it
out. Trying to explain it to you is a waste of my
time because it would be like trying to teach a
monkey to think. In fact I'll bet a monkey would
figure it out before you did!

Allentown. Just went through the place a few weeks ago on my way from Pottstown to Wilkes-Barre. Took highway 100 from Pottstown to Allentown, then got on the turnpike north. The tunnel throught the mountian while driving on the North bound Penn State Turnpike was something different. Looks like a lot of construction work is going on around the Wilkes-Barre airport out on highway 315 too.

> Thats what I thought when I bought mine, at
Menards.

You quickly forgot that most other users of the
GMRS frequencies are
licensed and thus have paid their money. They may
not take kindly to unlicensed users showing up and
may go to some trouble to help the FCC track down
the unlicensed users. The repeaters you find on
GMRS are a pay to use service so if some
unlicensed yo-yo jammed it, on purpose or not,
people are going to come looking for sure. On UHF
its incredibly easy to direction find somebody
with nothing more than a hand-held transceiver and
a small directional antenna connected to it. So
don't be too surprised if you get asked to show
your license someday by a gentlemen in a suit who
is accompanied by a uniformed law enforcement
officer.

Because the frequencies here are open to everyone - using radios for
security work would be rather pointless. Channel datails can be found
on the Dick Smith web site - data section :-

http://www.dse.co.nz/cgi-bin/dse.storefront/3f459a7307b381fa2740c0a87f990758/Export/catalogs/DTS0000030

hope that long URL posts thru without wrap-around - data section - NZ
& AUS CB channels

In addition - these channels are not meant to be used for commercial
work.

>

I would suggest that the signal would most definately NOT go 2 & 1/2
times further by increasing the power that much. Radio (and audio
levels) are measured using a logarithmic scale called 'decibels'. To

increase the range of the radio, it is much cheaper (and easier) to
increase the height of the aerial, or the size of the aerial.

TW,

A good friend brought her Dad's old radios that had been stored for years after his death. Lots of parts, old
Aerotron radios (outdated), tubes, and a couple of CB radios. One is a Gonset--must be 35 years old, and a
JC Penney transistor base station (40 channel). I think that one belonged to her brother. I think I'll hook them up and/or repair them and see what happens. Maybe I can get on the 'bowl" with 4 watts and shut 'em down!

LOL! (just kiddin')

Jerry

>quite a bit of tramping about the hills and I thought a CB set might give a
>bit of added security, but there don't seem to be many repeaters available
>yet, and if hardly anyone is listening to the UHF channels, I guess a CB set
>would be a bit useless for security purposes?

CB is pretty dead-ish these days (Thank god!) Most were far too big
and ugly to haul about anyway. Any radio is useless for "security
work" Somebody will hear you. A digital cell-phone will be a much
better solution. OK, out in the hills you may have a long walk to get
near cell-phone coverage, but they are reliable, small and light.
Check both Tele$com and Voda$one coverage maps to see which has the
best coverage for your intended tramping.

Oh BTW, always take an unwanted CD with you and learn to use it as a
signal mirror, they work great, BUT DO NOT TAKE A MICRO$OFT one, you
know how insecure their stuff is !

>Is there a calling channel on the UHF sets that most people use? It seems
>that CB radio these days is confined to talking between two people who are
>situated close to each other, that is, within about 3 to 5km. In addition,
>the other person would need to know when to listen out for you, because it
>seems you are not likely to come into contact with someone you don't know
>because there are so few people on the air.

Yes, I think there is, Check out DSE as they push the new UHF sets.
They do go a long way, but it's very dependant on the vegetation and
terrain between sets. In something close to "free-space" ie; mountain
peak to peak, they could easily do 20-40 Km. In hilly bush, it could
be down to a few hundred metres.

>Another question, can the signal from a 5 watt CB set travel two and a
>half times further than the signal sent from a 2 watt set? Two watt sets are
>advertised as having a maximum range of about 4 kms (on the flat and without
>major obstructions like hills and high buildings), so would a 5 watt set
>have a maximum range of 10kms, or don't radio waves travel in an exact
>proportion to the power output?

No, sorry, real-world path loss is a complex equation, but a quick jab at the calculator says about 1.5 times, all other things being equal. But they never are!

>I am looking at buying either the Uniden UHO44 XR (2 watts) or the >Uniden UHO52 XR (5 watts). Are these good sets?

Uniden does have a reasonable name, but I don't know about the specifics of those sets.

Barry Lennox

Gee,,KC8LDO Lelnad denies all involvment, then
lies to the world about
his bignet account.

>No lie Twirt.

Huge Lie, Lelnad, and I'm gonna pop this one (juts like your lowest self-esteem) too, in a second, just like I do the rest of your lies that you need to repeat over and over that "no one will believe". You need to move on from your lies, 'cause you dig yourself deeper with each one.

> As I said I have never had a BigNet account

And as I have said before,,you lie, and proving them is getting easier each tiome you open your trash mouth.

> of mine. I'll let you ponder how that can be

>true. Maybe you'll surprise me, but most likely

>you're a bit too slow, IQ deprived, to figure it

>out. Trying to explain it to you is a waste of my
>time because it would be like trying to teach a

>monkey to think. In fact I'll bet a monkey would
>figure it out before you did!

>--

>Leland C. Scott

>KC8LDO

>ARRL Member

>NCI Member

>Charter member of the

>Lawrence Technological University

>Wireless Society W8LTU

Yea, we know what you said. Sure, sure, it was "someone elses" account.
Only,.....now we can al certainly understand WHY you would claim such
a thing, but even if that were true, your only reason for such would be
malice.
Nevertheless, you had NO other access during the ENTIRE time you were
posting EXCEPT that BIGNET account. You had another account PRIOR to
Bignet, and another AFTER Bignet. I'll let you figure that out awhile.
Maybe you'll surprise me, but most likely you're a bit too slow, IQ
deprived,
  Trying to explain it to you is a waste of my time because it would
be like
trying to teach a monkey to think.
In fact I'll bet a monkey would figure it out before you did! 10-4, good
buddy?

Hey Geogre, why do you avoid this post? "Cause you were caught in yet another lie. Don't know why you have the penchant for lying about your identity, but it meshes with the same lie you provided the FCC concerning your contact address, the same as KC8LDO. Are you two not aware that intentionally providing the FCC with false personal information is a crime? Yet, Lelnad does so and proudly utilized the ARRL sig in his harassing posts to rec.radio.cb as well as in his forges of other people he has persoanl problems with. Massive communication deficit these lids suffer.
Anyways,,,,on with the floor show..
From: space@c.com (Cool Breeze)
If you are who you say you are, I will hedge you are contacted by the FCC for supplying an incorrect address.
****
>Who have I said I am? I have told you I am not
>wa3moj, you tell me I am you call me george,

>but

Exactly. This is the reason why CB and MURS do not require a license. The FCC in their infinite wisdom decided that since the vast majority of people were not applying for CB licenses when they bought their radios, the public would be better served if the license requirement was done away with. The same holds true for MURS. The MURS frequencies were formerly assigned to low power business radio, and since hardly anyone was applying for a license to operate on those frequencies, the FCC just decided "to hell with it" and created MURS from the former business band frequencies. Come to think of it, I don't believe a license is required to operate a radio in the VHF FM marine band now either.

With the FCC's present trend towards deregulation, I can see the license requirement for GMRS being dropped within two to three years.

73,
David

2743. Packet Ops

Brett,

In the post, he was stating that a commercial license was necessary for cb repair. He also stated that hams could do what the wanted with their equipment; therefore I believe he intended to state a commercial license was necessary to repair cb equipment. It used to be that way; a first or second class radiotelephone license (and I also believe a commercial telegraph 1st or 2nd would also work as they had theory tests) was necessary to repair two way radio equipment (other than amateur). The commercial licenses have been watered down; there is now only the General Radiotelephone Operators License. I know as I used to hold a 1st class radiotelephone license, commercial telegraph license, and a radar endorsement. I now only hold the GROL (as well as an amateur license). I can't help with the exact dates that the requirements changed, however. I do believe that was nailed down fairly close in one of the threads on rec.radio.amateur.policy.

Kind regards,
Jim

Kind of sad, actually. I've been accused of aiding the lawless. It just struck me what has changed. Amateur radio used to be nothing but fun. No flames and no arguing about code vs no code vs cbers. When I went to join an amateur radio club in Great Lakes right after boot camp in the Navy, I was really surprised to find a few dour-faced guys handing me a list of 'rules' to memorize (bear in mind that I had my 1st class radiotelephone, 2nd class radiotelegraph, radar endorsement, and amateur extra class license back in 1967). I said I'd think it over. On the way back to the barracks, I saw a sign which simply said "73" with an arrow pointing to the back of a building. What the ... ??? a barbeque with beer and a lot of women going on. They made me feel welcome. Problem was, you needed a license (cb was licensed back then). No problem, they'd help with the paperwork. Well, I asked if this would do - and I pulled out my 1st class radiotelephone license. Instant membership plus 3 rigs to fix. The rigs got fixed, and beers kept being placed into my hand. What a time! If both cb and amateur radio could find a way to go back to the times when fun was had and no one had the time to argue. If it irritates some of the folks that some hams come here to flame, go over to some of the amateur newsgroups. They're busy flaming each other! Hey, guys, wake up and smell the coffee!

Can't we all just have fun and leave the police business to those charged with doing that?

Just a thought, but I've put on my asbestos underwear on just in case :))

Yeah right. I bet there are far more unlicensed users than licensed. Most
are two watts or less and dont have repeater functionallity. GMRS will
eventually go the way of FRS.

Amateur radio isn't going the way of the horse and buggy, but you make a point about the members of some amateur clubs. You're probably better off meeting a few amateurs on an individual basis and getting your own group up and running. Other than that, despite the efforts of some, amateur radio continues to grow. There are so many modes and people to work that the grumps can't cover even a majority of bases :)) Even CB has its' own small groups that enjoy each others company - say the bunny hunters, the avid DXers and so on. The difference is that very few (if any) CBers have so little to do that they simply flame the newsgroups.

Cindy -- you have to understand you asked a question about illegal CB operation and Hams are very much against ANY illegal operations on any band. Kinda like asking an atheist question in a Catholic Church.

Go to rec.radio.cb --- you will get sympathy there and also probably bad mouthed about illegal operations. But perhaps you didn't know it was illegal -- now you do.

Read FCC rules at URL:
http://wireless.fcc.gov/services/personal/cb/

As far as your visit to the club meeting -- here in Southern California we have a youth group of young Hams under the age of 18, about 20 of them. We have donated lots of equipment to their schools, given them free books, make a point to welcome them to the repeaters and club meetings. All ethnic groups and genders are represented. They had a table and setup at Field Day just for the youth group at the GOTA station. They meet each Thurs eve for a net on one of our repeaters. Some are involved in Emergency Communications. We treat all Hams the same, young, old, green or blue. Maybe you live in an area where the converse is true.

So your comments are like --- this cat is green -- so all cats are reen --- too generalized.

And your comment about "Old White men" is racist and stupid, as you too will be old someday. Sooner than you think.

Ask yourself a question "When did I start to hate Old Folks ??"
The ones that Tom Brokaw termed "The Greatest Generation".
The ones who made this country the great nation it is.

You have a tough act to follow and off to bad start -- lets hope in the long run -- you are up to the task of being also a great generation.

I guess most of the young ones here doesn't remember the days when a so called license was needed for CBs until it ran rampid and nobody got them either. Lets face it 1,000,000 CBers and growing the FCC had to give in. Same goes for GRMS.

WOW! We went from an illegal activity to the reason why people are scared away from Ham radio?

It isn't a very good debate technique, but you have made the best stretch of an argument I've ever seen.

My hat is off to you!

But, to answer your paragraph, why would anyone take a group of kids to an amateur club meeting? It's a completely different environment than

they would be comfortable in. And there is usually business to take care of at a meeting that would be mind numbing for kids to listen to, like finances, membership issues, etc. If you really wanted to get them interested, you would get a few amateurs to meet with the kids on the kids turf, like a classroom, the local YMCA, places like that. The kids would be comfortable, only hams who ar interested in public outreach would be involved, and a program could be put together that would keep the kids involved and interactive.

Not aiding. Just being complicit toward those who promote blatently illegal activities. By not speaking out against it, you are basically condoning it.

> It just
> struck me what has changed. Amateur radio used to be nothing but fun.

It still is. You just have to find the right people.

What HAS changed is the attitude of society in general, which radio merely mirrors, which is a general disrespect for rules. Many people seem to feel that rules are "optional" and those who call attention to their infractions are "spoiling their fun".

> No flames and no arguing about code vs no code vs cbers.

No, back then it was incentive licensing.

> When I went to join

Some people take authoritarianism to the extreme. But I'd bet you wouldn't willfully violate the FCC operating rules back then.

Ah, the stereotypical myth. Hams are a bunch of "sticks in the mud", who are serious and law abiding. CBers, are a bunch of fun loving people, who throw caution (and the rules) to the wind. Which group would you rather be a part of? If we are now going to base our morality by the amount of "fun" we have, then I really hope it doesn't really become fun to shoot people randomly.

> The rigs got fixed, and
> beers kept being placed into my hand. What a time!

It was a fun time. But most people become more responsible when they get older. I recall my youthful radio experiences quite fondly, even though I was no boy scout. The thing is that now I realize that many of those activities were irresponsible and not legal, fun not withstanding.

> If both cb and amateur
> radio could find a way to go back to the times when fun was had and no one
> had the time to argue.

How much "fun" do CBers have when they are being overpowered by other "CBers", who's idea of "fun" is running excessive power? The standard answer from the lawless set, is to say; "turn it to the left, if you can't deal with it". The point is that these "fun" people, through their selfish and inconsiderate actions, are ruining the fun of others, who are at least trying to follow the intent of the rules. The rules were created so that everyone has a fair chance at equal access. Those who ignore the rules are taking away from those who are. In my book, that's being selfish and inconsiderate. Are these the people you want to be included with?

> If it irritates some of the folks that some hams
> come here to flame, go over to some of the amateur newsgroups. They're busy
> flaming each other! Hey, guys, wake up and smell the coffee!

Sometimes when you see changes occuring, which are not in the best direction of the hobby, and of society itself, you tend to get defensive when others flaunt their newfound "fun" in your face, and make it seem like YOU have the problem, when you try to defend the concepts of responsibility, consideration, and just plain good manners.

>
> Can't we all just have fun and leave the police business to those charged
> with doing that?

Those charged with enforcement are way overwhelmed to make much of a dent in these illegal activities. This fact is what enables the continued activities to continue. Most of these scofflaws would crawl under a rock, if there was a good chance that they'de be caught and punished harshly for their brand of "fun".

>
> Just a thought, but I've put on my asbestos underwear on just in case :))

You won't need it from me, although you might want to think about who it is that you're defending, even subtlely.

It's a sure bet that the king of the punch clowns will unleash a barrage of untruths, ad-hominem insults and other groundless APD inspired nonsense in response to my response to you, much like a child has a temper tantrum. Is this the kind of guy you'd want as a friend?

FYI Cindy From FCC URL:

http://wireless.fcc.gov/services/personal/cb/operations/#equipment
You must use an FCC certificated CB transmitter at your CB station. You can identify an FCC certificated transmitter by the certification label placed on it by the manufacturer.

Ah come on Tom -- we all know CB is a legal hobby, but as I read the rules for the Citizen Band --- there is no provision for Packet Radio on the 27 MHz band as Cindy asked.

CB Rules:
[Code of Federal Regulations]
[Title 47, Volume 5]
[Revised as of October 1, 2002]
From the U.S. Government Printing Office via GPO Access
[CITE: 47CFR95.412]

[Page 529-530]

TITLE 47--TELECOMMUNICATION

COMMISSION (CONTINUED)

PART 95--PERSONAL RADIO SERVICES--Table of Contents

Subpart D--Citizens Band (CB) Radio Service

Sec. 95.412 (CB Rule 12) What communications may be transmitted?

(a) You may use your CB station to transmit two-way plain language communications. Two-way plain language communications are communications without codes or coded messages. Operating signals such as ``ten codes'' are not considered codes or coded messages. You may transmit two-way plain language communications only to other CB stations, to units of your own CB station or to authorized government stations on CB frequencies about--
(1) Your personal or business activities or those of members of your immediate family living in your household;
(2) Emergencies (see CB Rule 18, Sec. 95.418);
(3) Traveler assistance (see CB Rule 18, Sec. 95.418); or
(4) Civil defense activities in connection with official tests or drills conducted by, or actual emergencies announced by, the civil defense agency with authority over the area in which your station is located.
(b) You may use your CB station to transmit a tone signal only when the signal is used to make contact or to continue communications. (Examples

[[Page 530]]

of circuits using these signals are tone operated squelch and selective calling circuits.) If the signal is an audible tone, it must last no

longer than 15 seconds at one time. If the signal is a subaudible tone, it may be transmitted continuously only as long as you are talking.
(c) You may use your CB station to transmit one-way communications (messages which are not intended to establish communications between two or more particular CB stations) only for emergency communications, traveler assistance, brief tests (radio checks) or voice paging.

So I ask you --- where does it say Packet radio is permissable on the CB band. In fact it sez:
You may use your CB station to transmit two-way plain language communications. PERIOD

">

2772. Have I got this right? GMRS...

Newsgroup: rec.radio.cb
Date: 2003-08-22 18:35:07 UTC
From: "M. G. Devour" <mdevour@eskimo.com>
Message-ID: <bi5nqq$q8h$1@eskinews.eskimo.com>
Source record: 164304

I just bought a pair of Motorola Talkabout GMRS/FRS radios in a cheapo bundle pack from Sam's Club, just to have on hand in case we ever need some short range communications.

The 22 channels are:

1-7: shared FRS and GMRS simplex
8-14; FRS only
15-22: GMRS only

According to bandplan charts I found online and the channel frequency table in the manual, channels 15-22 are in fact a mix of GMRS repeater input and output frequencies, meaning that any simplex operation with this radio on those channels could cause interference with nearby repeater users.

So, on the "shared" channels 1-7 I'll need a license or else will be bootleg, because the radio uses GMRS power levels and modulation.

On channels 8-14 I'll be using straight FRS and legal even without license?

Channels 15-22 are basically useless anywhere repeaters might be in use, given the radio cannot operate split to take advantage of them, even if the repeater operators permited it?

So, in type-accepting these radios, the FCC is bolluxing up the accepted GMRS bandplan. Who created that bandplan, the FCC or user groups or what? Just curious.

At present the FCC will still take my money for a license, yes? And, of course, they have about as much manpower committed to stopping the unlicensed and improper operation caused by these cheap radios as they did to police CB back in the 70's?

Of course it comes down to the question of whether to license or not. It'd be a waste of 75 bucks if next year the FCC threw up their hands at all the problems *they* caused and stopped issuing licenses. If I only use the FRS channels, I've got a couple of cheap 7-channel FRS radios. <shrug>

Most folks that buy these cheapie bundles won't go to the bother of figuring this stuff out. So they're going to keep messing things up for the foreseeable future. With all that, just how much is left of the GMRS community, if there was one? Is there anyplace where GMRS folks gather online? It'd be nice to hear what they have to say.

Thanks for your comments or answers to my questions.

I was simply commenting on the apparent illegallity of the sort
of operations that you described ... not something that hams
condone ... and warning you that you might get flamed.
(Note that I was polite ...)

> Which is exacly why young kids are turned off by ham
> radio. I once took a group of young black kids to a

> Cindy W

There is simply no excuse for the sort of behavior that
you describe in your last paragraph above ... I can assure
you that it would NOT happen at the local club of which
I am a member.

You *are* correct that there are too many hams who are
not open to, and often disparage, newcomers or "would-be's.
That IS a significant problem in bringing in the newcomers
and, particularly, younger folks who represent the future of

ham radio. On this point we agree 100%.

Dave,

I disagree ... while I would discourage the apparently illegal packet
activity that Cindy described, I am forced by personal observation to
agree substantially with her assessment of how *many* (not all, but
enough to make a negative impact) treat kids and newcomers ...

I think that getting kids involved with local ham clubs is an excellent
idea.
It will socialize them with the older, more experienced hams that can
"elmer" them, show them that there is order and organization, expose
them to programs and activities, etc.

The KEY is finding the RIGHT ham club that will treat the kids the way
they be deserve to be treated as the future of amateur radio, not a club
that will shun and ridicule them as Cindy has described.

Jim Hampton wrote:
Kind of sad, actually. I've been accused of aiding the lawless.

>Not aiding.

Yes he has. And reposting it would serve only to show you remember nothing and intentionally lie about it anyway, but if it needs to be reposted.....

>Just being complicit toward those who

WTF is "complicit"? One of those new terms invented by those suffering communication deficits? LOL,,,sort of like "Keyclown" ,,,HYUK!

>promote blatently illegal activities. By not

>speaking out against it, you are basically

>condoning it.

Really? So those who fail to speak out against your perverted self-admitted acts of illegally monitoring the phone conversations of under-aged teenage girls talking about their fisrt sexual experiences are condoning your activities that reek of pedophilia? Interesting concept you profess, Hall. Not even close to be being correct, but most definitely interesting in your twisted and warped views of things.

_
It just
struck me what has changed. Amateur radio used to be nothing but fun.

>It still is. You just have to find the right people.

LOL,,like you and the other named members of the Voobs gang of lids.

>What HAS changed is the attitude of society in
>general, which radio merely mirrors,

Here you go again.....LOL. N3CVJ feels "radio" mirrors society,..LOL!..That clues the world in on the way you think and believe. See Davey, the world isn't even aware of hammie radio anymore, OR cb, yet you seem to feel that those who frequent the hobby are representative of Americans as a whole...LOL. What a warped view, you have.,,but then again, we knew that wehn you told us what brings you pleasure....

>which is a

>general disrespect for rules.

Sort of like your blatant disrespect for yout TOS, which is why you lost your service as well.

>Many people seem to feel that rules are

>"optional" and those who call attention to their

>infractions are "spoiling their fun".

Exactly, only that seems to be the motif emanating from yourself, Lelnad, and Geogre....not one cber has cried about your pitching fits about illegalities,,not one,,,,it's when you make the posts personal is when your deficit in communications must be identified. YOU lids brought the entire "enforcement of cbers through hammie monitoring"to us,,,when the tables are turned and you are forced to live by the shit you toss at others, such as being reported for providing the
FCC the wrong address,,you cry like a baby girl and say we are "spoiling your fun".....LOL.

_
No flames and no arguing about code vs no code vs cbers.
No, back then it was incentive licensing.
When I went to join
an amateur radio club in Great Lakes right after boot camp in the Navy, I was really surprised to find a few dour-faced guys handing me a list of 'rules' to memorize (bear in mind that I had my 1st class radiotelephone, 2nd class radiotelegraph, radar endorsement, and amateur extra class license back in 1967). I said I'd think it over.

>Some people take authoritarianism to the

>extreme.

Yup,,,you illustrated that with your Jack-booted Nazi , fascist comment that if one doesn't get involved, iot means they are taking a position. You're lost and unAmerican as they come. You lack power and feel the need for it against those who talk of freebanding and or amps, that of which you are guilty of yourself and have been for years and years/

>But I'd bet you wouldn't willfully violate the

>FCC operating rules back then.

You're being selective, hall, You feel that the FCC rules are somehow to be followed, but TOS are to be disregarded,,this is how you earned the nickname "The Hypocrite Hall".

_

   On the way back to the barracks,
I saw a sign which simply said "73" with an arrow pointing to the back of a building. What the ... ??? a barbeque with beer and a lot of women going on. They made me feel welcome. Problem was, you needed a license

(cb was licensed back then). No problem, they'd help with the paperwork.
Well, I asked if this would do - and I pulled out my 1st class
radiotelephone license. Instant membership plus 3 rigs to fix.

_
>Ah, the stereotypical myth. Hams are a bunch

>of "sticks in the mud", who are serious and law
>abiding. CBers, are a bunch of fun loving

>people, who throw caution (and the rules) to

>the wind. Which group would you rather be a

>part of?

Well, those who do not suffer great deficits in communication as you
demonstrate on a regular basis have figured out how to belong to both.
they don't have a stick up their ass like you do and insist that it is
either "one or the other" and if you don't choose a side, they are
automatically against poor Davie.

> If we are now going to base our morality by

>the amount of "fun" we have, then I really

>hope it doesn't really become fun to shoot

>people randomly.

Well, let's see,,,YOU judge people's morality and called many, many of
us criminals for JUST talking skip. You have called others criminals for
using amps, You have called those that do not agree with your
self-imposed myopic vision of morality "sociopaths." You're twisted,
Dave, and so is your little clique of lids.

_
The rigs got fixed, and
beers kept being placed into my hand. What a time!

>It was a fun time. But most people become

>more responsible when they get older. I recall

>my youthful radio experiences quite fondly,

>even though I was no boy scout.

Ahhhh,,but your past breaking the law enables and gives you the right to
call names and become personal toward those who discuss the same acts
you have committed yourself.
HH..LOL.

>The thing is that now I realize that many of

>those activities were irresponsible and not

>legal, fun not withstanding.

Save the busllshit. You had a call when you were breaking the law and you damn sure knew you were breaking the law. You even give advice on how to circumvent the law and not get caught...HH.

_
If both cb and amateur
radio could find a way to go back to the times when fun was had and no one had the time to argue.

>How much "fun" do CBers have when they are
>being overpowered by other "CBers", who's

>idea of "fun" is running excessive power?

Anyone that disproves your bullshit, would be my guess, of who you would claim is fond of running "excessive power", among a plethora of other offtopic lies you have made toward other chatters for nothing more than expressing their opinion of taking a differing, opposing view than yourself. This illutrates your deficit in communications quite nicely, despite the twisted irony you hold the call of N3CVJ.

>The standard answer from the lawless set, is

>to say; "turn it to the left, if you can't deal with

>it".

You ARE the lawless, set, Davie-son. Your pulled ISP say so, HH.

>The point is that these "fun" people, through

>their selfish and inconsiderate actions, are

>ruining the fun of others, who are at least

>trying to follow the intent of the rules.

Same with the internet and the tos that casually disregard.

> The rules were created so that everyone has

>a fair chance at equal access.

But you hold yourself above such TOS rules.

>Those who ignore the rules are taking away

>from those who are. In my book, that's being

>selfish and inconsiderate.

Which is exactly what your behavior consist of.

>Are these the people you want to be included

>with?

There you go,,,,,,attempting to toss Hampton in with a lawless,
intentional group of people for no reason other than he doesn't
subscribe to your bullshit harassment tactics.

_
 If it irritates some of the folks that some hams
come here to flame, go over to some of the
amateur newsgroups. They're busy flaming each other! Hey, guys, wake up
and smell the coffee!

_
>Sometimes when you see changes occuring,

And sometimes you see lids coming apart at the seams when faced with
truth. I need merely point to the yahoo clowns of Lelnad and
Geogre,,,,,,

>which are not in the best direction of the

>hobby, and of society itself,

LMAO,,and YOU promoting illegal activities such as how to avoid getting
caught running an illegal linear on cb, or illegally eavesdropping and
monitoring private phone conversations of minor girls and claiming it
makes you feel "juicy" is somehow in the "best direction" of the hooby,
or conducive somehow, in your hypocritical , deficit-ravaged, criminal
mind?

>you tend to get defensive when others flaunt

>their newfound "fun" in your face, and make it

>seem like YOU have the problem, when you

>try to defend the concepts of responsibility,

>consideration, and just plain good manners.

In the first place, you;re lying. You can't produce one single post from
a ng reg flaunting anything. You CHOSE to come to rec.radio.cb.,which by
your own definition over the years, consists of a majority of illegal
activity. It was not flaunted, YOU came looking for it, so it very much
is YOUR problem, ad Geogres AND LElnad's, as they, and you, have never
failed to demonstrate.
Try some truth, Hall, once in your pathetic life.
In addition, your many, many, off-topic posts and failed attempts at
making the poster YOUR topic instead of their claims, discussions, or
topics is not responsible, considerate, or good manners, especially when
coupled with the massive amout of names you call in your posts.

_
Can't we all just have fun and leave the police business to those
charged with doing that?

_
>Those charged with enforcement are way

>overwhelmed to make much of a dent in these
>illegal activities.

Which is how perverts like yourself can get away with admitting on usenet, and to the world, getting your jollies by illegally monitoring the phone conversations of young, underaged, girls.

>This fact is what enables the continued

>activities to continue. Most of these scofflaws

>would crawl under a rock, if there was a good

>chance that they'de be caught and punished

>harshly for their brand of "fun".

As your clique of lids can do nothing but be reactive and post your hate here. The fact is, you would never confront anyone concerning anything.

_
Just a thought, but I've put on my asbestos underwear on just in case
:))

>You won't need it from me,

Right,,you say this AFTER you moronically and foolishly attempted to portray him as a defender of illegal activities for not speaking out and agreeing with your illegal activities then joining you when you bitch to someone else about freebanding.

>although you might want to think about who it

>is that you're defending, even subtlely.

There ya' go again, HH. This is America, I have been telling you this for a long time, but you continue to think you have some sort of status. You have delsions of grandeur that allow you to believe that you are some sort of defender of the faith, when, in fact, all have seen you are nothing more than what you profess to be against. you;re indeed partof the problem. ALL voices and opinions are welcome, whether unpopular, offensive, vulgar, what have you. That you persecute Hampton for defending one's right to discuss topics that YOU have a problem with, illustrates, of course, your problem, as always, is with yourself.

>It's a sure bet that the king of the punch

>clowns will unleash a barrage of untruths,

>ad-hominem insults and other groundless

>APD inspired nonsense in response to my

>response to you, much like a child has a

>temper tantrum. Is this the kind of guy you'd

>want as a friend?

LOL....there ya' go,,attempting to use the CHARACTER instead of the
topic.
Says plenty about your own character Davie. Your view is in the extreme
RADICAL minority. Have a great weekend.

>Dave

Odd. You make the collective claim that hammies do not break the law
then secure and post a link that shows the opposite.. (shrug)
These hammie violators were not "found",,they were reported. The FCC,
sir, despite your thoughts otherwise, do NOT patrol the streets and
highways and neighborhoods of the USA looking for that DXing cber or
freebanding cber or someone talking on 27 MHZ that shouldn't be there. I
will be more than happy to inform you of any other misconceptions you
may hold regarding FCC enforcement issues.

>Sounds like totally illegal activity to me ... if I

>were you, I would not expect help here and

>would be prepared to duck for cover as the

>flames erupt ...

>Carl - wk3c

_
  The "flames" you speak of usually originate from the guilty
themselves..you know,,the ones that protesteth too much or the ones
seeking assumed status or power over another...

>I was simply commenting on the apparent

>illegallity of the sort of operations that you

>described ... not something that hams

>condone ... and warning you that you might

>get flamed.

It applies. Hammies freeband as much, maybe more than cbers,,,,the
enforcement logs are chock full of such actions.

>(Note that I was polite ...)

Of course you were. Why would you be anything else but? And by the way,
it's much appreciated 'round these parts these days.

_
"Which is exacly why young kids are turned off by ham radio.   I once
took a group of young black kids to a local ham radio club meeting.
All the old white men ignored the kids or made rude remarks.   These
same frustrated old white men then wonder why the hobby is rapidly going
the way of the horse & buggy.
Cindy W"

>There is simply no excuse for the sort of

>behavior that you describe in your last

>paragraph above ..

Yet,,we already see those that defended the actions of said hammies and actually attempted to blame it on Wendy for bringing those boys there, clearly justifying the callous behavior exhibited by these old coots.

> I can assure you that it

>would NOT happen at the local club of which I

>am a member.

You sir, then may be a scholar as well a gentleman.

>You *are* correct that there are too many

>hams who are not open to, and often

>disparage, newcomers or "would-be's. That IS

>a significant problem in bringing in the

>newcomers and, particularly, younger folks

>who represent the future of ham radio. On this
>point we agree 100%.

>Carl - wk3c

Divisiveness and dissent among the ranks is hurting, also. This group has been witness to a few die-hard nocoders, who, while consistently whining about the code that holds them back, simultaneously and hypocritically talk bad about the old-timer "clique" while bashing cbers from the other side of their mouth.

>the time.

_
You can't cite a single example. You're upset with yourself, not Jim.
You have been told for some time now, by several sources, that your
behavior and manner in which you conduct yourself is not representative
nor conducive to hammie radio. Finding that out appears to be taking its
toll on you.
In any event, you're thinking of N3CVJ. I have several of his posts
where he lunges at the chance to offer advice in assisting amp users and
freebanders of alll sorts of things, even how to operate an illegal
amplifier that splatters on 27 MHZ without gettting caught.

And Geogre is NOT innocent. Here's another of his lies where he tells us
he IS WA3MOJ, then he lies about it.

>You better read the post again, assclown.

I see the homosexual remarks are now to be found throughout most of your
posts. I bet you feel much better to be out of the closet.
****
Funny you liken the word assclown to be a homosexual remark, guess you are
slightly homophobic dealing with Landshark, and I can't blame you.

>It still doesn't say I said was wa3moj, and I still
>have never said i was wa3moj from day 1

Sure you have.
****
Nope sorry Never said your assuming again. remember what happens when you
assume ...

>Where in the quote below did I personally say I am wa3moj? you posted it
lets dechiper it.

No,,YOU decipher it.
****
I have no need to dechiper it , your assumptions have been noted as usual.

We already read it the first time you posted it..
****
yes, you may have read it but you sure don't understand what was said then
and again you are assuming what you want it to say.

>How about wee look at some of my other

>posts.

" wa3moj.... who is next? perhaps you could get dickie boy cranium to
give us his next."

Yea,,that was in response to the question : What is your call?
****
I didn't say it was my call thats is the one you guy have assigned me

> unless your right on top of one.

You don't think because you don't know. I can tell you from experience that I have used repeaters on both the Ham 2m and 70cm bands from 5 to 15 miles out using nothing more that a few watts from a hand-held radio. The Ham 70cm band (430 to 450 MHz) sits right below the frequencies used by GMRS (462 to 467 MHz), and thus the propagation is very much the same. One machine I can get into only using around 100 to 500 milliwatts of power from 10 miles out because the antenna is at 500 feet on top of a tall building in down town Detroit.

So assuming that two watts isn't going to cause a problem is total nonsense. I can garantee you that it will if you're not carefull.

It happens all the time. It won't be the first time somebody has looked me up on the FCC ULS, while talking to them on the air, and came back asking me if I'm so-and-so from such-and-such place. In fact it happened just a day or so ago when I was talking to a station, on 2m sideband, in Cleveland from Detroit during a tropo band opening. Others have been caught bootlegging red-handed on the Ham bands that way using BS callsigns or "barrowed" callsigns. Its funny when they can't seem to remember their address, or the city they live in.

No, I am involved in a few - Uncle Jim's forum comes to mind - but that one has been getting a bit 'strange' of late. I did answer a post concerning a pot. The gentleman asked if it was the deviation control. I answered that it was, but he wouldn't want to mess with it without a communications test set. The problem is that excessive deviation on an FM radio will result in distortion at the receiver. There are many services and many standards for deviation. FM broadcasting uses much wider deviation that amateurs (although amateurs do use wide band FM up on microwaves). The problem is that too many folks simply want to state that it is "illegal", without giving the background. This ends up as an insult to the person who posed the question, and flames start and nothing positive results. Who really wants distorted audio? I'm happy to try and answer questions concerning antennas and grounding if I can - as well as other questions. I'm just not interested in cutting someone off with the "it's illegal" answer. You know as well as I that there are reasons for the rules. The reason is to make communications compatible for those in a given service and to avoid interference to other services so all of us can share a limited resource. Of course, BPL can render all of this moot :)

Both are legal but combining packet with CB is NOT legal. Also US law limits CB communications to LOCAL use only although propagation makes it possible to communicate world wide. You are not allowed to make cross country or out of country contacts on CB.

Actually given the fact that we are in the trough of the sunspot cycle, long distance communications on the CB band will be rather rare for the next few years.

Not only that but if the group is larger than two or three, it would be very
wise to arrange it with the club in advance so that they can set aside some
time from the business meeting to welcome the kids and have material
prepared to show them some of the marvels of ham radio. Just springing a
batch of kids on the club is not the best way to introduce the kids to the
club and vice versa.

Ah, its so refreshing to see somebody who actually
"thinks" on this group for once.

> We're not going to
> speculate as to whether the real owner knew you
were using it or not..

No need to do so. I'll bet you well aware of the
fact that its common nowadays for many people to
have Internet access through their employer. Since
the account is paid for and managed by my employer
it is their account, thus the factually correct
statement "not of mine" being correct.

As things worked out at the time the company was
using BigNet for Internet access we were in the
process of dumping the 20 plus year old Wang
minicomputer system. This was required because it
would have cost more to update the old accounting
software etc. for Y2K than it would cost for a new
computer system and software. Plus the old Wang
system was getting very hard to get serviced. The
new software required that the database run on one
server, but we had several locations across the US
we wanted to be able to access the system too.
However the ISDN line we were using was way too
slow to support the usage, and BigNet was unable
to supply us with the bandwidth we need. So we
dropped BigNet in favor of another ISP who
supplied us with a full T1 line connected to the
Internet. The change over took almost a year to
implement, converting from the old system,
training etc. Now we use Remote Terminal Services
that is built-in to Windows 2000 and XP to run the
software through a Linux box acting as a
gateway/proxy/ firewall, between our LAN and the
Internet.

Twirt claims I had "my BigNet" account pulled.
Well that's really silly. I'm good friends with
the company's computer system/LAN administrator so
if there were any problems he would be the first
to know, and I would be the second. Of course it
would be stupid to do anything that resulted in
several hundred people losing their Internet
access, and hardly would go unnoticed. Since I
never received any comment about anything I did on
line, and there was no termination of service, the
only conclusion is Twirt is full of crap. Nothing
different from his normal misplaced accusations.

So as you can see everything has a normal everyday
explanation, nothing sinister or clandestine about
it. So once again Twirted has proved himself the
uneducated idiot that he is.

This is true in the U.S., but in other parts of the world CB packet is completely legal, and very popular. FBB BBS software was altered about eight or nine years ago to make it usable with CB callsigns, because of that popularity.

There are dozens of European CB packet web-sites... Where have all you guys been the last decade or so?

If it was legal here in the U.S., it would be popular here, too. Personally, I do not see any harm in it, but the law is the law. It can't be done here in the U.S., but we cannot assume that everybody in this newsgroup is in the U.S.. For some of the readers here, CB packet is a legal, legitimate hobby.

You're right,,,you're too busy looking for a life.

>I just forwarded your initial

>message to the FCC. I hope they find it

>interesting.

Forward mine, Dan. I freeband AND DX on eleven meter all the time.
Riley has been hounded by so many of you clowns forwarding usenet posts
to him that you've made the genuine complaints concerning actual harm
and behavior so much harder to follow up. It's amazing one can live to
be as "old" as you and learn so little

>Don't like that?

You're years late and hundereds of complaints to short.

> Too bad.

LOL.....you have issues. I also do 60 in a 55 at times. Hey
Dan,,,forward that to the Highway Patrol,

>Dan/W4NTI

However the original poster Cindy indicated she was in Tampa, FL and her
e-mail address substantiates that.

Her post also substantiated she was dooing NOTHING but inquiring of something she knew to be taking place and/or heard, and in no manner did she say, imply, or construe she would be breaking any law. Yet, the knee-jerk reactions from the anal retentive instantly assumed her intentions. They not only convicted her of breaking the law for a mere question she posed concerning illegal activity that she may be listening to, but faulted HER for attempting to get kids involed with hammie radio, as if their is only one approach, "Their" approach. I've said it time and time again, and it needs repeating,,,,,,, I find it extremely ironic that a small minority of those licensed for communications, at times express such a large deficit concerning such.

Well then, it looks like Cindy's just going to have to find something legal to do. If she really likes packet, I'd recommend that she get her ham ticket and participate in the fine amateur packet radio activity that goes on in Florida. They have over 50 SEDAN nodes there if she is into public service and emergency communications, and there is also a great ROSE network there.

Trying to do packet on CB freqs in Florida will just get her in trouble, to no particular purpose.

Ahh, the Edison 2m, Leland? I know that machine. <grin>

> So assuming that two watts isn't going to cause a
> problem is total nonsense. I can garantee you that
> it will if you're not carefull.

I've been scanning with the Talkabout and hear some activity on the repeater frequencies. It sounds like commercial stuff, possibly a security service or some maintenance people, on 2 or 3 different channels.

Being right in the "big city" I suspect they might be some of those famous "grandfathered" commercial systems that were in place before 1987 and the creation of the GMRS.

I've told the (teenage) kids we'll just be using the 7 FRS-only channels for now, and explained why. Since these radios are in part a stopgap until they get their technician licenses, I expect I'll be able to trust them.

As I read the rules, as long as we don't use any of the channels on these radios that are shared or assigned to the GMRS we'll be legal to use them as FRS radios. Whether we will bother to license for the sake of using the GMRS simplex channels or not I haven't decided yet.

Be well,

Mike D.

> they be deserve to be treated as the future of amateur radio, not a club
> that will shun and ridicule them as Cindy has described.

I think that the best approach is to get with the kids at a level that they can relate to. And a club meeting is not always the right place. There is business to attend to, and that is a necessary evil which can turn a kid off really quickly. It can turn a lot of other people off also.

In our club, the board tries to do as much business as possible during the separate board meetings. But we still have to bring a surprising number of issues before the membership.

Now that being said, if someone wanted to bring a number of students to a club meeting, we would probably come up with some program to keep them entertained and interactive.

What is interesting to a group of Older folk is probably not going to be interesting to a group of teenagers, save for a narrow overlap.

The other thing I would be interested in knowing is the other side of the story. Did Ms Cindy just show up with the kids in tow? Did the hams, if they knew she was coming, do nothiing special for them? There are enough unanswered questions that I must go on the evidence presented, and that is the illegal packet suggestion, and the odd race related comment. Perhaps Cindy can elaborate.......

And you remain as predicatable and true to form as ever. I can just imagine the inner turmoil that you must have wrestled with, deciding whether to resist the overwhelming urge to run your fingers and unload your usual ton of B.S. which has become your trademark, and prove my above statement wrong, or not. I can see that your lack of self control made the decision for you. You really can't resist getting in the last dig. A true sign of a narcissistic personality. A narcissistic sociopath. It's no wonder you can't do any better than charter captaining.

I've sat quietly by while you frothed and fumed over George, Leland, and the gaggle of anonymous people who are getting kicks out of pushing your buttons. You never fail to respond to any of them. Have you no restraint? Of course not, your narcissicm prevents that.

> >general disrespect for rules.
>
> Sort of like your blatant disrespect for yout TOS,

#1 What "TOS" rules have I allegedly ever broken? You see, just like you, I am entitled to an opinion, and am free to express it. Somehow you seem to think that when I am doing such, that I am in violation of TOS rules. How are my posts any more "illegal" than yours?

> which is why you lost your service as well.

#2 Another of your many lies. I maintain that I am still using the same ISP which I've used for the last 8 years, and that is worldlynx networks. I challenge you to prove differently. They have no reason to pull my account. I do nothing wrong.

> You're being selective, hall, You feel that the FCC rules are somehow to
> be followed, but TOS are to be disregarded,

You have still failed to date to come up with even ONE TOS rule that I've allegedly "broken". Go to the worldlynx homepage, (www.worldlynx.net)and look for their rules. Then tell me which one(s) I have broken.

You really need to cut the B.S. and lies. They may work on some people, but intelligent people have had your number for quite some time..... Some of them are playing you right now, like someone uses a string to play with a cat.

Fair enough. But to say that he may share
some "philosophical" views disturbs me. So it's
ok to crap on anyone that doesn't agree with you?
It's ok to use foul language? It's ok to harass, send
virus's, sign you up for Spam, false accusations,
that's the kind of philosophies you believe in?

what are they thinking would you please tell me so i will know.......are they really that dumb???? why would a cber want his puny little amp anyways.......you know jimbo some of these guys can't seem to see past their own damn noses i guess..............

I have for sale a Dentron MLA-2500 with 2 (8875) tubes as new or near new, cost me $800+ for the tubes. I am selling the amplifier to someone who is able to pick-up and I can demonstrate output. I WILL NOT SHIP. I will only sell two licensed amateur. This also has 10 meters. Sorry cbers, dont even ask. Band coverage is 160-10 meters and this is small enough to put on your desk. A true Kilo-watt amplifier. I dont mean input ! We are talking output here ! Ok , you can probably find one cheaper somewhere but dont ask me to sell cheaper as the Finals were very expensive and these are near full output. $1100

hey mike.., lelnad hangs out on those freqs because he can't talk on
any of the others doncha know.......kind of has a problem learning the
code and is in favor of dropping that requirement.........for whatever
reason...actually he is just a pissant.......and thinks he runs
something but all he runs is just his mouth.......he always is on
here bragging about this and that, but i have found that people that
do that are small minded twits with no grey matter.........so pay him

no mind and do what you want......but whatever you do , do not tell
him where you live or he will without a doubt try and rat you out for
whatever purpose,.........because he is that kind of a guy doncha
know......just a thought...also be advised that he does not live at
the address he told the fcc on his cb plusser license......he
lied.....it is a common trait in the scott family doncha
know...................that is all...........

Do you really believe that?
Do you take the time to speak out against everything you disagree with?

Let's face it, if we all went around whining about everything we disagree with, we would soon end up in a mental institution... but not before the Internet is brought down by the incredible load created by the whole world whining.

I am quite sure that you, like every other sensible person, pick the things that you feel important enough to you... but don't blame other people if their priorities are different.

Anyhow, whining about illegal use on this newsgroup does nothing more than add to the noise. Look at how few *different* people there are on this newsgroup, how much time is spent whining, and how many years it has gone on for. It really is incredibly inefficient on time.
Either Georgina is too stupid to see that it is making no difference to the situation, except to make the "pro-legals" look like a bunch of losers... or the only intention is too fill the newsgroup with arguments.

Every now and then, Sparky makes a reasonable argument with things such as the SSB efficiency thread... but agreeing with him stops him dead in his tracks, until he can to find a way to start an argument again.

Regards,

Peter.

look closely, its been an almost perfect troll... she sent one initial message, and one reply with the comments on the club meeting, and the thread now has dozens of messages. she also knew enough to post it to two conflicting news groups, thus dragging both sides of the argument into the fray.... give the nest a kick and sit back and watch the hornets fly, an almost perfect troll!

The more I look at this thread the more it looks like the 'almost' perfect troll. note that Cindy made one posting to start it to two conflicting groups, one of which is known to be hostile to the discussed activity. She already knew the frequencies, times, other operators, and apparently had enough equipment to monitor said activity, which should have been enough to answer her question without having to post to these groups. And after the first, and surprisingly civil reply, she hopped in with both feet on a totally unrelated topic to attack ham operators and label them not only as judgmental hypocrites, but also as racist old white men... then she disappeared.

If she could have done both with a single message it might have qualified as a perfect troll, but now I can only give it a 9 out of 10 on the troll-o-meter.

Whatever. I know that nothing happens on this newsgroup that doesn't deteriorate into a pissing match. <shrug>

I still would like to know if there were ever any GMRS "communities" as there were of CB'ers in the old days. Clubs, associations, web boards or even neighborhoods that happened to get a critical mass of licensees that made the service more useful. And, if so, have they survived or fallen by the wayside?

Who runs or used to run public repeater systems and where?

If GMRS is supposed to be a type of "Citizens's Band" requiring type-accepted equipment and no-test licensing, did the citizens really use it?

No, more like you George. You are nothing more
than a troll. ANYONE that disagrees with you,
immediately you start to attack them with foul language,
false accusation, threats, harassment, etc etc.
That's why it time to flush another of your thousands
of screen nics down you POS!! LOL!!!

>
>
>
>
> > Oh, and I don't troll,
>
> Me either

Wrong, you post dozens of times a day, harassing
accusing etc etc. SSB is lucky if he posts once a
day.
Here's an even easier question: If your not
WA3MOJ and your not a troll, why do you
care when people post anything about him?
Knowing the way you are, you would have
got on you're bicycle and rode over to his
house and showed him all the posts.
Your George, you are a troll, nothing more,
a whole lot less.

>
>
> >It's ok to harass,
>
> Again like you never have, you have harrassed many people including me

Constant harassment? Like you have done to
me for over three years now? Nope, not a chance.
How about Mopar, GW, SD Jones, Toll, Eitner,
Jay, SSB, BrainBuster, Skipp, Tim, Twist, Jim,
Late Dick McCollum, dozens of others who have
long since left because of your constant harassment
& trolling you do here?

Yes, and just like your post using your AOL account. But
your excuse was that someone was setting you up
<Chuckle>. At least Frank proved someone had access
to my computer by finding those posts that Jason Halverson had done using my accounts.

>
>

Why George, I used that google account once, but then
you claimed I had an AOL, Mindspring, Earthlink,
WebTv, verizon among others. I know you have Comcast
& AOL, but you are the one needing a hankie.

<grin>

That would be one. The other is the 444.000 MHz
machine (WB8CQP). Another is a 2m machine in
Winsor Canada and I don't have the callsign for
that one but its on 145.410 MHz.

That's true as far as I know.

> Whether we will bother to license for the sake
> of using the GMRS simplex channels or not I
haven't decided yet.

The license is good for the whole family and is
valid for 5 years. That works out to $15 a year.
For that it might be worth it. That way at least
everyone will have access to a good radio with out
the need for a Ham ticket. Plus you're not limited
in the content of the messesages either like on
the Ham bands.

Yeah right. If you want to bet then go get the
numbers and prove it.

> Most are two watts or less and don't have
repeater functionality.

Also you don't need repeater functionality on a
radio to screw with a repeater.

> GMRS will eventually go the way of FRS.

Then again the FCC can just as easly band the sale
of the combo FRS/GMRS radios which will fix that.
They already do that for FRS/MURS.

If you really want to find out just how seriously
GMRS users take the licensing issue try posting
your comments on "alt.radio.family". It's not a
joke with them. The issue has been debated to
death over there.

Gee, Lelnad, this is your forge that had your
Bignet account
pulled....that's why the post doesn't exist at all

anywhere in any
archives,,,it exists only in the body of your
posts... Or was it one of
<snip>

I'll bet when you contacted the ISP they only said the person was dealt with but they would NEVER say who it was. I've had one or more people contacted for pulling crap on usenet so I know for a fact what goes on when a complaint is made. So you still remain totally clue-less as who was posting what. So somebody got it but how many people have BigNet accounts Twirt? 10, 100, ... 1,000,000 so how are you going to prove with out a doubt that a particular account belonged to so-and-so with out the ISP telling you? And they can't do that with out getting sued over privacy issues. And they are not going to let some idiot like you get them sued so the proof you don't have, and never will get.

So all you really have is your anger, your misdirected agenda, wondering around in the dark as always, clue-less as to who your real tormentors really are. And I have no logical reason to help you either after all of the crap you have pulled. So if you want to continue to waste your time chasing me around it just leaves the door wide open for your true adversaries to continue making a hobby of you. That suits me just fine.

I don't have an aol account, but it has been proven you do, FRENCHY

> But your excuse was that someone was setting you up <Chuckle>.

No excuse facts are what they are, you don't like it because they prove you
wrong. Randy used the wa3moj@aol , I never have funny part too, you always
post 1 post from that account why isn't there more of them? I mean If i had
aol why haven't more wa3moj posts been made? Go ask your friends why.

> At least Frank proved someone had access
> to my computer by finding those posts that Jason Halverson had done using
my accounts.

Frank didn't prove anything except your a flaming homosexual, you have had 5
different stories. In fact I called and talked to Jason about this, he says
you lie.

> > > that's the kind of philosophies you believe in?

> that's the kind of philosophies you believe in?

Uh, no. I was refering to the concepts of responsible and LEGAL radio operation. Philosophically, we are in agreement. I am not, however, a proponent of some of his methods. There is a difference you know....

I feel that adherence to the intent of laws is important. On the other
hand, if you want to run around in a pink tu-tu, that doesn't bother me.

>

This may be true. But it's a testament toward the sad state of affairs
that our society is slowly devolving into.

> Either Georgina is too stupid to see that it is making no difference to the
> situation, except to make the "pro-legals" look like a bunch of losers... or

I'm not so sure about that. Many of the staunchest "defenders" of the
worst of behavior and illegal activities have gotten worn down by the
"harassment", and have left. So, in some respects it has worked.

> Every now and then, Sparky makes a reasonable argument with things such as

It is possible to be in disagreement with someone without being
disagreeable.

No, that is a weird post. This is something that should be reported to the FBI. The guys is obviously selling two (2) licensed amateurs - and it is patently illegal to own people (in the United States, at least).

As far as power, I had a ball and worked the world with but 75 watts. High power amps can be a pain in the neighbors' ... uh ... well, three feet below the neck. That usually causes problems for the operator as well. Heck, I broke into one net running milliwatts (below 500 milliwatts).

Well, forget the FCC - your problem will come very quickly from the repeater owners and users. In that band, they charge monthly rates to access the machines (in 1995, users were being charged $7.00 per month per radio to use the repeaters owned by Liccardi Radio). Of course, if you don't have your sub-audible tones set to open the machine, you won't open it - but if you are fairly close to the repeater, you might interfere with legitimate users who are loath to share what they have paid for. I can assure you that I can talk 24/7 through a Toronto repeater from Rochester, NY using just a handheld running about 3.5 watts. That is a good long haul. I've opened a repeater in Pennsylvania with the same handheld in Rochester (except I was on the 21st or 22nd floor of a high-rise). My consistent range runs 20 to 40 miles with a handheld to a repeater (depending upon local terrain). Out in the open, it runs closer to 40 to 60 miles using a 36 inch whip :)

Thanks Barry and others for your informative replies. When I talked about security, I meant being able to find someone to talk to if you got lost or fell down a cliff etc. If you have a CB set with you and you are lost in dense bush, at least searchers can listen out for your signal if they know the frequencies you are likely to use. In circumstances like this, where no cell phone signal is available (and this often happens in the bush believe me) a CB radio could be really useful in an emergency.

A GPS is also a good thing to have so that if a rescue was ever needed, you can give an accurate location. The only problem with a GPS is that the signal often cuts out when the path to the satellites is blocked by the bush canopy. A GPS, even with an external aerial, is often not too good in the bush, but a lot better than not having one! As with a CB and a cellphone, a GPS works best when you have an uncluttered line of sight to the sky.

> Oh BTW, always take an unwanted CD with you and learn to use it as a
> signal mirror, they work great, BUT DO NOT TAKE A MICRO$OFT one, you
> know how insecure their stuff is !

I hadn't thought of taking a CD as a signal mirror, the pack will be bulging with gadgets before long. Might as well take the portable CD player as well so I can enjoy listening to the reflective mirror!

> They do go a long way, but it's very dependant on the vegetation and

> peak to peak, they could easily do 20-40 Km. In hilly bush, it could
> be down to a few hundred metres.

Yes, CBs work brilliantly from the tops of high hills, the range is extended greatly. In addition, I think you need to buy a CB that will take a half wave aerial in place of the smaller aerial that comes with it when you buy it. The quality of the aerial is everything with CB sets, so don't buy a CB that doesn't allow you to attach a better aerial.

> >Another question, can the signal from a 5 watt CB set travel two and a

> But they never are!

Interesting, although the signal from a 5 watt set doesn't travel 2.5 times as far as that from a 2 watt set, I guess a 5 watt set would use up 2.5 times as much battery power as a 2 watt set?

I understand that the main future value in New Zealand UHF CB sets is that, within a year or two, the number of UHF repeaters will be extended quite a lot, and this includes privately owned repeaters that will be available to the public. I am not sure whether this means that a person in Wellington will be able to talk to a person in Auckland (if there are enough repeaters to relay the signal), does anyone know whether this is a future possibility with these sets?

> proponent of some of his methods. There is a difference you know....

Dave I hope you don't believe the snake oil they are selling.
They are like the girl who cried wolf, un fact Twisty brought your name up
last week
many times I guess he figured you were behind some of the shenannigans.
They have no clue who is doing what, as evidance of their accusations at me
and Leland. that's why they accuse like 3- 4 people every time
by luck they may get it right if then name enough people.

Sorry Ronny, you are confused. I never said I was sending it to Riley.

I said I was sending it to the FCC.

Oh and BTW you don't think enforcement cares or can catch anyone of you packet racket fools? Ask the guy in Miami how much his equipment cost that was taken by the Federal Marshalls a few years back.

Caught up to him right in the middle of that packet burst to the Frency BBS.

You people are idiots. Why don't you just get your 'hammie' license and do it legal? Miss the thrill of never knowing when there will be a knock on the door?

Im right...you people are IDIOTS.

So what?? At one time or another the entire USENET is one big TROLL...so
what ?

It brings up interesting conversation. What else is there to discuss? The
wx, the rig. If you don't like reading it, and you consider it a
troll...don't.

A UHF CB would be just as useless as a cellular phone in such a case.

If you're that worried, carry a locator beacon. That's what they're
designed for and satellites have the advantage of looking damned near
straight down, so terrain is irrelevant.

>> Oh BTW, always take an unwanted CD with you and learn to use it as a
>> signal mirror, they work great, BUT DO NOT TAKE A MICRO$OFT one, you
>> know how insecure their stuff is !

If you're going to take half a helioscope, you should make sure you know
how to use and aim it. the hole in the middle is there for a reason on the
old-style ones, as was the matchstick thingie with the loop on the end. It
makes aiming trivial, even if you can't see the light hitting the far
target.

Hint, look through the hole, hold a stick at arms length, line up the end
of the stick on the target, then aim the sunspot so the hole is
surrounding the end of the stick. You have pinpoint illumination and no
shaking is required. If someone's looking in your direction, you'll get
their attention fast.

This works at distances in excess of 50km. I've used it to setup antennas
- it's a good idea to confirm you're aiming at the right remote hilltop...

Practice helps....

:
: Uniden does have a reasonable name, but I don't know about the
: specifics of those sets.

A friend just last week took his marine Uniden MC610 VHF radiotelephone to
the local Uniden agents for repair. It was made in 1997 (date on the pcb).
It's suddenly stopped transmitting, but still receives. They *refused* to
service or repair it. When pressed, the chap took it out back to at least
determine whether the microphone or unit itself was at fault. Mic was OK.
That was it. He said he was told that *if* he could get a schematic and find
a tech elsewhere who would service it, good luck, but they wouldn't do it.
Or couldn't. Six years, and obsolete/unserviceable. He'd bought it there!

http://www.uniden.co.nz
Rather riled at this treatment, my friend went across the road and bought
the latest Icom as a replacement, vowing never to buy Uniden again ...
YMMV ... then again, maybe not. OTOH, Icom in NZ don't seem to list CB
http://www.icom.co.nz

If there is *one* such ham, that is too many, but you seem to suggest that the problem is widespread. On that notion we disagree 100%.

For every curmudgeon who disparages newcomers there are thousands who actively welcome them. Check out www.mnyarc.org. It was formed by members of our club, originally as a club sponsored Explorer Post, and has grown into a standalone group fully dedicated to nurturing youth-oriented amateur radio in our area. Hamfest Minnesota, also sponsored by our club, has a policy of free admission to hams aged 17 and under. These are just a couple of examples right in my neighborhood. Maybe you just live in a bad neighborhood.

Since you don't know who I work for then you
definitely wouldn't know. Finally you can't tell a
forged post from the real deal, which is how you
got in to the mess you're in now. The logical
thing is if the posts in question are forged then
being posted outside of my normal working hours
isn't so surprising. Your problem, being as stupid
as you are, is in the failure to account for that
possibility. You don't have any reasonable
explanation for it so you just conveniently ignore
those troubling facts. You really should leave the
thinking to those that have a normal or above IQ
since you have amply demonstrated that yours isn't
up to the task. I'm still betting on the monkey
over you and the monkey has the better odds too.

That's not a bad idea, they are quite cheap nowadays, at least for the
1/2 freq ones. Be aware though, that around 90+ % of all alerts are
false. And the satellites can only locate you within quite a large
sphere. Then it's down to the SAR air and ground teams. A signal
mirror and loud whistle will help them locate you much more easily.

The 406MHz COSPAS/SARSAT ones are much more accurate, typically about
200-300metres just from a satellite fix, but they are also much more
expensive. Depends on how much you are worth!

With a CD. I just hold my thumb at arms length over the target, then
sight through the CD hole, and get the reflection onto my thumb, hence
the target. Works great, and it seems like they are custom made for
signal mirrors.

Hans,

I have seen/heard it from SoCal to Florida to New England ...
over many years ...

However, I did not intend to imply that all/most/a large majority
of hams are that way ... just WAY too many are (although we
agree that even *one* is "too many," my experience is that there
are a LOT more than that ...

Perhaps folks are just friendlier overall up in your neck of
the woods?

Carl - wk3c

| > I dont think your two-watt radios will be much
| interference for repeaters
| > unless your right on top of one.
|
| You don't think because you don't know. I can tell
| you from experience that I have used repeaters on
| both the Ham 2m and 70cm bands from 5 to 15 miles
| out using nothing more that a few watts from a
| hand-held radio. The Ham 70cm band (430 to 450
| MHz) sits right below the frequencies used by GMRS
| (462 to 467 MHz), and thus the propagation is very
| much the same. One machine I can get into only
| using around 100 to 500 milliwatts of power from
| 10 miles out because the antenna is at 500 feet on
| top of a tall building in down town Detroit.
|
| So assuming that two watts isn't going to cause a
| problem is total nonsense. I can garantee you that
| it will if you're not carefull.
|
|

|

My 200 mW HT would get me into the 147.195 machine in Wauseon (about 18 miles) and the 147.315 machine down by Holgate (about 15 miles) from my bedroom in McClure with the original antenna (which was a joke). This same radio after moving to Napoleon would get me into the 147.375 machine in Toledo (about 40 miles) used by NWOH ARES for SKYWARN net when hooked to a "Super J-Pole" antenna at 45 ft above ground.

2938. ARNewsline 1358 - Aug 22 2003

Newsgroup: rec.radio.cb
Date: 2003-08-24 15:38:10 UTC
From: radionews@aol.com
Message-ID: <20030824113810.28426.00000626@mb-m18.aol.com>
Source record: 164470

Amateur Radio Newsline(tm) Report 1358 - August 22 2003

From the 2003 Huntsville Hamfest and from our studios in New Orleans, this is Amateur Radio Newsline report number 1358 with a release date of Friday, August 22 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. I'm Don Wilbanks, AE5DW, reporting.

We begin this weeks newscast with the sad news that one of the voices so well known to ham radio will be heard no more. This, with word that Amateur Radio Newsline's Vice President and senior anchor Roy Neal, K6DUE, has passed away.

Roy was 82 when he died on Friday, August 15th at a hospital in High Point North Carolina. He had undergone heart valve replacement surgery three days earlier. According to his family, Roy was at peace at the end and did not suffer.

In both the worlds of broadcasting and of Amateur Radio, Roy Neal was a legend. He began his career at WIBG radio in Philadelphia. After military service in World War Two, he returned and helped pioneer the emerging medium called television at station WPTZ. He then joined the National Broadcasting Company where he spent most of his career producing and reporting for Network News. His specialty was science and aerospace.

But to hams, Roy will always be remembered as the person who brought manned Amateur Radio into space through the SAREX and ARISS programs. His close friend and NBC colleague Alan Kaul, W6RCL, joins us later in the newscast with more on Roy's many contributions. (ARNewsline, Philadelphia Broadcast Pioneers)

**

IN THE NEWS: JIM HAYNIE ON BPL

Roys Death came just as the Huntsville Alabama Hamfest was getting underway. One of the major topics hams were talking about is he growing debate over B-P-L or Broadband Over Powerlines. One of the people most concerned is ARRL President Jim Haynie, W5JBP:

--

Jim Haynie, W5JBP: "Broadband Over Powerlines is important, and just as I said on our website - this is bad. This is not good for Amateur Radio and I don't know how we are going to lick it. Quite frankly, and I want to tell you that right now."

--

Haynie made his comments to a packed audience at the hamfest's ARRL Forum. He says the League is doing everything possible to try to convince the FCC to not proceed with rule making B-P-L a reality. (ARNewsline)

**

RESTRUCTURING: HAM RADIO AFTER MORSE CODE

Jim Haynie also shares his thoughts on a subject dear to many hams: Whether Amateur Radio should or should not keep Morse code. Stressing that he speaks for himself and not the League, Haynie says code should be a requirement for the Extra Class license:

--

Jim Haynie, W5JBP: "What if we were to have three classes of licenses? Entry, General and Extra and Entry got phone privileges on he current Novice bands? And that's all.

So we ask questions on the exam about just that. They could only use 100 watts store bought radio equipment. Possibly even a two-year expiration date.

Generals - same thing except no new expiration date. The same privileges they have today. But for Extra we retain the 5 words per minute code requirement."

--

Not everyone agrees with Haynie. Scotty Neustadter, W4WW, is Chairman of the Question Pool Committee for the National Conference of Volunteer Examiners and this is his personal view:

--

Scott Neustadter, W4WW: " This is not your fathers or your grandfathers ham radio. Things have changed. Technology has changed, and I think that - to an extent - that we have to change with them. We have to recognize our history and in no way am I - nor do I know of anyone else ho is advocating any abolition of the right to operate CW on any Amateur band where you can operate it today.

What I do know is that there is a whole lot of people saying that it does not make allot of sense anymore that I require that you be able to do that. I think that's the distinction that we have to keep in mind.

--

While the debate over Morse Code in amateur radio's future goes on _ Jim Haynie points out that what will be decided remains a long way off_perhaps years. (ARNewsline)

**

HAM RADIO HONORS: W6JAY RECEIVES 2003 YHOTY AWARD

As enthusiastic hams began pouring into Huntsville's Von Braun Civic Center Saturday morning _ one of the Hamfest's biggest moments was taking shape. The Huntsville Hamfest is the setting for an exciting yearly event_and that's the presentation of the annual Amateur Radio Newsline Young Ham Of The Year Award. This year's winner is 17-year-old Jay Thompson, W6JAY, of Santa Ana, California:

--

Jay Thompson, W6JAY: "When I first started I did not think that thre was allot to do in Amateur Radio, but the longer I am a part of it , I realized that there is much more that I could do. And I know that as much as I have done so far, I know that there is still kore out there for me. So I'll keep trying to acomplish more and maybe Ill become even better at Amateur Radio in the future."
--

CQ Magazine is one of the award's principal underwriters. Editor Rich Moseson, W2VU, says that_while Jay stood above fellow nominees_many other young hams are big achievers, as well:

--

Rich Moseson, W2VU: "Every year we review applications and nominations from a variety of people. The person you see standing here on the stage is not the only really good kid who has done allot. He's just risen the crop a little bit. There are a whole lot of other young people out there in ham radio doing great things, and we congratulate all of them."

--

The Amateur Radio Newsline Young Ham Of The Year Award is in its 17th year. Vertex Standard and CQ Magazine are the Award's principal corporate underwriters.

That's it from the 23003 Huntsville Hamfest. The rest of the newscast will come from our New Orleans studio, but first this. (ARNewsline)

**

Break 1

From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the 145.600 MHz repeater of the Hiway Amateur Radio Club serving Durban South Africa.

(5 sec pause here)

**

RESCUE RADIO: THE BLACKOUT

Ham radio came to the rescue as cellphone systems totaly failed during the recent North-East blackout. Bill Pasternak, WA6ITF, has more:

--

A New York Times article said it this way: When technology failed on a massive scale, some old-fashioned broadcasting stepped into the breach. This, as ham radio operators took to the airwaves to reach emergency workers.

The technology that failed was the North-East power grid that provides electricity to cities like Cleveland, Detroit and New York. This in turn lead to communications failures as numerous cellular telephone sites without generators or battery back-up - went away -- the afternoon of August 14th .

According to an ARRL Bulletin, with cellular systems overloaded or out altogether, the incident turned into a test of Amateur Radio's capabilities to operate without commercial power. The New York City-Long Island Section Emergency Coordinator is Tom Carrubba, KA2D. He estimates that ham radio operators handled 800 to 1,000 messages from Thursday afternoon until early Friday.

Diane Ortiz, K2DO, is the ARRL Public Information Coordinator for the area. She took to the air when power went down in her Suffolk County community. Ortiz called up an informal VHF net. Over the next 20 hours hams passed about 500 pieces of traffic. In addition to handling messages for people stranded in the city, amateurs also relayed other useful information. This included such items as which stores or gas stations were open.

In the Big Apple itself, ARES teams provided communication support for Red Cross Emergency Response Vehicles set up at transportation centers in Manhattan. ARES members also accompanied Emergency Response Vehicles to fire calls. RACES was activated in the greater New York City area after a state of emergency was declared.

Across the Hudson River in New Jersey, a net linked the Red Cross lead chapter N2ARC in Princeton with other chapters. Further to the West, Michigan ARES teams assisted emergency operations centers and the Red Cross.

In Ohio, Section Emergency Coordinator Larry Rain, WD8IHP, reports that all ARES organizations in the Northern tier of the stated were activated.

For millions of people in the Northeast and Midwest, the August 14th power outage took away access to wireless voice, e-mail and the Internet. The failure of the cellular system was especially evident. Nextel Communications spokesman Chris Grandis said that the company needs electricity to power its cell sites, but when you don't have that, it's out of his company's control.

The same held true for virtually every other wireless provider, few of which bother to have emergency power at cellular and wireless Internet sites.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF.

--

The bottom line: The traditional forms of communications failed, but hams were there to lend a hand. (ARRL, NY Times, others)

**

RADIO LAW: FCC DECLINES TO RECONSIDER ITS HUMAN EXPOSURE TO RF RULES

The FCC has declined to open an Inquiry into updating its human exposure to RF signals rules. In particular, the petitioner in this case wanted the Commission to consider possible health hazards not covered by the current rules, including non-thermal effects and the effects of long-term low-level RF exposure.

According to the CGC Communicator the FCC dismissed the petition, arguing that any such evidence should be presented to other, more appropriate expert agencies. The Commission also noted that its current human exposure rules have recently been upheld by the Second Circuit Court of Appeals. This, in the face of similar arguments by other petitioners. The complete story is in cybrspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-191A1.doc (CGC)

**

WRC'03 FALLOUT: GERMANY GOES CODE FREE

It's another week and another country has joined the no-code revolution. Following Switzerland, the U-K, and Belgium, Germany is the latest country to announce that it is abandoning the Morse code test as a requirement for HF band operation.

According to the website of the German national amateur radio society, the DARC, from the 15th of August radio amateurs in Germany with a CEPT Class 2 license are allowed to use the High Frequency bands using their existing callsigns. Further details were to follow, the website said. (GB2RS)

**

RESCUE RADIO: OREGON HAM RECEIVES HONOR FOR GOING THE EXTRA MILE

Back on this side of the Atlantic, an Oregon ambulance dispatch coordinator, EMT and amateur radio operator has been named a recipient of a "Star of Life" award. This, from the American Ambulance Association.

Scott Waggoner, KC7DHJ, of Clackamas County was nominated for the honor by his co-workers in recognition of the many extra tasks he has undertaken at AMR's headquarters in Portland. Among other things, KC7DHJ was cited for his help in setting up portable repeaters during search and rescue operations, his treatment of minor injuries suffered by firefighters and his overtime work on an American Medical Response

ambulance. (CGC from OregonLive.com)

**

ENFORCEMENT: UNCOORDINATED REPEATERS TAKEN OFF THE AIR

It took three letters and allot of patience on the part of the FCC but a repeater interference problem in Stockton California has been solved. This, as Thomas G. De Lasaux, WA6SEK, removes his repeater from the air.

The matter goes back to September 9, 2002, when the FCC notified De Lasaux that his operation of uncoordinated repeaters on 224.660 and 441.275 MHz was causing interference to coordinated repeaters on the same frequencies in his are. By letter dated May 5, 2003, the FCC informed De Lasaux that the information he submitted in regard to the initial inquirey did not demonstrate coordination for either of the repeaters. Also, that until he was able to demonstrate current coordination, the primary responsibility to prevent interference.

At that time the FCC requested De Lasaux inform the agency within 20 days what steps you were taking to resolve the interference issues. On July 1, 2003, the FCC notified WA6SEK that we had not received a response to the May 5th letter, and enclosed an additional complaint. The July 1 letter afforded De Lasaux an additional 20 days to respond, and stated that if the matter were not resolved by July 25, we would initiate enforcement action against his license.

On July 22nd, De Lasaux notified the Commission that your repeaters operating on 224.660 MHz and 441.275 MHz had been shut down and would remain so. The FCC has now terminated all further action in this matter. (FCC)

**

ENFORCEMENT: FCC AFFIRMS $10,000 FINE AGAINST NY PIRATE

The FCC has affirmed a $10,000 fine issued on July 23rd of 2002. This, against the Reverand Yvon Louis in a case the case involves an aleged series of unauthorized FM broadcasts made from Louis' Calvary Tabernacle in Brooklyn, New York.

The FCC says that over the course of several months in 2001, Reverend Louis reportedly transmitted on 93.7 MHz, then switched to 88.1 MHz after getting caught. But it was not over yet. He then used 90.1 MHz after getting caught again, then reverted to 88.1 MHz in open defiance of the FCC order to stay off the air. (FCC, CGC)

**

RADIO HAPPENINGS PAROCHIAL SCHOOLS TO REMOVE CELLULAR ANTENNAS

Bowing to health concerns from parents, sixteen schools operated by the Catholic Diocese of Brooklyn will eliminate cellular antennas mounted atop buildings and church facilities. The on-line edition of the New

York Post reports that one parish stands to lose $18,000 a year in rent money used to offset the school's operating costs as a result of the change. (CGC)

**

COMMUNICATIONS FOR THE HANDICAPPED: BLIND STUDENTS LEARN TO NAVIGATE USING NEW GPS TOOL

A group of blind high school students visiting Catholic University in Washington D.C. recently shouldered specially equipped laptop computers. This, as they navigated about the campus and visited a pizza restaurant led by voice commands and the Global Positioning System.

A $1,000 Global Positioning System add-on to the BrailleNote keypad showed the students that getting around a college campus is suddenly much easier than it used to be. The complete story is on line at www.washtimes.com/business/20030729-093916-2006r.htm (CGC)

**

WITH THE HANDI HAMS: SUMMER CAMP ON THE AIR

Handi Ham station W0EQO, will be on the air during the summer Minnesota Radio Camp from August 23rd through August 30th. You can look for W0EQO on several different bands using CW, single sideband, FM, and digital modes. Also listen in cyberspace for an EchoLink net on Monday evening at 2400 hours GMT. The HandiHams will respond to all QSL requests for all contacts, including EchoLink contacts. (HandiHams)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

INTERNATIONAL - HOLLAND: NEW PREFIXES FOR THE NETHERLANDS

A New call sign prefix went into effect in the Netherlands on August 7th. On the High Frequency bands, the PA, PB, PC, PF, PG and PI prefix callsigns will now be be heard with one, two or three letter suffixes. On VHF and above, the PD, PE and PH are the prefixes, again with one, two or three letter suffixes. For example, the former PBZ0AIU, who sent in this news story, is now PC2A. (PC2A via GB2RS)

**

DX

In D-X, word that GM0GNY, is active as 4K0GNY from an oil drilling and production platform in Azerbaijan. He will be there starting the 20th of August for around a month. Look for him on daily on 40, 20, and 17 meters and QSL as directed on the air. (OPDX)

**

THAT FINAL ITEM: A FINAL 73 TO K6DUE

At the beginning of our newscast, we told you about the passing of a member of the Amateur Radio Newsline family. Roy Neal, K6DUE, died August 15th following heart surgery. One of the people who knew Roy best is Alan Kaul, W6RCL. Roy and Alan worked together at NBC News, and on projects benefitting amateur radio. Alan looks at the life of a man who was an institution in American broadcast journalis, as well as a driving force in amateur radio's conquest of space:

--

When Roy Neal, K6DUE, died last week, he was possibly the best-known ham in America. He left an indelible imprint on Amateur Radio.

Roy, more than anyone else, was responsible for getting ham radio aboard manned space craft and each new mission is testament to his legacy. His efforts earned Roy awards from the Dayton Hamvention, they designated him Ham of the Year and from CQ-Magazine, which this year named Roy to the Amateur Radio Hall of Fame. He also received honors from The American Radio Relay League, and other groups and served as chairman of two key AMSAT committees.

Roy was a good guy. He was my friend and colleague at NBC News.

I met Roy in the 1960's when I was working in Seattle and he came to town to report on aerospace giant Boeing. After I moved to Los Angeles and joined NBC News in the 70's, Roy and I collaborated on a lot of news reports.

As a correspondent Roy was best known for his coverage of the U-S Space program _ he was a friend of the original astronauts _ and often reported from both the launch site at Cape Canaverral and NASA Mission Control in Houston.

Not many people know this but Roy was also the author of a book about America's missile system_. called The Ace In The Hole. It was written at the height of the Cold War.

In the 1970's, Roy teamed with television producer Dave Bell, W6AQ, to launch the first of several documentaries about amateur radio. Number One was a 16-minute film, Moving Up to Amateur Radio. Followed a few years later by The World of Amateur Radio. Dave Bell remembers Roy as the ultimate professional:

--

Dave Bell W6AQ: "Of all the on-camera talent that I have known, Roy was the most assured and had the smallest ego of all of them.

He was a true professional when it came to the news. Everything was always true. Everything was straight from the shoulder and there was no compromise.

Roy was one of the old-school news guy. He grew up in the television business and he understood it better than anybody who is working in it today."

--

In the 1980's Roy helped convince NASA to put ham radio in Space aboard a manned flight of the Shuttle. That first ham-astronaut was Owen Garriott, W5LFL, on board STS-9. Garriott's story of the 1st DX-pedition in Orbit was told by Roy in the television documentary Amateur Radio's Newest Frontier.

--

Audio from ARNF: "This is the story of an expedition. The story of STS-9. The Columbia. And these are the explorers: John Young - the commander. Brewster Shaw the shuttle pilot. And the scientists Dr. Ulf Merbold, Byron Lichtenberg, Robert Parker and Dr. Owen Garriott -- an Astronaut who is also Amateur Radio operator W5LFL. This is an expedition to probe the outer limits of science and Amateur Radio's newest frontier.

--

Roy's next project was called SAREX - Shuttle Amateur Radio EX-periment, followed by the New World of Amateur Radio which profiled a new ham, teen-ager Kelly Howard, N6PNY. She's now all grown up, married and has kids of her own. She fondly remembers working with Roy Neal.

--

Kelly Lenhert (ne Howard) N6PNY: It was all so exciting, but it was also overwhelming. But working with Roy made me feel so comfortable. He made me feel competent in what I could do. He took me under his wing and he was really supportive and he got me to do what I needed to do to make the film and bring out the best in me."

--

Roy's last documentary was called Ham Radio in Space. Roy's interest was a natural fit with AMSAT. Roy's close friend AMSAT Vice President Frank Bauer, KA3HDO, thinks of K6DUE as his mentor.

--
Frank Bauer KA3HDO: "One of the things that Roy taught me was how to distill information into basically sound bites, if you will. I remember one time where we had to give a presentation - at Dayton - and we had 20 minutes. I told him that I did no know how he could so that, and he

said: `Frank, if I can do the whole world on the news in 30 seconds, you can do this in 20 minutes.' So Roy taught me a whole lot from an executive perspective because he was a true executive."
--

Another AMSAT officer who worked closely with Roy is Robin Haighton, VE3FRH, the President of AMSAT North America.

--

Robin Haighton VE3FRH: "The space program itself is in good hands, but there is no doubt about it that we will miss that leveling confidence that Roy always brought to the meetings and the discussions. He made friends with everybody. The moment you met him you felt that here was a man you could trust."

--

Other comments have come in from all over the world From New Zealand, the past president of NZART, Jim Meechen ZL2BHF sent his condolences. As have numerous other Newsline listeners. Another of Roy's friends, Bob Heil, K9EID, had this to say.

--

Bob Heil K9EID: "I'm going to miss his spirit. He had a spirit about him that when you heard him on the air, you stopped tuning. This was something special you were listening to. And it wasn't always the tone of his great broadcast voice. It was his spirit. He was always in an up-mode about this hobby."

--

Roy was in the first generation of television newsmen who began their craft after World War Two. He started in Philadelphia and then moved to the West Coast where he helped found the NBC News bureau in Los Angeles. That was during the days of the old John Cameron Swayzee Camel News Caravan.

Roy was at ease in front of a microphone _ and could talk to millions of television viewers as easily as he could talk to the ham across town. On camera, he had the uncanny ability to read to time, precisely to time. When I produced updates for NBC Nightly News and Roy was the on-camera talent, I would time the newscast and tell Roy how long he would have to report the story.

I'd say something like this: "Roy, can you do it in 19 seconds?"

And Roy would always reply, "You know I can old buddy."

Roy liked that phrase "old buddy." He used the phrase to address friends and co-workers for some time. As for the updates - Roy always got them right. He would stop talking just an instant before we'd have to switch back to the network.

By the time he retired in 1986, Roy had worked out of the Los Angeles news bureau for almost 35-years. He'd probably written millions of words, and brought his audience uncountable hours of news and information.

But even in retirement, Roy Neal didn't stop doing what he did best. He was no stranger to listeners of Amateur Radio Newsline who knew him as a tireless volunteer giving freely of his own time to report the latest information -- always signing off in his own stylized way.

--

"This is Roy Neal, K6DUE. Thanks for listening and 73."

--

73, Old Buddy _ I really hate to see you go.

I'm Alan Kaul, W6RCL, reporting for Amateur Radio Newsline.

--

Roy leaves his wife Pat, and sons Mark and David. Services were held August 19th at the Wesley Memorial United Methodist Church in High Point, North Carolina.

In lieu of flowers the family requests that donations in Roy's mame be made to the Astronaut Scholarship Foundation at the Astronaut Hall of Fame. The mailing address is 6225 Vectorspace Blvd, Titusville, Florida, 32780. Please mark your envelope to the attention of Linn Le Blanc.

And this final thought. Yes, we at Newsline have lost a very dear friend. More important -- so has all of Amateur Radio.

73, Roy. None of us will ever forget you. (ARNewsline, W6RCL)

Well GW, he is turning people in that he sees
operating on the ten meter band, not freeband,
not cb. I only used the ten meter band when I
had my license, even then as far as I'm concerned
they can have it. He doesn't hunt people on the
freeband, doesn't go looking for amp users on the
cb band, only on the licensed bands he use's.

> being a rat is a character flaw pure and simple and if you
> can't see that and wish to be associated with such nonsense be my
> guest, butt......and that's a big butt.....doncha know.....
> > >

If he were a freebander, cb'r using an amp and then started turning people in after gaining
their trust, I would call that
a fink. He's at least going out and doing something about
what he believes in, not like some of the hot air trolls
on this group.

|
| Whatever. I know that nothing happens on this newsgroup that doesn't
| deteriorate into a pissing match. <shrug>
|
| I still would like to know if there were ever any GMRS "communities"
| as there were of CB'ers in the old days. Clubs, associations, web
| boards or even neighborhoods that happened to get a critical mass of
| licensees that made the service more useful. And, if so, have they
| survived or fallen by the wayside?
|
| Who runs or used to run public repeater systems and where?
|
| If GMRS is supposed to be a type of "Citizens's Band" requiring
| type-accepted equipment and no-test licensing, did the citizens really
| use it?
|
| Mike D.

try the family radio usenet group, thats made up of FRS and GMRS users also
try I believe www.g-m-r-s.org

Will it blow your modem, even if the phone line is NOT connected to it?

Will it make your answering machine act like it is on drugs?

Will it short out a caller ID box?

Will it cause an OPEN in in 1 line of a 4 conductor phone wire?

Will it losen the ground clamp from the phone wire gnd to the electrical
wire GND ?

Any thoughts from those who know?
Dave!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Not many comedians can be found just as funny on both sides of the pond, but what about Mr Bean?
Some of his stunts are just so crazy, like where he had bought so much stuff, he couldn't fit in his car (a small Mini)... so he sat on the roof of his car, and drove it from there.
He even crosses the age barrier, and is just as funny to all ages.

Regards,

Peter.

After all the years, their only achievement is to chase a few of the legitimate users away... illegal CB and the talk of amps, freebanding, etc continues just the same. if they were really wanting to persue legal issues, they would be doing something more useful than whining on here.

It is clear that certain people want to clear this newsgroup, maybe they just hate CB.
Well, I refuse to be chased from a group just because a small number of people have nothing better in their lives than hatred of people who are doing them no harm.

>Ask all the mentioned above, they to have
>had that problem with you.

I have an e-mail address that is never used and never given out. When I e-mailed someone on this group, I decided to use that addy, rather than my usual one.
Suddenly, spam started rolling in. Not a great amount, but it has been getting spam ever since. My other addy at that ISP is only ever used for business contacts, and it has never had any spam... so it is not the ISP selling details.

It gives me an extremely short list of suspects.

Regards,

Peter.

well dave you have to ask yourself ....how many amperes of pure
current are in a lighning bolt..........

the answer to your question is: all depends.....how close the
'lightning strike' was to your residence........but it can do all the
things you have stated and much more......ask the hambos what happens
when their illegal towers get hit by lightning........

if the flow of electrons goes from negative to positive in the real
world........does lightning go from the ground up or the clouds to the
ground..????? that is the learning question for the pile
today.........

2958. Sadelta Mike help please

Hi,

I've a sadelta Echo Master Classic U-D, can anyone tell me the
connections, what colour wire does what.

Please email a reply if you can.

Many thanks

First the cloud sends a leader to the ground then the earth fires
back a hugh bolt to equalise the difference of potential.

Dave,

Check out http://www.nationalgeographic.com/lightning/2.html
There are a few errors, but the essence is there. You'll have current in the hundreds of thousands of Amperes. Nothing is sacred. Anything can be fried (or spared). My neighbor's house was hit probably 10 or 15 years ago; she showed me the light bulb that the bolt left/entered into. There is a nice hole (no sharp edges, very round and smooth edges) in the bulb. It burned out motors in her house. Quite a mess. She felt her hair stand on edge when she was lying down on her couch and the bolt struck. Not pleasant.

CB Shops out there:

Have CB sales gone up this summer for 4 wheeler travellers? Gas prices are up--this usually means more CB sales in the past; but now? !

Have base station antenna sales picked up with the end of the summer?

I am continually amazed at how some messed up mobile installations are, a lot of them done by modulation kit installing INCOMPETANT CB CHOPS ! It IS amazing that these places are still in business!
What do YOU think?
Dave!!!!!!!!!!!!!!!!!

Yep, you got ANOTHER reason as to WHY you shouldn't buy CB's and other
radios made in RED CHINA. Fameous NG poster Jim Hampton is "losing life" at
Kodak, because the company is "sharing life" with COMMUNIST CHINA instead !
Dey shipped his job to da commies!

Don't support RED CHINA by buying Cobra, RS, and other brand CB's that
continue to make their TRASH there and are guilty of UN-American activities
in TRADING with OUR enemies! Would you buy fuel from an Iraqi gas station?
So WHY buy from RED CHINA, when the Phillipines is making better quality
CB's & other radios? !

So SHARE the moment--have life and DON'T BUY RED CHINA RADIOS
!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
Dave!!!

2970. Re: When lightning hits....

Newsgroup: rec.radio.cb
Date: 2003-08-24 23:58:15 UTC
From: w_tom <w_tom1@hotmail.com>
Message-ID: <3F495117.860A6BE4@hotmail.com>
Source record: 164504

First appreciate what Franklin taught us in 1752. Lightning seeks earth ground. Franklin demonstrated how to keep lightning from seeking earth through church steeples. He gave lightning a better, electrically shorter path to earth. We call them lightning rods. However the rods really are not protection. It is just that we humans tend to associate what we see with the solution. Those lightning rods were only as effective as their earth ground. And that is the point. Protection from a direct lightning strike is defined by the most critical component of a protection 'system' - earth ground.

Today we give lightning many more paths to earth. Antenna and utility wires. The most common source of a direct lightning strike to a building is AC electric. Lightning seeks earth ground. The shortest path to earth may be on AC wire down the block, into your house, through houshold appliances (destructively), to earth ground.

Just a Franklin demonstrated, damage from a direct lighting strike is avoided IF it is earthed before it can enter a building. CATV and satellite dish wires are suppose to provide that protection. They are suppose to connect to central earth ground before wire enters building. This is required by code for human safety. It just also provides direct strike lightning protection - if earth ground is properly installed.

AC electric and phone wires cannot connect to earth directly. So they make a connection to earth during the surge via a surge protector. Again, the surge must be earthed before it enters the building which is why telcos install such protectors, for free, at the service entrance. However the source of most destructive surges is also the one utility that has no earth ground connection. AC electric is the most common source of surges. And yet effective 'whole house' protectors can be purchased for about $1 per protected appliance.

Again, the surge protector really is not protection. It is just that we humans tend to associate what we see with the solution. The protector is made effective by the surge protection it connects to - earth ground.

All this assumes the most critical component of a surge protection 'system' exists. That means homes must meet and

typically should exceed post 1990 NEC requirements. The NEC required ground should also be central earth ground to which all incoming utilities connect.

Antennas also must be earthed for surge protection AND to meet NEC requirements. A direct ground from antenna to earth must be installed as required by human safety specifications of the NEC (National Electrical Code). Also the antenna wire should have some direct and short (less than 10 foot) connection to central earth ground where it enters a building. Damage from direct strikes to antennas also made redundant by the quality of that earth ground and connection to it.

Surge protectors are simple science. They are not always required since some incoming wires can be connected to earth ground without surge protectors. Either way, the effectiveness of protection is defined by that central earth ground. This art is discussed in two thread in the newsgroup misc.rural entitled:
Storm and Lightning damage in the country 28 Jul 2002
Lightning Nightmares!! 10 Aug 2002
http://tinyurl.com/ghgv or http://tinyurl.com/ghgm

Many have posted misconceptions or irrelevant information. For example, the surge from a direct strike is a radio frequency transient - not some DC voltage. Connection to central earth ground must be short (less than 10 feet), direct, and independent because transient is RF. Details described in that misc.rural discussion.

As you read this, that other newsgroup, and other posts, always remember this fundamental point. A surge protector is only as effective as its earth ground. Earthing is so critical that any surge protector not discussing earthing is not effective and often sold using urban myth or junk science reasoning. Furthermore, effective surge protection has been repeated proven effective since the 1930 meaning that surge damage is directly traceable to human failure.

The problem with using your thumb is that your hand will obscure more of
the reflection than a stick will.

"Infinity" is not a number.

However, if a number is infinitely large, by definition, it has no limits. You
cannot extend or exceed the limits of a number which has no limits. Therefore,
adding 1 to an infinitely large number will never yield a larger number.

Your answer is 'infinity'.

well tesla said that it went from the earth to the sky.........seems
funny but i can understand the electrical theory of it......also he
could prove it....he built lightning machines and he said he could get
it to 'strike' anywhere he wanted it to..........maybe it would be
useful if we set one of those machines outside bill clinton's
house..........that would be nice.............

well it is no different than john boy running around calling himself
ve1jot...i don't understand how some dude that lives in colorado goes
around calling himself a canadian hamster.....i guess it is a
attempt by some old agitator wantabee to try and shake the dogs of
war, but as is usually the case.....these types of blowhards

always make a mistake and it can be safely said that both , danny boy
and johnny boy are two peas in the same pod so to speak.....long on
the mouth and short on the ass..... .....doncha know.....

A friend of mine had his tower struck by lightning about that long ago too.
The tower was right next to the house and a chain link fence that circled
the yard and was grounded quite well. The lightning hit the tower, went into
the aluminum siding (which got loosened up badly along certain areas), made
a beatiful arc of 3 inches or so between the siding and where the fence post
for the yard started. When it ran along the fence, it blew off all the post
caps and welded the gate and car gate shut. It blew a hole 2 feet deep and 1
foot wide in the ground where it stopped in the corner of the yard. In the
house was even more fun. It killed most everything plugged in, even blowing
the plugs out of the sockets completely along a couple circuits. I lived in
the same town and thought a bomb had gone off. It was an early Sunday morn
and even miles away was wakened in a hurry. I got over there about 20
minutes after the fact and was surprised to see the hole in the corner of
the yard still smoking just a wee bit. There was even a bit of that glass
that lightning makes (i forget the name). Needless to say, they thought a
plane hit the house or something.
Makes you wonder how many house fires were started by aluminum siding,
antennae, and lightning.

>
They already exist right now, and have done for about 6 years, but
they are expensive, and that won't come down too much. The problem is
the 121.5/243 MHz ones cannot support embeddded data, and
COSPAS/SARSAT plans to stop monitoring these freqs in 2006 (I think,
maybe 2008) because of this limitation and the VERY high rate of false
alarms, over 90% in most countries, inc NZ.

The 406 MHz ones certainly support embedded data, but you pay a lot
for them. The big cost driver is the very stable oscillator required,
plus the many thousands required for certification.

Never ceases to amaze me how religious zealots/wannabe patriots scream rant and rave about how the commies are taking away religion when one of the first tenets in the US Constitution is the separation of Church and State.

Read the Constitution, Dave. It's in violation of the Constitution for any Federal, State, County, City, Township, Parish (in the county sense, not the church sense), or other governmental body to support or lend weight to any religion.

Just thought you should know... maybe it's not the Commies doing it.. Maybe it's the REAL Americans.. you know, the ones you don't want anyone to know about because they don't support your right-wing liberal religious bullshit.

Have a nice week, I'm off on the road.

No, Dan, they're not idiots. An idiot would never be able to put it all together and make it work. What they are are sociopaths. People who break laws for the fun if it. Sort of like extreme sports. The thrill of "getting away with it", and the rush of living on the edge is what fuels the excitement. Why else would someone build a 20 KW mobile radio station? An idiot couldn't pull it off. But someone has to seriously question the motives of those who do.

Getting a ham license would take all of that away. Most of these same people proclaim just how easy it is to get a ham license, yet they also claim that they have no desire to do it. Further proof that they enjoy operating illegally, and showing that they also have an alarming paranoia about the loss of their anonymity, which having a legal call sign would bring.

Hardly.

> They are like the girl who cried wolf, un fact Twisty brought your name up
> last week
> many times I guess he figured you were behind some of the shenannigans.

Twisty is enamored with me, as he is with anyone who's paid him a little attention in the past. He craves attention, which is why I stopped "debating" with him. It was a hopeless cause and I'm not going to contribute to the inflation of his self-importance and ego. He's not interested in discussing points. He just wants to insult people who don't share his sociopathic disregard for the common rules of law and courtesy. He also likes being at the center of attention, however negative it may be. He's like the "black sheep" of the family, who pulls the Christmas tree down, while the rest of the family fawns over the other brother or sister's gifts. Even thought it may not be positive attention, it is still attention, and he knows that his stunt is what the family will remember and talk about for years to come.

That's why it's pointless to make up web sites about him, or to mount crusades to "rid the airwaves" of him. He thrives on that sort of attention. As long as his relative anonymity is secure, and he feels that noneone will ever do anything "serious" other than banter on this newsgroup, he's free to play the part of the cartoon character. Once he feels really threatened, watch his demeanor suddenly change....

> They have no clue who is doing what, as evidance of their accusations at me
> and Leland. that's why they accuse like 3- 4 people every time
> by luck they may get it right if then name enough people.

There are many self proclaimed "internet sleuths", who think that they know far more than they really do, when it comes to tracing I.P. addresses. What it all boils down to is that no one knows who anyone is for sure. They just take big guesses. Notice than no one can prove any of it.

All I know is that if the lightning is within 20 miles of my house, it sets
off my smoke detector for about a second.
That's how I know if there is lightning in the area even if I can't here the
thunder. Doesn't blow it out, just sets it off.

Very cool old all-metal walkie talkie from 1960. Works!

Thanks for looking

i think you are missing the point sideband.......i ask you what is so
bad about it........it wasn't bothering anyone and if it did, so
what......the point is it was not bothering most people... , these
seperation of church and state types masquerade behind the
constitution to do their dirty work, but when ever someone stands up

about it, then they are immediately branded religious zealots.......if it is so bad to have such a thing in alabama , then why don't they take it off of the us supreme court building.........why don't they quit opening up the sessions of congress with prayer???? and why do we need a senate chaplain???? heck seperation of church and state doncha know.......we can't have stuff like that can we.......???? but we can damn sure have a towel head at the 911 rememberance ceremonies talking about nothing or some innocuous raghead at el paso to welcome back guys that served in iraq.......you know ...as a soldier i can tell you, if it was me.........the last damn thing i would want to see is some muslim up there offering up bogus prayers to a bogus god of theirs...........but that is ok you see,... here in this politically correct country of ours but some harmless stone monument with the ten commandments on it in a public place in alabama is somehow offensive.......give me a break.......also if you think the uproar about this is bad, you wait till they try and tax the churches and church property...........then you will most assuredly see a uproar...........no doubt about it...........

Wanna bet? There are moves afoot to push the devices into all sorts of transport equipment which don't currently have 'em (and arguably don't need 'em in most parts of the world)

> The problem is
> the 121.5/243 MHz ones cannot support embeddded data, and

> alarms, over 90% in most countries, inc NZ.

That and the satellites are already way past their use-by date, plus there are the usual interference issues. Txing on 121.5 is awkward (airband) anyway.

> The 406 MHz ones certainly support embedded data, but you pay a lot
> for them. The big cost driver is the very stable oscillator required,
> plus the many thousands required for certification.

This will come down rapidly. The oscillators can be selftweaking off GPS clocking information, providing ongoing accuracy feedback and substantially reducing setup costs.

Just as long as the beacons don't start suffering blue screens of death...

>responsible and LEGAL radio operation.

>Philosophically, we are in agreement.

Yes,,you, lelnad, Geogre, N8wwm, and Sparky usualy are in agreement,,,he
"voob" team of lids..

>I am

>not, however, a proponent of some of his

>methods.

But you don;t speak out about it...whoops,,another self-contradiction,
as you claimed, and believe, on condones it if one doen't speak
out.....lol.

> There is a difference you know....

(Dave I hope you don't believe the snake oil they are selling.)

>Hardly.

Aww,,isn;t that sweet? (chuckle? Support from the oly place they have
ever been able to find it, from each other,,KC8LDO, Wa3moj, KC8LDO, and
N8WWM.

(They are like the girl who cried wolf, un fact
Twisty brought your name up last week
many times I guess he figured you were behind some of the shenannigans)

Got that right. Anyone that would break the law to receice sexual
pleasure involving minors cn not be trusted to obey any other laws, and
certainly can't have their word trusted.

>Twisty is enamored with me, as he is with

>anyone who's paid him a little attention in the

>past. He craves attention, which is why I

>stopped "debating" with him.

Let's place your bullshit into perspective. YOU came at me long ago, calling me a criminal for freebanding. I illustrated your hypocrisy of your own acts of breaking the law when you were calling us criminals for freebanding on 27. I illustrated many posts of yours that break the same laws you hypocritically call others "criminals" for. You went to pieces over this, getting off topic, making your posts all about MEMEMEEMMEMEMEMMEMEME! You never have recovered. You astutely claim that you no longer break the law in the criminal manner you used to. This was also proved incorrect and an intentional lie by you, as your posts within the last two years prove you broke hammie communication law..but let's run with that claim, Hall, and assume you are telling the truth and that you no longer break the law,,,,YOU still initiated the namecalling and insults. You really went to pieces when you lied about a hammie getting popped in Philly, which you claimed was IN Philly, then when I hit you with the lit of goodness, you scurried like a cockroach and recanted your claim, claiming it happened in a suburb OUTSIDE of Philly, but you were never able to name it, illustrrating your lies......THIS sent you over the edge, and you became "enamoured" wiht myself, going as far off topic as claiming you are PHD qualified to diagnose internet strangers with maladies..LOL. I ilke when you get mad, Davie,,your lies come rolling to the forefront and are so easy to punch holes in.

>It was a hopeless cause

Sure it was. Instead of merely backing your claim, wich you couldn't do because it was a lie, you attacked the one who proved you lied,,MEMEMEMMEMMMEMMEMEMEMEMEMEMMEMME..LOL.

>and I'm not going to contribute to the inflation

>of his self-importance and ego. He's not

>interested in discussing points.

Speak for yourself. Merely google the conversation we had about your lies about the cber in Philly,,,anyone can see who became, obsessive, insultive, off-topic, and full of hate and piss. Instead of backing your claim with anything, anything at all, you chose to go off on a tangent, refusing to provide anything but your claim, and ever since,you have never recovered..hahhahah!

>He just wants to insult people who don't share

>his sociopathic disregard for the common

rules of law and courtesy.

I insult no one who hasnt; initiated trouble, Hypocrite-Hall. And I may be sociopathic, but you're a sexual deviant that has committed crimes against children, accoridng to your post. These kids were victims of yours, as you claimed a sexual satisfaction from illegally monitoring their cordless phone calls to listen to them talk about their first

experiences with sex. You're a pervert, Hall.

> He also likes being at the center of attention,

>however negative it may be. He's like the

>"black sheep" of the family, who pulls the

>Christmas tree down, while the rest of the

>family fawns over the other brother or sister's

>gifts. Even thought it may not be positive

>attention, it is still attention, and he knows that
>his stunt is what the family will remember and

>talk about for years to come.

>That's why it's pointless to make up web sites

>about him, or to mount crusades to "rid the

>airwaves" of him.

Oh, but it's not pointless, David Jr,,it illustrates your ignorance and pulled acceses, and befoer you say it, just post from there, Davie,,,oh that's right,,when asked for proof, or to back anything, you need switch your topic to MEMEMEMEMEEMEMMEMEMEMEMMEMEMEME...LOL..Poor, pathetic, guy.

> He thrives on that sort of attention. As long as
>his relative anonymity is secure, and he feels

>that noneone will ever do anything "serious"

Example? Just what do you consider serious, Davie? If you;re speaking for yourself,
and have something to say, say it,,,,but you won;t ,,I have illustrated what a yellow coward you are, and YOU have ilustrated what a lying lid you are, AND a sexual deviant.

>other than banter on this newsgroup, he's free

>to play the part of the cartoon character.

I'm free to do whatever I want, and I have several of your posts where this is one of your problems..you jsut can;t get over your self,,,,hahaha!

>Once he feels really threatened, watch his

>demeanor suddenly change....

HAHHAHAHHA..you;'re treading in Lelnad waters, 'ol yella! Why on Earth would ANYONE feel threatened for posting on a cb group? AHAHHAH,,I'll tell you why, because that has always been one of your tactics,,,,you

know it I nknow it, and the whole group knows it,,you are indeed part of that little group of lids, like it or not. You've been told by hammies and cbers alike, that you;re way off base and your views are in the extreme radical minority. Deal with it and you may learn not to hate yourself as much as you do. Self-loathing is a terrible trait, davie,,ibut then again, if I was attracted to underaged kids, I would hate myseelf as much as you do.

>They have no clue who is doing what, as

>evidance of their accusations at me and

>Leland. that's why they accuse like 3- 4 people
>every time by luck they may get it right if then

>name enough people.

Oh, no,,we accuse no one, We have the Voobs post mentioning you lids by name of KCLDO, N3CVJ, WA3MOJ, and N8wwm,..Remember, YOU defended him many times, Davie,,only when he names you, he suddenly is incorrect....LOL..Oh Davie,,what a poor, mess you find yourself in,,,perhaps, some day, you will manage the therapy needed so underaged childen speaking of sex doesn't excite you and you can return to a normal life and not one that is akin to a pedophile.

>There are many self proclaimed "internet

>sleuths", who think that they know far more

>than they really do,

And there are lying POS's like you that make claims about cbers getting busted and when asked about it, attack the person that asked about it when he can find no record of it anywhere, even with the FCC. The mention of this to you, sent you off the deep end and reeling with insults and off topic rematks and insults that YOU initiated.

> when it comes to tracing I.P. addresses. What
>it all boils down to is that no one knows who

>anyone is for sure. They just take big guesses.
>Notice than no one can prove any of it.

>Dave

>"Sandbagger"

You keep on believing that, We;'re used to your self=professed ignorance, and it IS your right ot remain so.

"Twistedhed" <twistedhed@webtv.net> wrote in message
news:28315-3F46AFA5-13@storefull-2312.public.lawso n.webtv.net... So the
company you work for
is open all night long? Hardly,,,

>Since you don't know who I work for then you

>definitely wouldn't know.

Of course I don't know,,,don't care either, YOU made your work an issue
several times, YOU brought it to this group, and as usual, you won;t
even comment on the hours because you know you;re about to throw the
proverbial trap door under your clubfoot wide open and that noose around
your pudgy neck is scaring the hell out of you,,,,
LOL.....but,,check it out,,,I most certainly know what hours you CLAIM
you work. In fact, you;ve made, youve made several posts claiming such.
You;re so confused about the plethora of lies you told that you cant
remember WHAT you said....LOL.,,this is preventing you from daring to
mention anything concerning your work,,LOL. Again,,by your words, your
company is not open all night long, effectively wiping out your lies
that you were posting from work when using your pulled Bignet account.

>Finally you can't tell a forged post from the

>real deal, which is how you got in to the mess

>you're in now.

Well, then explain why your forge of me is not to be found anywhere but
in the body of your email, lid...LOL...no archives, nowhere..except the
body of your posts is that forge to be found, Mr.self-described
ARRL....LOL.
The mess is yours, Lelnad, illustrated perfectly by your dancing and
claim after claim backed by......nothing but more claims..LOL.

>The logical thing is if the posts in question are

>forged then being posted outside of my normal
>working hours isn't so surprising.

HAHAH,,,,only it's not "outside", lying lelnad,,LOL,,it's only in the
body of your posts......LOL.
See, we aren't speaking any forge from Bignet, Lelnad, only your death
threat which caused you to lose your account and your latest claim that
you were posting from your place of employment. Why did it take you two

days to get back to my posts? Oh, never mind, the contingency is aware you had nothing to offer in the way of substantiation last week when asked for it. You were forced to respond Sunday, with predicted insult, to what apparently enraged you and confounded you Saturday,,,,,such as the tough questions you prefer not be raised, also illustrated by your instant shift to the poster as your preferred topi:c (MEMEMMEMMEMEMMEMEMEMMEMMEMEME...hyuk) and insults directed when you were asked to back you claim. Poor, poor, Lelnad with his poor, poor ego..LOL.

>Your problem, being as stupid as you are,

LOL,,stupid is as stupid does.
"Being stupid" would be reposting the post where you asked to blow a volunteer examiner, over and over, in the same manner you feel the need to post a forge in your posts.....hehehe! Only, some of us are above that type behavior,,its why you;re always looking up to me for approval and hanging on my every word.
You have not accounted for any of your claims,,,,i have accounted and presented all the evidence a jury would need to eliminate reasonable doubt, yet you maintain your lies with nothing to offer but anger, insults, and more claimed lies......period.
is in the failure to account for that possibility.
The possibility you suggest doesn't exist, "nad. You made a death threat from bignet. Speaking of your forges when your death threat is noted is a hell of a way, not very effective, but a hell of a way to try and deflect speaking of your death threat and perfect illustration of your yellow lack of self-control . But we can focus on your forge, if you need, Perhaps the term "jock" is to endeared to you that you have no choice but to pleasure yourself with it on a regular basis.
Your back is against the wall and I have most definitely proved beyond a reasonable doubt you are a troubled, upset, angry lid that intentionally provoked cbers as a means of entertainment,,,,YOUR admitted post told us, this Lelnad. that's pretty pathetic, even for a subterranean dweller such as yourself.

>You don't have any reasonable explanation for
>it so you just conveniently ignore those

>troubling facts.

You;ve presented NO facts , Lelnad..But I have,,,no bignet before or after your threat, no headers on your forge and it exists nowhere else but your posts, self-contradiictions concerning your work, etc., etc., Your claims are the furthest things from facts. Now, I, on the otherhand, hae illustrated the chain of events, the FACT you had no access prior to and after Bignet. Couple this with the your past threats toward myself, lack of self control you display when it comes to ol twist, and your death threat, AND your disappearance from Bugnet directly after your death threat, never to post again from there,,and wel, Lelnad,,,your claims fall completely apart, don't they mister ARRL? LOL.

>You really should leave the

>thinking to those that have a normal or above

>IQ since you have amply demonstrated that

>yours isn't up to the task.

I'm quite content with what I have posted. Is yourself that has a problem with communication.
My "demonstration" had you responding and scrambling all weekend to explain yourself away,,,it occupied your Friday night, your time Saturday, and again Sunday. You keep returning to add more...hahahhahha!

>I'm still betting on the monkey over you and

>the monkey has the better odds too.

LOL,,you;re still betting...lol...the dice were rolled and you lost,,hahahah!-\ You go on and continue to "bet", it illustrates your incompetence and impotence.

>Leland C. Scott

>KC8LDO

>ARRL Member <-- It's still here TwatHead

LOL,,ultimate perfection. Your insults are now becoming more obsenity-laden. Lelnad MADD!

><8-))

:)~

>NCI Member

>Charter member of the

>Lawrence Technological University

>Wireless Society W8LTU

>--

Chin up, Lelnad,,,you did it yourself. but, there really is no reason for your lack of self-control to manifest and call people juvenile names, but the name "Twathead" most certainly illustrates the mentality of your juvenile intellect was it does your increasing hostility and uncontroled ire.. Nevertheless,,,you a guilty, nutha' sucka.,,perhaps this is what has you beside yourself unable to make any sense of your life of chaos, ire, and unhappiness. Judged guilty by a jury of your peers,,,,hammies AND cbers. DOn;t worry, Lelnad, the world is not against you as you incoherently interpret, Everything is personal to you due your mild retardation, Trust me, it's not personal, as you're a nobody. It's your behavior that sealed your rep as a hammie failure that

couldnt' cut the mustard,,,oh, and lid. :)~

"BigBill" <Bill@comecast.net> wrote in message
news:H_p1b.225053$Ho3.29214@sccrnsc03... You are full of SHIT on all
accounts.

_
(No. Like they will go looking for two kids talking on the little walkie
talkies.)

>No, but they will go after some dumb yo-yo

>who can pay the $7500 fine to make an

>example out of them.

_
Source? Example? Anything that brought you to the conclusion that the
FCC actually has a person ascertain WHICH person can afford the fine and
who can't? And how is this accomplished? And how do you claim knowledge
of such a fantastic lie? How is this done, Lelnad? By subpoena of his
tax returns? LOL,,you;re talking through your ass again and the way you
wish/want/hallucinate/need things to be,,not reality.,,,,,the problem
that plagues you,,,detached from reality.

>He can post his silly comments on

>"alt.radio.family".

We're not talking about HIS comments, but of YOU talking out your ass
again about somehting you really have no clue,,you see, they are YOUR
silly comments and they won;t go away. Either cite your example or move
on,,of course, you can use this as an example to cry about
MEMEMEMEMEMEMEMMEMEMEMMEMEME since you have no examples, are lying
about it, and I pointed it out...after all, it's ALL you can do.

>They will be more than happy to bury him in

>examples.

>If you're that interested

YOU are the one interested, YOU made the claim, YOU provide the exampe,
Scott.

>go there

>yourself, unless your too chicken.

LOL,,you;re a lid. See how you turn angry, malicious, and attack
unprovoked when

asked to back your claims,,,,..its first nature to your lidness...yes,
KC8LDO, the entire group is correct about you, cbers and hammies alike
know you are the worst example hammie radio has to offer. Last time you
begged me on your hands and knees for weeks to follow your yellow tail
to another forum and had your collective clock cleaned. When I refused
to follow your demands, you forged me in a hammie room, "Mr. ARRL
representive" and it took hammies of your own kind to tell you what a
sourcge to the hobby you have become. As usual, your ego took such a
battering, but nowhere near the level you have been experiencing as of
late..hahha
  You merely had to say "No, I have no examples and made it up." But
since Mr. ARRL rep KCLDO was dared asked to back up one of his bullshit
claims, note the need for his immediate insult, illustrating the wasted
ego and lowest self-esteem he has projected in years.

>I'm not going to bother since it so easy for the

>other poster to get the info himself and I can

>save myself the bother.

The brother's Lid,,,LOL...you and Davie both have problems
substantiating things you each claim,,LOL,,, have a penchant for
refusing to provide anything. Let's see,,now how can this be MY fault
for you getting caught in another lie? (ROAR) LOL!
Tee-Hee,,,you can "save" yourself nothing,,,you simpy made another claim
with not a single shred of remote credibility nor a single example. Yet
ANOTHER claim with not even a remote
URL or single piece of evidence,,,,ONLY your word...
You're a pathological liar, Lelnad...lol. Now, quick, tell the world how
its all that illegal, sociopathic, criminal twistedheds fault that
you're impotent and get caught in your own lies....hahahhahahhahaah!
Just do it!! YOU can FEEEEEEEEEEL the swoosh....LOL!

>Make enough examples and the rest will get

>the message.

How many is "enough"? Hammies have been getting popped for years and
years for the same infractions,,,,,,,,,,,appears they didn't "get the
message" you claim, despite thousands upon thousands of hammies that
have been cited.

_
(How will they know if the ones that are talking have a license or not.
Are you going to sit on your ass and type in all the call letters and
check it to see if they are good.)

>It happens all the time. It won't be the first time
>somebody has looked me up on the FCC

>ULS, while talking to them on the air, and

>came back asking me if I'm so-and-so from

>such-and-such place.

Me too,,happens all the time,,,,and I have you to thank for it,
Lelnad,,,,all because you went pieces way back when and became SO
enamoured with me,,,,,,,,,that you took to using your free time to
search the net on anything you can find on twistedhed. You found my
article on freebanding and brought it here to the group to criticize,
not only the content, but grammatcial structure which you have never had
a clue.....you sure had a hard-on for me, Lelnad, adn it continues
right through today, but as always, I will continue to not permit your
blatant lies and malfeasance merely because you suffer a huge deficit in
communication and were never taight any better..

> In fact it happened just

>a day or so ago when I was talking to a

>station, on 2m sideband, in Cleveland from

>Detroit during a tropo band opening. Others

>have been caught bootlegging red-handed on

>the Ham bands that way using BS callsigns or

>"barrowed" callsigns.

But of course, you again have no example, nor can you cite one, but I'm
certain it has happened at one time or another but since you don;t kow
this for certain, its but another lie.
It's why you failed to even address the questions posed you.,,,,your
lies stoped you dead in the water..... Nevertheless, ignoring those
questions you know illustrate your lies is better than attacking one for
merely asking you to provide any substantiation for your claims, and
"substantiation" does not include MORE claims by yourself, despite your
twisted beliefs and "T" on your forehead....LOL.

>Its funny when they can't

>seem to remember their address, or the city

>they live in.

Or the address they provided to the FCC. How come YOU failed to provide
the FCC with your current and correct address, Lelnad?
THAT is a law, not a request, per the FCC, that all hammies must comply
with. This is just one law, in along line of laws you hold yourself
above while bitching to cbers about the laws they SPEAK about. Don't
forget your inquiries about seeking information of how to circumvent
your local laws, oh Mr. hypocrite ARRL Representative...LOL.

_
(Send the Walkie Talkie police to all the National, state parks,
Lakes,and
all the neighborhoods . This is a real bad thing.)
>It is.

Lelnad, do you feel such tactics are worse than licensed hammies (admitted by a self-professed upperclassmen illegally monitoring private phone conversations? Just for the record, of course, and I didn;t even mention his sexual relation to his crime.....

(O shit I scared.)

>So should your wallet.

Not everyone is as unfortunate as you and NO other hammie is as hung up about cbers as you,,,,except Geogre and HH. Even N8 was slapped by the big hand of the law for thinking he was above it...LOL. You're more than likely next, Mr. ARRL

Message-ID: <0ot2b.114752$JI2.12633@news02.roc.ny>
Source record: 164547

Dave, digital is also being shipped off shore, only digital will be in Japan. All production either now is or shortly will be in Mexico, India, China, or Japan. Oh ... I forgot Hungary, but that is going to disappear shortly too. They sold copy products (not enough profit) and it is doing wonders for Heidelberg. They sold medical products, and J&J is making money hand over foot with their former business. So I suspect it is something much deeper than simply the fall in demand for film. BTW, a lot of other business are doing the same. Now that they have reduced taxes on the rich and are eliminating the middle class, I wonder how this will play on balancing the budget :)

3015. Re: Packet Ops

Newsgroup: rec.radio.cb
Date: 2003-08-25 19:25:47 UTC
From: twistedhed@webtv.net
Message-ID: <10513-3F4A62BB-147@storefull-2317.public.lawson.webtv.net>
Source record: 164549

>Sorry Ronny,   you are confused.

Apparently not as confused as you, as my name isn't Ronny.

>I never said I

>was sending it to Riley.

>I said I was sending it to the FCC.

My apologies, kind sir. Nevertheless, why not send it straight to the source?

>Oh and BTW you don't think enforcement

>cares or can catch anyone of you packet

>racket fools?

Of course they don't give a damn about anything that goes down on 27 MHZ. Most realized that with the FCC abdication of enforcement there. The only thing the FCC does is pacify some of you crusty, angry-types who complain and complain about other ops until something is done. This is a very big difference than the FCC "caring" or patrolling for such violations.

> Ask the guy in Miami how much his

>equipment cost that was taken by the Federal

>Marshalls a few years back.

 Why? What does the value of the confiscated radio equipment have to do with the FCC "caring" about 27 MHZ illegal activity. He was warned prior to his problems he self-created. But you may inquire and find you will, that the incident you speak of, was a reported incident, not one where the FCC was patrolling for scofflaws and merely "happened" upon him.

>Caught up to him right in the middle of that

>packet burst to the Frency BBS.

He deserved it. He was warned.

>You people are idiots. Why don't you just get

>your 'hammie' license and do it legal?

  What does having a license have to do with it?

>The only "idiots" are the ones who continue to

>be of the incorrect and fixated mindset that

>hammies don't freeband or break the law.

Again, check the rainreport.

>Miss the

>thrill of never knowing when there will be a

>knock on the door?

Has nothing to do with anything you speak.

>Im right...you people are IDIOTS.

>Dan/W4NTI

  Idiots are those who fail to comprehend that another may actually have differing interests than those of yourself. If you can't understand this...you may indeed be another with a call sign expressing the peculiar need to undermine his license. Lack of communication and debate skill can be illustrated no better than by unprovoked insult. Ironic that some, not unlike yourself, hold that a license is the deciding factor between good guy/bad guy or idiot/genius, especially when difficulty expressing communications without insult that effectively convey your message is evident. Are you a member of this "ARRL", too, Dan?

3016. Re: WA3MOJ CLAIMS "NEVER SAID I WAS WA3MOJ"

Newsgroup: rec.radio.cb

"Twistedhed" <twistedhed@webtv.net> wrote in message
news:28311-3F46AE81-117@storefull-2312.public.laws on.webtv.net...
No,,the bignet email I received claimed you were "dealt with."

>No you said "pulled".

I did. And I stand behind what I write.

>Just to make a fool out of you again

"Again" implies it happened in the past. You've had no such luck your
entire existence.

>and prove

  You've proved nothing except a depsperate and dire concern of what
the entire world, and most magnificently, myself, think of your gaffes
and screw-ups. One has but to merely glance at the effort you devote to
defending yourself of something you claim didn't occur.

>you can't tell anything but lies read

>the copy of your other post which should

>refresh your defective memory while exposing

>you as a liar.

Again,,,just your extraoridinary claims. My claims are backed by facts:
1) You were caught lying about the hours you claimed you post from work
in the past. It's why you abandoned the inquiry of the hours of
operation your "company" office keeps. But now that I mentioned it, you
go ahead and present yet another claim explaining it away,,that you were
unable to address in the past. And before you begin, have they kept the
same hours for at least the last two years? :)

2) You had NO other access at that time period in whcih we speak of
except the Bignews account. You had an acocunt PRIOR to Bignet, and yet
another account AFTER Bignet, directly after your threat,,,,so, the
question begs,,,,why did you NOT access the group in any manner
whatsoever from your home, the ENTIRE time you were utilizing Bignet,
but (drum roll, please,,,,,) coincidentally (LOL) after your threat,
resumed accessing the group from yet ANOTHER posting access, which, was
NOT the same as your posting access PRE-Bignet.....,LOL!.

Gee, Lelnad, this is your forge that had your Bignet account
pulled....that's why the post doesn't exist at all anywhere in any
archives,,,it exists only in the body of your posts... Or was it one of
<snip>

>I'll bet when you contacted the ISP they only

>said the person was dealt with but they would

>NEVER say who it was.

LOL,,,you were the only Bignet poster to complain about, lelnad....YOUR
threat.
You are the only one that has ever threatened me along with Dogie N8.
Wait a sec,,,,Davie has alluded to me being "threatened"
also,,,gee,,,LOL,,Voob nailed you all to the proverbial cross,,,each one
of you that he mentioned as the group lids has threatened me,,,,well,
except Sparky,,,,although he can be a pro-troll, he does thave that
education that tells him just how farhe should go prior to crossing the
line of questionable legality. Just for the record,,,,are you somehow
inferring or claiming that WASN'T you that cowardly posted I was a "Dead
Fish"?..LOL. Right after you just said that bignet account was from your
work? HAHAHAHHAHA! Poor, lelnad!!! You're worse than a used car
salesman, at least they are semi-convincing to SOME of the folk SOME of
the time,,you're convincing no one, not even yourself,,,ahhaha,NONE of
the time..,LOL! No wonder you feel so low and bad about yourself, you've
wrecked yourself, but you can't say you weren't warned and deserving of
it all these years. Hell, all groups need the token clown, like the
village idiot..tell you the truth, way back when, I didn't figure you
for the lid type, but your true colors came quickly via that lack of
self-control you proudly exhibit. The hammies can't stand you, the cbers
kick your collective ass on a regular basis by merely pointing to your
own words as contradictions to your claims, and your world has fallen
apart.

>I've had one or more

>people contacted for pulling crap on usenet so
>I know for a fact what goes on when a

>complaint is made.

Your facts are nothing more than claims disproved over and over.
At least I post your idioso remarks and allow the masses to judge you an incompetent, lying lid.,,lol,,you need resort to forges, Mr. ARRL man,,,hahhahahahha! If you don't like what you've become, the cure is simple, stop lying and stop attacking, ...but, your ego is so heavily involved and destroyed, it will not alllow it.

>So you still remain totally clue-less as who

>was posting what.

Sounds like a straight out admission that you know exactly who does what....in fact, it was an admission. No surprise there, as you had a direct hand in N8WWM porn-spamming this group. Twice, when you fell off the wagon, you even threatened that YOU would bring him back to resume his disgusting filth he was spamming us with.

>So somebody got it but how many people

>have BigNet accounts Twirt? 10, 100, ...

>1,000,000

Only you in here at the time, genius. Only you made the threat. This is one of those times in which your inability (due the comprehension deficit you suffer) to see yourself as the majority does is paying off huge freakin' dividends...LOL.

>so how are you going to prove with out a

>doubt that a particular account belonged to

>so-and-so with out the ISP telling you?

Is THAT what has you menstruating like a female goat? You waiting for proof? LOL,,you poor, poor man with that poor, poor ego. I have no intention of supplying you with anything. I supplied the post of your threat (need to see it again for posterity's sake?), your sudden disappearance after your death threat and my complaint was there for all to see, as is your peculiarity of not posting for the entire time you had bignet, as is the fact you had a separate access before AND after Bignet. If the group was a jury, there would be no reasonable doubt, as YOU, Lelnad C. Scott, were the ONLY person posting via Bignet who threatened me and told me I was a "dead fish".
This, presented and admitted as exhibit 'A", coupled with your past references and predisposition to violence, with your preferred mentioning of the method "shooting freebanders in the head",,and you are a guilty 'nutha sucka'! Sentence is hereby handed down. You will be forever more, branded the lid of rec,radio.cb. Appeal denied. Try again next year. Bailiff, get this malcontent out of my courtroom.

And again..

>Again like you never have, you have

>harrassed many people including me

send virus's,

>Now your lying, show proof that I have ever

>done anything like that.

 No,,YOU prove it wasn't you. You have asked several on this group to
prove double-negatives several times..it is now YOUR turn to provide
proof you didn't do what everyone knows you have done.

(sign you up for Spam,)

>Again show proof,

_
Again, prove it was not you, as the burden of proof is ON you, as you
are the only one denying the belief the entire group holds of you. It is
not for anyone to prove anything about you, as your reputation is sealed
in cheap plastic...if you are unhappy with such, you need prove everyone
wrong and yourself right. If it wasn't such a concern you wouldn't make
it such a front issue.

_
(false accusations,)

>Which accusations are false that your a

>blatant homosexual that has been proven to

>post in the transexual Newsgroups.

Shark didn't make the posts. That you somehow feel YOUR claims of another are to believed by anyone, anyone at all, illustrates how severe your communication deficit really is...

_
>Nothing

>false there your ip, name and computer are

>stamped all over them.

 According to Lelnad and Hall, one can't go by IP numbers. Davie Hall N3CVJ made that post just today. Did you miss it?
But, alas, these two are masters at offering obfuscational techniques and reasons why it means nothing and should be discarded. Hell, the Hypocrite Hall made repeated lies claiming he accessed the group in only ONE manner all these years, with the exception of a "short stint when his posts all originated from Villanova."
This was, of course, absolute bullshit and when he was asked about it, he denied it, as usual, and took to whining about the poster, and cried much the song you are now whining.. "Pwoof, Pwoof, gimme pwoof".....he foot-stomped and denied and demanded I post the complete headers and ISP numbers that not only matched, but originated with his computer. I did so. Hall's claim of defense expertise? "I have no idea how my headers came to be shown there,,perhaps my server routes my posts through Villanova".......LOL! That ilustrates the intellect emanating from, well, from where? He didn't inform the FCC when he moved a little while back.....
I think your self-described AKC club should be referred to as the Liars' Club,,heck,,Voobsie nailed the master-liars by name. We'll provide the calls

_
>that's the kind of philosophies you believe in?

>everything you have accused me of you have

>done the same,

 Of interesting note is the refusal to acknowledge your own behavior. The self-hatred and communication deficit you suffer from, dictates refusal of acknowledgement of your own behavior. Your damaged psyche triggers a denial-defense mechanism that insist you meet all inquiries of your own behavior by invoking anothers.

> Well, forget the FCC - your problem will come very quickly from the repeater
> owners and users.

That makes me curious, Jim. Where will I find mention or listings of
these operations? If they indeed have set up repeater networks as you
imply, they must talk about them somewhere.

There's something there I should at least know about and perhaps
something to be gained from buying some better equipment later on.

> Of course, if you don't have your
> sub-audible tones set to open the machine, you won't open it ...

And if I don't use the upper 7 channels on my radios, right? They are
the only frequencies used by these radios that are listed in the
bandplan charts I found online for repeater operations.

> My consistent range runs 20 to
> 40 miles with a handheld to a repeater (depending upon local terrain). Out
> in the open, it runs closer to 40 to 60 miles using a 36 inch whip :)

As I would expect with several watts into a good antenna on UHF.

Thanks,

Mike D.

Dave I feel the same way, I wouldn;t waste any time making wepages about
them either my repkys to them in the group already constitutes enough air
time
for them. But there are others who don't post as much to the group and have
the time to make the web pages, that is thier contribution to the group, ya
know what
they cry about these made up web pages yet they hold one of thier own. Me
and a few others are the center of attention yet I never once cried about it
like they do. Go figure... Have a good one Dave.

well jim ....which way is it.........up going down or down going up.??? i had a friend of mine that came home from work one day ....and found a gaping hole in his roof right over the couch where he watches tv when he is home......needless to say, being the nice guy that i am ......i told him.......too bad, if it had been just a little past 6 in the afternoon, it would have been much better......of course alas he did not see the humor in that.........however , it came down the big pine tree in his yard and jumped over on his house and blew a hole in the roof......how about them apples???

From: Nojunk_n3cvj@worldlynx.net (Dave Hall)
>It's a sure bet that the king of the punch

>clowns will unleash a barrage of untruths,

>ad-hominem insults

Tut-tut, Hall, it has been shown you iniated the
insult tossing between us, and attempt such with just about all your
posts. You have become so accustomed to lying it is now second nature
and you are being extermely careless as to your claims which are melting
away before your eyes.

> and other groundless

>APD inspired nonsense in response to my

>response to you, much like a child has a

>temper tantrum.

Ahh,,,,now we understand your radical position thqat rendered you
hysterical when I simply asked you for proof way back when about your
lie concerning the cber in Philly you were unable to cite to back your
claim. You merely "had a temper tantrum.:" Thanks for clearing that, up,
Davie-son.

>And you remain as predicatable and true to

And you remain as ignorant as ever. Use spell-check. A typo, I can
accept from anyone. A spelling error, I can accept from most, but not
you, as you live in the most cracked-glass house I have ever
encountered, but you still think you are in a gravel pit throwing
stones.

>form as ever. I can just imagine the inner

>turmoil that you must have wrestled with,

Sure you can....you can't even imagine an original thought, let alone
anything else,,you;re already off and plagiarizing me..LOL.

>deciding whether to resist the overwhelming

>urge to run your fingers and unload your usual
>ton of B.S. which has become your trademark

LOL..so, you give me a trademark, now? Cool,,,think it will have the
same effect on you as my article did on Lelnad? Oh, wait a sec, it

already did...hahahhahahhaahahahhah!

>and prove my above statement wrong, or not.

All your statements are wrong, Davie, especially the one where you claim to represent the "good" of hammie radio, where you maintain yourself some type of pro-legal radio advocate, yet break the law to entertain your own twisted, deviant fantasies.

>I can see

You can see nothing. You can't even see your behavior is shocking. A man in his forties claiming he receives "juicy" pleasure from breaking the law and listening to what you claimed you did, is sick and demented. But go ahead and rationalize that perverted behavior to yourself by holding cbers who talk skip as "criminals" and "sociopathic anarchists" and who "condone poor behavior for not speaking out against it." It just may keep you occupied until the police catch up with you. Most are aware that sex freaks are not cured, just treated. Chances are your acts of deviant perversion will catch up with you and the law will be there to lock your ass away, if you;re fortunate. If you're unfortunate, you will be caught by one of the fathers of the children you spy on to get your kicks.

>that your lack of self control made the

>decision for you.

Actually, your deficit in communication prevents you from seeing the rational scenario. See, my web address, posting access, and email has remained the same after several years, illustrating great self-control. I thank you for giving me the opportunity to clarify your lie and penchant for making all your posts to one of that of an insultive and personal nature.

>you really can't resist getting in the last dig.

You're right, but only when you can't resist initiating it and getting in the FIRST dig.
A circular argument caused by your initiation.

>A true sign of a narcissistic personality.

And your post telling us of your,,er,,hobby,, is a true sign of one who suffers dangerously close to, if not full-blown, pedophilia. Point?

>A narcissistic sociopath...

...is extremely more accepted by society than one who commits crimes against our children with a sexual connotation involved. As a narcisstic sociopath, I would present a danger to no one except, possibly myself,,,as a pedophile, you would present a danger to children everywhere.

>It's no wonder you can't do any better than

>charter captaining.

BETTER? LOL...It's no wonder you're only permitted supervised, monthly visits.

>I've sat quietly by while you frothed and fumed
>over George, Leland,

Well, you didn't. In fact, if you would have stayed quiet, you wouldn't have been so drunk and posted your sicko doings on usenet.
But since you want back in the fold of trouble you are used to creating,,,

>and the gaggle of anonymous people who are

>getting kicks out of pushing your buttons.

That says quite something about the intellect of such people, whether you can comprehend such complexities, or not.

>You never fail to respond to any of them.

Correct. Diect a post toward me, I will respond. If one directs a post toward another, the one who initiated it wishes for a response. This is how usenet works. It falls under c-o-m-m-u-n-i-c-a-t-i-o-n, an area in which your gray matter has no function, and that of which you suffer a magnificent deficit.

>Have you no restraint?

Of course. It's why I remain with the same addy and posted email address all these years and access, as well. You fumble when speaking of all your accesses. Well, to be accurate, in fact, you lie.

>Of course not,

Talking to one's self is fine, answering oneself, however, is loco,,and a self-professed protege of 'psyche would already know this.

>your narcissicm prevents that.

And it would appear pedophilia prevents you from unsupervised visits.

>general disrespect for rules.

Exactly the same as you did, and proabbly do,,well, not now,,,your too worried about getting your addy in line with Uncle Charlie now,,LOL.
Sort of like your blatant disrespect for your TOS

>#1 What "TOS" rules have I allegedly ever

>broken?

Ahh,,,Davie,,,you love to tango, but are lousy at it. You can't handle example or proof without wetting your panties and crying about the character, not the topic, which you, Lelnad, Geogre, and N8 have ALWAYS preferred.

It's a symptom of the massive communication deficits you all share.

>You see, just like you, I am entitled to an

>opinion, and am free to express it.

Sure you are.....and I will never call you a name or reduce myslef to your level of condescension to another for their mere offered opinion, but get one thing straight,,you are nothing like me, and you never will be. Come at me, don't cry about what you get in return. Your statements concerning the listening on little kids makes you a pervert, and nothing in the world will change that. , so YOU see,,you are NOTHING like me, or anyone I have ever associated with, let alone known. You are the first sick F###* I have ever had the displeasure of coming across.
No wonder you can't stand the south,,,,those stories you heard about good 'ol Dixie? They're all true, bud, especially when it comes to crimes against children.

>Somehow you seem to think that when I am

>doing such, that I am in violation of TOS rules.
>How are my posts any more "illegal" than

>yours?

Never claimed your posts were "illegal",,just in violation of some TOS. (shrug) You claim you have the same ISP, Davie-son,,,drop the semantics,,how many posting accesses have you had to acquire? I see I need to go down the same road of denial with you as Lelnad failed with and spell it out for the intellectually impaired......we can look at your accesses, their free trial allowances and contracts, and cross reference them with YOUR claims of why just how many you had and just WHY you lost them when you did.....10-4? Ok,try again,,how many accesses have you needed in the last year and a half, Davie-son? 3? 4? More than 4?

–
which is why you lost your service as well.

>#2 Another of your many lies. I maintain that I

>am still using the same ISP which I've used for
>the last 8 years, and that is worldlynx

>networks.

See above.

>I challenge you to prove differently.

I already did with your Villanova account (which, I still have, somewhere) you claimed you only used "temporarily' many years ago. When I posted the proof, the only offering you had was the pathetic "I have NO idea how my headers got there" and the even more laughable half-assed lie of "perhaps my server routes my posts through

villanova"..LOL....you;re not even original anymore, old man, just a washed up, angry, yellow, lying, lid who has serious issues and personal problems.

>They have

>no reason to pull my account. I do nothing

>wrong.

Of course you don't. It's perfectly ok for a freak your age to claim they receive their jollies listening to underaged girls talk about their first texperiences with sex...you're whacked,,,and a deviant, bt you're also being selective, Hall. You feel that some FCC rules are somehow to be followed, but TOS are to be disregarded.

>You have still failed to date to come up with

>even ONE TOS rule that I've allegedly

>"broken". Go to the worldlynx homepage,

>(www.worldlynx.net)and look for their rules.

>Then tell me which one(s) I have broken.

>You really need to cut the B.S. and lies.

This may work on some people, but intelligent people have had your number for quite some
time. See, Davie, you are still sitting here crying about how you are innocent and how you "do nothing wrong". This makes your behavior all the more troubling for many reasons, denial may be the least. That you are a licensed hammie, that you claim it elevates you as a radio operator above the riff-raff, that you claim how you EARNED something, and that you stand for the betterment of radio is right there along with your other denials. You see, a licensed hammie such as yourself, that touts the rules as some sort of cosmic word from a deity you worship other than myself, is lost forever. You can not illegally monitor phone conversations as you so enjoy, the sexual involvment notwithstanding, and claim you represent legal radio, You're simply a hypocrite and when you are shown as much, your ego can not handle it. It's probably why you focus on children for pleasure,,,,rejection takes its toll on your battered ego, and you know grown women would not only reject you, but probably call a cop,,women can sense these things...

You're right, and they use it to call me quite
often.

>Some of them are playing you right now,

And it certainly has you howling.

>like someone uses a string to play with a cat.

>Dave

>"Sandbagger"

I refer the more accurate analogy of, "Like someone who knows they let their dirty little secret out of the bag during a night of too much hooch." Get over yourself, Hall. A deviant like yourself has no credibility. According to yourself, all who fail to speak out concerning your pedophilia-like acts, condone them. No wonder you think there is nothing wrong with sexual deviant behavior directed toward a minor,,,,you think you're being supported by anyone who doesn't persecute you for it. The real deal is, most are too shocked that we have one amongst us and don't know what to say out of repulsion......as am I,,,let the words be yours,, I'm done with mine.

From: joxendi@bellsouth.net (Jerry)
TW,
A good friend brought her Dad's old radios that had been stored for years after his death. Lots of parts, old Aerotron radios (outdated), tubes, and a couple of CB radios. One is a Gonset--must be 35 years old, and a
JC Penney transistor base station (40 channel). I think that one belonged to her brother. I think I'll hook them up and/or repair them and see what happens. Maybe I can get on the 'bowl" with 4 watts and shut 'em down!
LOL! (just kiddin')
Jerry
_
  Never seen a "Gonset",,,I do remember an old radio I had back in the seventies called a "Comp---" something or other.
  I don't think you're gonna shut anything down with 4 watts, but I damn sure can get you heard at 4 AM, barefoot on the bowl from 30 miles out....over and over and over. Add 100 watts and you're talking on the bowl sounding like a monster with many kilowatts. Even though I know it's hard to believe, come on down for an instant education. Why are certain hammies the hardest to convince the merits of LP? What's wrong with this picture of the hammie joshing the cber for his LP claims? Lack of HF experience will throw 'em everytime....

Not up to us 'old white men' to handle you and your problem.
You're right,,,you're too busy looking for a life.
I just forwarded your initial
message to the FCC. I hope they find it
interesting.

–
Forward mine, Dan. I freeband AND DX on eleven meter all the time.
Riley has been hounded by so many of you clowns forwarding usenet posts
to him that you've made the genuine complaints concerning actual harm
and behavior so much harder to follow up. It's amazing one can live to
be as "old" as you and learn so little

>Just as google and Yahoo etc is hounded by

>your forwarding of usenet posts.

–
I give back really well. In fact, better.

That's why it's pointless to make up web sites about him, or to mount
crusades to "rid the airwaves" of him. He thrives on that sort of
attention. As long as his relative anonymity is secure, and he feels
that noneone will ever do anything "serious" other than banter on this
newsgroup, he's free to play the part of the cartoon character. Once he
feels really threatened, watch his demeanor suddenly change....

--
Dave I feel the same way, I wouldn;t waste any time making wepages about
them either my repkys to them in the group already constitutes enough
air time
for them. But there are others who don't post as much to the group and
have the time to make the web pages, that is thier contribution to the
group, ya know what
they cry about these made up web pages yet they hold one of thier own.
Me and a few others are the center of attention yet I never once cried
about it like they do. Go figure... Have a good one Dave.

-
LOL,,,there we have it,,Lelnad all weekend,,,the collective denial of
these two voob teamers ,,these who protesteth too much,,,

In practical terms, what do you suggest that conscientious Kiwi trampers
should take with them when they spend a few days in the bush? Are these
locator beacons available in NZ and for what price? Who sells them? Do

these beacons put out a strong signal? What battery power do they require? How long does the beacon transmit for after it is turned on? Can the signal from one of these beacons be obstructed by a heavy bush canopy in the same way that GPS and cell phone signals can? If not, why is it different from
the normal GPS signal? Is the signal from a locator beacon monitored 24 hours
a day? How is the information passed on to the authorities and by whom?

Incidentally, I can't see why the signal from a 5-watt UHF radio would not be picked up by someone listening to the emergency channel, particularly when it was known that a person was lost. A helicopter search for example would probably pick up such a signal, as would someone on the top of a nearby high hill.

Awwwwwwwwwwww pore ole gw. I told you this was coming and your "freeband'
buddies made all kinds of sport of it. Name calling isn't going to change a
thing. This has been on FCC's agenda for at least a couple of years now. I
am NOT ratting out freebanders: I have never bothered with the freebanders.
But, just
as you would chase off a trespasser off your land, the amateur operators
have gotten fed up with bandits and freeloaders on 10 and 12 meters. USE
your crappy old "export" ' reddios' thar, fill up your head with RF until
your eyeballs pop out of their sockets: we don't care. Just stay out from
where you don't belong, or get
the license and have at it within the limits of the law.

And my "heart" is fine, thank you. And if this is bull****, then go to
www.rainreport.com click on FCC enforcement and listen to Mr. Duckworth's
current report.
Those trucks were, indeed, warned, there's more to come, and you might as
well get used to it. It's gonna to happen whether *I* have anything to do
with it or not. And I don't.

>Again like you never have, you have harrassed many people including me
send virus's,

>Now your lying, show proof that I have ever done anything like that.

No,,YOU prove it wasn't you. You have asked several on this group to
prove double-negatives several times..it is now YOUR turn to provide
proof you didn't do what everyone knows you have done.

++

HaHa how do you suggest I prove it wasn't me you sick puppy?
The onus is on the accuser assmunch, you have some sorta proof that I did
post it.
I just proved it wasn't me, I told you it wasn't.

(sign you up for Spam,)

>Again show proof,

_
Again, prove it was not you, as the burden of proof is ON you, as you
are the only one denying the belief the entire group holds of you. It is
not for anyone to prove anything about you, as your reputation is sealed
in cheap plastic...
++

LOL as you know assmunch you know it is physicaly impossible for me to prove
your claims.
Provide your evidance, thats how the accusatory stage works, then it is
refuted. need a call from Nancy to explain Lawyering?

(false accusations,)

>Which accusations are false that your a

>blatant homosexual that has been proven to

>post in the transexual Newsgroups.

Shark didn't make the posts.
++++++++++++++++++++++++++++++

Well using your sick mentality he should prove it, yet his IP address
proved it was him. He lies you swear to it ...
Hahhahahahahahahahahaqhahahahahahahahahahahhahahahahahahahahahahahahahahahah
ahahahahahahahahahahahahahahah

LOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLLOLOLOLOOLOO

That you somehow feel YOUR claims of
another are to believed by anyone, anyone at all, illustrates how severe
your communication deficit really is...
++++++++++++++++++++++++++++++++++++
That is the difference assclown, my claims are backed up by Hard evidance IP
address direct from Landqueers computer.
Your claims are backed up by nothing but hot air and accusations never
proven.

_
>Nothing

>false there your ip, name and computer are

>stamped all over them.

According to Lelnad and Hall, one can't
go by IP numbers. Davie Hall N3CVJ made that post just today. Did you
miss it?
++
Yes here comes the catch 22, Landqueer admitted they came from his computer,
he blamed someone else, now dispute that assclown.

>me, posting accusatory posts with absolutly no
>proof. here is a hankie Landqueer

Landshark initiated no harassment of you at all, like all others that
illustrate your insanity, and communication deficit, you started it.
****
I started nothing assclown, his posting of every screename I used was his
start to the harassment,
along with his sig file crying about me. check google dickface.

You
break you ass on a daily basis to start trouble with all you come into
contact with.
****
No I just break the assholes like you, remeber your problem with me started
when you took the group hostage with all your reply troll posts to N8WMM.
You were more of a troll than he was and you still are, you couldn't leave
him alone, hell even Landshark has asked you to stop recently, nothing has
changed with you NOTHING!you can't you won't your addicted to trolling and
lieing.

You were never capable of learning proper debate skills,
let alone proper communication technique. It angers you to sit back and
watch so many be a part of something you were never able to achieve, so
you lash out at all you envy the most.

I believe I've read that "streamers" go up and there are a number of quick strikes before the big show. Best bet is do a google search on lightning and see what turns up. I haven't ever worked with the stuff (thank heavens!) :) Of course, if anyone is in the way of it - does it matter if it goes up or down? BTW there was an article in the newspaper in the last week or so - some guy finally came home from extensive rehabilitation. He still is far from normal. He was a boy scout and a tree was hit near where he was standing. This occurred in the late 1990s and he just came home within the last two weeks!

How a plasma wire is constructed and how lightning currents
flow are two completely different events - happen at different
times during a CG lightning event. How a streamer is built
has nothing to do with the OPs original question. Lightning,
as his question asks, is not going one direction. Lightning
is a powerful RF wave. IOW it goes both directions. BTW
powerful but typically not that much energy at a strike
location.

It doesn't take much education to understand the bottom line, Twisty: You can whine, bitch, gripe, moan, cry and complain until you are blue in the gills about how you think you have been threatened and/or harassed on Usenet, but your arguments will never be valid because cartoon characters (i.e, anonymous and imaginary personalities) don't have any standing in a court of law. Even if they did, your case would certainly get thrown out when it is revealed just how much threatening and harassing you have done yourself. Therefore, it's a sure bet that you will never take any remedial action against these or any perceived threats/harassment, and the only thing you are accomplishing in this newsgroup is the setting of a world's record for how many times someone can whine, bitch, gripe, moan, cry and complain on Usenet. Hey, just a few more posts and you might set that record, Twist. Imagine -- you will finally get some of that recognition you think you deserve! Of course someone will come along and break your record soon afterwards, but at least you will have firmly established yourself in the archives for centuries to come as one of the biggest cry-babies on Usenet. And maybe a few years after you get dethroned, you can supress your ego long enough to toss your tiara in the closet and move on with your life.

It's been a spectacular summer, and you are absolutely pathetic for wasting so much of it pursuing your obsessions on rrcb. Get a life.

It has nothing to do with the decline of film, Twist. Single Use Cameras are increasing in numbers. They make more every year. All US companies are tired of paying the high utility rates, taxes, etc. Our unit labor cost is below two plants that are continuing to run. Labor is only a small part of the equation. Taxes, environmental laws, utility costs ... those figure in much more heavily. BTW, even digital cameras are going off shore, and digital is where it is at. My guess is that they will downsize until only Kodak tower is left - filled with folks making over $500,000.00 per year. Yep, they hired another vice president. I'd hate to guess how many that is now, but I assure you that even with your shoes and socks off, you couldn't count to half that number. LOL. This is a lot bigger than Kodak. Many other companies are doing the same. Play the game to Wall Street and you will be rewarded with big bonuses. Of course, once your 20 billion plus company is down to 2 billion, it will be hard to understand if the stock price goes up (or even holds even), but, then again, neither the stock holders nor the employees count for much - so long as the wealthy get wealthier (and only those inside folks will likely get wealthy - look at Enron. Global Crossings...)

What illegal towers? I hope you don't think amateurs are limited to 60 feet or something. There are no 2 meter CB amps. My guess is that most amateurs run 100 to 150 watts on HF and anywhere from 5 watts to perhaps 70 watts on 2 meters. That is *plenty* for worldwide communications on HF and sufficient for a couple of hundred miles of continuous 24/7 coverage on 2 meters (depending upon mode/antenna etc.)

Turns out that the bottom of the cloud is negatively charged and usually is the cause of cloud to earth strikes. The top of the cloud is positively charged and can strike 5 or 10 miles out away from the cloud. This means you can be struck even if you're 10 miles away from the cloud and think you're safe. Up or down? If you talk electron flow, it can be either way. The following I clipped from a website:

The average lightning stroke has a peak electrical current of 30,000 amps. Extreme lightning discharges can reach 10 times that, while some discharges, especially those within a cloud, are only a few thousand amps. In terms more people are familiar with, the electricity flowing within a lightning bolt can reach 200 million volts. Combined with the high amperage, lightning has enough energy to kill instantly.

So, 200 million volts at 30,000 (possibly 300,000) Amperes. So much for the shoot-outs LOL.

Picked up a brand new K-40 and found it to tall for the trunk lip so I
mounted it on the rear bumper.
Now I cant get the SWR below 3:1, all ground connections are good.

HOWEVER For neat installation I did cut the coax to about 4 feet, being a
base loaded I assumed that was OK ?
Does anyone know if that matters with K-40's
I will read comments in the group.

3055. Review: Amateur Radio Companion 3rd Edition

Newsgroup: rec.radio.cb
Date: 2003-08-26 04:47:42 UTC
From: Mick <sionnagh@yahoo.com.au>
Message-ID: <3f4ae7c3@dnews.tpgi.com.au>
Source record: 164589

Review: Amateur Radio Companion 3rd Edition

The 3rd edition of the Amateur Radio Companion marks a "coming of age" of this product. Not only does it have the favourite materials from the previous editions, it has expanded on those and more!

"What is it?" you ask? It has to be the most complete reference created for electronics and radio enthusiasts that I have seen.

It is not only a supportive educational product, but has enough information packed into it that you can dispense with many of the heavy handbooks, textbooks and teaching aids which take up your valuable shelf space. With over 500MB and 600 pages written in an easy-to-read style and internet links to help you along the way, it is a gem!

There is so much material on the CD that pages could be written just to cover it all, so I will just summarize.

There is a huge amount of reference material - coaxial cable tables, copper wire sizes, semiconductor datasheets, electronics component data and commonly used formulas, as well as connectors, plugs and sockets and many diagrams for easy identification.

A huge amount of software for electronics and radio enthusiasts - circuit design, antennas, callsign lookup, radio modifications, morse code and packet radio - and both MS-DOS / Windows and Linux are supported.

The entire website of Ron Bertrand's popular Radio and Electronics School

(www.radioelectronicschool.com) - all course readings and software, in fact the entire site so you can browse the CD as if you were on the Internet and at the site.

On top of all this there is a "from the ground up" look at other areas of interest in radio both old and new: Slow scan TV (SSTV) and ATV (fast scan), Internet Radio Linking (IRLP and EchoLink), a large and impressive section on antennas and antenna design, and a catalog of world-wide frequency allocations, repeater and beacon lists and more.

The CD is definitely not "bland". The interface is HTML driven which means you browse the CD as if you were on the Internet, and if you have an Interne t connection there are links off the CD to other sites of interest to all users.

It comes packaged in a slimline case which is both compact and sturdy - ideal to take with you when travelling. It is a marvellous effort, and at only $20 plus postage - don't let the price fool you into thinking it will be anything but high quality - it is exceptional value-for-money.

To cap it all off, it is created and produced in Australia by someone who knows something of what they are talking about in the shape of Michael Todd VK6JMA. If you would like to find out more, visit the ARC website at www.arcompanion.com or email Michael at toddcomp@bigpond.com and decide for yourself if this product is for you.

Pass this review on to your friends and acquaintances, in fact anyone who has an interest in radio or electronics. And don't forget to get a copy yourself - you won't regret it!

jim i have always been of the opinion that once you get out of college
, your whole wage earning potential and future is already pretty well
mapped out.....and it is all a big game.....is there collusion among
companies as far as salaries is concerned.....i believe there
is........in this world there is only one place where salaries have
gone out of control and that is professional sports.....and you see
what has happened there........but it is real easy to get some college
kid to do the work of three people for a small amount of money and
then also put in the extra time too, thinking he is somehow getting
ahead.....that is why companies like to hire young inexperienced
people a lot.......easier to control and easier to fool........also
that is why they use foreigners as well such as indians to do computer
work.....................and i feel it takes some real ingenuity to
break out of that straight jacket........you have to ask yourself
.........over the last 40 years....how much......how much have real
wages really rose compared to the 1965 time line for instance or
whatever........there is a lot of aspirations and hope from those
getting out of college ....we live in a materialistic
nation......they watch tv and see how hollywood lives.........they
spend money like there is no tomorrow.........they live on credit and
become highly leveraged......this is the future and it is
now.......actually if the truth be known.........you talk about the
rich.......well i have to tell you.....the plans for this nation did
not have anything to do with the freedoms we have, and that includes
the financial area as well.....the ones in control wanted to create a
nation of surfs..........who tended the big spreads.......that would
be owned by the wealthy who would be beholding of course to the

banks..........but.........the founding fathers did what had to be done to insure this would not happen......and a lot of them paid dearly for that.........oh by the way...the same type of individuals that tried to put that surf idea across 200 years ago are still at it today......and for some reason they will not stop to they have control of every person and every dollar........and on this you can bet.........that is why they want our guns and look the other way on the illegal alien problem.........

I would, but whatever happens does happen, This has not been discussed
at COSPAS/SARSAT meetings I have minutes for. I think you may be
confused with some other beacons.

>> The problem is
>> the 121.5/243 MHz ones cannot support embeddded data, and
>> COSPAS/SARSAT plans to stop monitoring these freqs in 2006 (I think,

>That and the satellites are already way past their use-by date, plus there
>are the usual interference issues. Txing on 121.5 is awkward (airband)
>anyway.

Use-by date? They do get replaced ! "Interference issues"? Like
what, In every ITU region and WARC these frequencies are very
agressively protected. The UWB case is an excellent example.

"Txing on 121.5 is awkward" WTF?! Quite a few A/C carry either a D/F
or homing system that lets them localise the beacon source. In
addition, early every decent A/C Comm Rx has a "Guard" Rx on 121.5 to
detect a beacon. That is the whole point of it, and how the SAR and
aviation infrastructure has grown in the past 50+ years.

>> The 406 MHz ones certainly support embedded data, but you pay a lot

Hmmm, none of the 3 beacon manufacturers I have dealt with over the past 4 years would agree. The certification costs can only go up.

wrote:

>In practical terms, what do you suggest that conscientious Kiwi trampers
>should take with them when they spend a few days in the bush?

A few first aid bits.
All the other safety stuff, pocket knife, strong cord, razor blades,
pen, paper, etc, etc
A very loud whistle
A CD (signal mirror)
A cellphone (If you are remotely near coverage)
Perhaps a day/night flare
A space blanket (Aluminized mylar)
Several options for fire-lighting, don't rely on just one. A fire is
one of the greatest life-savers. Not only does it give you warmth, but
it's also a signaling mechanism, as well as keeping your spirits
up.Just be careful not to set off the greatest bush fire ever known!
Some sort of beacon or MRS set, see below.

>Are these
>locator beacons available in NZ and for what price?

Yes, anywhere from about $350-400 upwards

> Who sells them?

Most of the safety/camping/map shops

> Do
>these beacons put out a strong signal?

Yes, quite strong enough.

> What battery power do they require?

Sometimes a special pack, manufacturer provided, but some have 4 or 6
alkaline AA cells in a battery pack

>How long does the beacon transmit for after it is turned on?

Varies with the battery type and temp, often 20-50 hours, with the
transmitted power falling off towards the end

> Can the signal
>from one of these beacons be obstructed by a heavy bush canopy in the
>same way that GPS and cell phone signals can?

Yes, it can, but the satellites are well above you, so they have a
better chance.

>Is the signal from a locator beacon monitored 24
>hours a day?

Yes.

>How is the information passed on to the authorities and by whom?

Through the COSPAS/SARSAT organisation. Bear in mind that it takes two
satellite passes to resolve the position ambiguity, and the
positioning accuracy is quite poor with the low-cost beacons, often
around 20Km, a huge area. The 406 MHz ones are much better, during
some trials, we managed to set one off accidentally. The first pass
put our position 67 miles out, the second pass was 380 feet.

Bear in mind that over 90% of all such beacon activations are false
alarms. If I was taking one out, I'd leave notice with friends, etc
that I would activate the beacon for say, 111 minutes, then turn it
off for exactly, say 47 minutes, then back on for 4 hours, or some
"coded sequence" like that. This is not an approved system or method,
but it would pretty much eliminate it as just another damm false
alarm. They would have to pass it on to police and the SAR center
after hearing of a beacon activation, or suspecting a problem.

>Incidentally, I can't see why the signal from a 5-watt UHF radio
>would not be picked up by someone listening to the emergency channel,
>particularly when it was known that a person was lost. A helicopter search
>for example would probably pick up such a signal, as would someone
>on the top of a nearby high hill.

Sure they would, 5 watts will typically go 80-120 miles in an good
air-ground link. BUT, you must be transmitting on the same freq they
were receiving on. And how would they know you were lost in the first
place?

An MRS, Mountain Radio Set would also be a good option to hire, they
do require a bit of messing about to setup and some limited skill to
operate. The big thing about them, is there is a regular monitoring
watch with probably a large number of operators each night. So there
is a good chance you will get through to somebody, somewhere in NZ.

Best of luck, be careful.

Don't know about the specifics of the K-40 but here's a quote from a
similar antenna.

1976 Antenna Specialist Co. concerning 17 foot cable length on base
loaded magnet mount.

" The cable length, as supplied, is a part of the electrical circuit
of the antenna. Altering its length by cutting may produce undesirable
VSWR effects. Cable length should not be changed."

Well of course, what would you think would happen? Since this country has been going through decades of inflation, which has boosted both incomes and costs to Americans, the rest of the "third" world, is in the same place where we were 60 years ago. You really can't fault the increasingly globalized corporate structure from taking advantage of the savings in costs of manufacture. Fear not though, as those countries experience the boost in living standard, they too, will demand more, and inflation will infect them, and in a few decades, they will be just as costly as the US, to produce goods. Once upon a time, not so long ago, Japan was considered "cheap", not any more.

> They sold medical products, and J&J is making money

Sigh. Don't tell me you're another one of those people, who equate an across the board tax cut (Meaning on everyone who pays taxes) as a "tax cut for the rich"? I would have thought you knew better.

According to weather service, though the lightning is called "Cloud to Ground" - it is from the ground UP.... As to what all would happen in a strike, it depends.
Our home was directly hit once, the lightning went up under an awning, blew out a porch light and went in that way. The CB and every thing else was ok.. The brand new TV set got smoked. So, go figure. I've never - even in my repair business history - have ever heard of "everything" getting zapped. As to HOW the items work or not after, depends on how it was affected, though usually, they won't work at all, if in through a "power" supply. While some folks feel a set struck by lightning is usually non repairable, that is not always true. I've seen, heard AND repaired sets or devices that were hit by lighting with great success.
So, a lighting hit is not always a killer for electronics. I've seen as much if not more damage done by power surges from Electrical Lines as I have with lightning.
So, YOU decide which is more damaging..... Actually, I"d bet Electrical surges are a better bet for probability, as you're always connected.
However, due to our experience from the lightning strike of days gone by, when a storm is approaching, EVERYTHING in my home except the light bulbs, furnace, refrigerator is unplugged. The phone is left plugged in to the phone jack, but modems are unplugged from the computers. The only other lightning strike I sustained which was not a direct hit, was a preamp on a 2meter repeater receiver got burned out. The receiver was ok. The transmitter and all else checked out ok. Though my answers are not definite by any means, these are just my experiences and knowledge of the subject.
C.L.

Threats are against the law. If I referred to myself as the great
Gazoo on this forum, you are still not allowed to threaten another.
You are not a judge, nor are you a jury, nor are you educated in the
jurisprudence system, otherwise you wouldn't be telegraphing your
ignorance. Defending such actions is what one expects from lids not
unlike your challenged self.
 In the first manner, Frankenstein, I bitch and moan to no one. In
each and EVERY post I have EVER made concerning what you misinterpret
and employ intellectual dishonesty, you will note the person I am
directing the post to brooought it to MY plate. Just need to point these

things out, Frankiestein, to remain fair and balanced. Snipping posts to take their words out of context is a tactic pioneered by you lids and failed at daily,,,I really didn;t expect you to rear your jeaous head, but then again, when voob named the lids of rec.radio.cb,,you WERE numero UNO! You WERE included.

>Even if they did, your case would certainly get

>thrown out when it is revealed just how much

>threatening and harassing you have done

>yourself.

LOL,,now YOU have me filing cases,,,LOL,,you must really be worried, Frankliestein. Tell ya' what', lid, if youwern't such a yellow lid in your mannerisms and all you do, this sudden concern for "legal" maneuvering would never have come into discussion,,you must have really screwed up to be thinking along lines of me taking legal recourse,,,,Perhaps it was the comment that "I save EVERTHING" that caused you such panic..LOL. If youweren't such a loser, you wouldn't have a problem with followig rules and TOS and you would have no reason to mention something such as a "case",,you;re paranoid, and for good reason. The wheels of motion are in justice. Hall is in a panic as what to do concerning his new address he failed to give the feds. Lelnad was shown what a habitual liar he is, and you,,well,,hahhahhahha,,,,someone pulled your card several times. Now, remmebr you temper Frankiestein.....and try to remain on topic..oh,,,and according to your TOS and the nice folks at your
abuse department, "Twisted" s not the topic for rec.radio.cb. Consider yoursself fairly warned...HYUK,,I love when youlids get fair warning, F*** yourselves, and blame me....LOL...now THAT'S entertainment from the peanut gallery.

As you now reduce yourself to lying, Frankiestein, I say two words that give you that familiar headache,,,,,post it. Post a single item from me anywhere where I have ever threatened anyone. Your self-esteem must be as low as the others, Frankiestein, when you lids must resort to making up lies. Lelnad is unable to produce headers or locate his forge of me in ANY archives, davie-son is unable to produce anything remotely associated with the cber he made his lies about A) First IN Philly..then B) OUTSIDE of Philly, and YOU, lol,,,you need provide the icing and get your daily lie in,,,,,post it, Frankiestein,,post it.

>Therefore, it's a sure bet that you will never

>take any remedial action against these or any

>perceived threats/harassment,

Poor, Gillinad....this is YOUR paranois, your worst nightmare and fear,,this is what keeps YOU awake at night..again,,no one mentioned anything of the sort except you,,you're a guilty nutha' sucka'

Frankie,,it was shown the last time you lost your access and was sentenced to 30 days for violating your probation fro God-knows-what. Your worst fears are also small stuff and I have never in my life sweated the small stuff. Wathcing you impotent lids get worked up over my life, my hobbies, my world, and making ME YOUR "bottom line" is MY recreation, you poor pathetic no-life lid..

>and the only thing you are accomplishing in

>this newsgroup is the setting of a world's

>record for how many times someone can

>whine, bitch, gripe, moan, cry and complain on
>Usenet.

You mean a world-record as a direct means of a world-record of posts directed toward me. Your deficit is preventing you from presenting the concise and entire picture, alongw ith your attempted intellectual dishonesty. Nevertheless, it's quite balanced now.

>Hey, just a few more posts and you might set

>that record, Twist. Imagine -- you will finally

>get some of that recognition you think you

>deserve!

LOL,,,,,but Frankiestein,,you forget it was KC8LDO that went looking and searching the internet on anything he can find remotely associated with "twistedhed",,,,lol,,,HE brought my article here, Frankiestein, not I. HE felt I deserve the recognition, Frankiestein, by such an act, not I,,,much in the same sad manner YOU feel I am worthy of such attention as you readily admit I am YOUR bottom line.....you;re not very accurate today, Frank. Something bothering you?

>Of course someone will come along and break
>your record soon afterwards,

In the same manner your reputation is broken?

>but at least you

>will have firmly established yourself in the

>archives for centuries to come as one of the

>biggest cry-babies on Usenet.

Wah! Look who's crying about MEMEMEMEMEMEMEMMEM! HAHAH!
You have it bad, Frankie,,some day, you ought get a life and quit salivating and drooling on your shirt over mine. MAybe see a doctor about your conditions.

>And maybe a few years after you get

>dethroned,

You put me there and cry about it,,HAHHAHAHHA! Poor Gillinad!! LOL!

> you can supress your ego long

>enough to toss your tiara in the closet and

>move on with your life.

Hey, YOU are the one claiming "I" am YOUR "bottom line" in this world, you poor pathetic goof,,,,,,,,your "life" is empty without me, you hypcritical lid..LOL!

>It's been a spectacular summer,

Sure has. Extremely wet, too.

>and you are

>absolutely pathetic

LOL....aww, Fwankie,,,,,hehe,,, you were doing so well with only a few lies, but you had to illustrate what a lesion you are with the insults...LOL..oh well, it's not like you;re not in great company,,,look at the ther lids of the voob team,,,,birds of a feather,,,Voob never did us a better favor than fronting you off by name with KC8LDO, N3CVJ, N8wwm, and WA3MOJ as the ones that rec.radio.cb would have to deal with as troublemakers.

>for wasting so much of it pursuing your

>obsessions on rrcb. Get a life.

A "waste" would be holding one you never met as your "bottom line",,you're a real pathetic whack obsessed with all you are forced to reckon with..LOL..dig yourself!
Hahhaah..it's all about the power that continues to elude you and your lack of it and your never ending quest to attain it.....,now you are telling one what to do for recreation. This is "rec" radio.cb....I'm certain the "rec" stands for "recreation" and you would probably know this if you didn't suffer from such a nose problem and a great communication deficit, but thank you for the genuine, albeit overt concern for my free-time. Now, go back to holding MEMEMEMEMMEMEMEMME as your "bottom line" Gillinad,,,,,,,,,,,,,,,but you really should "get a life.".

(Again like you never have, you have harrassed many people including me send virus's,)

>Now your lying, show proof that I have ever

>done anything like that.

No,,YOU prove it wasn't you. You have asked several on this group to prove double-negatives several times..it is now YOUR turn to provide proof you didn't do what everyone knows you have done.
++
>HaHa how do you suggest I prove it wasn't me
>you sick puppy?

I ain't the sick puppy,,your pal Davie-boy Hall is the sick puppy for his sexual devations concerning children..

>The onus is on the accuser assmunch,

Not according to lelnad and Hall,,,are you claiming they lie? They claim their CLAIMS are plenty proof, so the pendulum swings both ways. They BOTH claimed no need to produce proof, as if YOU want the proof, it's out there for the taking..go get it..if that is good enough for them,it most certainly is good enough for the rest of us..hahahaha!

>I just proved it wasn't me, I told you it wasn't.

And holding with the lid ways and mannerisms, you continue to never disappoint. The voob named team of lids, consisting of yourself, KC8LDO, N8wwm, and n3cvj, all denie wrong doing, yet, N8WWM was popped by the feds, Lelnad lost accounts, you lie and spam, and N3cvj lies and lies and lies.....3 out of four of you threatened me, and now, true to form, you all, just like clockwork and predictable as ever, like little minions lined up in a row waiting your turn at being bathed, feel your

words somehow means something to this group, as you 3 collectively come out swinging and shouting about y'alls innocence, only y'all have never been innocent of anything,,,,,yer guilty 'nutha 'suckas..LOL!.

>Again show proof.

_
Again, prove it was not you, as the burden of proof is ON you, as you are the only one denying the belief the entire group holds of you. It is not for anyone to prove anything about you, as your reputation is sealed in cheap plastic...
++
>LOL as you know assmunch you know it is

>physicaly impossible for me to prove your

>claims.

Well, I am only using Davie Hall's tactic that he used when asked the same thing you are asking of me now. He told me "Prove it didn't happen", concerning his claim of a cber getting busted in 2 different places at once that never really happened. does this make n3cvj an "assmunch" also, or are you being hypocritically selective and applying the rules only to others y as only a lid like yourself can do ?

>Provide your evidance, thats how the

>accusatory stage works, then it is refuted.

Well, you accuse ME of lying,,,prove it. This is YOUR claim.

>need a call from Nancy to explain Lawyering?

>Nancy who?

_
Shark wrote:(false accusations,)

>Which accusations are false that your a

>blatant homosexual that has been proven to

>post in the transexual Newsgroups.

>Shark didn't make the posts.
++++++++++++++++++++++++++++++
>Well using your sick mentality he should prove
>it,

Please explain how you miscontsrue my mentality as "sick" and not Hall's for his sexual deviancy.....oh,,excuse me,,he claimed you condoned such behavior against children.
yet his IP address proved it was him.
Yet another flawed character trait eeks out from your pile of fecal matter.

>He lies

>you swear to it ...

>Hahhahahahahahahahahaqhahahahahahaha

>hahahhahahahahahahahahahahahahahaha
>hah ahahahahahahahahahahahahahah

>LOLOLOLOLOLOLOLOLOLOLOLOLOLOL
>OLOLOLOLOLLOLOLOLOOLOO

 That you somehow feel YOUR claims of
another are to believed by anyone, anyone at all, illustrates how severe
your communication deficit really is...
++++++++++++++++++++++++++++++++++++
>That is the difference assclown, my claims are
>backed up by Hard evidance IP address direct
>from Landqueers computer.

And indeed, so was mine concerning Davie Hall Jr.'s from Villanova, yet
he denied it and had to have his nose rubbed in it a little more before
he came off with the superb gem "Perhaps my ISP routes my email through
Villanova, I don't know Your claims are backed up by nothing but more
claims, as are all the clown quotes from the lids we enjoy taking down
several notches on aregular basis. You have nothing but hot air and your
accusations are baseless, off-topic, of malicious intent, and never
proven.
  And you never answered concerning the 68.45 addy. Did that user
forge you? Hmm?

_
>Nothing

>false there your ip, name and computer are

>stamped all over them.

According to Lelnad and Hall, one can't
go by IP numbers. Davie Hall N3CVJ made that post just today. Did you
miss it?
++
>Yes

Then I suggest you go abck and read it, as he claims these IP numbers
mean nothing.

>here comes the catch 22,

You think?

>Landqueer

>admitted they came from his computer, he

>blamed someone else, now dispute that

>assclown.

Easy as a court of law,,,,is there reasonable doubt he posted them? YES. Why? They came from a place of employment. Anyone could have made that post. No catch 22 at all, Dave Hall denied making the posts and when showed proof, could do nothing but offer "I don't know HOW my headers got there."..lol....and we have Lelnad ADMITTING he posted from work, USING the Bignet account,,was there reasonable doubt with Lelnad? Never,,at least not in any sane, non-angry, rational, sane, human being's mind. And lastly, we have YOU, attempting to distance yourself as far as possible from that 68.45 post that ofered your call sign. Once again,,,,were you forged by that user? :)~

>me, posting accusatory posts with absolutly no
>proof. here is a hankie Landqueer

Landshark initiated no harassment of you at all, like all others that illustrate your insanity, and communication deficit, you started it.
****
>I started nothing assclown,

You start everything, and everyone knows it. Too bad for your you, huh? LOL..your repeated daily homosexual references noted,,,no wonder you and Davie both get along, your're both perverts, and anyone reading your posts would agree..

>his posting of every screename I used was his
>start to the harassment,

Bullshit, Your harassment was in play long before that. He shined the light on your ass, just like I did with my dog pile, and you went to pieces as did your lid pals KC8LDO and N3CVJ and N8wwm. Blaming the person that points out your filthy little games and behaviors has ALWAYS been YOUR problem as well as the above mentioned..

>along with his sig file crying about me. check

>google dickface.

I was there, Geogre,,you're lying. Always the penis references from you..you know what Freud says,,,,if you don't ask Davie-son,,he's his own favorite deranged subject,,,,ya' know, if you didn't claim your call was WA3MOJ, one would think you're a chick with all your preferences to speaking of the penis and the ass. Did the user at the 68.45 addy forge you?
You
break you ass on a daily basis to start trouble with all you come into contact with.
****
>No I just break the assholes like you,

Another sexual connotation and you;re not even aware of it,,,,,,"breaking assholes" seems right up your alley.

>remeber your problem with me started when

>you took the group hostage with all your reply

>troll posts to N8WMM.

Despite your mild retardation and insanity, "replies" to a directed inquiry are not troll posts. Calling all you disagree with, all you can not comprehend, all you dislike, all that you fear, all that you respect, all that you love, "troll posts" is but one of the reasons you're not taken serious, Geogre. You're insanity prevents it.

>You were more of a troll than he was and you

>still are, you couldn't leave him alone, hell

>even Landshark has asked you to stop

Yes,,,Shark has asked me to stop REPLYING, but Landshark is a big boy. On the other hand . EVERYONE has asked you to lay off. Shark hit it right on the head when he listed the problems you have made,,,,with everyone,
Geogre,,,,,,except (sigh),,,Kc8LDO, N3CVJ, and N8WWM ,,they are the ONLY ones you never had a smart-ass TROLL post directed toward and are the ONLY ones you never insulted with your homosexual remarks.
recently, nothing has changed with you

>NOTHING!you can't you won't your addicted

>to trolling and lieing.

I don't lie,Geogre,,I am the bastion of integrity and stand behind what I write, unlike the vob team, who are all hanging their heads in shame this day,,,and rightly so,,,,don't worry,,they are still here,,just driven deep underground where they belong, Light has always caused you lids such pain.

Hello Tnom:

Good call. The cable length will be more critical if the antenna is a magnetic mounted antenna, as the coax is now part of the counter poise. Thats why a good ground connection to the antenna end of the coax is important. And that ground connection is connected to metal body of the vehicle.

Antennas are like light bulbs, they need two wires to. So manufactures in there design will rely on the coax as being the other part of the antenna. In mobile installations sometimes there isn't a choice.

Jay in the Mojave

With all due respect, those heavy handbooks that take up valuable
shelf space will work in the absence of electricity. Also, there are
more operating systems than "both" Wintels and Linux.

A big Mac doesn't count

3084. N3CVJ asks for PROOF! Proof it is..

Newsgroup: rec.radio.cb
Date: 2003-08-26 21:14:04 UTC
From: twistedhed@webtv.net
Message-ID: <10513-3F4BCD9C-210@storefull-2317.public.lawson.webtv.net>
Source record: 164619

N3cvj wrote:
>"I do nothing wrong" and, "If you feel I did

>anything illegal, PROVE it."

Ok. First things first. Concerning your bullshit about the cber in Philly you claimed was busted but would provide no details on, not even a town.....
>And it was NOT in Philly. It was in a suburb of

>philly. BIG difference.

And of the SAME incident, wrote

>This happened about 5 years ago, IN

>suburban philadelphia.

Now,....a "suburb" of Philly would be a separate court, especially if it was a local charge of "Disturbing the Peace" as Hall implied. But as he noted, there is a BIG difference of this taking place IN surburban Philly, as opposed to a Suburb OF Philly. He claimed BOTH. He goes on...

>This case was handled through a local court,

But there is no record of it anywhere.

>and involved a neighbor pressing charges

So now it was YOUR neighbor. Where did this take place again, Davie-son? What precinct, borough. or "suburb", Davie? You lived in Norristown and Douglassville, according to your posts. Neither town has a record of your claim, and it would HAVE to be one of these towns if he was your neighbor.

>over offensive language that he intercepted

>CBer. The Cber (Who I knew personally),

Not only is he your neighbor, but you "knew him personally." And where did this take place, Davie-son? Kensington? Germantown? S. Philly? Darby? Exactly where? Since he was your "neighbor", and you claim it happened about "5 years ago",,it was relatively easy utilizing the process of elimination to shoot this out of the sky,,the same way this lie was disproved the first time you brought it up....by being forced to be held to the light of truth and integrity....

>didn't have the money to fight the charges,

>and ended up paying a $300 fine for

>"disturbing the peace".

City? Town? Precinct? Borough?
If it occurred, it's on the books and an entry level grade school
librarian could have disproved it....but, alas, it never occured.

>The judge

Judges name? Court document? Case number? Since you don't know, just
give us the name of the town, since you
changed your claim about it happening in Philly,,,,I'll do the rest,,you
supply the "suburb."

>decided that this type of intrusion was no

>different than someone playing a loud stereo

>in front of your house.

Then THAT claim would be in the transcript as well....I said I'd get the
transcript, even if I have to come out of pocket for 40 pages,,,,,you
provide the facts instead of smoke and mirrors.

_
Moving on,,,,,N3cvj wrote:

>"I do nothing wrong".

The following quotes were made by you last year (2002):

>"I am not a hypocrite"

>"I advocate legal radio."

>"If that means that same operator occasionally
>escapes to a "freeband" channel or bumps up

>the power a few watts to maintain contact with
>their base/mobile, over adverse conditions,

>then so be it."

Uh-oh! Doesn't look good Davie-son,,,doesn't look good at all ......that
radiant hypocrisy emanating from your lying pie-hole...

>"I make an effort to try to enlighten the person,
>but if he's set in his ways, I let it drop"

LOL..my, how your bullshit flows freely when you think no one is paying
attention to your doublespeak....haha!

>"But what heppens when LEGAL operators

>start getting the gestapo treatment by the local
>"fuzz"? The FCC is still the only fair bet on

>radio related complaints. Maybe they need

>more money to enforce the rules, but I'd rather
>have them than the cops telling me the

>what-for..... "

>Dave

>N3CVJ

>"Sandbagger"

Excuse us for a second, Davie, some of us must pause to pull our boots on by their strap, and yet others are choking on laughter while shaking their heads in disgust.

>"Ad Hominem comments do nothing to bolster

>your credibility in any form of debate, so you

>would be wise to avoid them. Stick to the

>topic."

Yeeeeeeeeeesh!...Davie, thank God for archives....otherwise, someone that didn't know any better, may take something you claim as truthful (shudder).

>"That is what makes you a sociopath."

(giggle),,,entertainment value:

>"I play with whatever radio bands are available

>to me. I don't look down from my holy perch of
>hamdom to other radio operators "

LOL.....

>"Hams frequently give out their phone

>numbers

>or addresses on the air.

>Unlike CB, there aren't a bunch of mentally

>challenged people waiting to cause trouble

>with this information."

In addition to self-contradicting yourself every day in every way, YOU are the one wishing to cause trouble with such information,,it's why you have a hard-on for the anonymity of cb and why you have a problem with me not "feeling threatened" via cb anonymity. All YOUR problems..more ilustrated below.

>"Every so often I'll respond just to bitchslap

>you back to reality"

Nice...

>I advocate legal cb

Yea...sure you do... say it again..LOL

>Peaking a radio is NOT recommended. It's

>more trouble than it's

>worth. Go with the small 2 pill amp, and let IT

>do the work.

>Dave

>"Sandbagger"

>"I advocate legal cb"

Then we have your selected, malice of ignorance::

>"That's an export radio, so he's already a

>criminal. So go ahead and

>modify the clarifier!"

>Dave

>"sandbagger"

More hypocrisy that makes you such a flaming lid::

>"I'll stick with my TS amp. It seems to continue
>to run with the best

>of them.... "

>Dave

>"Sandbagger"

>N3CVJ

Breaking the law is ok when it's you doing it, and giving such advice is
not "irresponsible" when you do it.

>"it is much safer for a CBer to run power from

>the mobile. That way you never interfere with

>the same people for very long."

>Dave

>"Sandbagger"

>"I advocate legal cb"

_
>"Why should you fear this? Only people that

>have something to hide need

>to fear this loss of anonimity (SIC)".

The world of security experts, the mainstream public, and just about everyone in the natural world, including all internet service providers, are aware of the need for online privacy and wisely direct their customers as so. That you can't comprehend such, and that you were so careless in your green and botched attempts at approaching the internet, is not the folks fault who continue to remain anonymous. To blame them is to illustrate your misdirected anger and lack of intellect. You created your own internet world,,deal with it. Posting non-topic information on what you erroneously view as the private lives of individuals is what you live for..it's why you want all of us to be "non-anonymous", so you can attack on a personal level, as your communication skills and debate skills are non-existent. You've done it in the past and you continue to attack with off-topic posts. To claim you would use any information you had on anyone you misconstrue as the blame for what ails you in a malicious manner and aginst them, is not a stretch of any one's imagination...it's why you have such a hrad-on over the anonymity issue,,'cause you can't have what you WANT!!

>"I would recommend finding a mail-order store

>that carried a Uniden Grant XL. This radio can
>still be modified via the PLL for out-of-band

>operation, and they're usually available in the

>$129 range". Dave

>"Antisocial Personality Disorder (APD) is

>practically synonymous with

>criminal behavior."

Not surprising.
Based on your self-contradicting comments , it is easy to see you are the same old Dave Hall N3CVJ that breaks laws and is a hypocrite.

>"Who needs "Melrose Place" when you have a
>scanner? My neighborhood

>phone traffic was no less juicy at times.

>Teenaged girls talking about their first time

>with sex, wife talking to newly found lover

There goes Davey,,breaking federal communication law in the most disgusting, perverted manner...while maintaining:

>"I do nothing wrong"

> "I advocate legal

>radio..",,

And my favorite of Davie's:

>"And BTW, those who do thumb their noses at
>the established rules of society, no matter

>what you may think of them, are considered

>sociopaths, so Leland was right about that.......

Of course you lid-freaks pat each other on the fannie and pinch each other's bums..LOL...so Hey Davie,,,how long have you considered yourself a sociopathic deviant who breaks FCC communication law that advocates "legal radio" and "does nothing wrong"?

Truth? TRUTH? YOU can't HANDLE THE TRUTH (in my best Al Pacino voice, and yes, I do it well, tyvm)!!

twistedhed@webtv.net (Twistedhed) wrote:

<snip Twisty whining>
> Threats are against the law. If I referred to myself as the great
>Gazoo on this forum, you are still not allowed to threaten another.

That only holds for legal entities, which can only be a person or corporation. An imaginary character is not a legal entity. Since it is your intention that I not know who you are, or if any of your BS is true (such as your claim that you are a "professional journalist" -- LOL!), then your "person" is no more a legal entity than Pellets the Wonder Rabbit; and any harassment or threats made against your character "Twistedhed", by me or anyone else, are meaningless in a court of law. That's the irony about anonymity -- you can release yourself from the behavioral restraints that otherwise exist in any form of communication where you have a physical presence or legal identification, but at the same time you forfeit any and all legal rights and protections as that anonymous personality. That means -YOU-, the yellow dog hiding behind your anonymous identity, have no legal standing when it is your -anonymous character- that has been threatened or harassed. And even if you ever decide to register the name "Twistedhed" as a legal alias (only God would know why you would do that), you -still- have to deal with the fact that your behavior has been just as bad as the behavior you attribute to others: your excuse that "they did it first" would never hold up in court -- it doesn't even hold up in this newsgroup. Regardless, I NEVER accused you of being a child molester, I NEVER harassed you by email, I NEVER posted your phone number and encouraged others to harass you by phone, etc, etc, etc. So bitch, moan, cry, complain, whine -- even throw a fit if you like, it doesn't make a bit of difference because you made yourself wide-open for anything that anyone wants to throw at you. If you like, I'll even get the ball rolling...

TWISTEDHED MUST DIE!!!!

Now do something about it or shut the FUCK up.

<snip Twisty crying about who hit who first>

Thanks very much Barry for a most informative reply. It concerns me that some trampers / hikers think you are a bit paranoid or overanxious if you prepare well for longish trips into the bush. The space blanket is a very good idea and the need for at least a cell phone is obvious, but sadly often overlooked by some people.

HEY Geogre,,,was Randy forging you or did you give him permission to say
he was you? Ahh, never mind,,your clique of lids are all liars,,,PROVEN
liars, no doubt! But it has been fun illustrating it, today!!

>Why you blaming Randy for forging?

I SAID never mind,,,,(sigh),,,,I "asked", I did not blame. Really
hurtin' huh?

>And, No I never gave him permission to do

>anything he is a big boy.

Can you elaborate on why the call of WA3mOJ is coming from that addy,
when the opposite claim was made several times?

3106. Re: N3CVJ asks for PROOF! Proof it is..

>He never said it was his neighbor asshole, he

>said it involved a neighbor, it could be a

>neighbor of the complaintant ,

Do something about that laziness and spelling prior to calling another
an "asshole" for asnwering the HH's claims..

>just like I never said it was my call sign,

Well, I said it came from the 68.45 addy, whcih you lied about and said
it didn't.
Once again, did the user have permission to identify himself as WA3MOJ?

>you can speculate and fabricate but as noted

>you are the liar.

There is no specualation. Each and every quote I illustrated of Hall's
exist in google.
Did the user have the needed permission to identify himsrelf as WA3MOJ?
:)~

twistedhed@webtv.net (Twistedhed) wrote:
<snip Twisty whining>
    Threats are against the law. If I referred to myself as the
great Gazoo on this forum, you are still not allowed to threaten
another.

>That only holds for legal entities,

Wrong. One can not make threats against a private individual, electronic
or otherwise. The intended victim need not be a "legal entity".

>which can only be a person or corporation.

Oh,,I see where you're going with this,,semantic spin.

>An imaginary character is not a legal entity.

>Since it is your intention that I not know who

>you are, or if any of your BS is true (such as

>your claim that you are a "professional

>journalist" -- LOL!),

No,,I "was" a professional journalist. Now I'm a professional columnist.
Twistedhed@webtv,net is indeed copyrighted, twice in fact, once via
SporadicWaves, and once by myself. That most definitely protects the
MONIKER, regardless of WHO I may or may not be. I have plenty of ammo
should I ever decide to bring such a case as you bring to subject. It's
why Leland and his admitted partner-in-crime was smacked for not only
plagiarizing my article, but for intentionally libeling it and the rag
by altering the content.

>then your "person" is no

>more a legal entity than Pellets the Wonder

>Rabbit; and any harassment or threats made

>against your character "Twistedhed", by me or
>anyone else, are meaningless in a court of

>law.

Read up on copyright law. I provided you some links once before,
straight to the US federal web sites concerning the digital millenium

copyright act pertaining to the internet and copyrighted material. Need to become re-educated in such? You apparently are totally clueless.....now if only you could find out WHO holds that copyright...LOL

>That's the irony about anonymity -- you can

>release yourself from the behavioral restraints

>that otherwise exist in any form of

>communication where you have a physical

>presence or legal identification, but at the

>same time you forfeit any and all legal rights

>and protections as that anonymous

>personality. That means -YOU-, the yellow

>dog hiding behind your anonymous identity,

>have no legal standing when it is your

>-anonymous character- that has been

>threatened or harassed.

>And even if you ever decide to register the

>name "Twistedhed" as a legal alias (only God

>would know why you would do that), you -still-

>have to deal with the fact that your behavior

>has been just as bad as the behavior you

>attribute to others:

Post it Frankiestein..crying about what you "think" I did will not save your ass when it's on the line.

>your excuse that "they did it first" would never

>hold up in court -- it doesn't even hold up in

>this newsgroup.

Because no such behavior has ever been attributed to me.

>Regardless, I NEVER accused you of being a

>child molester, I NEVER harassed you by

>email, I NEVER posted your phone number

>and encouraged others to harass you by

>phone, etc, etc, etc.

Likewise, I never did that to you either,a nd you know it,,,this is the second claim in days you ahve not been able to provide a claim for,,,wow,,I'm on one hell of a roll,,,,,3 lids with a mighty swoop of' 'ol Twists deity-like powers you attribute him..LOL

>So bitch, moan, cry, complain, whine -- even

>throw a fit if you like, it doesn't make a bit of

>difference because you made yourself

>wide-open for anything that anyone wants to

>throw at you.

And just how did I do that?

>If you like, I'll even get the ball rolling...

>TWISTEDHED MUST DIE!!!!

LOL,,,tut-tut,,temper temper,,,LOL

>Now do something about it or shut the FUCK

>up.

Sure..I'll continue to illustrate the lies from KC8LDO, N3CVJ, Frank Gillinad, and WA3MOJ, and anyone else that wants to cry, piss and moan about other peoples lives and opinions as being the reason for your misery, crushed ego, communication deficit, mild retardation, lack of self-control, and blasphemy by holding me as your God and "bottom-line." Your deficit is illustrated nicely by directing your post at me, and then telling me to "shut the f*** up." Only, you hae been magnificently impotent in all your attempts at "shutting up" all those you blame for your misery.

<snip Twisty crying about who hit who first>

Hahaha,,not only are you mad, you're pathetically impotent.

_
LOL,,now YOU have me filing cases,,,LOL,,you must really be worried, Frankliestein. Tell ya' what', lid, if youwern't such a yellow lid in your mannerisms and all you do, this sudden concern for "legal" maneuvering would never have come into discussion,,you must have really screwed up to be thinking along lines of me taking legal recourse,,,,

>No, just the fact that if you aren't going to do

>anything about it,

LOL,,about what? And who said anythinf about doing anything? Oh, ,,that's right,,YOU did
, as did N3CVJ and KC8LDO...hahahha!

>then all you are doing here is whining.

<snip Twisty hallucinating>

Heeeee-heeee..Poor, Gillinad....this is YOUR paranoia, your worst nightmare and fear,,this is what keeps YOU awake at night..again,,no one mentioned anything of the sort except you,,you're a guilty nutha' sucka' Frankie,,it was shown the last time you lost your access and was sentenced to 30 days for violating your probation fro God-knows-what.

>Go soak your head in sheep-dip.

Go back to making claims you can;t back,,,,you're in the right thread with N3CVJ and WA3MOJ. I'm gonna make ya' famous,,,I return favors. Get those addy's in order, boys, the wheels of Twist's motions are spinning madd justice..LMAO!

You will find no threats by me anywhere, period, but you will find them by these impotent clowns directed at me. It's real simple,,,,someone wishes a reply,,they direct a post toward me, I respond. Those who need it, can use a killfile. By the way,,,,who am I supposed to be ignoring this time, just for the record? <g>

I have a question? How does you showing the message header prove anyone sent jack from a given IP address? When you log on to @shittv.net, I mean webtv, do you really think you get the same IP address every time? If you do, you are daft. Are you the only one who purchased webtv? Well, that might be a bad example. How many people have signed up for AOL, MSN, etc? That's right millions. So how the heck do you assume that because this guy happens to have a certain ISP that means HE was the one who sent whatever? What a dope. Before you start spouting off, you should really understand the technology. Check out static versus dynamic IP addressing.

what was spelled wrong? Take your own advise while ""asnwering"" someone
before you critisize.

> >just like I never said it was my call sign,

> Well, I said it came from the 68.45 addy, whcih you lied about and said
> it didn't.

I know what you said just because you say it doesn't make it so, check your
spelling before critisizeing others.

You said what came from 68.45 addy? I said I never mentioned wa3moj as my
call sign.
Am I to assume like you when you type n3cvj that it is your callsign?

> Once again, did the user have permission to identify himself as WA3MOJ?

Who identified themself as wa3moj?

Yes and so is landgfag huh, how do you know he is a decent guy, I mean
really what do you know of him

Sure..I'll continue to illustrate the lies from KC8LDO, N3CVJ, Frank
Gillinad, and WA3MOJ,

Go back to making claims you can;t back,,,,you're in the right thread
with N3CVJ and WA3MOJ. I'm gonna make ya' famous,,,I return favors. Get
those addy's in order, boys, the wheels of Twist's motions are spinning
madd justice..LMAO!

Are you kc8ldo, are you n3cvj? wa3moj? your addys says so

Yea, dogie was real handy here. Just punch doug dogie n8 n8wwm or his
last name into google, along with rec.radio.cb , anyone can see how
much he contributes to the CB hobby.

You are getting predictable and boring geo, so I'll ignore
you again..until I feel like slapping you around..

Cheers.

Hi Guys,

I hate to be the bearer of Bad news, But I figure some people that frequent this news group(s), may know this guy...

I found out Some sad news, It seems that Terry Elkins, AKA Coon Dog, from Taylor, Michigan Died, death was ruled a Suicide. It seems Coon Dog had some personal problems and he simply just couldn't handle it. He died from Carbon Monoxide Poisioning...

For you that didn't know, Coon Dog had a CB shop, first in a truck stop at Ecorse and I-94 and then ran on in a van... a Mobile CB Shop.

We was Laid to rest last Wed.

May He rest in peace...

Signed,

A Freind.

Not taking sides here, but anything .rr.com is roadrunner (cable) and is a static IP address (at least it was as of a couple of years ago). I have had DSL for a year and a half and they have changed my IP address exactly once. I believe that roadrunner was going to try and change the internet address once in a while, but would expect that to be difficult if someone has their computer on 24/7 (my neighbor uses her computer as a radio). Dial up is dynamic IP, but the broadband stuff is generally not. Just FYI.

I'm guessing here as I'm not sure about your amp at all, but would suspect that it was designed for a 5 watt stock output radio. If you are indeed putting out over 20 watts (all where you want it; no guarantees here), you are likely overdriving it. Somehow, the units have to work together. Kinda like you go to the store and want the fastest hard drive they have in stock. Gee, kinda expensive, but it is guaranteed to be the "fastest". So you get home, open up your computer (with an IDE interface) and guess what? IDE drives aren't the fastest drive and you now own an ultra scsi hard drive that won't work with your computer. You got what you asked for, but it is not compatible with your system. I am also not familiar if you are using the radio/amp as a base; if so, it is possible that you are demanding more from the amp than the power supply can provide; in this case, a hum on the DC to the amp would result as it falls out of regulation 120 times per second and very possibly results in a hum on your signal. Many folks would be far better served looking for a good antenna rather than an amp. Would you believe that a vertical antenna mounted low (say on top of a ranch house) over "normal" ground can result in a 6 dB loss compared to the same antenna mounted two wavelengths above ground? This can well be true, at least as far as the signal strength put towards the horizon (which is where you want it) is concerned! Also, 5/8 wave antennas can produce real gain as opposed to a 1/4 wave whip. Combine going from a 1/4 wave ground plane on your roof to a 5/8 on a tower and you could come up with quite a few dB difference - a difference approaching adding that amp (and very possibly at a lower cost). It will also improve your reception.

This is somewhat conjecture on my part, however. Perhaps someone else can give you some ideas.

73 from Rochester, NY
Jim

connections are good.

That may be the reason right there. On the bumper
the radiating section of the antenna is in close
proximity to the body of the vehicle.

The other possibility is to check and make sure
that the metal section of the bumper the antenna
is mounted on is really electrically connected to
the body of the vehicle. With all of the plastic
used on cars now you can't take anything for
granted.

Seems like the only one is Twist. I've never seen anybody get so bent over who posted what from where and signed by so-in-so. You should read his comment about where he said he had a bignet account of mine "pulled". Then later claimed he said it was "dealt with". Then finally lied about his earlier lie and said it was "pulled". He's so screwed up he can't remember which lie he told on what day anymore.

3150. Astatic 636 doesn't work on TRC-485

Newsgroup: rec.radio.cb
Date: 2003-08-27 05:22:36 UTC
From: explorer233@aol.com
Message-ID: <de11d7c4.0308262122.6afe488b@posting.google.com>
Source record: 164684

I bought a new old stock RS TRC-485 off of eBay and rewired my Astatic 636L microphone for it and it doesn't sound good at all. Very low audio. The radio puts out 4 watts and swings 17 peak with the stock mic. The Astatic only swings the radio to 7. I also tried an old dynamic mic and that sounds great on the radio. I rewired the Astatic three times with two different 5 pin DIN plugs and it still doesn't work. I rewired it and put it back on my Uniden 78LTW. Why won't it work on the TRC-485? Thanks.....

From what it sounds like, you need to turn your output on the radio
down. Too much drive can kill an amp. Most 225 amps I know should only
have 3 watts input to perform great.
Try hooking the amp directly to a car battery. If it doesn't buzz, you
may need to get a bigger or better power supply. Also try different
arangements with your coax. I had a "thought to be good" piece of coax
that tested fine, but when used with my Palomar 600, it would cause my
audio to squeal. I changed it to a different jumper and had no squeal.
Also try a different microphone. If I think of anything else, I will
submit it. But Im leaning more towards the drive output power from
your radio.

Fred,

I have just found my "standard-minimum" hiking kit, and it's listed
below. You may find it useful, but I'll bet you get plenty of sniggers
from those who have never been in a tricky situation.

Many, many, years ago, 3 of us did get a bit in the pooh. While we
were young and fit, as well as having plenty of survival training, we
had a tense day and night until we found our way out. The kit below
would have been a big help!

My list:

Matches, waterproof in a 35mm film cannister
candle stub
Bic butane lighter
Zippo lighter
several Band-Aids and a crepe bandage
2-3 safety pins
a dozen or so Disprin
magnifying glass
small bottle alcohol, about 75 mL.
Water purifying tablets
fish hooks and line
nylon parachute cord
Space blanket
A good solid pocket knife, or survival knife
2 x compass (one good, one standby cheapie)
Maps as required
A very loud whistle
2 x CDs
5 x single edged razor blades
pencil and paper
sunglasses
small roll of duct tape
LED flashlight and spare batteries
Plastic bags large and small
A 35 mm cannister holding cotton wool balls soaked in vaseline (a
great firestarter)
Waxed cardboard box to hold some of the above (secondary duty as

firestarter)

While it reads like a lot, it's all very compact and light.

While it's out of print, for sure, I often see used copies of an excellent little book: "How to Survive in NZ" by Flt Lt B Hildreth. It's worth a study, and I would generally carry it, depending on how weight fussy I am. He used to teach survival techniques to RNZAF airman cadets, and last I heard he was running a survival school in the UK

Twisty. He will reply with a post filled with excuses and hallucinogenic delusions. He will support his obsessive rants with reasoning that can never be supported logically or factually. His obsession with Leland drives him to the brink of insanity, to the point where he cannot resist ANY challenge by Leland, or anybody that -might- be Leland in another alias -- hence his parallel obsession with me and "George".

Truth be told, Twisty needs to shut his arrogant trap, give up the newsgroup for a couple weeks, pay attention to the things that matter (his kids), go fly a kite, and realize that the integrity of his alias "Twistedhed" is no longer an issue -- it's a lost cause. Maybe you can clue him into the reality of his situation.

Which is exactly why I refuse to be drawn into another "debate" with
him, where I have to defend the semantics of the words I choose, because
his communication deficit (Funny he accuses others of having a malady,
which is plainly obvious, that he suffers from himself), or more
accurately, a comprehensive deficit, prevents him from getting the
clearly intentioned meaning, and instead he warps the words to fit his
own immaginary scenario. He gets his bowels in a knot because he can't
resolve the fact that "suburban" and "a suburb of" are basically the
same thing, yet he uses that little semantic difference to accuse me of
telling a deliberate lie. Yet he ignores the obvious, that if I were
going to tell a deliberate lie, it would be far easier for me to just
make up a town somewhere, instead of the one I lived in.

> He will support his obsessive rants with reasoning that can never be

> brink of insanity, to the point where he cannot resist ANY challenge by Leland,
> or anybody that -might- be Leland in another alias -- hence his parallel
> obsession with me and "George".

He is obscessed by anyone who will argue with him. As part of his
narcissism, and antisocial personality disorder,

http://www.bullyonline.org/workbully/serial.htm#Attention

he seeks attention. Arguing with him is pointless, as he will never
acknowlege your side, and no matter how concise, logical and factual you
present your side, he will find one semanatic and spin it out of context
to start down yet another distorted path, while attempting to put your
reputation on the defensive, while coulding the original issue, which is
his own antisocial and borderline criminal behavior, with respect to his
blatent disregard for FCC rules. An example of this, is his taking the
comment that I've overheard sexually explicit phone conversations on my
scanner, and morphing it into the accusation that I'm a pedophile, even
though this occured over 20 years ago, when I was maybe 5 years older

than the people I was listening to, and before the passage of the EPCA, which now might define some of these activities as illegal.

Attention is what he craves. He relishes the fact that this newsgroup has degenerated into a free for all "Love fest", with twisty at the center. The more you come back at him, the more he will ooze and drip his unique brand of vitriol over the group.

You best bet is to ignore him totally. Let him think what he wants. What he thinks of me, is irrelevant. He is unimportant in my life. He doesn't even have the guts to come out of the closet, and use his real name. So the rantings that an anonymous, paranoid delusional sociopath makes, become meaningless, and close to zero on the credibility scale. A wise man once told me that it's pointless to argue with an idiot. I'm finally taking that wise man's advice.

There are far more intellectually stimulating people out there, who will debate points on the merits of those points, and not as an personal affront to another's character.

> Truth be told, Twisty needs to shut his arrogant trap, give up the newsgroup for
> a couple weeks, pay attention to the things that matter (his kids), go fly a
> kite, and realize that the integrity of his alias "Twistedhed" is no longer an

> situation.

He'll never "shut up" as this is his chance to feel important. The only way we can rid this newsgroup of twisty is to ignore his rants, and allow him to slink back into irrelevance.

While I know nothing of him, other than basing his personality by the crud he spews on the newsgroup, I'd have to believe that he much the same in person. I would have a hard time believing that he could hold on to a family. I don't know too many women who could deal with his particular brand of APD. His visits with "kids", would most likely be on an every other weekend basis. That's why he has so much time to spend on this newsgroup.....

(watch the vitriol laced spew that this post will generate)

LOL....tough to answer those questions, eh, "nad? Too painful to explain away those lies, eh, Lelnad? Tough for you to explain why you had to forge me several hundred times in the body of your posts,,,wait a second,,you were trying to "BUG" me....LMAO! In fact,, everything you have "tried" with me has illustrated what a magnificent failure you have become......now, continue on and make me your topic,, as it is great pain for you to confront your malice and campaign of hate. So far, in only 2 days, KC8LDO, N3CVJ, and Frank Gillinad have made claims and accusations,,,,,,with no proof. I illustrate your own lies by posting your own contradictions..I don't need to forge you, Lelnad, as you have done myself. I need not lie about Davie Hall, his posts show his own lies. I need not falsely accuse Frankiestein of anythimg as he claims I have done, but for some reason, is unable to provide headers or a post backing his claims,,,much in the manner you have been breakig your very large ass to find a way in which to "bug me..LOL...you;re impotent, Lelnad, Grow up, and you possibly may find yourself not wallowing in self-pity because of self-loathing. Your ego may not recover, but its never too late to redeem yourself and liberate yourself from feelings of no self-worth and inadequacy..

3167. FS: Rare Collectable ARF-2001 Transceiver

Newsgroup: rec.radio.cb
Date: 2003-08-27 12:49:55 UTC
From: jonweiner@aol.com
Message-ID: <20030827084955.28589.00000004@mb-m03.aol.com>
Source record: 164701

I have for sale a rare and collectible Citizens Band radio. It was made by A.R.F. Products, Inc. in the late 70's. It had a retail price of $ 1000.00, and was produced in small quantities. Estimates indicate less than 1000 were produced. It was made in America, using only American parts. The internal layout was similar to commercial communications gear; with different PC boards for each "Stage".
The SAM switch controls the Servo Amplitude Modulation circuit; an enhancement similar to a processor that A.R.F. incorporated into this design. The Mike Gain controlled the FET Preamp in the base of a D104, which started it's life as a G-Stand. The special preamp was placed in it's base, and was powered from the radio, as well as having it's gain controlled by the front panel control. Above the normal controls on the bottom are switches for some unique features. The PA is a familiar function, but the ARF-2001 added a twist; TALK BACK. This isn't the "10-4 Good Buddy" type of talkback used to set your Echo for maximum disturbance factor. It was used to allow the ARF-2001 to be used in an industrial or commercial site as an intercom; allowing the PA Speaker (mounted in another department) to be used as a microphone to communicate back to the office. In addition, the External Speaker switch allowed another listening device to be mounted and controlled via the front panel. To the right of the External Speaker switch is the familiar Noise Blanker (NB) switch. One more to the right is a feature labeled AMSIL for AM Silencer. This was an A.R.F. Products exclusive that would mute any AM (or carrier based signal) when the set was operated in the SSB Mode. It is impressive to hear it eliminate all hetrodyne, beeps, boops and Billy-Bobs on SSB so only a Sideband-Based signal would pass. Can you imagine a Sideband Squelch control that actually worked? This feature made this a reality. The switch to the right of this feature allowed the SWR to be monitored and was used in conjunction with the SWR / RF / Signal Strength meter. The other meter allowed Monitoring the percentage Modulation and Calibrating the SWR forward level.

In the center of the rig is a status window that has indicators for Transmit, High SWR, AMSIL and Receive. Below that is a Dimmer control for illumination level and a CALibrate control for setting the SWR and Modulation percentage reference level. To the right of that is the frequency display which displays the Channel number. It also functions as a digital clock. There was a factory option for a 5 digit frequency counter module that could be installed here to replace the clock/channel display. Below the display are the Mode and Scan switches. Each have an illuminated tip which changes color dependent on the position of the switch. The Scan function could seek either Busy or Open channels as an aid in finding either a clear channel or a channel in which a conversation was in progress. The Keypad to the right allows direct channel entry, programming or accessing the 10 memory channels, changing the scan rate or direction, last channel recall or immediate jump to channel 9 for Emergency traffic. Below the Keypad is an Antenna switch to allow front-panel control of

two different antenna systems. The power switch toggles the display from channel readout and ON to digital clock and OFF

In excellent condition. Photos available. Price $425.

3168. Please help! Strange power/radio problems in my apartment!

Newsgroup: rec.radio.cb
Date: 2003-08-27 13:03:11 UTC
From: Clare Quilty <quiltyfilms@hotbirdmail.com>
Message-ID: <3f4cac11$0$12638$afc38c87@news.easynet.co.uk>
Source record: 164702

Hi there,

I have a very odd problem that I am hoping some kind soul out there can help me with. It has puzzled the minds of electricians here in Brighton for some time!

Basically whenever a taxi goes past my apartment and receives a message, I get a loud thumping sound from my subwoofer. I initially thought it was the subwoofer itself picking up the noise, but since I bought a wireless network transmitter which is plugged in on the same loop, it resets itself at the same time as the sub clicks.

To eliminate the possibility of the two causing the prob I have run them separately and the same thing happens! Sure enough as I run to the window, I see a taxi going off into the distance (too few here for it to be a coincidence, but too many to make my life and movie watching a misery!). Also when there was a fire engine opposite and they were talking back to their base, I could hear every single word (loudly!) through the subwoofer. It seems that it is spiking my power supply! BTW I live close (a block) from two different taxi companies with masts. I don't know if that is related.

What can I do? Any ideas or help are greatly appreciated. Many thanks in advance!

Best,

Tony

P.S. To reply to me you will have to knock one of the words out after the "@" in my address - just make it the name of a very popular web based email service and it will get through ;)

Youre wireing is being an ariel and picking up the VHF/UHF FM which the
only amplitude change is the carrier turning on or off. Thats the thump.

Source record: 164707

>EVERYONE THAT COMES BACK TO >ME SAYS IT HAS A BUZZ
Easiest mistake is power wires being
too small. If you have a 12 volt battery
laying around, connect it to the amp
and leave the vehicle connection on there
too. Be sure to check the polarity, this
is no time to get it backwards!
Try the amp again. If the buzz is gone
you have inadequate voltage/amperage.
This is most likely due to power wires
being too small. Palomar 225, i figure,
will need 25 amps max so 12 gauge min.,
10 gauge would be best, would
probably do the trick. Wire direct to the
battery. Do not go to a fuse block. If you
wish to fuse it do so at the battery. I also
am assuming you have a low SWR.
Good luck....333

This is a troll or it's silly.

There are thousands of people operating in the "freeband" above 27.5 and
below 28 mhz. Any *one* of them isn't an issue unless someone has a bug up
their ass about it.

You guys got hosed.

The THUMP is the taxi's calling you to TAKE a TAXI--he is advertising to you. So call them up and take the taxi and the problem will go away! But the next problem is that you will go away also! So then you will have to click your heels together like Dorothy did and say "there's NO place like home." Then go home and buy a CB radio and cause a thump in the taxi's radio! Then they won't do that when they go by!
Dave!!

Source record: 164714

Hmmm...I usually agree with all the things you say D & D, about God the Almighty Father and Creator of all things, however, removing the Ten Commandments is NOT about God, but rather the Constitution. If those who are offended by the attempts to remove the Ten Commandments, then they need change the Constitution, but be warned, to do so will open the floodgates and ALL religions who want equal time must be given such. However wrong one may believe it, however offensive it may be, the doctrines of other religions would have to be displayed alongside the Ten Commandments. Think about how those that are screaming the loudest about wanting the Ten commandments displayed would feel if a passage of the koran (despite how many of us feel about it) was displayed alongside it. It's either complete separation of church and state or it's acceptance and equal time to all, otherwise, your undermining what this great country is about. Bush has assaulted, and may continue to assail the Constitution (the very document he swore to uphold and protect with his hand placed upon a bible) without any assistance from American citizens placing their selfish needs before that of the people and of the documents that forged this great country, under God.

3180. Re: Please help! Strange power/radio problems in my apartment!

Newsgroup: rec.radio.cb

From: quiltyfilms@hotbirdmail.com (Clare Quilty)
Hi there,
I have a very odd problem that I am hoping some kind soul out there can help me with. It has puzzled the minds of electricians here in Brighton for some time!
Basically whenever a taxi goes past my apartment and receives a message, I get a loud thumping sound from my subwoofer. I initially thought it was the subwoofer itself picking up the noise, but since I bought a wireless network transmitter which is plugged in on the same loop, it resets itself at the same time as the sub clicks.
To eliminate the possibility of the two causing the prob I have run them separately and the same thing happens! Sure enough as I run to the window, I see a taxi going off into the distance (too few here for it to be a coincidence, but too many to make my life and movie watching a misery!). Also when there was a fire engine opposite and they were talking back to their base, I could hear every single word (loudly!) through the subwoofer. It seems that it is spiking my power supply! BTW I live close (a block) from two different taxi companies with masts. I don't know if that is related.
What can I do? Any ideas or help are greatly appreciated. Many thanks in advance!
Best,
Tony
P.S. To reply to me you will have to knock one of the words out after the "@" in my address - just make it the name of a very popular web based email service and it will get through ;)

_
Wireless transmitter? Are your speakers remote wireless? If so, there is your problem.

This is a troll or it's silly.
There are thousands of people operating in the "freeband" above 27.5 and below 28 mhz. Any *one* of them isn't an issue unless someone has a bug up their ass about it.
You guys got hosed.
-W

_
Stick around,,I have a gaggle of hammies with admitted "bugs" up their ass. They claim I am their "bottom line" in life. You'll have to wade through the bullshit, though,,,,KC8LDO forges me on a regular basis, has a fetish for men's testicular wear (googie the term "jock" and "KC8LDO" in this group), lies, and makes claims he refuses to provide for,, N3CVJ lies and lies and lies and makes claims about cbers getting busted and goes to pieces when confronted with the facts that it never happened, and Frank Gillinad makes false assumptions and accusations against cbers with no proof, as he has no clue who is messing with him and ruining his life.
WA3MOJ is simply insane. For a grand total of his world record he set for the most posts under the mosts names, email Landshark. Other than that, this little gaggle of mine is all about "hosing". Thanks for setting them straight.

If you;re going to continue to publicy use the cb group to have your fun with the other two swine, you're going to have to back your claims as well. You're nobody special. You accused me of threatening you, posting your phone number, and claiming you were a chid molester,,,,,post it. Well, you can't see, Frank,,you're lying again. Wonder if there is any connection between the false accusations by yourself, KC8LDO and N3CVJ? I mean, all three of you claimed things and can't produce anything to back your claims except to whine, cry, and bitch about me....LOL...like lids do.
You accused me of all kinds of things,,,KC8LDO felt so low he needed present his forge of me again..it makes him feel better (sshhhh! Don't remind him the forge exists nowhere in any internet archive and only in the body of his post) about his low self-esteem. And Davie,,well, My gosh, who would have thought we had one right in our own midst? He shouldn't make claims and deliberate lies he can not provide for. Let this be a lesson to the three of you dogs..you can either get past yourselves, or cry and piss and moan about 'ol Twist for the rest of your pathetic lives..of course, you three can always threaten me some more,,,,how many is that now for each of you? I've lost count. I'm quite used to y'alls impotency and public displays of incompetence.

I am looking for a reference for a mid line or slightly better
quality handleld CB. I just want to be able to keep in touch with
another vehicle that we will be traveling with. I have a mobile unit in
my vehicle but need a handheld for the other car. It would be preferable
to have the capability to attach a magmount antenna and a jack to power
it from the cigarette lighter. I imagine I could buy a toy
for pretty cheap but do not want a piece of junk. Just a guess but I am
hoping to get what I want for between $50 - $100.
I'm looking for a reccomendation for a make and model and also a
retailer where I could get a radio as soon as possible. An e-mail would
be great but you can also just post any info here. Thanks all.

_
LOL,,,,man, these guys like to think of themselves as radio cops and internet speech cops, but when the tables are turned and they are made to obey rules, they become threatening, hostile, rabid, accusatory, personal, insultive and off-topic. Hundreds upon hundreds of pposts devoted to ME by the resident newsgroup terrorists N3CVJ, Frank Gillinad, KC8LDO, and WA3MOJ. See, they suffer massive deficits in intellec tand communication and as such, have never learned a way to communicate their feelings of self-worth effectively. They are defeated easily in debate as they allow their childish emotions to rule over logic. They are unable to debate or discuss absent of insult and are easily confounded by actual topics, so they do the only thing left that they were taught by whoever raised them....attack the person, not the topic.
Most hammies agree that those hammies who feel thecompulsive need to use such obscenities in any form of communication medium more than likely use the same language on the air: The Scourge of Hammie radio. Their egos were handed to them on a platter and they have never had do deal with such turmoil in their lives before, Mike. Good luck to you, sir, and thank you for your good sense. Perhaps you can teach some of these lowlives proper communication technique,,they have yet to display any in years of rec.radio.cb posting.

3211. Loosening coil slugs in tube-type CB radio?

Newsgroup: rec.radio.cb
Date: 2003-08-28 15:08:12 UTC
From: k5dh@raytheon.com
Message-ID: <wVo3b.143$612.1293@dfw-service2.ext.raytheon.com>

I am restoring an old Kris 23+ tube-type CB radio.
As with most Japanese-made CB gear from that era,
the coil slugs are held in place with some sort of
glossy white paint-like sealer. How do I dissolve
that sealer without damaging the coil forms? I'm
unable to budge the slugs with a diddle stick, and
I don't want to risk fracturing a slug by trying
to force them.

73,
Dean K5DH

Usually a drop of solvent will loosen them. If the coil
forms are plastic it might be a problem, but you can test the
solvent on the end of the form first.

try alcohol first for solvent, it should not mangle coil forms. if that
doesn't work, a paintbrush with a little bit of acetone is the next step
for solvent.

Mots of the time coils just don't come untuned, why do you need to turm
them.
Another Goldenscrewdriver tech.

Yes, you're right. Coils usually don't just come untuned.
However, other components in the circuit will change value
with age, often necessitating an alignment. This is even
more true with tube-type gear, where the heat takes a big
toll on components over the years.

So, I'm "Another Goldenscrewdriver tech", am I?

I am a professional electronic technician with 23 years'
experience with a major aerospace company, and an Extra
Class ham with 26 years in the hobby (a REAL Extra, not
a modern era "gimme" Extra). I've been building, fixing,
and restoring gear for all of those years. Because I'm
restoring a vintage CB radio rather than a piece of ham
gear, you assume that I know nothing and am just dorking
around with it? What are your qualifications? Are you
justified in making such observations about others?

Thanks for all of your insightful "help".

73,
Dean K5DH

Dean,

This is one reason we have problems attracting newcomers. The incessant flames. The fact is once you mention "tubes", folks should realize that the thing may indeed not be well tuned. I'm trying to think if it is the GE Master II ... but it is a VHF rig and the cavities used to grow "crystals" in 'em and detune 'em. One guy showed me a quick way to fix it (yes, you can go in with a q-tip). He picked the radio up and banged it on the bench about 3 or 4 times. Suddenly, it no longer took 4 uV to get a decent signal. It was down to 0.25 uV. I did have to clean my shorts out the first time I saw it, however :)

I was given an old SP-600 which had been under salt water for a brief period of time (I got the radio in 1968). I ended up replacing most of the components in the whole front end as it could barely receive local broadcast stations. It worked fine after I did that, but it was a real mess. Easier to buy a new receiver these days (prices are reasonable and if you figure my time, I was probably making about twenty five cents per hour fixing that slug!). Of course, that was back in the late 60s. Figure a grand buck and a half an hour in today's wages :) It was a good learning experience, however.

73 from Rochester, NY
Jim

You didn't mention whether it's a hollow core (hex) or a slotted top. If it's a hollow core, many of those older radios used long slugs. If that's the case, you can usually break them loose without a problem by using a long hex wrench or "diddle stick" to contact as much of the slug as possible. Just make sure you have the correct size wrench (a tight fit). If it's a short or slotted slug, you will probably need a solvent. As far as solvents go, alcohol doesn't usually work, and acetone doesn't penetrate. Try a drop or two of toluene and let it soak in for a while. It will be gummy, and might even be worse than breaking it loose when it's dry, but it won't hurt the coil form. Just remember to measure the slug before you try anything so you can replace it if it breaks.

Oh really? Can you read, Hypocrite Landshark? If so, go through the archives and find where I have threatened any of the people named by either of us.

> So please, if you are going to play the part
>of "picked on", at least play truthfully.

Do you want to talk about truth? Did you read that list of forgeries by Twist? Did you see the one's where she accuses me of being a child molester? Or where she claims I'm five different hams? Or where she fixates on N7VCF and posts his phone number over and over, encouraging others to harass, even to the point ot giving instructions on how not to get caught? Probably not, since you can't read. If you want to talk about truth, at least get your facts straight.

> When you
>talk tech, I almost always agree, when you talk
>politics I almost always agree, but when you talk
>about how you've not trolled, not accused, not

==========

It's human nature. Anybody who loves repairing,
restoring elderly radio receivers and say's he's never
been tempted to twiddle the slugs in coils and and
slots in trimmer capacitors is telling lies. There's a
good chance that in mass-production line conditions,
receiver alignment, front-end and IF stages were
hurriedly mis-adjusted before leaving the factory.
Experienced maintenance people and knowledgable
amateurs using the correct gear have accumulated ample

evidence of this over many years. There's a lot of satisfaction to be gained from returning something to a better-than-new condition.

I plead guilty to 'illegal' twiddling.

My first offence was committed on grandmother's old Victorian kitchen table in 1941 during the air-raids on Birmingham, England, at the tender age of 16, on a neighbour's 4-valve, 120-volt Excide dry-battery plus 2-volt lead-acid accumulator-operated receiver. The little white-haired old lady offered me 6 pence which she couldn't afford on a widow's pension of 10 shillings and 6 pence a week so I gently refused it.

By 1944 I had advanced to re-aligning secret, 50Kw, 3000 megacycle cavity-magnetron (invented in the same city at the same time as the first offence was committed) air-borne radar equipments.

Of sound character, I respectfully beg for the lenience of this Court.

Reg, G4FGQ

PS: Grandmother's kitchen table is now displayed in the Black Country village museum, Dudley. The first cavity magnetron is now displayed in the Science Museum, Kensington, London, England. But almost identical replicas are hidden inside many millions of microwave ovens in the world's domestic kitchens. There's no trace of the affectionately-remembered 4-valve battery-operated receiver. Thanks to Messrs B and B and a thirst for oil, air raids continue.

My experience has been that the "hex" hole slugs that stick are broken
and the only hope is the pick out the pieces and put in a new one.

Good luck
Bill K7NOM

Likely the slugs are sealed with an acetone based paint. Similar to nail polish. Reason: dries fast.

You might want to try some nail polish remover (acetone) to soften it up. I can not offer much encouragement for success, however.

Cheers,

Al Link K4ICL

Dean -- I don't think it was meant that way, but it was a good
observation. I've am a retired Journeyman Technician, spent 26
years in the Navy all in electronics, was a Tech for Sony for 15,
years, a ham since 58 and have been building, repairing and whatnot
electronicswise most of my life -- and I should have thought to mention
that they seldom change as well. I've been caught in the 'Golden
Screwdriver' situation myself and just laughed it off.

Givem hell, Dean!

On the coils, I've found that heating the coil form (heat gun is best but solder iron if done carefully) will sometimes melt the wax on the coil form allowing the slug to turn.

If not available, I have on occasion drilled a hole in the PC board bottom of the coil; sometimes getting access for the tool through the other end of the coil will make the difference.

If you do crack the coil, I assume you know its pretty much worthless for reliability and proper tuning after that. Worse case, try to dig up some used coils from other gear and just drill out the old core and install a new one.

Good luck

Ed WB6SAT

in the movie.....the forrest gump character made at least four
fatal relational mistakes.....

1. he tried to make a woman change ,
2. he saw the woman not as she is but saw her as she was,
3. he thought she was the only woman in the world for him,
4. he allowed her to come back to him, even after she fucked
up.....

all of these are very basic and very bad mistakes.....all american
men should learn from this.....

I have put an old Allen wrench into a stuck slug and heated it with a
large soldering iron, then carefully remove the slug by turning the
Allen wrench with a pair of pliers while the slug was warm enough to
melt the wax.

One other thing, some coils are sealed with "Printer's Ink", a water
based ink that chips easily. We used it on all the coils in the PRC-77
radios built by CE.

You have to be careful drilling holes in circuit boards. I have
worked on a lot of RF boards with traces run under coils that will be
destroyed with a drill bit.

That's a good way of transferring the heat. But care must be taken
not to tork the allen wrench too much. I've broken far too many slugs
with those inflexible steel tools.

Thanks for that reminder. Forgot about some water soluble sealers.

That's a given, that care must be taken where you drill. I've never
damaged a trace yet, though I've opted not to drill some. Of course if
the board has internal traces (sandwich) forget it!!

Ed

The last boards I worked on were 16 layer. About the only place you
could drill was through a bad via the connected the top and bottom
layers. At up to $8000 per board, they were rather fussy about extra
holes in new boards.

From: Joe <gm@nospam.net>
Message-ID: <qAH3b.3355$xD2.3243@fe01.atl2.webusenet.com>
Source record: 164766

I've owned several cb's in the past and have had extremely good transmission/reception with my old ratshack unit. It is probably 15-20 years old. It's dead now and I don't want to fix it because a new unit is so cheap. I've been looking at the uniden PC68XL and the other uniden units above it esp the PC78LTW. Questions...

1. Although the weather capabilities are neat do they detract in any way of the performance (transmission/reception) of the unit?

2. I have room for a full size unit in my pickup but I may put a unit in my explorer too where size is limited. Are the uniden compact radios any good?

3. If I'd like to get 20-30 miles range (assuming a mod) is any of the unidens better to mod than others.

3233. what is ssb?

SSB (USB/LSB) is a different mode of transmission like a AM/FM radio
but with different characteristics. SSB Has no Carrier. Alot of people
consider USB/LSB different channels, but they are wrong. SSB radios
use the same channels as AM, a kc difference +/-, Just a different
mode. So if you get a 40 Channel AM/SSB radio, You get a 40 Channel
AM/SSB radio! Not 120 Channel....

So if you are using ssb does the other person have to be using
ssb too? For example can a ssb on channel 19 talk to channel 19 on a
regular unit?

Yes the other person needs to be using a SSB radio. SSB or Single Side Band is a more efficient mode tham AM, on AM you are using the center carrier as well as both sidebands, on SSB you are using only the sideband you have selected so all energy or power is used only on that sideband. When using SSB there is no carrier unless you modulate (talk). AM on CB is regulated to 4 watts output, where on SSB it is 12 watts. There are more technical things I could list but I thought I'd keep it simple. I hope this helps.

Bwwwaaaaaaa!!! Base to base on a quiet day, good luck mobile.
You could do that on sideband with full size antennas, no short
stuff. Cheap radio and a great antenna work better then a good
radio and crap antenna.

There used to be a sort of cement you could buy, some kind of urethane I believe, that was mixed up with a very finely powdered high-permeability iron. GC Electronics might still make it, and it used to be sold for emergency field repair of broken ferrite bits.

Last weekend was great fun. For those of you that participated (non-club members also welcome) we will be on the same QSY frequency as the previous two weeks.....as you all know, we are getting tons of new pledges, but you MUST have a physical address,,,no PO Boxes, no exception. Renaldo repeats his email several times during the two hour window, for those who want further information.
Remember, this frequency has been cw only for some time, and the club would love to keep it that way. By the numbers:
Britain: 43
Canada: 27
Spain: 16
USA: 12
Australia: 8
Ireland: 3
Greenland:1
Mexico: 1
Africa: 1
France: 1

Some members said QSL cards have already began arriving from overseas. The weekend division designee is still up for grabs. Happy DXing.

that was semi-official repair policy for apple II computers in the
minnesota education system... turn it off, lift it up a foot or two, and
flat-foot slam it back on the table. oxidation and heat popping on the
tin-socketed chips, you understand, and the machine was well enough
built so you could get away with it.

Big question mark here. Noise, atmospheric and man made determine
your distance. At night when it's whisper quiet you can easily talk 20
- 30 miles.

I realize that stuff affects range. What I'm asking is... If
I were to want to mod the unit to get better range (say 20-30 miles)
would a certain model be better/easier to mod than another.

3250. TWISTEDHED SIGHTED IN TAMPA BAY

Newsgroup: rec.radio.cb
Date: 2003-08-29 19:51:19 UTC
From: twistyisaliar@yahoo.com
Message-ID: <932afc6.0308291151.6a48281d@posting.google.com>
Source record: 164784

Regarding the weekend radio pirate monitoring search in Tampa Bay, there were several "hits" on 8/24 with video taken of a vessel in a number of locations, most notably passing a certain set of rocks, and in a well-known fishing spot that charter captains are known to frequent.

Two shore stations were able to vector the search craft after hearing "Twistedhed" transmitting illegally on 27.555 and identifying himself as such. Audio recordings and video have been sent to the FCC along with the offending vessel's registration number.

We will not release the information and/or audio and video at this time but anyone with additional data can email tampabayradiosafety @yahoo.com and be assured we will take action on this matter. The gears of justice grind slowly, but with extreme precision.

I've always had good luck by heating the slug with a soldering iron tip,
set on low heat. The "gliptall" will usually melt before the coil form
does, but be careful just the same.

That's the understatement of the week. I've seen lots of new stuff that was factory mis-adjusted, and not just electronics. My new GMC pickup truck tracked a bit to the left until I had a front end alignment done.

Ya know, Dave, if you want to live in a country where the Religion and
the Government are one and the same, you could move to one. Here's a
few suggestions:

Afghanistan
Iraq
Iran
Saudi Arabia
Qatar
Pakistan

Should I go on, or do you get the point. What makes America great is
the fact that we have our religious liberty. Of course, you right
wingers don't really see it that way...

Osama Bin Dave?

You're right.. It's not a big deal.. But calling names because the law and the U.S. Constitution was upheld for a change is ignorant. THAT is the point.

Well, that and pointing out that Dave is the redneck pseudo religious nut that he is.

He's right on this one. Get a good antenna.
Tune it to the frequency(ies) you intend to
use. Of course the right tuneup will help.

Joe,
Actually, the range may double. But, that depends on
a number of things, not just power or what mode (AM, SSB)
you are using. I wouldn't expect a huge amount of difference.

Reg, you got my eyes to watering up a bit. How many years has it been since the local store carried 67.5 and 90 volt B batteries? I remember them carrying the things into the 50s and perhaps the very early 60s, but they are long gone now. Back to "tuning" radios; I bought an HTX-404 some years back and the darned thing was of 5 KHz. I returned it for another - and it was also off 5 KHz. At that point I realized that Rat Shack (or their supplier) didn't have properly operating equipment to even set the darned thing on frequency. So .... :)

Has changed over the last few weeks. I've been silently reading and laughing. It's really amazing how much time some have to devote to defending, and others to bashing. I've taken to reading the group, and realized that the first word in the description of the group is the one I like. I don't have the time or emotion to devote to something so trivial. At any rate, I wish to all a great Labor Day weekend. And for those that don't have to work, remember those of us that do, and drink a beer or whatever your choice of beverage for us.

I'm not a CB'er, but I have an older model base station that was given to me recently. It is a President "Dwight D." Hooked it up and tested it. The pots are a little dirty and noisy, but otherwise all works well except for the mechanical digital clock. Although old, it seems like a quality unit.

Google search doesn't turn up much of anything on this radio. Anyone have any idea what kind of quality this radio is, and if it has any maket value (perhaps on e-bay)?

Thanks. HH

What's changed is how many have turned against
Twirted since he's crossed the line from harassing
amateurs in the NG to harassing them via falsified FCC
complaints, ISP complaints, etc.

Nope. Inverse square law, if your twice as far away u recive only a 1/4 of
the signal.

Nope. 3KHz as opposed to 6KHz bandwidth, 3dB gain. .25uV as opposed to .5uV sensitivity, another 3dB gain. A useless carrier, a waste of power and cause of heat. Sideband vs AM, AM loses.

3277. Indoor antenna

Newsgroup: rec.radio.cb
Date: 2003-08-31 02:15:06 UTC
From: bruceb1836@aol.com
Message-ID: <20030830221506.20041.00000189@mb-m28.aol.com>
Source record: 164861

My son has talked me into trying to get one of my old mobil cb's to work in the house for him. I have a proper power supply, but the only antenna I have is a mag mount. I put the antenna on a large cookie sheet. It works but very poorly. I was thinking about trying one of those indoor dipole antenna's. Has anyyone tried doing this before and what kind of results did you get? Any thought or suggestions would be greatly appreciated. Oh I live in a townhouse and what I can put outside is very limited.

Thank you,
Bruce

They do have some value, but not as much as one with SSB. Maybe
looking at $30.00 maybe more if the description was better.

So now that I understand ssb to some extent, I figured I would buy a new unit with it. I assume the high end unidens had it. Now I see they don't, but that's ok because I can buy a different brand, or I see that some grants are still available. My question is, why did uniden stop making ssb units? Is ssb worth looking around for, or should I skip it and just get an am unit?

>will an ssb unit do for me? Does that just give you more channels?

SSB is much more efficient than AM. CB is allowed 4 watts AM and 12 watts SSB.
That may not seem like a big difference until you realize that 12 watts of SSB
has about the same range and 'talk power' as 100 watts of AM.

SSB uses only half the spectrum space as AM, so each CB channel can be split in
half, one half for Upper Sideband (USB) and the other half for Lower Sideband
(LSB). If everyone used SSB there would effectively be 80 channels. But not
everyone uses SSB, so you need to remember that AM and SSB will interfere with
each other if they are used on the same channel.

>Is ssb worth looking around for,

Yes. If you want improved range and less noise
then SSB is the way to go. You just have to make
sure those you wish to contact on the air are also
using SSB radios in order to take advantage of the
mode.

> or should I skip it and just get an am unit?

In my opinion AM radios are a waste of money
compared to the performance you get using SSB. Of
course there are those who like AM even with its
technical deficiencies. If the people you talk to
don't use SSB then you can save yourself some
money and get an AM only radio.

And a few quotes from another web page:
(http://www.gmrsweb.com/cbweb/cbroguesgallery.html
)

"Illegal use of CB radios adn RF amplifiers and
the epidemic of complaints to the FCC (46,000 in
2000) regarding illegal CB use"

"Rule violators choosing to operate outside the
authorized band segment interfere with world-wide
communication above and below the CB band. They
rationalize their activity as a hobby much like
the graffiti vandal might rationalize painting
over a wall."

"Rule violators turned the service into a
wasteland, dramatically reducing its popularity
with businesses and families. The pathetic and
childish behaviors on the band chased off the rest
of us."

"Like graffiti did in the 70's, illegal CB use
spread worldwide. CB pirates from the USA and
South America can be found in the 10 meter Amateur
Radio Service CW band. The culture of the rule
violator is now the culture of a folk outlaw. A
rogue outlaw whose activities have had deleterious
consequences on the radio hobbies."
Look at the FCC enforcement logs at:

http://www.fcc.gov/eb/Public_Notices/Welcome.html

Look under the section called "47 U.S.C. &#65533; 301 -
Unauthorized Operation"
The fines are nothing to joke about.

Not so surprising. The cookie sheet needs to be
about 17 to 18 feet square to work right. A bit to
large for inside use. 8-((

A dipole antenna would work, BUT being horizontal
you take a hit of almost 3 "S" units loss in
signal strength. Most CBers use a vertical antenna
so the dipole antenna would really cut down your
TX and RX signal strength. 8-||

Or you can try the antenna below from Radio Shack:
http://www.radioshack.com/default.asp

"No Ground" CB Antenna

$41.99
Catalog #: 21-977

For boat, RV, van. Specifically for wood or
fiberglass vehicles and boats -- metal ground
plane is not needed. Half-wave design for
excellent performance on all 40 CB channels.
Mounts on boat rail, luggage rack or truck mirror
bracket. 48" whip. 16-foot cable.

Since a ground plane isn't needed you could try
and stick it on the edge of the roof, or on the
chimney. Being only 4 feet tall, and no ground
radials it won't be very noticeable. 8-)) If you
try using it inside it may not work well.

Those dipoles do work but very poor for distance. I'd say they have the range like a walkie talkie...maybe a quarter to half mile radius of coverage before the transnit quality goes down to the point where nobody will hear you.

3289. Base vs. mobile radios

Newsgroup: rec.radio.cb
Date: 2003-08-31 08:44:19 UTC
From: Lou <NoSpam@nowhere.com>
Message-ID: <vl3dbgekuk1j57@corp.supernews.com>

I'm looking to get a CB to use from home. I'm wondering what the difference is between the base and mobile radios.

They both have the same wattage out from the factory, and I don't notice any fancier controls on a base unit than you can get on a mobile, but the base are way more expensive.

Thoughts?

Thanks!

-Lou

Gday Dean,
dont get too upset about the "screwdriver expert" jibe - we have to rely on the printed word in front of us and take that at face value. Its been a good subject, thank you for kicking it off, and there has been lots of useful ideas to try, so just accept that. If we were face to face or on air, it wouldnt be a problem but using this particular medium misunderstandings and errors do occur.

And I am sure you will agree that as a working tech you MUST have seen the results of inexpert slug twiddling - sort of like old British motorbikes whose ten previous owners only had a 12" shifting spanner as their major (or only) tool....

Perhaps because my house is tall, (roof ridgeline where I mounted the
dipole is about 35 feet above ground) I got reasonably good results
with an indoor dipole. I tried it both horizontal and inverted V
configuration with similar results.

I got even better results from an indoor 1/4 wave verical groundplane
antenna I built from a SO239 fitting and 5 pieces of 9 foot long wire.
I'm lucky to have a 10 foor high attic where I could set it up. Total
cost about $3.00.

I would try the dipole. They are cheap and will certainly give you
better performance than the magmount on the cookie sheet.

The only problem with messing with antennae, is that it can be the
"thin edge of the wedge". I started with a dipole in the attic. I
now have a Solarcon A99 on a mast 45 feet AGL, and am looking at
building a Beam.

Good Luck

3297. Re: Base vs. mobile radios

Lou,
The difference is the power supply. One uses 12 volts DC,
the other uses 120 vlots AC. If you removed the power supply
from each, base/mobile, there would be no difference.

Source record: 164881

Bruce,
The problem with the mag-mount antenna is the cookie
sheet isn't large enough to be an effective groundplane.
Adding a couple of 9 feet wires to the cookie sheet would
help a bunch. They don't have to be entirely straight,
they can be bent around to 'fit', just so long as they are
not bent back onto thems selves.
A dipole antenna will work. If you hang it horizontally
it will be horizontally polarized and you will 'loose' a bit
of signal strength. Hang it vertically, or like an "L" and
it will be vertically polarized and should 'hear' a little
better than the horizontal way.
No indoor antenna will ever work as well as an outdoor
one, unless the outdoor antenna is kinda doggy to start with.
But, an indoor antenna is certainly better than none at all.
It doesn't hurt to experiment and it can be as much fun as
talking to people. Give the dipole a shot, or add a radial
(9 foot wire) or two to the cookie sheet...

JOE>>Is ssb worth looking around for,

LS> Yes. If you want improved range and less noise
LS> then SSB is the way to go. You just have to make
LS> sure those you wish to contact on the air are also
LS> using SSB radios in order to take advantage of the
LS> mode.
LS>

That's the catch, ain't it? I don't find myself using SSB
much, as I'm almost always mobile. Other drivers don't
seem to use sideband for some reason. Still, it's there
when I want/need it :)

It's not THAT expensive, really. A perfectly fine sideband
rig can be had for under 200 bucks.

JOE>> or should I skip it and just get an am unit?

LS> In my opinion AM radios are a waste of money
LS> compared to the performance you get using SSB. Of
LS> course there are those who like AM even with its
LS> technical deficiencies. If the people you talk to
LS> don't use SSB then you can save yourself some
LS> money and get an AM only radio.

I'm with you. I encourage sideband operation.

My brother-in-law and I use SSB
when we run into each other around town. It's much
easier to talk to him across town on sideband rather than
AM. Less noise, more efficient, more power...

F4CQA> 73

If you mean schematic diagram, I couldn't find any online. Perhaps TopCom
(UCOM) will sell you one. They have a bunch of support numbers for
different contries at:

http://www.topcom.net/support/contactsupport/

It's not really a CB (to be honest, I'm not sure what it is, exactly -
somebody can feel free to fill me in). So I don't know how much help
anybody here will be. I noticed you've been asking around in other French
newsgroups. I'm not sure if "sch&#65533;ma" means schematic or diagram :)

If you just wanted a user manual, you can download it at:

http://tools.topcom.net/userguides/TT3500%20E-NL-FR-D-IT-SP-GR-PORT-FI-SW-
TSJ.pdf

It's in a million different languages, including French.

I remember this guy's site, Leland. It's the one with such altruistic advertising policies but buys his cobra from his top advertiser, Bill's 2 Way.

"GMRS Web reserves the right to refuse service to anyone without explanation. Banner ads should be related in some way to the two-way radio, wireless products, or the personal communications industry. No adult oriented ads or ads encouraging illegal activity are permitted (including ads for export CB radios that are really intended to promote the illegal CB radio market in this country.) Communications companies that specialize in selling illegal radio equipment in U.S. markets or in making illegal radio transmitter modifications should look elsewhere."

Check out www.bills2way.com ; Nope, no "illegal" CB stuff there. What a hypocrite, LMAO.

Remember this thread?
http://groups.google.com/groups?hl=en&lr=&ie=UTF-8&th=31996e0dad6b336f&rnum=1

Moral? Be careful who you quote, Leland.

I get the point Bert. What is the shocker is the
mention that the FCC receives 42K complaints a
year about illegal CB operations.

There AIN'T NO LAW or ANYTHING in the Constitutions about this so called "seperation." This "seperation" was in a letter that Jefferson wrote to the DANBURY Conn. Baptists that were worried about a STATE CHURCH starting here, like Eurpoe had. Jefferson assured him IN this PRIVATE LETTER to THEM that that will never be (even though it exists NOW under IRS 501.3(c)), and for those Baptists to NOT WORRY about it!

So the commies come along and take that section out of context to try to throw Christianity out of the nation! The Supreme Court in 1892 ruled that THIS IS A Christian Nation in the Trinity case. It hasn't been overturned, you pinkos! So IF you don't have a RED NECK like myself, den you is a RED HOT COMMIE ! GO BACK to CUBA or China or N. KOREA, where all your (good?)buddies are!!!

This IS a Christian Nation (Holy Trinity vs. US, 1892), not a secular Humanist one! The religion of a nation determinesw the LAWS of a nation. And since THIS nation was started and framed by Christians, I suggest YOU go back to Europe or wherever your god is more prevalent, so we can see WHO the TRUE GOD (Jesus Christ) blesses, which WAS the USA !

De Touqville in the 1800's said that AMERICA was GREAT because AMERICA was GOOD (that means Biblically correct, going by the 10 Commandments that they threw out of sweet home Alabama this week). Christian Nations are GOOD; non-christian ones are NOT !
Dave!!

Ben Franklin said that THE BIBLE IS the ROCK on which THIS REPUBLIC RESTS !
IF they don't like the 10 commandments, they should GO BACK to Europe!
Which one of the 10 do they not want to obey? Are they Murderers? Thieves?
Adulterers? Which one do YOU commies that are reading this have a problem
with, or is it ALL of them? They have "Twisted" the law of the land to let
the commies try to DESTROY Christianity! I hope the WAR against them starts
in Sweet Home Alabama!
Dave!!

Yep it is. Bush said more nonsence, saying that "The American Worker" can compete with any in the world. HOW can we, Georgie, when our OWN government is against us (with Deut. 28 NAFTA and the rest YOU have done to destroy this country since the 60's) by CHASING ALL OUR JOBS away to RED CHINA & Mehico and wherever? HOW MANY MORE people will lose their jobs before THE PEOPLE revolt against you reprobates in the Congress, the courts, and you skull & bones Chief Exec.? How many jobs must go away before ALL the people rise up and throw out the (Fed. Rerserve) VIPERS (as Andy Jackson called them) that have been causing all our economic turmoil? Good Hambo Jimbo in this NG JUST THIS WEEK lost his job to RED CHINA. WILL you continue to buy CB's and other radios from OUR ENEMIES, RED CHINA ? When will you REPENT pursuant to 2 Chron. 7:14 ? That IS our only answer, because WE CAN'T DRINK BEER anymore, because we NEED all the brain cells we got left, to FIGHT the UN and all other Un-Constitutional enemies of the American People, foreign AND DOMESTIC. Labor Day WAS started and wanted by communists. Communist are UN-American and ANTI-American. They own Hollywood. They have for years. They don't own your CB or guns, but they may own da bullets one day! REAL Americans will be working tomorrow, IF they still have a job!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
Dave!!

The number should have been 46K, not 42K. But
anyway the number came from

the web page at the address below.

http://www.gmrsweb.com/cbweb/cbroguesgallery.html

The section containing the number is in bold face
type.

What I actually find find sad is the relative absence of FCC enforcement
behind 46K complaints. When they DO strike, it's usually against a
freebanding ham who is running 30 or so Watts SSB on a RCI-2950 rather than
"Kilowat Charlie" running a 10kW mobile on AM. Get the demographic
implication, Leland?

3320. There AIN'T NO versus Base-Mobile-Hand Helds!

Newsgroup: rec.radio.cb
Date: 2003-08-31 23:31:01 UTC
From: Dave or Debby <truth@planetc.com>
Message-ID: <3f528567_3@corp.newsgroups.com>
Source record: 164803

In the past, one bought a base when he wanted to talk from the house. Mobiles were used from cars. Walki-Talkies (that's HAND HELDS for you YUPPIES and Hamsters) were used for people that WALKED AROUND the block OR in the woods OR for camping. NONE of them ever switched jurisdictions. NO ONE would of ever think of using a base when walking around, OR a WALKI TALKIE in the car (unless you were under 15 just experimenting). Because of the advent of SMT technology for the Hambos, the "walki-talki" has DIED and now EVERYTHING has got to be HAND HELD ! Hence the hand held CB for the car, which is something that should NEVER BE even thought of ! Just POKE that antenna in the passengers eye while driving and see what I'm talking about!!!!
Dave!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Hey Astatic! how about a Golden Hawk?

3328. HELP: Uniden Grant mic socket help!

Newsgroup: rec.radio.cb
Date: 2003-09-01 02:06:49 UTC
From: NeonHomer <NOSPAMneonhomer@bellsouth.net>
Message-ID: <27a5lv48un2n6vt5berr7ekkkin51t07ar@4ax.com>
Source record: 164812

While I was replacing the mic socket on a President Grant (the 5 pin model), I foolishly unhooked all the wires going to the mic socket PCB. I do not remember where the wires go. If anyone could help me by telling me which wires go where to the mic socket in the radio, it would be appriecated.

I have a black wire that goes over toward the audio chips, a violet wire that goes back by one of the int spk lines. I have a bare wire that has a small wirewrap coil in it below the socket. There is a pink wire that comes from the mic gain control, and a red wire that comes from the PA/Squelch control.

PLEASE HELP!!!

> Humanist one! The religion of a nation determinesw the LAWS of a nation.
> And since THIS nation was started and framed by Christians,

Were they Christians, Dave? Really? It's been said that all anyone
would have had to do at the Continental Congress is call it to order,
and, having a quorum, a Masonic Lodge could have been held.

> I suggest YOU go
> back to Europe or wherever your god is more prevalent, so we can see WHO the

Ah.. so now you're defining what De Touqville said? Must be nice to be
in two people's minds at the same time. Oh, wait.. I forgot, you're
not in your right mind, so, for you, being in someone else's would be
second nature.

> Christian Nations are GOOD;
> non-christian ones are NOT !
> Dave!!
>

Again, you pushing your religious dogma on others. This country was
founded by the Pilgrims, who came over here to escape what? Anyone?
Anyone? Beuler?
They came over to escape Religious Persecution.
Now you're going and doing the same thing Dave; that is persecuting
anyone whose religious beliefs differ from yours. Are you sure you're
a true, Red Blooded American? You're starting to sound a bit socialist
to me.
Interesting how hypocritical you can be sometimes. You claim to be a
patriot and support the liberties this country is supposed to offer
us, and then you turn around and cram your particular flavor of
religion down our throats. Perhaps it's time you take a good, long,

hard look at what it means to be American, and in the meanwhile, do
the rest of us a favor and just shut the fuck up. Oh, and while you're
at it, lay off the crack pipe.

The physics of antennas don't change from one band
to the next unless you believe the voo-doo advice
some others give on the group.

> DO NOT go to Rat Shack! I have a better
antenna---a brand new 20 year old 7'
> BOAT CB

Of course you do. That's why its 20 years old and
you can't wait to unload it on the first dummy to
hand over his money. Of course you forgot to say
it was designed for 23 channel CB's and the match
goes to pot above 23.

I paid 26bucks two months ago for one on ebay, sold with echo mic (cheap one) for 75 after I tuned it and put extra channels in it. It dead keyed 4 watts and swang 18 after a 1969 final swap. 10 kc switch also installed with talkback, and it had no speaker, so I put a high quaility one in under the grid in the center rear..lights and clock were restored. It wasnt bad at all after the mods. I probaly could have gotten more if I held on to it for the right "person". I was not departing with the D104 I had on it ...it was probaly a 8 out of 10 cosmeticly, a 9 on audio output..10 on recieve...

>>Apart from getting a dirty great linear, I fail to see what you can do.
>
>Get more ERP with a better antenna.

He said he wanted more power.
An antenna cannot give more power... just focus it.

But, a better antenna is always the best option. More power only gets your
signal further... you still cannot hear people further away. A better
antenna improves both receive and transmit.
Also, for Americans, SSB is legal and much more efficient than AM.

Regards,

Peter.

Joe wrote in message ...
>Under ideal conditions what kind of range are we talking?
>AM = 4-5 miles?
>SSB = x miles?

If only it was that easy.
Distance is dependant upon so many factors, your antenna, the height of that antenna, your height above ground, local obstructions such as buildings, etc.

From where I am, high up in the hills, and with the 4 Watts FM I am allowed here in the UK, I can get people 20 miles away as if they are down the road. People on the edge of a city also make it here, but those in the city centre do not often make it.

You certainly should notice the difference between AM and SSB.

Regards,

Peter.

>addresses.

No sh*t.
Like the fool who thought they had traced me to Birmingham.
Then, realising their cock-up, they changed it to me having been born
there... some kind of software they were using, huh.
As if that wasn't crazy enough, they then made claims that has me down as
posting from several parts of the UK within a couple of hours. Without my
own private Jet, and landing facilities close to the points, it would not
have been possible. Even then, it would be doubtful.

But, if they were making a fool of themself, then what about the person who
was silly enough to believe it and carry on the crazy suggestions. Yep, if
brains were sh*it, I doub't he would have enough to grow a potato.

Everyone seems to be saying, "not me", but there are "Twisty" Web sites.
The person creating them is clearly obsessed with him as it is the main
point of their posts on here... to promote them.

6 of one, half a dozen of the other.

Regards,

Peter.

| try to keep up "

I am planning on going to the hamfest. This weekend, as well as part of the week, I am working with the Fulton County Amateur Radio Club doing radio demontrations. Club call is K8BXQ 2m repeater is 147.195, we also have 2 HF stations on the air, so if anyone hears the call K8BXQ on HF hey it just might be me.

I guess the FCC feals that the licensed amateurs should know better, and
they should know better, part of getting the license is studying FCC
regulations. Personally I feel that anyone that breaks the rules should get
nailed, all rules apply to all equally. I've admitted to having freebanded
before I got my ticket, and to running power. I still have radios that are
capable of tuning to the freeband but they are not even hooked up these
days. My license, and my money are not worth the trouble the freeband can
cause me.

I thought I'd weigh in on this one.

A handheld is perfectly fine for use in the car. Many are capable of using an external antenna and microphone. With these capabilities, the handheld starts to shine a bit. They're still 4 watt radios, and can be mounted anywhere - which is great in things like small trucks where it can be tricky to find a suitable mounting location.

One cool solution might be to fabricate some sort of a permanant mount similar to those used to hold cell phones in the car. You could have the power and antenna lines located permantently near the mount. In fact, you could do the same in the house. Now you have _one_ radio that's usable whether at home, in the car, or out walking around.

I do realize that handhelds don't have all the features of their larger counterparts. In fact, I don't own one (at least I don't think I do, I'll have to look around). Still, I also know that almost all of the "features" on my Galaxy remain largely unused. Yes, I know what they all do, don't lecture me. I'll leave the finer points of radio operation to another thread. Though I'm an admitted knob-thumber, I really only use the volume and squelch reguarly. The primary reason I bought that radio was because it was pretty damn cool looking for $175. Like, get this: it has a pot to adjust the dimmer - for those of us who might want it "kind of dim" as opposed to really dim or really bright. Heh.

The point is, a handheld is more than capable of wearing many hats. I don't see the rationale behind pigeon-holing it into a defined role. If you're like me and you've got money to burn on radio gear...then nevermind =-)

The advice concerning radials is good; you might try simply placing the antenna on the refrigerator and see what happens. You will have a mass of metal and the metal will be grounded (albeit questionably for rf) through the neutral wire. My guess is that this will help considerably if not exactly up to adding 9 foot radials - if you have the space above the refrigerator to put the thing :)

The MAIN reason is that Hand helds are NOT for car or mobile operation is
that (a) NO microphone to put up to your mouth, (b) antenna gets in the way
(poke a hole in your headliner), and (c) it was NEVER designed to be used IN
a vehicle !
Dave!!

I found a Uniden Grant schematic at:
http://www.cbtricks.com/uniden/grant/grant_sch.pdf

I base my answer on the schematic combined with your description of what
color wires go where (since the schematic doesn't show wire colors). The
"small wirewrap coil" sounds like an inductor. Anyway, I'll go ahead and
call it "bare" below:

pink -> pin 1
bare -> pin 2
violet -> pin 3
black -> pin 4
red -> pin 5

Radio is my hobby not profession. If I'm wrong, somebody else in the
group should feel free to post a correction. i.e. Check my work =)

Yep. Radio waves still have to follow the law, same as the rest of the
electromagnetic spectrum.

The gain is done inside the rig.

BTW, has a raser (radio equivalent of a laser) been invented yet?

Dunno if anyone else has mentioned this but SSB is
really only used above channel 35.

Heh, without the obvious, that is plugging it in, and seeing if it will receive that band.

Yes, I am a newb, without the antenna or knowledge to see if it will receive CB.

Can I tell by looking inside? If so, what would I be looking for?

Thanks,

Erick

Hmmm...it looks like I did a poor job of making my point in my last post.
I suspect most people got it. Having said that, I'm going to re-state it
in an effort to clear up any possible confusion that you and others may
have:

In my last post, I asserted that a handheld transceiver could fufill many
roles, i.e. base, mobile, hiking/walking operations. I didn't give a
specific example, when perhaps I should have. For this discussion, have a
look at the Midland 75-820 for reference:
http://www.bills2way.com/equip/mid75820.html

I'll address your three points made above using this radio as an example:

(a) The Midland has provisions for an external microphone, negating the
need to hold the transceiver up to your mouth
(b) The antenna on this and other modern handhelds is under a foot
long, unlike the 4 foot monsters on handhelds of yesteryear. It can also
be detached (read - no poking through the headliner or your passengers
eyes). More on that in a second. Keep reading.
(c) Midland has designed this radio to be used in a vehicle with the
addtion of the 18-821 mobile-comm adapter.

The 18-821 mobile-comm adapter replaces the battery pack and provides for
an externally mounted antenna and power source when used in a vehicle.
The existing rubber-duckie style antenna can be removed when the mobile-
comm adapter is attached. Neat, huh?

This, combined with an external microphone, allows the radio to be used
in a vehicle in the same manner as a traditional mobile radio. What's
more, a VOX headset could be added allowing for hands-free voice
activated operation. This is kind of cool, because with it a guy like me
could use it on his motorcycle. Traditional mobile radios aren't
particuarly well suited to operation on a motorcycle because they are
difficult to mount and require that the rider use one hand to key the
mike. Heck, I could put this radio in my jacket pocket.

It gets better. Midland is selling the radio and the mobile-comm adapter as a package deal - the 75-822 - for under a hundred bucks. Imagine that: a radio that works at home, in the car, on the motorcycle, or out hiking for under a hundred bucks. What a deal.

Consumers want versatility and manufacturers are delivering. We have alot more technology available to us then we did some years ago. We no longer _need_ 3 or 4 different radios to fufill different roles. Some of us only _want_ them (myself included).

It's funny - in the process of researching handhelds to try and illustrate my earlier point, I found this Midland. Neato. I'm going to buy one now. Finnaly, a way I can use a CB on the scooter :)

Can you tell by simply looking inside? I highly doubt it. I suppose that a radio-stud type person could manage (if so, can you mentor me?!!!), but if you had that ability, you wouldn't be a newbie. My humble suggestion: put a cb antenna on it and see if it receives the 11M band. I looked at a picture of that radio. If one was modded, I doubt there would be any way to directly indicate whether it was on CB or not.

Alan's standard disclamer in the event that the original poster gives a damn: If you're the legal-beagle type, note that using that radio on CB ain't allowed here in the US. Moving on...

Incidentally, that's a pretty old rig for a newbie. Legal issues on CB notwithstanding, do you really want to use that thing?

Keep checking back. Somebody around here might know an easier way to help. I know I'm curious.

Progress not perfection is the key Keith. Some
other freebanders on the group can learn a thing
or two from your experiences.

Thanks for the compliment!

I've posted here frequently before. I stopped reading the NG because I was getting too caught up in the "who-hates-who" and "I-know-who-you-really-are" politics. Though I didn't comment much on the subject publicly, it was mentally taxing and depressing. Since that time, I've come to realize that the choice to get caught up in group politics rests solely with each individual. Anymore - I don't care who knows who, where somebody lives, what so-and-so said 3 years ago and would rather not be involved in any such activity. If anybody wants to know my feelings on certain volitile subjects, they can ask. Note that anymore, I prefer to praise in public and scold in private. If I have anything really negative to say, it'll probably be in an email. Otherwise, I'd just as soon help others when I can, and learn from others when I can't.

I respond to posts I think are interesting, and ignore the ones that bore me. I enjoy the group alot more now. This NG - much like life - is full of good and bad, isn't it? I ignore the bad stuff and enjoy the good stuff :)

I'll try and stick around.

Totally subjective.

>The IMAX 2000 comes close and radiates as
>well. The problem with the IMAX 2000 is it is
>not as well constucted as the Shakespeare.

My "beater" antron has been abused in more ways than you can imagine, including being dropped in abrasive salt water. It has been dropped from tall trees while being bungee strapped, it has been whacked by trees when being used as a mobile antenna during many hunting seasons, it has slivers of fiberglass that irritate the bare hand, is faded from the sun, is so old I can't remember it's exact age, and is used at least 4 days per week with kick-ass nothing-less-than-spectacular results. When can I expect it to fail and what will happen to its inferior contstruction? <g>

Sort of a gentleman's agreement, ssb and am don't get along very
well. One will plug the other's receive.

Back in the day of 23 channel radios, we only used channel 16
for ssb.

I've been working on that theory for quite some time. His whole attitude, with respect to authority, respect, what it means to be a responsible memeber of society and his over inflated sense of self worth, all smack of the attitude of a disenfranchised 20-something.

I do not know too many people, who are 45+, who talk so flippant and reckless. Most older people grew up in a world where respect for rules, and courtesy for others, were still an ingrained part of growing up. The time for protesting, cause adopting, and the naive idealistic attitude that they can change the world, happens when one is young and impressionable. With age comes wisdom, maturity, along with a certain amount of cynicism, which finds its way in as well.

Despite his obvious APD symptoms, there is just nothing in his presentation to suggest that he's any older than mid 20's.

I could be wrong, and if so, he's just one of those rare people who never grew up.

While your response was very rational, and to the point, as much as I'd hate to say it, I sort of agree with DebbyDave's conclusion, although not for the exact same reasons.

My experience with handhelds, both CB and ham, shows performance that was not as reliable or robust as radios designed for permanent mounting. Most handhelds can be run from an external power source, but they lack the power line filtering to block things like alternator whine from being superimposed on the transmit carrier. Noise blanking is also seriously lacking on the receive side as well. It is also harder to work an awkward small handheld radio while driving, and the potential for driving distractions increases.

Another point is that while there are CB handhelds which are rated at a full 4 watts, they often fall a bit short of that value. Typically 2.5 to 3.5 watts is the usual norm for output power. More power out means greater battery drain, so they often keep that in mind when designing a handheld radio. Handhelds are designed to work best on battery power,

and many of their circuits were trimmed back to facilitate longer battery life.

The price of a full featured handheld CB is also usually more than an equivilent mobile CB. So unless you have a specific need for the portability of a handheld, you would be better served with a mobile rig.

3379. Loosening coil slugs -- the final result! :)

Newsgroup: rec.radio.cb
Date: 2003-09-02 12:29:10 UTC

The mystery is solved!

Thanks for the tips, suggestions, and lively discussion.
I was able to loosen and adjust all of the coil slugs in
the radio without breaking any. Belive me, fellas, that
radio was in sore need of alignment! Now that I have the
set functioning, I can continue with troubleshooting and
restoration.

Here's what I did to loosen the slugs:

1. denatured alcohol... no luck
2. non-acetone nail polish remover... no luck
3. acetone... yahoo!!!

After sitting for a couple of minutes, the acetone loosened
the sealer enough that I was able to break the slugs loose
with a plastic alignment tool (I apparently pushed someone's
buttons when I referred to that tool as a "diddle stick" in
an earlier post!). I removed the slugs, one at a time, and
cleaned all of the old sealer out of the threads. It looks
a lot like some kind of lacquer, which makes sense if I was
able to soften it with acetone.

Two of the coil forms had their internal threads factory
pre-stripped-out, so I had to use some melted wax to hold
the slugs in place in those coils.

Anyway, a big "73" to the guys who suggested acetone, 'cuz
your suggestion was ultimately the right one!

To those curious as to why I would even care enought to do
all of this work on an old CB radio, I have a very simple
answer: restoring ANY old radio is fun! What am I gonna
do with the finished product? Sell it, of course (likely
at a huge loss).

73,
Dean K5DH

pardon the lc, i can't get uppercase this am.. i think my keyboard's dying.

just picked up one of these, to replace my former 'no name' antenna.

i replaced the old one, because i could not tune it to resonance, no matter what i did.
it was way off, and would have needed a longer whip than it had, to come in tune.

the cobra was pretty interesting. it's resonant on my first guess, with near zero reactance at ch19.
however the impedance shows 90 ohms. interesting.

i'll be looking around for a 2-1 un-un for it, should be interesting.

Only sure way to tell is to see if the 11 Meter Crystals were installed. I can't remember the exact frequencies since it's been 20 years since I owned one. Word of advice don't buy a FT-101 series unless the price is ridiculously low. Parts are increasingly difficult to come by and the age of the unit means there's bout to be crystal degradation and problems with other electronics besides the tubes. Find a more recent FT-757or ICOM.

Dave:

Sounds like you have RF grounding issues. Try ensuring you have a good contact to ground by cleaning up your antenna mount, etc. If in a mobile, try running some ground strap from the mount to the frame, or to the door frame on the body side (not to the door itself) if it's a mirror mount.

Dave Hall <nojunk_n3cvj@worldlynx.net> wrote in news:3F547F14.5CF7
@worldlynx.net:

DH> While your response was very rational, and to the point, as much
DH> as I'd hate to say it, I sort of agree with DebbyDave's
DH> conclusion, although not for the exact same reasons.

That's ok. I enjoy looking at things from different angles, and
appreciate the response.

DH> My experience with handhelds, both CB and ham, shows performance that
DH> was not as reliable or robust as radios designed for permanent
DH> mounting.

I've never had much grief with handhelds that I've owned in the past, but
such is the nature of anecdotal evidence. One guy thinks something is
great based on his experience and expectations (valid) and another
doesn't think so based on _his_ experience and expactations (still just
as valid).

DH> Most handhelds can be run from an external power source, but they
DH> lack the power line filtering to block things like alternator whine
DH> from being superimposed on the transmit carrier. Noise blanking is
DH> also seriously lacking on the receive side as well.

I've had alternator whine issues on both mobile and handheld radios (in a
vehicle of course <g>). In fact, I've noticed that Galaxy DX959 of mine
is a bit susceptible to it. I corrected the problem on it by running
power straight to the battery. As a funny side note: On two occasions
I've been able to forsee and alternator's demise by a sudden and
substantial increase in alternator whine. Maybe it's not so bad! (just
kidding)

You know, I never noticed that handhelds didn't have NB circuits. I
suppose this is because it's largely unnecessary when being operated on
battery power. I would HOPE that handhelds - like the Midland I used as
an example in a later post - would address these filtering issues on
radios that are being marketed as being suitable for mobile operation. I
suppose the only way to find out is to buy one and try it out, eh?

DH> It is also harder to work an awkward small handheld radio while
DH> driving, and the potential for driving distractions increases.

Now THAT is an excellent point that totally escaped me. Come to think of
it, one of the things I like about my Galaxy is it's big S/RF meter. It's
easy to read while driving. You're right - the controls on handhelds are
much smaller, and the tiny LCD display on newer models is hard to see

while driving.

DH> Another point is that while there are CB handhelds which are rated at
DH> a full 4 watts, they often fall a bit short of that value. Typically
DH> 2.5 to 3.5 watts is the usual norm for output power. More power out

DH> battery power, and many of their circuits were trimmed back to
DH> facilitate longer battery life.

I never thought of that either, though I've admitedly never checked the carrier power on a handheld. I suppose one could pop the handheld open and perform a proper alignment, if anything just to see how the radio performs from the factory. It shouldn't require a full alignment. If it does out of the box, then it's a safe bet that the manufacturers quality control is suspect. At any rate, while you're in there you can try and get the carrier power up to 4 watts. Another interesting test would be to see if handhelds that are otherwise cabable of modulating a 2.5 watt carrier 90% could do the same on a 4 watt carrier. None of this ever occured to me. Of course, if you're going to go through all the trouble of popping a handheld open to to make it suitable for mobile operation, then perhaps you'd be better served just picking up a known good mobile. Great points, Dave.

DH> The price of a full featured handheld CB is also usually more than an
DH> equivilent mobile CB. So unless you have a specific need for the
DH> portability of a handheld, you would be better served with a mobile
DH> rig.

You're right about that, too. I suppose this is why I haven't bought any handhelds in recent years. I haven't needed the portability of one. (Side note: I found two old Realistic 3 channel handhelds in my garage yesterday. I didn't think I still owned any!) I'm still considering the purchase of a modern one for my motorcycle. :)

Thanks for the reply and for shedding a different light on things. The original poster now has ALOT of good information to make a decision with. That's what it's all about, isn't it?

Thanks, dude.

Your link is broke. Allow me
: You slam one magazine (Popular Communications) when another cites it
for a source, but YOU invoke a magazine to cite YOUR
source...hmm,,,ok,,,,,,,,,,moving on, the article in Popular Wireless
cites no busts for intruders on those freqs, as you would profess. The
FCC doesn't list any busts fo intruders on those freqs., do they? Yet,
when the FCC lists a bust on their website (Doug Adair, N8WWM for
jamming repeaters) you yell "Prove it" and claim the FCC is wrong. When
the FCC DOESN'T list action, you claim it takes place. Gotcha! Just
checking to make certain you're keeping with the Lelnad logic.

> an earlier post!).

First of all - congratulations on your success.. As to the "diddle stick" term, who cares.. it is only a term... For some one to get ticked, is ridiculous. It isn't like "you" came up with it. I've seen that term used hundreds of times. They need to get a life. Secondly, yes.. sets do need aligned often if components are replaced... maybe not much, but some... WHY??? For one reason because MAYBE the set was retuned to suit the failing component to start with and once it is replaced due to total failure, the coil is out of tune.... Could make a big difference. Whoever said they don't need tuned doesn't know their ass from a hole in the ground. They're either not good techs or too lazy to do a good job. The tuning "should" be checked. As to cores, I save cores from many items small and large.. I have probably 6 drawers full of various sized slugs for just such purposes. A lot of my repairs are from screw driver techs that break the slugs and cant get them out... OR the idiots they are, superglue them in place. Sometimes not able to get it out. I usually "carefully" drill it out and replace it. I've not had a problem yet. Not the greatest job to do, but with care, can be done. As for repairing old CB sets, a friend of mine got me started.. He likes the old sets and has bought a few for $5 and asked me to get them going, him buying the parts of course OR paying for them if I have them on stock. He helps me a lot, so I barter the labor and I also get a thrill out of the challenge. Not every defect is the same in cause or solution. Besides, the more you do, the better you get. As they say, practice makes perfect. Anyway, I have an old Lafayette Comstat 25A that was my moms and I acquired a Kris tube set also. Am going to get those two going. She also had a Johnson Messenger 250 Gold Anniversary radio I want to get working.... While I may sell the Kris when done, I won't sell the others.. as they are

sentimental. One other thing, I often take those old radios since easier to repair... and use them to teach troubleshooting when I hold basic electronics classes or more advanced classes at our Amateur Radio Club. Most guys don't have the tools let alone the equipment to do the new stuff. So, they can learn on the older stuff. I troubleshoot it first, present them with the radio and a schematic and present the problems.. I then have them tell me their opinions of the causes. I correct them in their thoughts if need be... In other words, I don't let them go off stray into areas that would have nothing to do with the defect. I also give them hints on how to boil it down to blocks then to a specific area. So as not to end up chasing their tail and wasting their time. After I've gathered all of their opinions, I let them know who was correct or on the right path as I've already got the answers. I show them how I found it. I then replace the parts the next bench session and take it back to show the repairs.... We don't normally meet where we can do any repairs, so we just do show and tell.. and teaching in theory. But for me to trouble shoot ahead of time, lets me know the exact cause and therefore help them hone their skills down to a stage or part... That way, I too am not wondering what it could be, I already know. If we had more time and space to do actual repairs and had the equipment there without me hauling half of my workbench, then I'd let them troubleshoot with tools and equipment and replace parts as going along. But in the way it is now done, it at least gives them some understanding on how to proceed in a logical manner. C.L.

What's your point, Lelnad, besides the one on top of your head?? That you have a serious ego problem? We know. That you have no self-control regarding what I say or do? We know. You have always attempted to imply malicious behavior against myself We know. thing is, I don't use big power nor do I splatter the spectrum nor do I use hammie freqs unauthorized and ALL my posts illustrate such....so does the article that you brought to the group, like a proud papa who has just found the Holy Grail,,,,hehehe,,,,the things that excite double-digit IQ's.....LOL!
I stand behind what I write,, ,,you're incapable.

You have this unyielding tenacity, almost an innate *need* to attempt to present me as one who splatters runs big power and splatters the spectrum and invades hammie bands, despite my article (that you had the *need* (LOL) to snip) slamming those who do so...hmmmmmmmm.....LOL..then again, this is what you must reduce yourself to,,,,as you have nothing else except an incredible self-loathing dillema.. Go back to forging people, Lelnad,,,it illustrates your train-of-thought, lowly intellect and whupped ego. Attempting to pigeonhole me in (read: lie) with spectrum splatterers and hammie band intrusions illustrates the level of scum you currently reside.

Upset that you were outted for your forging and lost ISP,s,,,you realize what was left of your reputation was destroyed by your malice.

More lies from the ARRL representative, KC8LDO....forever etched in stone. Now, carry on about MEMEMMEMEMEMMEMEMEMEMEMEME...LOL!

It's good to see you back in the action Dave!

The First Amendment, which has become the mythical "separation of church and state," was meant to keep the government out of the church and never meant to keep the church out of the government.

Our government of the people, by the people and for the people has become a government at the people, on the people in spite of the people.

Kevin

twistedhed@webtv.net (Twistedhed) wrote: Hey Davie,,Forget the debate.
Post something that proves you're not a pathological liar concerning
your made-up claims about the cber. Why in the hell would anyone post
such blatant, outrageously false lies about something such as this?
Attention? Narcissistic disorder?

>Who do you think I am -this- week, Twisty?

>LOL!!!

N7VCF! (LOL!)

>You are not only obsessed, you are an idiot<

Let's inject the truth that shows you for a lying lid, shall we? YOU ask
ME who I think you are regularly and redundantly, illustrating *your*
cornfusion, lack of confidence concerning your own identity, and
unyielding concern for what I, another, may think.,,,,kapish? If you
can't comprehend it, re-read it again, s-l-o-w-l-y, repeating it as a
mantra, or try having someone read it to you and explaining it as you
follow along.

<Snip Frankie-babble>
It's not about "ANYONE"else, Frankie,,,as ONLY yourself, KC8LDO, N8WWM,
and Hall the pedophilia-like freak have threatened myself,,,no one
else...no matter how much you need to look to others,,only you lids have
reduced yourselves to such levels. No one else experiences such anger,
hostility, and frustration at failing to make their wishes and feelings
known. No one else suffers from their ego being handed to them as much
as you, Lelnad and Hall. No one else needs make all their posts off
topic and about MEMEMEMEMMEMMEEMMEMEMEMEMEM besides you losers.

>So are those your kids in that skipfish pic?

Question for a question, hmm? Ok, answer the questions that were posed
to YOU first. They were based on *your* unsolicited claims and words.
Common etiquette and courtesy (LOL,,,,that ends the questioning, for
you, doesn't it Frankie, mah boy? LOL) dictate you respond to the
initial question prior to demanding anything, your footstomping and

crocodile tears, notwithstanding. Hyuk..how do "RF pirates affect your daily work"? Or, if that claim of yours is too caustically painful to entertain, you can carry on about your claim that you don't "care" about RF pirates, and how the "more RF pirates the better"...or how you claim you "lie all the time in rec.radio.cb " and how it wasn't the "First time" you lied and how you claimed it wouldn't be the "last" either.
That communication deficit really rocks your world.
In any event, those implicit off-topic curiosities about MEMEMEMMEMEMEMEMMEMMEEMMEMEM (hahahhahh) displayed by your challenged self several times per day that can never be satiated are testament to what ails you. Your problems have always been with your inner self. Sordid attempts at abdicating all personal responsiblitiy for your failures in life and blaming your misery on others (those that point out the problems you are unable to comprehend) is something you have mastered.

<More frankie-babble snipped>

Your personal undoing.....LOL.

>Ben Franklin said that THE BIBLE IS the

>ROCK on which THIS REPUBLIC RESTS ! IF

>they don't like the 10 commandments, they

>should GO BACK to Europe!

And Jefferson said one who would give up a bit of freedom for temporary
security deserve neither.

>Which one of the 10 do they not want to

>obey? Are they Murderers? Thieves?

>Adulterers? Which one do YOU commies that

>are reading this have a problem with, or is it

>ALL of them? They have "Twisted" the law of

>the land to let the commies try to DESTROY

>Christianity! I hope the WAR against them

>starts in Sweet Home Alabama!

>Dave!!

>_
The commies are those who seek to circumvent the US Constitution:
Amendment 1 of the Constitution, first quote:
"Congress shall make no law respecting an
established religion"
A law allowing the displaying of the 10 commandments in a government
facility "respects" the established religion of Christianity. Alabama
was in violation of this simple law and was made to comply. It's NOT
about God, Dave, it's about following the Constitution,,,something too
damn many people are casually tossing aside.
If you're not outraged over the current administration, then you're not
paying attention.

>surprising.
>It's understood that you need invoke another subject beacause you know
>nothing of the first.

HA! Geat real, Twisty! Even better, get an education!

Didn't you learn anything in school? Did you know that the CIA (with the help of
subversive radio broadcasting) overthrew a country under the direction of
Eisenhower just for control of bananas? Have you never heard of Watergate? The
Iran-Contra fiasco?

Hey Twist, let's play a game! I'll post a quote and you guess which president it
came from. Ok?

#1 -- This president increased the military well beyond the limits of the law,
spent millions without appropriations, and for a time suspended the right of
habeas corpus -- and did it all without congressional approval. Here is what he
said: "I felt that measures, otherwise unconstitutional, might become lawful by
becoming indispensable to the preservation of the Constitution through the
preservation of the nation."

#2 -- This president meddled in foreign affairs, encouraging a civil war that
resulted in the creation of a new country with a puppet government. And like the
other president, he did so without congressional approval. When congress passed
a resolution forming a commission to investigate the legality of his acts as
president, he refused to cooperate and ignored the resolution. This is his
excuse: "I declined to adopt the view that what was imperatively necessary for
the nation could not be done by the President unless he could find some specific

authorization to do it... Under this interpretation of the executive power I did and caused to be done many things not previously done by the President and the heads of departments. I did not usurp power but I did greatly broaden the use of executive power."

And here's a hint: both their faces are on Mt. Rushmore.

There you go again, misquoting dead people. And you misquoted the wrong dead
person. It was B. Franklin -- "They that can give up essential liberty to obtain
a little temporary safety deserve neither liberty nor safety." Notice he used
the term "essential liberty", not "bit of freedom". There is a difference.

Does that include TOS rules, Frankliestein?
How about threats? LOL...

>instead of trying to change or repeal them with
>the methods provided in the Constitution.

Exactly,,like Bush with the (un)Patriot Act that rapes the 4th Amendment. Ironic that he swore with his hand on a bible to protect it and immediately launched an assault against it.
If you're not outraged over the current administration, then you're not paying attention.
>If you ARE outraged over the current

>administration, then you haven't lived through

>too many administrations.

No other administration is responsible for the lies perpetuated against this country. No other administration has had the number of top appointees resign in disgust like this administration. No other administration attempted to slash military benefits while our soldiers were fighting the BUSH war. No other administration is being slammed by it's own military on a regular basis. Of course, if you were a US Marine like you claimed (for God knows what reason), you would receive or at least be aware of what the forever conservative (which makes them all the more credible) "Stars and Stripes" or even MORE conservative "Army Times" are saying. That you haven't a clue about anything, is not surprising.
It's understood that you need invoke another subject beacause you know nothing of the first.

I haven't been out here in years. Whatever happened to the old flame grudges
between the radio tech's WildCat and Coon Dawg? Any info. reposts, would be
great!

3428. Wilson 5000 testing?

Newsgroup: rec.radio.cb
Date: 2003-09-03 17:30:43 UTC
From: DmxDesigner <wosborne@stny.rr.com>
Message-ID: <7zp5b.32361$yG2.10673@twister.nyroc.rr.com>
Source record: 164957

Hi all... Does anyone know how to find out if a coil is good/bad for a Wilson 5000?

Reason I'm asking... I have a DX 99V Galaxy Mobile which I've not used for several months. I then took a trip to the hot AZ desert and returned back east. Didn't use the radio on the entire trip... Once I got back east.. I decided to test out my radio and notices a weird non speaker sound when I key the stock mic... Sounds like a relay that doesn't know open/closed... so it vibrates.... Thus I immediately assumed that maybe the set had suffered from the heat... I've since tested it on a dummy load and it does the same.. So I now rule out an antenna only problem.

But... I then put the magnetic mount antenna onto my Pres. Madison base to check out the antenna and the AWI "antenna warning indicator" comes on brightly... Now when I again remove the antenna and put the dummy load onto the Madison... the AWI light acts normal and goes out.

Is there a ohm test or something I can do to be sure the antenna is "OK"? I've hardlyh ever used the Wilson 5000. Like maybe 20 hrs. outside, but I've kept it stored inside the trunk of the car which it too experienced 120 degree heat for several months while in AZ.

Thanks if you can give some advice.... I don't have a base antenna yet for a third testing option... so I'm stuck unless someone can either test the set / antenna or both...

Thanks Dmx Bill

Rick,
It's called an antenna switch and comes in several
configurations. I would be careful because having two
radios on at the same time can lead to problems. Even
with one off, if it's connected to a second radio through
a switch, one can overload the other.

I use SSB exclusively unless I need to talk to a trucker on the highway.

I live about 40 minutes outside the city. During the morning commute there are a few mobiles and usually one base on 27.395 LSB. We chat on the way to work.

This would not be possible on AM as it is only useful over short distances.

You will want a good antenna as well. The Valor Half-Breed is a very good inexpensive antenna.

If you want to spend more money you can buy a Wilson 1000 but in my experience it is not better. I have owned both and still have the Half-Breed.

My tech told me that the Wilson coils are know to arc if you are running power. I didn't believe him until my amp died a week later.

I sold the Wilson and bought the Half-Breed.

I now run a Solarcon Quad Rod because of the wide bandwidth.

Hi Joe,

A lot of people in this group get caught up in academic discussions.

I run a Uniden HR2510 in my mobile and talk to bases up to about 40 miles away even in fairly bad conditions. This is on sideband of course. Mobile to mobile is less. I would say I get about 20-25 miles. It depends not just on equipment but conditions and terrain as well.

The most important factor is your antenna. Buy a good antenna like the Valor Half-Breed.

I am running an amp which is giving me 150-200 watts. The amp also has a receive preamp.

So the combination of a quality radio, power and a good antenna give me excellent range.

I am using a mobile D104 mic but a power mic is not necessary. I had no problem when I was running a stock mic.

That's pretty cool. I wish more people around here (Modesto, CA) used
SSB. What a fun way to pass the time while commuting!

I had never heard of the Valor Half-Breed before, so I decided to look it
up. Wow. 60" base loaded for $12 (valcoelectronics.com). Cool. I'm pretty
happy with my Wilson 1000 and don't run power, so I doubt I'll get the
chance to try out a Valor any time soon. Had I known about it earlier, I
might've tried it out (hey, it's a measly 12 bucks!).

Good post. How did you come to the conclusion that the Valor was just as
nice as your Wilson 1000 (minus the problems with arcing)?

Hi Twist.

There's none so blind as those who do not want to see.

What he is missing, is that I have spoken out against some posts on here, such as Lou's spamming. I have also told people on CB newsgroups if something is illegal, and told people that they do not need an Amp... when they have asked.
Because I do not rant on and try to beat people into submission, like they do, they refuse to see those posts.

However, in spite of speaking out or warning against some illegal things, or some posts to the group, I find that the only problems I ever get are from "antis". They seem to be the only people here who see in black and white - a friend must agree with everything they say, anyone else is an enemy.

> And therein lies the gist of it all, who continues to make their posts
> off-topic and of me?

They have shown what they are, when they post nothing of use to the group - just arguments, insults, etc. It didn't take them long to show their true purpose to me when I came to the group. Other newbies to the group will soon see them for what they are.

If you continue to argue with them at the same rate, you may find yourself in some of the same killfiles as them... not because of who you are or what you believe, but just because people don't want to see the soap opera any more.

What the group needs is more rational, CB type posts.

Regards,

Peter.

>complaints from Peter about that one.

As usual, you select parts from a post, twist them about, and try to make it fit your argument. Sadly, you are lacking the skills to do this well... otherwise, you would be working in Government.

I did not complain about the Web sites, but referred to the constant posts promoting them on this group.

Now, where do you see constant posts purely to promote other sites? There is, of course, the constant reposts from Lou Franklin, and you surely must know that I have spoken out against his constant use of this group to promote his business.

Do people try to claim that I am biased against Lou, his business, or even the illegal modifications that he promotes? I don't see any complaints from "keyclowns" about me speaking my mind... not even from Twist.
Maybe, unlike you, they do not have a chip on their shoulder.
Sure, I would rather that Lou kept his spam to the level needed to update the servers, no more than one copy per month. Sure, I would rather that Lou made attempts to encourage people to learn more so they know what they are doing. But, I would NOT want to see him or his business go.

It was the same when Voob was posting the same message multiple times in just a couple of days.
As I made clear then, I do not object to posts on these subjects... but making multiple posting is hogging bandwidth and space on struggling servers.

There are fears that the Internet cannot sustain the way it's use is increasing, and it could all crash under the strain one day soon. Some ISPs servers are already unable to cope, my old ISP has dropped all newsgroup services, as they could not cope with the demands on their servers. The bandwidth it took from their system was incredible, and they probably got fed up with increasing the available disk space as the requirements kept increasing.

Add to this the fact that people get fed up with seeing the same post over and over... and even wasting their download time on such repeated messages, it is all pointless. The only thing it does is to put people off using the newsgroup.

You mean the one that refers to me as a Brummy M&S van driver... rather
like Voob and George do?
You know, if I did protest to that, It would be said that I protest too
much. It would be assumed, by the "antis", that my protests were proof
that the suggestions on the page were real.

> Whoever put up the site with nude george
> and voobsie pics is not as bad?

So, they really are pictures of the infamous duo... cool. How did someone
get hold of nude pictures of them?

Strange how, when that site seems to be systematically working it's way
through the newsgroup regulars, none of whom are whining about it, the
one page you whine about is the one with "George" on it.

Hey, Mr "innocent"...
Methinks thou doth protest too much.

I didn't complain about the Web sites.
Sure, I siad they exist... and they do.
Sure, I said about the person who keeps promoting them, time and time
again.... and they do.

There is ONE "Voobie" Website that I know of. Your use of the plural
suggests that there is more than one... care to post links so that we can
see them all?
I certainly don't see constant posts and threads being started just to
promote these "Voobie sites".

Also, notice the use of the phrase, "6 of one, half a dozen of the other"...
do you not know what that means, or are you conveniently ignoring it?

Of course. The standard disclaimer (YMMV) applies. Such is the nature of
subjective criteria.

A similar thing happened to a friend of mine. He normally had a bit of
the typical high pitched whine in his background audio. One day the
noise changed to a lower pitched, and much louder, hash sound. Shortly
thereafter, his battery was dead, and it turned out that the alternator
was shot as well.

>

In the name of battery conservation, circuits like noise blankers, are
usually removed. Especially since they are normally used to suppress
ignition noise. I would guess that simple ANL type noise gate diodes
would be easy enough to add to it. Although they only tend to "smooth"
noise, rather than eliminate it.

The thing is, if you want the handheld to perform well AS a handheld on
battery power, it would probably not be a good idea to raise the power
output. If, on the other hand, you use it more as a mobile, then it
might be a better idea to pick up a mobile radio more suited to the
task.

Just once, I will try to explain this to you again, so listen real closely, and pay attention.

I have used the same ISP to access this newsgroup since about 1996 or 97. My ISP is worldlynx networks. They provide the news server that I use. That IS how I access this newsgroup. Within the last year or so, worldlynx has updated their system, including outsourcing their news server (slurp). With this change came the ability to access it without having to dial into the system directly. So I can now access the worldlynx news server from other internet means. I have always had the ability to access the INTERNET through a T1 line, as well as my dialup account. But Worldlynx is still my single point of access for this newsgroup, and has been for many years now.

a failed diode in the pack of six will increase the level of the current ripple, as well as putting it's share of the load on the other two. they fail pretty quickly after that, since detroit isn't known for over-engineering anything..

So what is the moral to this story? If someone puts up a web site about
you that isn't true, should you:

A. Deny the accusations, and then be accused of "protesting too much",
thereby lending some implied credibility to the accusers?

B. Ignore it, and then have it implied that it must be true since no one
ever denied it?

A real catch 22 if I ever saw one.

Actually, no. They were the first site that came up in Google when I
searched for the antenna, so I used them as a reference. I have no idea if
they're any good or not.

BTW - I just noticed that your newsreader makes use of the X-Face header.

You know, I looked everywhere and couldn't find ANYTHING. Not a common PMR
even in the UK, eh? Even information about the radio itself is hard to come
by. Strange.

Maybe someone else will have better luck.

(No similar complaints about the voobie
websites? Hmmmmmm)

_
LOL,,,,that's cause I never attacked and drew first blood with anyone,
ever.

>Hi Twist.

Yo' Brain!

>There's none so blind as those who do not

>want to see.

Agreed. Sometimes it takes a blind man to take one's hand and say "don't
you see?"

>What he is missing, is that I have spoken out

>against some posts on here, such as Lou's

>spamming.

Yea,,I remember, but, if you noticed, Lou's posts are on topic and
several times have been posted during a rash of angry-off-topic posts
(are there any others?) by those we have come to expect it the
most,,,,,,,,,in other words,,sometimes when Lou posted, they were the
ONLY cb related posts in the group.

> I have also told people on CB

>newsgroups if something is illegal, and told

>people that they do not need an Amp... when

>they have asked.

Haha..yea...THAT kills the angry lids, as they have a myopic view that
tells them those who disagree must be illegal, and all team-voobers know
if one disagrees with another team-voober, then that person is falsely
and cowardly accused.

>Because I do not rant on and try to beat

>people into submission, like they do, they

>refuse to see those posts.

Exactly. A semi-decent hammie educated me long ago on certain
frequencies where those who scream the loudest about know the least.

>However, in spite of speaking out or warning

>against some illegal things, or some posts to

>the group, I find that the only problems I ever

>get are from "antis".

LOL..those are the only problems PERIOD on this group,,every single one
of them self-created.

>They seem to be the only people here who

>see in black and white - a friend must agree

>with everything they say, anyone else is an

>enemy.

Well, you;re gonna be in a target now for certain. Evil hates bright
lights like that.

_
And therein lies the gist of it all, who continues to make their posts
off-topic and of me?

>They have shown what they are, when they

>post nothing of use to the group - just

>arguments, insults, etc. It didn't take them

>long to show their true purpose to me when I

>came to the group.

They hate change, any kind at all. They would rather wallow in their
breeding ground of contemptual familiarity, however, when one
illustrates the anger and malice emanating from this little sorry group
of boys, folks like you take notice and it berates their ego to the
point of rendering them towards insanity.

>Other newbies to the group will soon see them
>for what they are.

Which is why sometimes one must get mud on them to defend against
sty-dwellers (shrug), WTH,,,,they are the only ones that it doesn't wash
off of.

>If you continue to argue with them at the same
>rate, you may find yourself in some of the

>same killfiles as them... not because of who

>you are or what you believe, but just because

>people don't want to see the soap opera any

>more.

Yea, that has occurred, but it makes no real difference. In fact, many (not all, but MANY) of those who feel the extraoridinary need to TELL one that they are in a killfile have their own issues. I mean, if one is using a killfile for their own advantage, what is gained by telling another "I killfiled you"? It's akin to "na-na-na-na-boo-boo!" and serves no purpose except self-gratification to the person who thinks another actually gives a damn if they killfile someone or not.,,,in other words,,,"An Ego" trip. Killfiling for spam and related issues are notable exceptions. Killfiling because someone disagrees or doesn't do what one demands or because one doesnt like what another says is for the weak. JMHO, of course,

>What the group needs is more rational, CB

>type posts.

>Regards,

>Peter.

Agreed. We slammed the DX last weekend,,..cw really making the difference on the American freeband freqs...more and more hammies joining in each week from around the globe, unless there are a plethora of unlicensed ops that are adept at code.
Right now we have a tropical storm coming ashore and the DX is running wild,,,a direct line to my friends in the 'Star.
Have a good weekend over that a-way. Happy radio-ing!

But the skill is in where and how hard to hit it ;-)

Worked with a piece of production equipment I dealt with, with a relay
which stuck occasionally, no matter how many times it was replaced
(Note: never buy serial # 0001 of anything).

It was far simpler to kick it in just the right spot.

Happy trails,

>
> Dave
>"Sandbagger"

When not taken out of context, it doesn't sound like pedophilia to me or to any other reasonable person, which is clearly why you have pulled it out of context and interpreted it as such.

While there is no doubt that eavesdropping on private conversations is illegal (and if you have ever read my website you would know that I'm not a big fan of cordless or cell phones for just that reason), it doesn't interfere with the conversation or cause any harm or inconvenience. Unless someone is listening for purposes other than a morbid curiousity, I really don't have a problem with scanners. I do -not- condone eavesdropping on private conversations. But the fact is that it does happen, and I -do- warn people about using cordless phones.

Despite all that, the FCC has recognized the issue of eavesdropping on cordless phones and has taken steps in order to impede the efforts of those that would listen to private conversations for personal gain or the commission of a crime. As the older, unsecure phones find their way to the trash heaps, the issue is gradually becoming moot.

Ok, it's obvious that you really don't have such a good relationship with your friend Truth, so I won't push the issue. Too bad -- you might have pulled up some -real- dirt on me instead of your random speculations (i.e, lies). Or you might have signed me up for a few dozen magazine subscriptions. Just think of all the fun you could have had knowing my true identity!

>Yep. Post it.

Sure,,,,,here we have N3CVJ not only intentionally, wanton, willful,
breaking of federal communication law as set forth and defined by the
FCC (shouldn't a hammie of his status know better?) but committing
behavior that is construed by many LEOs to be of pedophilia-like nature,
of which ALL experts believe there is NO cure, only a time span until
they approach another child.
I mean, Frankie,,you just claimed in another thread that there is NO
excuse for breaking the law pertaining to the airwaves....according to
Hall himself, you condone this type behavior he commits...hmmmm,,,but
you hae a problem with DX and freebanding.LOL....your priorities are
whacked, Frankie, and I am certain beyond any doubt whatsoever, not one
person in this group would want either of you near any children.

Who needs "Melrose Place" when you have a scanner? My neighborhood phone
traffic was no less juicy at times. Teenaged girls talking about their
first time with sex

>Hmmm.... seems that there is more to that

>post than what you quoted... let's put

>it in context by adding the rest of his post,

>shall we?

Certainly. editing it for brevity doesn't alter his beahvior one bit,
nor his violation of the law.

>......, wife talking to newly found lover while

>hubby watched Monday Night Football in the

>next room, guys making drug buys, and even

>caught one neighbor bitching about ME and all
>my "radio stuff" to another.

>It's fun to try to figure out who all those voices

>belong to. Sometimes more entertaining than

>TV, becasue it's REAL......

>Dave

>"Sandbagger"

>When not taken out of context,

Out of context? LOL...his statement admitting breaking federal
communication law stands alone.

>it doesn't sound like pedophilia to me

No surprise there. You two are quite alike.

>or to any other reasonable person, which is

>clearly why you have pulled it out of context

>and interpreted it as such.

Feel free to ask anyone at all that you cite, or feel is "reasonable" if
they feel listening to minor children talk of their sexual liasons is
"juicy" let alone healthy, conducive behavior of one that continually
spoouts off about other folk's morals,,go on now, do as your told.

>While there is no doubt that eavesdropping on
>private conversations is illegal (and if you

>have ever read my website

LOL...there it is again,,,,that ego,,,,I'm not interested in anything a
confirmed and self-admitted liar sets forth.

>you would know that I'm not a big fan of

>cordless or cell phones for just that reason), it

>doesn't interfere with the conversation or

>cause any harm or inconvenience.

Nevertheless,,,you're intentionally glossing over Davie-son's wanton,
illegal behavior. He has called several others here a criminal for no
less than freebanding. By your own words, he is "selecting what rules to
disregard" and, man, have you posted a ton of ignorance concerning how

you feel about such behavior. Not only is Hall's behavior hypocritical, but your selective whining about WHO breaks laws is laughable in the face of your ire.

>Unless someone is listening for purposes

>other than a morbid curiousity, I really don't

>have a problem with scanners. I do -not-

>condone eavesdropping on private

>conversations. But the fact is that it does

>happen,

HAhhahah..so does freebanding.

>and I -do- warn people about using

>cordless phones.

Not here you haven't. But go ahead and do it now and use N3CVJ as an example.

>Despite all that,

Despite your hypocrisy? No, Frankie,,,IN ADDITION, to your hypocrisy,,,,

>the FCC has recognized the issue of

>eavesdropping on cordless phones and has

>taken steps in order to impede the efforts of

>those that would listen to private

>conversations for personal gain or the

>commission of a crime.

Umm,,hey Frankie,,,intentionally monitoring private telephone calls IS a crime, just as you hold freebanding is.

>As the older, unsecure phones find their way

>to the trash heaps, the issue is gradually

>becoming moot.

Not moot at all. I merely use you and Hall's oft-repeated mantra that it's the "BEHAVIOR" that makes such criminal acts so bad,,,,the blatant disregarding of federal rules for personal satisfaction...try not to lose site of what you selectively hold others to, Frankie.

_
Oh, wait a second, youre still tripping over your hairlipped lie looking for that post you claimed I said the same thing about you in,,,,,,still

waiting, Frankie,,,you mean you lied? Again? Gee...
"I have admitted to lying in this ng and on
more than
one occasion." Frank
Gilliland (Sparky@cet.com)
BTW,,,what happened to that Vancouver
feed?

>Never had one.

LOL...hokay!
Your Time Warner (TWTelecom) is in Vancouver, Frankie.

>My ISP is in Spokane, Twisty.

Your Time Warner (TWTelecom) is in Vancouver, Frankie, the "feed" you
just lied and denied.

_
>"I have admitted to lying in this ng, and on

>more than one occasion"

>Sparky@cet.com

Ah never mind,,,,one thing
at a time,,,,,now, about those RF pirates that you claimed affected your
daily work...

>Do you want to know the names of the most

>obnoxious offenders in this area?

Not at all. I'm not interested in anything about you. I am being polite,
to you, that is all. Your ego misinterprets such simple acts as much
more than they are. (sigh) Direct a post to myself, I shall respond,
When one makes a post on usenet, they are asking the one they directed
the post toward for attention in the form of a reply. That you can not
grasp the simple fashion in which usenet works, is testament to that
mounting communication deficit that ails you. Such behavior is your
forte and inherent to the unstable.

Frankie Gillinad, your communication deficit continues to spiral out of control. You continue to direct post after post of yours to myself and cry that all my replies are "whining". You snip them all, yet you continue to direct posts to myself. The educated among us know that it's your ego problem and are only interested in talking to yourself and reading your own posts, as well as sock-puppeting, Snipping what obviously pains you a great deal serves only to illustrate a great communication deficit, manifesting in this thread as a tolerance level for none but your own voice, thoughts, and ideas,,,,LOL. Now,,,,about that claim you made that RF Pirates affect your daily work.....

>Your inability to address the topic is but one

>manifestation of -your- communication deficit,

>Twist.

There goes the ego again, misinterpreting things and reading into things that do not exist.
I can discuss any topic that you like,,but *refusal* to hold to the golden rule is something you are blaming me for, LOL,,I't's always another's fault for your misery, eh Frankie? To wit: Questions need answered in the order they are received. You have yet to answer questions to your claims, which nullifies and cancels any right or point you may think you raised by shouting that I refuse to answer any latter inquiry brought by yourself. Let's take it one step at a time so Frankie can follow, shall we? Answer the questions put to you first, and you will be entitled to ask one of me. Golden rule,
Frankie,,,,,,communication deficit does not alow you to comprehend such simple, human, civilized behavior. You would rather focus on MEMEMEMEMEMMMEM,,,LOL!

_
"I have lied several times in this ng, and on
more than one occasion" Frank Gilliland,
Sparky@cet.com
Once a liar, always a liar.

>It takes integrity to admit one's mistakes.

Liars have no integrity, Frankie,
A lie is so far removed from a mistake, that only a liar can attempt to make a lie appear benign as a mistake.

>So who do you think I am -this- week, Twist?

You have issues, Frankie,

Frank he may at one time had passing
acquaintance with the truth, but TW
no longer cares about truth in any form.
Simply because he can make the truth
anything he wants it to be. If he wants
to say you are N7VCF one day and W1AW
the next, both will be "true" in his mind.

Likewise, he says he talks to "saucer
men" or collects "jock straps", or fancies
himself a captain, or that Riley H. told
him freebanding was OK --it's all
"true" to him because he lives in a
fantasy world. If his fantasy becomes
invonvenient, he just changes it
to suit the situation, e.g. instead of
having himself to blame for his
poor social skills, it's Dave Hall
and Leland's fault for conducting a huge
conspiracy under the direction of
"the Voob" LOL.

thanx for the reminder. saw the second one hit live. shut down my
facility straight away. it was the jumpers hitting the ground that
did it for me. the french documentary team did a surreal job...
dont usually say it but...shit....

Naw. It's more fun demonstrating how these nameless, gutless, spineless, spoiled
little mama's boys don't have enough integrity or courage to put a name to their
hate. That way, when they accuse someone else of such a thing (or something
worse), it will carry no more weight than a Clinton deposition.

then bounce and watching the firemen wince as they see whats going on.
had a fdny friend who was scheduled to work that day but his wife
started college that day and he had to take the day off. needless to say

his replacement is a hero.....

How do you get that impression? I thought I just got done saying that I despise those people that are primarily responsible for the "mud", yet somehow you think I meant just the opposite. Is it because I refused to abide by your advice to ignore such things?

Great. Then just to clarify your previous post, were you saying that you think freebanding is an "essential liberty"?

>,but *refusal* to hold to the
>golden rule is something you are blaming me for,

And for good reasons. I'm sure you will ask me to repeat those reasons for the umpteenth time... I will, but another day.

> LOL,,I't's always
>another's fault for your misery, eh Frankie?

What misery, Twist? You are projecting again.

> To wit: Questions need
>answered in the order they are received. You have yet to answer
>questions to your claims,

Wrong. I have answered every question you have asked. You may not have liked the answer, but I did answer them. Now -you-, on the other hand, have MANY outstanding questions pending. At least I don't drag the discussion into a different topic every other post. Back to the topic of the thread, do you think Ben Franklin would agree that freebanding is an "essential liberty"?

> which nullifies and cancels any right or point
>you may think you raised by shouting that I refuse to answer any latter
>inquiry brought by yourself.

If that had any validity at all, I wouldn't answer ANY of your questions until you answer the very first question that you ignored (and continue to ignore): A long time ago you accused me of a lot of things, things that you could never

back up with facts, and yet you had the balls to say that >I< lied. Well, where was that lie, Twist? Do you need to see the post again? I posted that question no less than two dozen times, and you have yet to answer it. Which post would you like to see again? All of them?

Back to the topic: So who were those presidents I quoted? This should be easy even for you, Twist -- you only have to pick two out of four. You should be able to use a search engine and come up with the answers real quick.

> Let's take it one step at a time so Frankie
>can follow, shall we? Answer the questions put to you first, and you
>will be entitled to ask one of me. Golden rule,
>Frankie,,,

I don't behave according to -your- Golden rule, Twist -- "Do unto others -before- they do unto you".

Now as for those two presidents, would it help if I said that neither one of them is George?

>,,,communication deficit does not alow you to comprehend such
>simple, human, civilized behavior. You would rather focus on
>MEMEMEMEMEMMMEM,,,LOL!
>
>_
>"I have lied several times in this ng, and on
>more than one occasion" Frank Gilliland,
>Sparky@cet.com
>Once a liar, always a liar.
>
>>It takes integrity to admit one's mistakes.
>
>
>
>Liars have no integrity, Frankie,

You should know better than anyone here.

> A lie is so far removed from a mistake, that only a liar can attempt to
>make a lie appear benign as a mistake.

Are you saying that a person cannot recognize, after the fact, that a decision to tell a lie might have been a mistake?

Now before you snip my question and insert some long-winded diatribe about communication deficits and "lids", at least recognize that I asked a legitimate and sincere question in order to clarify your remark. That isn't too difficult, is it? I mean, it's not like I'm asking for any facts or proof, or anything that I already know you can't provide. Just a simple clarification, that's all. Well?

>>So who do you think I am -this- week, Twist?
>
>

>
>You have issues, Frankie,

Blah, blah, blah. Stay on topic.

Time for me to hit the hay. 5am and then
take the Bronco back to the body shop to
finish it up. Got it running, new interior,
new paint, new seals, glass etc etc ready
to rock.

God Bless.

-Chuck K8CPA

Your ideas of "errors"? My, how smug.
What became of you Jesus Freaks who used to remind us lowly heathens to
Judge Not Others?
And that is exactly what you religious nutcases do...you pass judgment.
I think you and Preacher John would get along quite famously. You are both
psychotic and perhaps even a tad bit delusional to boot.
I am betting that you posted your own URL just to draw attention to your
far-flung web site. Nobody would bother otherwise.

>"juicy" let alone healthy, conducive behavior of one that continually
>spoouts off about other folk's morals,,go on now, do as your told.

Since you have no brain, I guess I have to do all the thinking around here. Let's start with his own words -- he said he heard "teenaged girls talking about their first time with sex". When you listen to two or more people talking, you don't know what they are talking about until you listen; and after you listen, and therefore discover the nature of the conversation, you can't return it for a refund. Did he say that he sat there and jacked off to the conversation? No. All he said was that he heard the conversation. He didn't even describe the details of the conversation. He didn't say if the girls were saying, "It was SO big and hard, and it hurt so BAD", or if it was more like, "...and when I woke him up he copped an attitude, drove me home and didn't even open my door! I don't think he respects me AT ALL!" Well, I grew up with two older sisters, and let me tell you that the latter is more like what two girls talk about when they are talking about boys. Yet you automatically assume that the conversation he heard was not just sexually explicit, but pornographic in nature. And you know what else, Twist? He also said that he heard other conversations, such as people making a drug deal. Does that make him a drug addict? Of course not, but according to your "logic" it does.

Now go finish your chores before your hubby comes home.

>>While there is no doubt that eavesdropping on
>>private conversations is illegal (and if you

Which is worse -- a person that can admit his lies, or one that continues to stack lie upon lie upon lie? Oh, I forgot, truth is your friend, and everything you say is the truth. I don't suppose you have told a lie in your entire life, have you, Twist?

>>you would know that I'm not a big fan of

>disregard" and, man, have you posted a ton of ignorance concerning how
>you feel about such behavior. Not only is Hall's behavior hypocritical,
>but your selective whining about WHO breaks laws is laughable in the
>face of your ire.

I'm "glossing over" nothing. Freebanding is necessarily illegal. Using a scanner isn't. I really don't care if someone spends their time listening to their neighbor's telephone conversations, just as long as they don't have any intention of cleaning out bank accounts, or using the info to hurt someone. In the same vein, I don't have a problem with CB DXing, just as long as the power and splatter is kept to a minimum so as not to muck up the rest of the band. On the contrary, I would like to see the 250km limit lifted. The only problem with that is as soon as it's lifted (if it's ever lifted), there is going to be a subsequent surge in freebanding and amps.

And no, I don't choose which laws I obey or ignore. But I DO choose which people I vote for office, and I DO choose to voice my opinion to those people when I think a law is unfair or useless. A couple of the issues I'm working on now happen to be the current mess regarding local broadcast station ownership, and the ban on new Class D station licenses. LPFM might have been an issue if it wasn't so poorly implemented. But none of that justifies ignoring the laws in favor of illegal operation.

So I'm not being hypocritical here. The problem is that you can't get past your obsessions long enough to have a civilized conversation, or to understand another person's point of view, or even to let someone listen to your opinions with a sincere interest. IOW, your opinions don't carry much weight when you are the newsgroup punch-clown.

>>Unless someone is listening for purposes

Oh yes I have. I have mentioned the issue a few times before, and on other
newsgroups as well. And I have also posted my website addy. I would probably
have posted it more often if the name of this newsgroup was rec.radio.scanners
or alt.telephone.cordless.

No it isn't. 18USC2511(2)(g)(v). Even though they should probably find a less
intrusive hobby, it's perfectly legal for anyone to listen to unencrypted
cordless phone conversations. Not my idea of a fun evening, but hell, I'm
wasting my time replying to your posts. I don't know which is worse....

My "feed" comes from my ice-box and pantry. My ISP is in Spokane. Where it goes from there I don't know and I don't care, just as long as it ends up at it's intended destination. If it goes through Vancouver, so be it. It might also go through Tacoma, Fargo, DesMoines, or even Tampa, I couldn't care less, but that doesn't mean I live in or around any of those urbs.

Then why bother even bringing up the subject? Or did you write it just to read it yourself?

> I am being polite,

ROTFLMMFAO!!!

>to you, that is all. Your ego misinterprets such simple acts as much
>more than they are.

Your incessant hounding on the subject leads me to properly interpret such a simple statement as a hub of your obsession about me. Regardless, I responded politely, yet your ego misinterpreted my simple question as much more than it was.

> (sigh) Direct a post to myself, I shall respond,

Respond to this: If I want you to know anything about me, just ask. If I don't tell you what you want to hear, deal with it on your own terms, or consult your imaginary shrink. Or keep begging for another year and a half if you really want, I couldn't care less.

>When one makes a post on usenet, they are asking the one they directed
>the post toward for attention in the form of a reply. That you can not
>grasp the simple fashion in which usenet works,

Do you mean like the simple way people use greater-than signs to indicate lines that are quoted from a previous post? You still haven't grasped that yet, Twist. Let me help you out -- one arrow (>) means the quote is from a post one step back in the thread. Now pay attention, Twist: this next part is your hangup, probably because you can't count this high. TWO arrows (>>) means the line is from a post that is TWO steps back in the thread. THREE arrows (>>>) means THREE posts back. Are you getting all this? Do you see the pattern? You haven't blown a mental sprocket trying to understand this SIMPLE concept, have you?

> is testament to that
>mounting communication deficit that ails you. Such behavior is your
>forte and inherent to the unstable.

Fix your own communication deficits, then I'll listen to you whine about mine. You might want to fix them soon, because in order to keep you from whining about me snipping the irrelevant crap you write in your posts, I am now quoting your entire post with each reply. No doubt they are going to get big. I wonder if webtv has enough bandwidth to compensate for your communication deficit....

I am thinking about getting a 5/8 wave antenna, most likely the Imax 2000. Does the GPK for it wrap around so that it is centered? I can't tell from the drawings I have seen posted. If I can get only a bracket or make one myself, would the performance be better with longer radials like Francis 8' antennas or something similar? How does the angle affect gain? I an interested in reducing TVI, improving groundwave performance and reducing skip as much as possible. What is the difference if the radials are horizontal vs 45 degrees or some point in between? Does the bracket need to be below the matching circuit rings or is there another position that would be better? I am using a 37' pole and it is well grounded with three 8' rods and another dedicated rod through the basement floor that attaches to my radio. TVI has not been a big problem with my A99 but I would like to improve ground wave performance. With my current setup, I typically tx/rx out to 40 or 50 miles. Is that good/typical for an omni type antenna? How much farther can I expect to reach with a 5/8 wave? Has anyone ever removed the flat mounting plate on the Imax 2000 so the A99 radial kit can be used?

I'm not sure that a legal case would be winnable, given the relative
anonymity of the internet.

That only applies in a court of law, not the court of public opinion.

But your point is well taken. It would seem that the people who complain
the loudest must be bothered by something, or had a nerve struck. In
this case, silence really is golden. Leave them guess.

And Twisty is the king of obfuscation and distortion. Which is why I'm
not even bothering to fall into his trap of having to "defend" my
actions in order to feed his warped antisocial need for attention.

>
> While there is no doubt that eavesdropping on private conversations is illegal

Actually, that's not entirely true. First off, when this "incident"
occured, it was before the passage of the ECPA. And even after the ECPA,
the only thing that ended up being protected, was the heavily lobbied
cellular industry. You can still tune cordless phones on a scanner, and
you're free to listen to anything you want (How could they ever catch
you?). The kicker is that you are not allowed to devulge details of what
you've heard, or use information to your advantage. Anyone who uses a
cordless phone needs to be aware of the potential security risks, and
buy the most advanced digital phone.

> (and if you have ever read my website you would know that I'm not a big fan of

I wonder just what federal law, I am supposedly breaking (and in the mid 80's)? If it's transmitted over the air, and I can receive it with common radio gear, then there can be no expectation of privacy. It's no different than listening to police or fire calls. A far different situation than deliberately attempting to break an encryption code, or attempting unconventional methods to receive these calls, beyond "common" radio receivers.

The only thing he is expert at is dragging out a moot point, and beating a dead horse. All for the purposes of attention. It's futile to attempt to logically debate with him. He does not acknowlege logic. When his point has been soundly trounced, he'll just spin it into a tangent, and start down another path. As long as you keep coming back at him, he's getting his fill of attention. You've become his cyber-mommy.

He knows no logic, he only exploits a point which he feels can give him
some attention mileage. I was not about to "debate" the issue with him,
for that very reason. You're only feeding his ego, by doing it for me.

Graeme,
If the computer power supply is working okay there's
really no point in buying another power supply. Meaning
that there is no particular benefit if the radio/amplifier
is getting all the current they need.

Source record: 165109

Antennahead1,
Yes, the groundplane kit is symetrical. But, you can get
the same affect by just using a bracket of some kind, it really
isn't that important.
The length and angle of the radials doesn't affect gain at
all. It does affect the input impedance of the antenna, though,
which means that it will have to be re-tuned. To reduce
interference
you'd be better off raising the antenna rather than using a
groundplane
kit. Distance is the best 'cure' for RFI (vertical or
horizontal
distance, doesn't matter).
What you are seeing (40-50 miles) is about average or pretty
good!
The advantage of a 5/8 wave antenna vesus a 1/2 wave antenna
isn't in
groundwave distances, but in skywave, or longer distance. There
is a
slight difference in groundwave signal but it isn't worth the
difference
in cost.
You can probably adapt an 'A99' groundplane kit to work on
the Imax.
As long as the electrical connections are correct, the actual
position
of the groundplane isn't too critical (within reason). I'm sure
someone
has done that before.
Personally, I think you would be smarter to use the price of
the
groundplane kit to raise your antenna higher. The difference
between
using and not using a groundplane is minimal. What you will
'gain',
if anything, isn't worth the price.
'Doc

If you're looking to "reduce skip", then you do not want a 5/8ths-wave
groundplane; they produce a lower angle of radiation which imcreases
"skip". For what you want, it sounds like you've got about the best
antenna. 40 to 50 miles range from an Antron 99 is very good.

If it works then theres nothing to gain by changing. I am suprised you do not get any interference. Most computers use switching supplies which are well known to generate interference. They also lack much filtering. IMHO most radio operators use linear supplies although there are some good switchers available.

i run a samlex switching supply, and 25ah gel cell.
this powers my ft-847 and a bunch of other radios as needed.
the battery supplies the large currents, and the power supply just has to have more output current than the idle drain of the radios. has been in place now for probably six years. i pull the plug and cycle the battery occasionally, but there's no real need.

while it is easier to make a bad switcher, linears can be just as noisy, if designed badly.
switchers will have a small ripple component at 50-300khz, which isn't going to cause you any problems in the audio path. their noise at higher frequencies is usually just about zero. if not, time to get a different switcher. i've used five different switchers that i can recall over the years, and had no noise problems.

one note.. the charger connects directly to the battery, and the loads come off the battery on separate leads. do not make the mistake of feeding the charger in at the end of a cable with radios between it and the battery.

i use anderson powerpoles on all 12v gear, so everything in the car can just be plugged into the bench, and vice-versa.

Where is a good source for powerpole power distribution devices?
Rigrunner is a bit expensive.

Generally the lower the better.

> I an interested in reducing

>TVI, improving groundwave performance and

>reducing skip as much as possible.

What makes you feel you are going to cause interference? If you're going to run power, stay the hell away from fiberglass bleed sticks. Buy a 5/8 Maco or similar metal antenna. Several sing the praise of the beefed up version by Jay-in-the-Mojave he calls a Mastadon. Assuming you'll be on eleven meter, concerning the skip, it's fading until next cycle when it will return again. When it's running hard, all you can do is change the freq or get a directional.

3532. schematics wanted - "jamming device"

Newsgroup: rec.radio.cb
Date: 2003-09-05 17:15:05 UTC
From: limitedselection@aol.com
Message-ID: <20030905131505.17988.00000281@mb-m24.aol.com>
Source record: 165116

Help!

I am looking for schematics for circuits to "jam" TV and CB reception.
I am interested in "jamming" reception on my property only, so the "jamming device" needs to be really low power - only capable of "jamming" an area about half the size of a 'small' city block.

I read about a circuit that transmits white noise from something like 25Mhz to something like 30Mhz - effectively "jamming" reception. Any pointers?

I also read of a circuit that used a crystal detector and would only "jam" after detecting a transmission! Anyone have any info on this?

The closest I have found so far is a reference on Google (dejanews) to "s_jam.jpg", but there are no pictures there, so I cannot see the schematic.

Any information, schematics, or pointers to web sites would be greatly appreciated!

Sure,,,,,here we have N3CVJ not only intentionally, wanton, willful,
breaking of federal communication law as set forth and defined by the
FCC (shouldn't a hammie of his status know better?) but committing
behavior that is construed by many LEOs to be of pedophilia-like nature,
of which ALL experts believe there is NO cure, only a time span until
they approach another child.
I mean, Frankie,,you just claimed in another thread that there is NO
excuse for breaking the law pertaining to the airwaves....according to
Hall himself, you condone this type behavior he commits...hmmmm,,,but
you have a problem with DX and freebanding.LOL....your priorities are
whacked, Frankie, and I am certain beyond any doubt whatsoever, not one
person in this group would want either of you near any children.

Who needs "Melrose Place" when you have a scanner? My neighborhood phone
traffic was no less juicy at times. Teenaged girls talking about their
first time with sex

_
>Hmmm.... seems that there is more to that

>post than what you quoted... let's put

>it in context by adding the rest of his post,

>shall we?

Certainly. editing it for brevity doesn't alter his beahvior one bit,
nor his violation of the law.

_
....., wife talking to newly found lover while
hubby watched Monday Night Football in the
next room, guys making drug buys, and even
caught one neighbor bitching about ME and all my "radio stuff" to
another.
It's fun to try to figure out who all those voices
belong to. Sometimes more entertaining than
TV, becasue it's REAL......

Dave
"Sandbagger"

_
>When not taken out of context,

Out of context? LOL...his statement admitting breaking federal
communication law stands alone.

>Yes it does. You brag about breaking federal

>communication law yourself.

I don't. That you misconstrue and misinterpret talking about skip and
freebanding as bragging is your problem.

>I guess that makes him no better than you,

>huh?

See what type truth you are capable of when forced.

>So what are you complaining about?

LOL,,,,once again, replying to your directives and inquiries isn't
contrued as complaining except by those with deficits in communication..

>it doesn't sound like pedophilia to me

No surprise there. You two are quite alike.

>Are you an expert on pedophiles?

I'm not the issue.

>Or are you renewing your accusation that I'm

>a child molester?

Poor Frankie..in such great agonizing pain..LOL..really pains you that
you have nothing to back you these days,,no posts, no headers, no
nothing. Just like KC8LDO forging me,,nothing in any archives, no
headers. Liars hang tough together.

_
>or to any other reasonable person, which is

>clearly why you have pulled it out of context

>and interpreted it as such.

Feel free to ask anyone at all that you cite, or feel is "reasonable" if they feel listening to minor children talk of their sexual liasons is "juicy" let alone healthy, conducive behavior of one that continually spoouts off about other folk's morals,,go on now, do as your told.

>Since you have no brain,

Temper-temper, Frankie,,,,my brain is much more tangible than your claims. Nevertheless, I am not the subject. Keep trying

>I guess I have to do all the thinking around

>here.

Internet Lawyering? Hoo-boy! (chuckle) I think not,,,,,

>Did he say that he sat there and jacked off to

>the conversation? No. All he said was that he

>heard the conversation. He didn't even

>describe the details of the conversation.

Sure he did. Your communication deficit prevents you from interpreting it correctly.
Sex. Their first time. Children. What more do you want?

>He didn't say if the girls were saying, "It was

>SO big and hard, and it hurt so BAD", or if it

>was more like, "...and when I woke him up he

>copped an attitude, drove me home and didn't

>even open my door! I don't think he respects

>me AT ALL!"

No,,that's not in his post anywhere,,LOL.
In fact, he even claimed that listening to the children speak of their first time of sex was "juicy". He's a pervert, and so are you for attempting to claim listening to children talk of sex on a private telephone is somehow innocent.

>Well, I grew up with two older sisters, and let

>me tell you

No Frankie,,tell someone who cares what yout think about such matters.

> He also said that he heard other

>conversations, such as people making a drug

>deal.

He didn't say it was "juicy".

>Does that make him a drug addict? Of course

>not, but according to your "logic" it does.

Not my logic, Frankie mah boy,,Davie's OWN logic. He is the one that claimed that since I DX and freeband, it's a good chance I break other laws pertaining to society. His hypocrisy bullshit is how this entire matter with him began. Why didn't you shed some light on his bullshit when he said it instead of waiting until I used his logic?

>Now go finish your chores before your hubby

>comes home.

LOL,,,,always in search of a a bit of power, no matter how slight...

_
>While there is no doubt that eavesdropping on
>private conversations is illegal (and if you

>have ever read my website

LOL...there it is again,,,,that ego,,,,I'm not interested in anything a confirmed and self-admitted liar sets forth.

>Which is worse -- a person that can admit his

>lies, or one that continues to stack lie upon lie

>upon lie?

A liar is a liar is a liar, frankie, all your spin in the world won't change the fact that you are a confirmed liar, lid, and hypocrite, just like Davie and Nad.

>Oh, I forgot, truth is your friend, and

>everything you say is the truth.

Everything I post is the truth.

>I don't suppose you have told a lie in your

>entire life, have you, Twist?

Try to follow, Frankie,,,I'm not the issue..I'm merely *your* issue.

_
>Iyou would know that I'm not a big fan of

>cordless or cell phones for just that reason), it

>doesn't interfere with the conversation or

>cause any harm or inconvenience.

Nevertheless,,,you're intentionally glossing over Davie-son's wanton, illegal behavior. He has called several others here a criminal for no less than freebanding. By your own words, he is "selecting what rules to disregard" and, man, have you posted a ton of ignorance concerning how you feel about such behavior. Not only is Hall's behavior hypocritical, but your selective whining about WHO breaks laws is laughable in the face of your ire.

>I'm "glossing over" nothing.

Denial ain't a river in Egypt.

>Freebanding is necessarily illegal.

So is monitoring private phone conversations.

>Using a

>scanner isn't.

Neither is using a cb. See above :)~

>I really don't care if someone spends their time
>listening to their neighbor's telephone

>conversations,

Illustrating your blatant hypocrisy and lies you told about how laws are there for the good of all and selective obeying of laws is of the criminal element....LOL,,,sure, Frankie.

>just as long as they don't have any intention of
>cleaning out bank accounts, or using the info

>to hurt someone.

Only,,,(and herein lies your malfunction) it's not up to *you* what is ok and permissable..LOL.

>In the same vein, I don't have a problem with

>CB DXing, just as long as the power and

>splatter is kept to a minimum so as not to

>muck up the rest of the band.

Again,,,your ego is in your way,,,it's not about you Frankie, or me, no matter how much your ego demands it. You have issues, dude, and you really need someone to teach and instruct you on the finer merits of internet communication,,,,,your ego is way too involved and dictates and demand everything relates to you personally, somehow,,,,,,you ain't right.

_
>On the contrary, I would like to see the 250km

>limit lifted. The only problem with that is as

>soon as it's lifted (if it's ever lifted), there is

>going to be a subsequent surge in freebanding
>and amps.

Conjecture. Pure speculation and *personal* opinion.

>And no, I don't choose which laws I obey or

>ignore.

With your lies, you're tough to find a believer.
See, you choose who to harass on usenet for their choice of topic. You also hypocritically choose which law you feel you have the right to enforce (that pathetic ego need for power).

>But I DO choose which people I vote for office,

Along with every other registered voter.

>and I DO choose to voice my opinion to those

>people when I think a law is unfair or useless.

And you DO choose to become personal and insultive to those who voice their opinion against laws you DO feel are fair and useful,.
You also have told those who hae voiced their opinion to stop "whining" about it and change the law. Take your own advice and you won't be a hypocrite,,,,,at least to the extent you appear now.

_
>A couple of the issues I'm working on now

>happen to be the current mess regarding local
>broadcast station ownership, and the ban on

>new Class D station licenses.

And you callously and ignorantly assume that no others work on any issues because they choose not to inform you, therefore, you hypocritically tell them "Stop whining and do something to change the law."

_

>LPFM might have been an issue if it wasn't so

>poorly implemented.

What's the matter with LPFM? It has plenty of great uses...oh, that's right,,,perhaps if you were educated in the manners of which it applies in the flatlands, you wouldn't be so apt to toss the baby out with the bathwater based merely on your looking at the water and trying to guess

it's temperature.

>But none of that justifies ignoring the laws in

>favor of illegal operation.

>So I'm not being hypocritical here.

Sure you are..good thing you had me to point them out.

>The problem is that you can't get past your

>obsessions long enough to have a civilized

>conversation,

Yea,,sure,,you go on trying to convince another of that,,LOL.
I'm not the one with the compelling desire to jump into another's
personal life like you do, Frankie,,,even when you offered..LOL..perhaps
this is what is chapping your myopic tail at this point.

>? or to understand another person's point of

>view, or even to let someone listen to your

>opinions with a sincere interest. IOW, your

>opinions don't carry much weight when you

>are the newsgroup punch-clown.

LOL....only you and KC8LDO have the need to make all your posts
personal, insultive, and of MEMMEMEMMEMMEMEMMEMEME! Now, go
on,,,resume telling us about my obsession, Frankie.

_
>Unless someone is listening for purposes

>other than a morbid curiousity, I really don't

>have a problem with scanners. I do -not-

>condone eavesdropping on private

>conversations. But the fact is that it does

>happen,
HAhhahah..so does freebanding.

>and I -do- warn people about using

>cordless phones.

Not here you haven't.

>Oh yes I have. I have mentioned the issue a

>few times before, and on other newsgroups as
>well.

Post it...right after yiou post your angry accusations claiming I made false claims about you....come on now,,,,you don't want to become the punch-clown you fear, do you, Frankie? Whoops...too late..hehe!

_
>And I have also posted my website addy.

Ego.

>I would probably have posted it more often if

>the name of this newsgroup was

>rec.radio.scanners or alt.telephone.cordless.

But go ahead and do it now and use N3CVJ as an example.

>http://www.aimcomm.com/sparky/hi-tech.htm

Pacification is a temporary thing with one that has his ego so heavily bruised as yourself.

_
>Despite all that,

Despite your hypocrisy? No, Frankie,,,IN ADDITION, to your hypocrisy,,,,

>the FCC has recognized the issue of

>eavesdropping on cordless phones and has

>taken steps in order to impede the efforts of

>those that would listen to private

>conversations for personal gain or the

>commission of a crime.

Umm,,hey Frankie,,,intentionally monitoring private telephone calls IS a crime, just as you hold freebanding is.

_
>No it isn't. 18USC2511(2)(g)(v). Even though

>they should probably find a less intrusive

>hobby, it's perfectly legal for anyone to listen

>to unencrypted cordless phone conversations.

HAHHAHAHHA! No it's not Frankie. Don't tell me you need 'ol Twist to cite the passage where it is illegal to INTENTIONALLY monitor any telephone conversation that is intended for private use without explicit permission? LOL,,,poor Frankie..you fall more each day. That ego must really be smarting about now,,hahhahah!

_
>Not my idea of a fun evening,

Well, Davie thinks it's "juicy."

>but hell,

>I'm wasting my time replying

(snicker) You know your ego is getting bashed and can take no more when you resort to what you know...lying. Once again, you initiated the posts and threads to myself , Frankie, Your communication defict once again has you misinterpreting my replies as initiating conversation. You're way off, Frankie.

>to your posts. I don't know which is worse....

You or Dave? So far, Dave denies lying. He hates to be wrong and told no. ANother destroyed ego by a lowly cber.

>As the older, unsecure phones find their way

>to the trash heaps, the issue is gradually

>becoming moot.

_
Not moot at all. I merely use you and Hall's oft-repeated mantra that it's the "BEHAVIOR" that makes such criminal acts so bad,,,,the blatant disregarding of federal rules for personal satisfaction...try not to lose site of what you selectively hold others to, Frankie.

>Idiot.

Yea,,I figured you'd be pained by rubbing your nose in your mess.

_
Oh, wait a second, youre still tripping over your hairlipped lie looking for that post you claimed I said the same thing about you in,,,,,,still waiting, Frankie,,,you mean you lied? Again? Gee... "I have admitted to lying in this ng and on
more than
one occasion." Frank
Gilliland (Sparky@cet.com)

_
BTW,,,what happened to that Vancouver
feed?

>Never had one.

LOL...hokay!
Your Time Warner (TWTelecom) is in Vancouver, Frankie.

>My ISP is in Spokane, Twisty.

Your Time Warner (TWTelecom) is in Vancouver, Frankie, the "feed" you just lied and denied.

>My "feed" comes from my ice-box and pantry.

>My ISP is in Spokane. Where it goes from

>there I don't know and I don't care, just as long
>as it ends up at it's intended destination. If it

>goes through Vancouver, so be it.

Ahahahha..you and Davoe are the same pathetic lids. He claimed the same
thing,,claimed he was a network admin in one post, then claimed he
didn't know how or why his email originated from Villanova U....LOL.
Lids in a pod.

>It might also go through Tacoma, Fargo,

>DesMoines, or even Tampa, I couldn't care

>less, but that doesn't mean I live in or around

>any of those urbs.

But it doesnt.It goes throgh Vancouver.
"Nuff said (smirk).

"I have admitted to lying in this ng, and on
more than one occasion"
Sparky@cet.com

_
Ah never mind,,,,one thing
at a time,,,,,now, about those RF pirates that you claimed affected your
daily work...

>Do you want to know the names of the most

>obnoxious offenders in this area?
Not at all. I'm not interested in anything about you.

>Then why bother even bringing up the

>subject? Or did you write it just to read it

>yourself?

You brought it up. I asked the questions that are too painful for a
hypocitical liar like yourself
years to entertain.

_
I am being polite,

>ROTFLMMFAO!!!

to you, that is all. Your ego misinterprets such simple acts as much
more than they are.

>Your incessant hounding on the subject

No hounding , frank, Just redirecting your failed obfuscation and lies,
You claimed I wouldnt answer your questions,,I indeed claimed I would
answer any question you like after you answer the original questions

posed to yourself based on your claims you made and thought important enough to share.

_
(sigh) Direct a post to myself, I shall respond,

>Respond to this: If I want you to know

>anything about me, just ask. If I don't tell you

>what you want to hear, deal with it on your

>own terms,

My, the hypocrisy is radiant today, Frankie,,absolutely beaming. Take your own advice, instead of attacking another with all kinds of pathetic wounded cries about how your questions are being ignored..LOL.

> or consult your imaginary shrink.

Once again, and right on cue, only you, Nad, adnd the lid Hall mention such novelties..the lids of the pod,,the lids and troublemakers,,,LOL,,,,deal with it on your own terms.

>Or keep begging for another year and a half if

>you really want, I couldn't care less.

When one makes a post on usenet, they are asking the one they directed the post toward for attention in the form of a reply. That you can not grasp the simple fashion in which usenet works,

>Do you mean
<snip>

I mean what I said, That you need far-flung analogies for all your lack of intellect is your problem, no one elses. I suggest you deal with it on your own terms.

> l Fix your own communication deficits, then I'll
>listen to you whine about mine.

I don't address yours, Frankie, except when your deficit acts up and you direct posts toward myself and then try and claim otherwise.

>You might want to fix them soon, because in

>order to keep you from whining about me

See above.

>I wonder if webtv has enough bandwidth to

>compensate for your communication deficit....

Your compulsions have you worrying about all that you are impotent over...LOL..no wonder you're a disheveled mess.

There goes the ego again, misinterpreting things and reading into things
that do not exist.
I can discuss any topic that you like,

>Great. Then just to clarify your previous post,

>were you saying that you think freebanding is

>an "essential liberty"?

Practice the Golden Rule Frankie,,answer the question posed to your
first, then you may have some ground in which to cry and stomp your foot
and hold your breath and demand one answers the question you placed
subsequently.
,but *refusal* to hold to the
_
golden rule is something you are blaming me for,

>And for good reasons.

Your inability to converse and your deficit in communications are not
good reasons, Frankie.

>I'm sure you will ask me to repeat those

>reasons for the umpteenth time... I will, but

>another day.

(chuckle)

LOL,,I't's always
another's fault for your misery, eh Frankie?

>What misery, Twist? You are projecting again.

And just who is convinced of that, Frankie, besides your pedophile friend and the other lid Kc8LDO? I'm not the one insisitng on making a chatter/pposter the topic of my world.You go on and lay down, now, OM.

_
To wit: Questions need
answered in the order they are received. You have yet to answer questions to your claims,

>Wrong. I have answered every question you

>have asked. You may not have liked the

>answer, but I did answer them.

Yea/ Cite it then..oh ,,,that's right,,you become constipated when asked to provide for your claims...LOL.

>Now -you-, on the other hand, have MANY

>outstanding questions pending.

My questions to you are radio related. Yours are obsessive in nature and all off topic. Your deficit in communication prevents you from telling the diffference.

>At least I don't

>drag the discussion into a different topic every

>other post.

Nope,,,,,,because you have not much room in your brain for multi-topics, I am about all you can manage at once. It's like walking and chewing gum,,some can't do it,,such as yourself.

> Back to the topic of the thread,

>do you think Ben Franklin would agree that

>freebanding is an "essential liberty"?

(snip) No. Back to the order of the questions, as Franklin wasn't the topic, but an incidental mention in whcih you are attempting to drag the topic.

_
  which nullifies and cancels any right or point you may think you raised by shouting that I refuse to answer any latter inquiry brought by yourself.

>If that had any validity at all, I wouldn't answer

>ANY of your questions until you answer the

>very first question that you ignored (and

>continue to ignore): A long time ago you

>accused me of a lot of things, things that you

>could never back up with facts, and yet you

>had the balls to say that >I< lied. Well, where

>was that lie, Twist? Do you need to see the

>post again?

Depends what I accused you of. What you claimed I accused you of, you have failed to produce.

>I posted that question no less than two dozen

>times, and you have yet to answer it. Which

>post would you like to see again?

The one where you claimed I accused you of something. Of course I accused you of being a hammie,,you are. Of course I accused you of being on the opposite side of the state than which you claim,,,you are.

>All of them?

Just the one that pains you the most.

>Back to the topic: So who were those

>presidents I quoted? This should be easy

>even for you, Twist -- you only have to pick

>two out of four. You should be able to use a

>search engine and come up with the answers

>real quick.

Let's take it one step at a time so Frankie can follow, shall we? Answer the questions put to you first, and you will be entitled to ask one of me. Golden rule, Frankie,,,

>I don't behave according to -your- Golden rule,
>Twist -- "Do unto others

>-before- they do unto you".

That's why you are so angry and demanding.

>Now as for those two presidents, would it help

>if I said that neither one of them is George?

,,,communication deficit does not alow you to comprehend such simple, human, civilized behavior. You would rather focus on MEMEMEMEMEMMMEM,,,LOL!

_
"I have lied several times in this ng, and on more than one occasion"

Frank Gilliland, Sparky@cet.com

_
Once a liar, always a liar.

>It takes integrity to admit one's mistakes.

Liars have no integrity, Frankie,

>You should know better than anyone here.

I do. I illustrate yours, Davies, and Nad's on a regular basis and will
continue to do so.

_
 A lie is so far removed from a mistake, that only a liar can attempt
to make a lie appear benign as a mistake.

>Are you saying

Once again, Frankie, I said waht I said. Your pathetic need for
analogies to lessen the effect of your communication deficit is not
needed by anyone else..

>So who do you think I am -this- week, Twist?
You have issues, Frankie,

>Blah, blah, blah. Stay on topic.

I'm not the topic, Frankie, I'm *your* topic. Franklin wasn't the topic,
Frankie, it was an incidental you made *your* topic. Get a grip on
reality, OM.

Simple,

Replace the spark plug wires on your car with solid core equivalents, also
swap out the spark plugs for the non resistor type.

You'll jam a lot more than you could ever imagine.

cheers
skipp

Dunno about jamming cable tv, but a handheld CB and a little duct
tape on the trigger can play havoc on one's CB ears.

Thanks. I am hoping to locate a circuit that I could build that would be somewhat simple and fairly cheap. A completely disposable solution that could be 'launched' and forgotten about.

I will of course keep the walkie talkie taped down as a backup.

Thanks.

I am looking at gettin a homebase antenna for my birthday and my mum and my dad know nothing about cb radio so i am turning to you. I had my eye on the chimney breast to mount the antenna but would i have to go up and swr the antenna there to see if this is the right place to put it. The only reason i am hesitating is its quite high and i would need to get a company in to fit it and its better knowing if the spot is the best place or not. I thought it would be as its the highest point in the house and from there you can get a clear line of site from the village i live in over glasgow to loch lomond.

thanks

I'd never suggest intentional jamming. Of course, if you happen to have a gasoline powered lawnmower and a 9 foot section of bell wire happened to land on the spark plug (stripped end on the plug) and the other end on some insulator such as a clothes line ... :) That would take out quite a bit of spectrum around 27 MHz (likely 4 MHz either side) for reception for a few blocks. :)

Not recommended, of course.

73 from Rochester, NY

Graeme,
The higher the better, but you do have to use a bit of common sense and 'balance' about the whole thing. (Common sense meaning 'frugal', 'cheap', 'penny pinching', 'lets not get carried away whith this thing!') Unless they build chimneys a lot diffrent there than they do here, the average chimney isn't designed to support the weight and wind load of an antenna. The difference between a few feet doesn't really make that much difference in what you will hear. A few tens of feet, yes. A few feet, no.
SWR is the measure of how well the antenna impedance is matched to the feed line's impedance and how well both of those are matched to the transmitter's output impedance. An antenna will have to be tuned no matter where you put it, unless you're extremely lucky to have a good match to start with (if you're that lucky, play the lottery!).
You might take another look to see where else you can mount your antenna that wouldn't envolve the pitter patter of chemney bricks hitting the roof...
'Doc

Well, a year ago you were accusing him of being a crack head. When he
posts something you agree with, he suddenly "has a brain" aqccording to
you..LOL.
****
Randy is a good guy. He isn't like the rest of you, I have said this many
times over and over in this NG
and yes randy and I had a few spats but we are past that and I respect him
and his opinions.

_
,your
insanity prevents you from realizing such, but your claim leaves no
doubt that the only manner you can know that another definitely didn't
"do" something, is by knowing who did.
****
>See above dickhead,

Didn't take you long to go for the insults and homo references.
****
your real easy at bringing insults to mind, shame the mention of calling you
a dickhead brings homosexual pleasures to you
perhaps thats why you and Gayshark hit it off so well.

Why not
bring out your favorite term "assclown" while you're at it. Your
preoccupation with men's privates and rears ia what you're all about.
****
Yes you really are a assclown, dickhead.

Nope,,you didn't use the word "definitely",,but you most *definitely*
claimed you knew Lelnad was innocent.
****
Post word for word where I said i know it was not leland? assclown

> didn't do it I said i didnt do it

Are you denying saying you knew Lelnad was innocent a few weeks back?
****
Yes, I had no idea if he was doing anything or not, post it assclown,

>you jit stained

Your preoccupation with men's rears, hom references, now coupled with
sexual acts, noted.

****
calling you an assclown has nothing to do with mens rear you stupid jit
liped retard.

Nothing of the sort, When one lies intentionally, I'll call you on
it,,,it's a pet peeve of mine,,just like pretending you have some radio
authority is yours.
****
then post where i said "I KNOW Leland isn't doing it'" . Ill bet you can't

Who is "he"?
****
THE GUY YOUR ACCUSING OF GIVING HIS CALLSIGN AS WA3MOJ

Here's your proof:

There is no proof just a carefully worded post for you to try and insinuate
something it sure workd. As noted it was never said anything your mind is
wandering and claining and fabricating all kinds of wild claims, assclown.

>I claimed i was the one who was innocent you

>stupid fucking dick with ears now go jerk off

Well, after reading the following, you can "stop" jerking off, You're
making a mess of yourself.

You have used that line three times, and it's already old. Besides that, it
makes no sense. Feel free to waste your time typing it.

>Sex. Their first time. Children. What more do you want?

I suppose that in your socially isolated mind you might have conditioned
yourself to assume that such a conversation must be an explicit play-by-play,
and that it is either unlikely or absolutely impossible for it to consist of
anything else. But that raises suspicions about -your- behavior, not Hall's.

Gossip is "juicy". Gossip is not necessarily pornographic or sexually explicit.
The word "juicy" implies pedophilia only in -your- mind, Twist.

> He's a pervert, and so are you for
>attempting to claim listening to children talk of sex on a private
>telephone is somehow innocent.

>
>>Well, I grew up with two older sisters, and let
>
>>me tell you
>
>
>No Frankie,,tell someone who cares what yout think about such matters.

Gee Twist, after all that whining about me snipping your posts, then you go and snip mine, even after I made a point not to snip any more of yours? One would think that your mind was closed to what I had to say, regardless of it's validity or truth (your friend, remember?) But that's ok, Twisty, we all understand that you just can't admit when you are wrong and will snip, lie, obfuscate, distort, misquote and forge just to avoid admitting your mistakes. But hey, that's our Twistedhed!!!

>> He also said that he heard other
>
>>conversations, such as people making a drug
>
>>deal.
>
>
>
>
>He didn't say it was "juicy".

Read his post again, dimwit. He said, in a sentence that was both seperate and prior to the list of conversations, that it was the "neighborhood phone traffic" that was "juicy". Go read it yourself. Then go schedule an appointment with your imaginary shrink to deal with your communication deficit.

>>Does that make him a drug addict? Of course
>
>>not, but according to your "logic" it does.
>
>
>Not my logic, Frankie mah boy,,Davie's OWN logic. He is the one that
>claimed that since I DX and freeband, it's a good chance I break other
>laws pertaining to society.

He's absolutely right. Pick up any Psych 101 book and you will find a bunch of references that support his statement -- i.e, your self-admitted ideals and deliberate lawbreaking, when taken in context with your behavior and writings in this newsgroup, is indicative of a major malfunction, something along the lines of an antisocial, histrionic and/or narcissistic personality disorder. Take your pick, because with any combination it's a fair bet that you can't restrain yourself to the behavioral standards of the rest of society.

> His hypocrisy bullshit is how this entire
>matter with him began. Why didn't you shed some light on his bullshit
>when he said it instead of waiting until I used his logic?

Because it wasn't his logic that equated his observations with such a gross and perverted social deviation. The only person that still accuses people of pedophilia in this newsgroup is you, Twist. I think you need to see a REAL psychologist, not just your imaginary shrink.

>>Now go finish your chores before your hubby
>
>>comes home.
>
>
>LOL,,,,always in search of a a bit of power, no matter how slight...

I'm sure you are, and you could probably find that power if you didn't give it up to him so easily. Play hard-to-get once in a while, even if he -is- your husband. After all, this is the 21st Century, and marriage doesn't give him some kind of legal right to sex even if you don't want it.

>_
>>While there is no doubt that eavesdropping on

MacroEconomics. It's called a complimentary market.

>>And no, I don't choose which laws I obey or
>
>>ignore.
>
>
>
>With your lies, you're tough to find a believer.

Right. Sure. What happened to all your cheerleaders, Twist?

>See, you choose who to harass on usenet for their choice of topic. You
>also hypocritically choose which law you feel you have the right to
>enforce (that pathetic ego need for power).

Whatever.

>>But I DO choose which people I vote for office,
>
>
>Along with every other registered voter.
>
>>and I DO choose to voice my opinion to those
>
>>people when I think a law is unfair or useless.
>
>
>
>And you DO choose to become personal and insultive to those who voice
>their opinion against laws you DO feel are fair and useful,.

Only to those who use ignorance to justify their lawbreaking.

>You also have told those who hae voiced their opinion to stop "whining"
>about it and change the law. Take your own advice and you won't be a
>hypocrite,,,,,at least to the extent you appear now.

Gee, I don't recall whining about the 250km limit. In fact, I don't think I have even mentioned it more than a half-dozen times in the past three years. Not like I am you, constantly on the rag about the government being oppressive, the laws being unfair, and the legal activists forming a conspiracy against you. No, Twist, I think that you -should- take my advice -- quit yer bitchin, unhitch yer horse and hit the trail with a do-something attitude and a saddlebag full of sticktuitiveness. Even if you fail, you will still have accomplished more than what you accomplish around here -- sitting on your fat ass, complaining about

everything and anything, lying about everyone you don't like and generally making yourself a nuisance.

>_
>>A couple of the issues I'm working on now
>
>>happen to be the current mess regarding local

>issues because they choose not to inform you, therefore, you
>hypocritically tell them "Stop whining and do something to change the
>law."

Maybe your communication deficit is acting up -- where are my thousands of post of me whining about those issues? They don't exist. OTOH, where are your thousands of posts whining about the government, unfair laws, and all your favorite "lids" in this newsgroup? Google.com

>_
>
>
>>LPFM might have been an issue if it wasn't so
>
>>poorly implemented.
>
>
>
>
>What's the matter with LPFM? It has plenty of great uses...oh, that's
>right,,,perhaps if you were educated in the manners of which it applies
>in the flatlands, you wouldn't be so apt to toss the baby out with the
>bathwater based merely on your looking at the water and trying to guess
>it's temperature.

The regs were poorly constructed, there is no procedure for upgrading the station, the selection process hasn't been exactly objective, and the whole service is subject to elimination with just a nod from the fat-cats of the broadcast industry. As far as I'm concerned, it's a lost cause. I would be more interested in an amateur broadcast service. Not a bad idea as the VHF-lo band opens up in the coming years. After all, that's where the FM BC band started originally.

>>But none of that justifies ignoring the laws in
>
>>favor of illegal operation.
>
>>So I'm not being hypocritical here.

>
>
>Sure you are..good thing you had me to point them out.

You tried, but failed yet again. Too bad you will never realize that you can't win with your Twistedhed tactics.

>Lids in a pod.

One small problem with that theory, Twist: I never claimed to know how packets are routed. But I -do- know that not everyone who subscribes to AOL lives in the urban hubs that are indicated by their IP numbers, as would be the case if your theory held water. I also know that no other webtv subscriber has posted from the same IP number set/server name that showed up in your headers last year, the same ones that are in the headers of some of those forgeries you claim you didn't post. So keep crying about lids, Twist, and I'll keep that page of your forgeries on my site. Fair enough?

>>It might also go through Tacoma, Fargo,

Eavesdropping on private conversations is indeed illegal. The difference is that because older cordless phones didn't use any encryption, any conversation using them cannot be legally defined as private. The cordless phone freqs were, in effect, party lines. The owner's manuals emphasized this fact, and it's too bad that people didn't read those things (then or now).

Only because I am already wasting too much time on the computer. But it's not so bad to spend a little more time indoors lately because the air here is loaded with smoke from local forest fires, and kinda makes the eyes burn if I stay out too long.

>> Back to the topic of the thread,

Omigod, a straight answer!!! WONDERFUL!!! Now, did you deliberately misinterpret Franklin's statement by substituting "essential liberty" for "a bit of freedom"? Or did you honestly believe that "a bit of freedom" is what he meant?

> Back to the order of the questions, as Franklin wasn't the
>topic, but an incidental mention in whcih you are attempting to drag the
>topic.

Actually, Franklin wasn't the topic because you allowed your communication deficit to [mis]quote him under the name of Jefferson.

>_

Wrong, as you have been all along, and I have offered to prove to you all along.

> Of course I accused you of being
>on the opposite side of the state than which you claim,,,you are.

Again, wrong. And again, I have offered you proof. Each time you have refused.
It's obvious that you don't want the truth, probably because it would prove that
-you- are the liar. You probably don't even realize that there are now several
people in the newsgroup who know that I'm not N7VCF, or any other ham for that
matter, and consequently know that you are an idiot -- not for your persistence
in your lies and delusions, but for not taking the opportunity to learn the
truth (abandoning your "friend", as it were). Well, the offer still stands for
the time being.

>>All of them?
>
>
>

>me. Golden rule, Frankie,,,

Like I said, I have answered it before. And like I said, you might not have
liked the answer:

http://groups.google.com/groups?hl=en&lr=&ie=UTF-8&safe=off&selm=3b482b7d.11964862%40news.
cet.com

Do you still need a picture? All you need to do is connect the dots. Dot #1: I'm
a BE at a local radio station. Dot #2: I own and run my own electronics/radio
shop. Dot #3: In the course of both jobs I work with licensees in your beloved
"freeband". Dot #4: Some of my clients are also CBers, and frequently bring in
what were once very good radios, but have been trashed by golden screwdriver
techs because some idiot wanted to get on your beloved "freeband". Dot #5: In
both jobs I also work with high-gain, high-quality audio equipment, which, when
not shielded during servicing, has a certain sensitivity to kilowatt charlie
rolling up the highway screaming "AUDIO-O-O-O" into an overdriven power mic
hooked up through a roger-squawk box to a radio optimized for overmodulation and
"swang". Dot #6: Sometimes you can hear kilowatt charlie jacking-off on the
radio even when the equipment IS shielded, which tends to piss off clients who
do their thing by playing their -own- music at the local night-club.

Are you getting the picture, or do you need more dots? And why was it so hard
for you to connect the dots yourself?

>>I don't behave according to -your- Golden rule,
>>Twist -- "Do unto others
>

>>-before- they do unto you".
>
>
>
>
>That's why you are so angry and demanding.

Because I don't troll the newsgroups with a 'flame-before-flamed' attitude?
That's just plain stupid.

>ï¿½
>I do.

I know you do. There is nobody that lies more and has less integrity than
yourself

> I illustrate yours, Davies, and Nad's on a regular basis and will
>continue to do so.

All you are demonstrating is that your obsession with us is so overpowering that
you will stack lie upon lie just to save face. Well, here's a newsflash, Twist:
You lost face about two years ago.

>_
>ï¿½A lie is so far removed from a mistake, that only a liar can attempt
>to make a lie appear benign as a mistake.
>
>>Are you saying
>
>
>
>Once again, Frankie, I said waht I said. Your pathetic need for
>analogies to lessen the effect of your communication deficit is not
>needed by anyone else..

Ok, I'll word it a little differently so as not to bruise your ego. IS IT IMPOSSIBLE for a person to recognize, after the fact, that a decision to tell a lie might have been a mistake?

>>So who do you think I am -this- week, Twist?
>You have issues, Frankie,
>
>>Blah, blah, blah. Stay on topic.
>
>
>I'm not the topic, Frankie, I'm *your* topic. Franklin wasn't the topic,
>Frankie, it was an incidental you made *your* topic. Get a grip on
>reality, OM.

Who were those two presidents? Here's another hint: One of them had a nickname, all you need to do is fill in the blank: "Honest ___". Can you handle THAT?

3576. Re: Ground plane kit

Newsgroup: rec.radio.cb
Date: 2003-09-06 03:58:16 UTC
From: Frank Gilliland <sparky@NOSPAMaimcomm.net>
Message-ID: <bmmilvoepgj0muacdgt400t9152h9si468@4ax.com>
Source record: 165059

In <585d363d.0309050052.224f8a69@posting.google.com>, fourstyx@hotmail.com (Antennahead1) wrote:

>I am thinking about getting a 5/8 wave antenna, most likely the Imax >2000. Does the GPK for it wrap around so that it is centered? I can't >tell from the drawings I have seen posted. If I can get only a bracket >or make one myself, would the performance be better with longer >radials like Francis 8' antennas or something similar?

I don't know about those specific antennas. I do know that the A99 may or may not work better with the ground plane kit (mine didn't).

> How does the
>angle affect gain?

Lower radiation angle improves gain at ground level. A Shakespeare Bigstick is a vertical coaxial antenna, and it's radiation angle is parallel with the horizon (ideally). A 5/8 wave antenna will radiate up at a shallow angle, but the lobe is 'longer' than a half-wave dipole (again, ideally). People using both have different reports. So it's really a coin-toss.

> I an interested in reducing TVI,

You should get your radio tuned up by a legitimate CB shop or ham (not one of those 'golden screwdriver' techs), and add a low-pass filter.

> improving
>groundwave performance

Groundwaves at 27MHz are limited mainly by the terrain. If you are in a hilly area or have lots of buildings, there's not much you can do. If the area is relatively flat, just mount the antenna as high as possible. But the latter follows the law of diminishing returns at about 20 to 30 ft.

> and reducing skip as much as possible.

There's not much you can do about that either, except to stay away from the toiletbowl (Channel 6), or use a beam antenna.

> What is
>the difference if the radials are horizontal vs 45 degrees or some
>point in between?

The angle of the ground radials changes the input impedance of the antenna. For a 1/4 wave vertical, if the ground radials are mounted 45 degrees down, the input impedance is about 50 ohms, which matches the radio and coax quite nicely. BTW, that applies for full-length ground radials. I have doubts that those short little nubs Solarcon claims are ground-plane radials will behave the same.

Actually, I think they are intended to keep RF off the coax, but who knows....

> Does the bracket need to be below the matching

>improve ground wave performance. With my current setup, I typically
>tx/rx out to 40 or 50 miles. Is that good/typical for an omni type
>antenna?

Very good, and much better than typical (assuming you are running legal power). So well, in fact, you should consider the old proverb, "if it ain't broke, don't fix it".

> How much farther can I expect to reach with a 5/8 wave?

Beats me. People have claimed different results. I don't think you will gain a whole lot, if any, and definately not as much as a beam antenna. You can make some BIG gains with a beam.

> Has
>anyone ever removed the flat mounting plate on the Imax 2000 so the
>A99 radial kit can be used?

I dunno.

>http://groups.yahoo.com/group/11meteramps/

It's nice to see someone paying more attention to antennas, since they can provide amplifier-like gains for Tx -and- Rx without the splatter-box.

ok here's what you do....go buy an Antron 99 18ft base antenna from www.copper.com, then when you get in the mail, dont touch the tuning rings. Get someone your dad knows that climbs trees or call a tree man to put your antenna in the biggest tree you can find. make sure you get an atleast a 10ft mast pole to put the U bolts that come with it on. have the tree guy to nail huge nails through the mast pole and on the tree, u need some kind of straps to wrap around the tree and the pole....have a good time, PS--- get the antenna as high in the sky as possible

RESTRUCTURING: PRO CODE PETITION FLED WITH THE FCC

The proponents of retaining Morse testing for all candidates for a United States Amateur License with high frequency operating priveleges are striking back. This, with a petition that not only asks the F-C-C to retain the 5 word per minute C-W exam, but to also require that Extra class pass a 12 word per minute test. And the organization that I sponsoring the measure also wants written exams stiffened as well. Amateur Radio Newsline’s David Black, KB4KCH, has more on this attempt to row against the deregulatory tide:

--

For the past couple of months, more and more countries have been steering toward making amateur radio code-free. That follows the July abolition of Morse code testing by the World Radiocommunications Conference. In the United States, the Federal Communications Commission has before it six petitions essentially seeking to remove Morse code from amateur radio in the U-S. Supporters of the code have been quiet--until now. A group called FISTS--said to be the largest code advocacy organization in the world--is leading an effort to make Morse code a more prominent part of ham radio and the licensing process.

FISTS is an international Morse code preservation society based in the United Kingdom with chapters world-wide. Its stated objective is to further the use of the Morse code in Amateur Radio communications. The group's north American chapter has delivered a detailed rule-making request to the FCC that seeks more than just making sure that Morse code testing is retained.

FISTS asks the Commission to raise the standards in other areas of testing, too. Nancy Kott, WZ8C, is U-S Chapter Manager for FISTS, and is Editor of Worldradio Magazine. She wrote the rule making request. Among the proposals are keeping code as a mandatory testing element for the General and Extra class licenses. General licenses would require 5 words per minute and Extra class

licenses would require 12 word per minute code proficiency.

FISTS says passing a 5 word per minute code test is no hindrance to people wanting to upgrade, and cites the large number of Technician class operators upgrading to General as proof.

FISTS also says that those aiming for the Extra license should be able to demonstrate Morse code skill at 12 words per minute.

Today's written exams are too easy. At least, that's what FISTS seems to suggest in noting that the FCC sought comments before amateur radio's restructuring about whether fewer morse code requirements should be offset by increased technical content on written questions. FISTS notes that nearly every commenter said yes, but the Commission's Report and Order failed to address the issue.

FISTS says the commission has a chance now to make General class written tests equivalent to the Advanced class written tests before restructuring. In other words, go back to the way it was, with tests that are harder and more thorough.

FISTS wants the Extra class exam to be more thorough, as well. It wants the FCC to require written knowledge of circuit design, information theory, digital methods and encoding schemes and software radio. FISTS says candidates for the Extra class ticket need to show a more thorough knowledge of propagation and geophysics than current tests require.

For the Technician class operator, FISTS suggests merging the Technician and Tech-Plus classes and not require a Morse code exam. But FISTS says technical content should be emphasized and should include the digital modes. FISTS advocates extending Technician Class privileges to include digital modes within the current Novice subbands, which it says should be kept. The group says that would let Technician Class operators participate in the explosive growth in digital applications occurring within the Amateur Radio Service on the high frequency bands.

But when it comes to giving Technicians even limited phone privileges on HF, FISTS says no. The group says the rush of upgrades by Technicians to higher classes following restructuring indicates that the barrier between General and Technician classes has already been lowered enough without needing to go any further.

FISTS also suggests one other big change and that involves taking license tests. Right now, if you fail an exam, you can go back and try again at the same session. FISTS is asking the Commission to impose a 24-hour waiting period before being able re-take either a failed written test or a failed code test.
For the Amateur Radio Newsline, I'm David Black, KB4KCH.

--

There’s 14 pages to the FISTS filing. You can read it on-line at ftp://ftp.qsl.net/pub/n1ea/FIST_FCC_Petition_8-30-303.pdf. As we go to air, no Rule Making designation has been assigned to the FISTS request.

RESTRUCTURING: ACA PAPER SUGGESTS TOTAL RESTRUCTURING OF VK HAM RADIO

Meantime, down-under the Australian Communications Authority has surprised that nations ham radio community with a proposal to totally restructure that nations Amateur Radio service. Jim Linton, VK3PC, has the rest of the story.

--
Radical changes are being proposed for the Amateur Service in the just issued ACA discussion paper entitled "A Review of Amateur Service Regulation.” The paper is sure to stimulate debate, particularly its reference to interference experienced by domestic television and radio receivers, and a suggestion that radio amateurs should take full responsibility to resolve these problems.

A major purpose of the paper is to discuss the implementation of the changes arising out of the World Radiocommunications Conference held in Geneva this year. These changes include the end of mandatory Morse code tests for amateur licences, amateur callsigns, third party traffic, communications during disasters, and reciprocal and visitor licensing.

The ACA, as expected, has also taken the opportunity to discuss restructuring of amateur licensing, the regulatory controls and administration of the Amateur Service in Australia. The paper acknowledges the WIA's proposal for a new entry level licence, and the potential for it to replace the current Novice licence. It discusses restructuring of the current system of seven different amateur licence types (five operator, plus repeater and beacon), to create only two operator licence types - Unrestricted and Novice.

On a positive note the paper hints that the removal of Morse code tests for amateur licences may occur earlier than the ACA's current timetable. It states that if there is sufficient public support, the code requirement could be removed prior to its proposed implementation of regulatory changes flowing from its discussion paper in early 2005.

In a controversial proposal, the ACA is to consider the introduction of a "no interference" policy for radio amateurs. It states "The operation of an amateur station, which is essentially a hobby, should not disturb another person's activities, such as television viewing or radio listening, or affect commercial activities." Should the "no interference" policy be introduced, it would be a major shift from the current ACA policy that provides for a shared responsibility between the radio amateur and his neighbour for the resolution of an interference problem.

To make it clear, the ACA explains "This would mean that an amateur must not cause interference to other radiocommunication services. If causing interference to another service, the obligation will be on the amateur to resolve the problem."

--

The Australian Communications Authority has set a deadline of October 31st as the last day for hams to file responses to its discussion paper. The 50-page discussion paper can be downloaded from www.wiavic.org.au/news or www.wia.org.au/vk4 (Q-News)

RADIO LAW: THE ACADEMY OF MODEL AERONAUTICS SAYS NO TO BPL

Back here in the United States, word that the Academy of Model Aeronautics is saying no to the introduction of Broadband Over Powerline or B-P-L technology. In Reply Comments to the FCC, the 175,000 member aviation hobby group says that it is concerned that B-P-L deployment could cause harmful interference to users of Radio Controlled systems and pose a safety hazard to aeromodeling equipment and spectators.

In its filing the A-M-A says that Broadband Over Powerline holds the potential to severely interfere with radio controlled models which operate in or near the 27, 50, 72 and 75 MHz bands. All of these fall within the 1 point 7 through 80 MHz spectrum where the FCC proposes to permit B-P-L to operate.

To the A-M-A this means that Broadband Over Powerline may not yield the benign environment the Commission expects. Also, that it could result in an unanticipated negative impact on Radio Controlled operations. And that’s what it has told the FCC. (AMA release)

RADIO LAW: MARYLAND COUNTY FILES RFI CONTROL APEAL TO FCC

Still with regulatory news, the CGC Communicator reports that Anne Arundel County, Maryland has filed an Application for Review before the full Commission. This, in the hope of reversing an order by the FCC’s Wireless Telecommunications Bureau that prevents the County from entering into the radio frequency interference control business through zoning laws. Laws that could even impact on ham radio, C-B and GMRS operators.

In 2001 Anne Arundel County, Maryland, had enacted legislation requiring that, prior to receiving a County zoning certificate, owners and users of any sort of telecommunications facility had to show that their installation would not degrade or interfere with the County's public safety communications systems. The ordinance also permitted the County to revoke a zoning certificate where degradation or interference was found.

Alarmed, telecommunications providers took the ordanance to the FCC asking that it be overturned. Last July it did just that. It In considering the case, the

Commission found that the challenged provisions of the Anne Arundel County zoning Ordinance infringe on the Commission's exclusive jurisdiction over RFI and are preempted under the doctrine of field preemption. Now the county is upping the antie.

In its pleading, Anne Arundel County maintains that reversal of the Bureau's decision is required because the Order conflicts with a controlling statute of the Communications Act. The County further states that, pending implementation of the Commission's 800 MHz proceeding, the Bureau's decision leaves public safety systems of local governments such as the County's vulnerable and powerless to deal with what it terms as -- quote: " potentially deadly radio frequency interference from wireless systems of commercial mobile radio service providers operating in the 800 MHz band."

The FCC has invited comments on this matter by September 26. More is on-line at the U-R-L featured in this weeks Amateur Radio Newsline printed report.

RESCUE RADIO: CELL PHONE HELPS RESCUE FCC OFFICIAL

A cellular telephone has helped to rescue two men dangling in a gondola buffeted by severe winds near Aspen Colorado. One of them is the chief of the Federal Communications Commission's Wireless Bureau who turned to the phone during an ordeal where he was trapped for more than two hours. Amateur Radio Newsline's Bruce Tennant. K-6PZW, reports:

--

According to news reports John Muleta leaned on the technology he oversees when he and Robert Pepper, an adviser to FCC Chairman Michael Powell, got stuck in the gondola on Monday, August 19th. The two men had used a break in a telecommunications summit to take in the view from atop of 11,000 foot Aspen Mountain.

Their sightseeing trip turned into an ordeal when the tram service abruptly shut down during their return. It stranded Muleta and Pepper n the enclosed gondola part way down the mountain. When help was slow to arrive, Muleta used his cellular phone to call for assistance. But the local service provider provider apparently did not have the latest "enhanced" 911 technology and could not locate him precisely. So Muleta simply directed the rescue effort over the phone.

Once off the mountain Muleta told the press that he was very happy that he had remembered to carry his cellular telephone with him. He added that had he not, that it would have been a much different scenario. This, if they had been trapped all night with the weather getting getting colder.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Ironically, just before he left for the trip Muleta told an interviewer that the FCC is looking at ways to accelerate the deployment of Enhamced 911 service. This is the system that uses G-P-S technology to more precisely locate callers. (Published News Reports)

**

ENFORCEMENT: INTERNET SALES BRING LETTER OF INQUIREY

The FCC has sent a letter of inquirey to Randy Owen, N9UOM, of Toma Wisconsin regarding his license renewal application. The Commision is asking Owen about his apparent involvement in the sale of non-certified C-B transcievers and non-certified High Frequency amplifiers over the Internet in 2002. Owen is the owner of Roper Electronics whose website was advertising the merchandise for sale. (FCC)

**

ENFORCEMENT: FORMER HAM WARNED NOT TO CONTACT THE FCC

A brefly licensed former ham has been told not to call the FCC and wait for it to contact him. The agency’s Daryl Duckworth, NN0W, explains:

--

(Duckworth) “Jack Gerritsen of Bell California has recieved a warnng notice about a violation of ex-patrte rules after his license had been set aside. His repeated calls to the offices of Administrative Law Judges is a violation odf the Commission’s rules against ex-parte communications. Ex-parte rules place restrictions on contacts with Commission decision making personel.”

--

Gerritsen’s license and KG6IRO call sign were set aside only days after they were issued back in November of 2001. This after the FCC learned that he had been convicted in California state court of a radio related offense. It also recieved complaints alleging that Gerritsen had been on the ham bands prior to recieving his license. (FCC, RAIN)

NAMS IN THE NEWS: 9M2TO WINS UKDXF AZWARD

Some names in the news. The Chiltern DX Club of the U-K DX Foundation has awarded its prestigious 'Local Heroes' Award for 2003 to Tex Izumo, 9M2TO. The club’s awards committee recognized the commitment Izumo has shown in providing many contacts and confirmations with amateurs world-wide on all bands from 160 to 6 metres over a period of many years.

This annual award goes to an operator resident in a DX country who has provided excellent service to the DX community and who maintains a high standard of operating without the benefit of major sponsorship. The award carries a cash prize and a year's honorary membership in the Chiltern DX Club. (GB2RS)

**

NAMES IN THE NEWS: HAM APPEARS ON TV MOTORCYCLE SPECIAL

Bob Mastrangelo, WA6ZTA, of Thousand Oaks Californis reports that he recently participated in the filming of a motorcycle special that aired August 28th on The Travel Channel. The show is called Revolution on Wheels, and Bob is seen in the beginning riding his yellow Honda Gold Wing and is interviewed about 25 minutes later. Since The Travel Channel does repeat these programs, check local listings to see when it will air again and keep an eye open for WA6ZTA. (ARNewsline(tm))

**

NAMES IN THE NEWS: KB4KCH NEW VP OF ARNEWSLINE(TM)

The Board of Directors of the Amateur Radio Newsline has confirmed the appointment of David Black, KB4KCH, of Helena, Alabama, as its Vice President. Black, whom you heard earlier in this newscast will fill out the unexpired term of Roy Neal, K6DUE, who died last month following heart valve surgery.

David Black, KB4KCH, is owner First Frame Video in Birmingham, Alabama. He is also a 20-year veteran of the broadcast television industry. Prior to starting First Frame Video, David worked as a television news reporter and weather anchor at WVTM, the NBC affiliate serving Birmingham, Alabama. KB4KCH also has extensive radio and television experience while working in broadcasting in Texas.

In addition to his reporting and anchoring Amateur Radio Newsline for well over a decade, KB4KCH is active in amateur radio Skywarn and emergency communications. He is past President of the Birmingham Amateur Radio Club and is one of the founders of ALERT Alabama. This is an organization of radio amateurs specializing in Skywarn communications to assist the National Weather Service in the Birmingham area. (ARNewsline (tm))

VOLUNTEERISM: HCI NEEDS VOLUNTEER SCHEDULES EDITOR

If you are a Shortwave Listener, live on the West Coast and want to edit an S-W-L newsletter, listen up. This one is for you.

Duane Fischer who heads up the Hallicrafters Collectors International needs a volunteer editor who can post the annual schedules of worldwide Shortwave radio stations. The site, located in cyberspace at www.w9wze.org/SWL contains loggings, current news, tidbits and program schedules. If you would like to become the Schedules Editor, please contact Duane as soon as possible at

dfischer@usol.com and tell him you heard about it on the Amateur Radio Newsline. (ASWLC, WDX6AA)

**

HAM RADIO IN SPACE: ARISS PACKET UPDATE

An update to last weeks story on the wayward packet radio system on board the International Space Station. Those of you who were on the air on Sunday, August 24 are aware that the packet system was re-activated around 12:00 UTC. Shortly thereafter, the ARISS team received reports from the general ham community that the packet system was operational.

Over the next 9 hours, many hams around the world sent digital signals through the packet system. But later that day, at around 21:22 U-T-C, the packet system abruptly stopped operating while traveling over the Western part of the U.S.

According to AMSAT's Frank Bauer, KA3HDO, the ARISS team has had several discussions on next steps to get the system back up and running properly. But it may be some time before this can be accomplished. This is because the debug efforts may be delayed further due to the arrival of the Progress 12P re-supply ship which will be keeping the two man crew very busy.

Once time is available, the plan is to have the crew report out on the status of the packet module and then to recycle the power. This should bring the packet system back up. If the system abruptly shuts down again after a few hours the ARISS team will then ask the crew to attach a computer to the packet module, download the current parameters to the ground and reset the module.

Stay tuned. ARISS promises to pass along word of progress as it happens. (AMSAT, ARISS)

**

INTERNATIONAL - AUSTRALIA: NEW BANDSPACE FOR VK HAMS

On the international beat, word than all-Australian radio amateurs will be allowed to operate between 3.776 and 3.800 Mhz effective from the 1st of January 2004. The move follows a proposal put to the Australian Communications Authority by the Wireless Institute of Australia several years ago. (GB2RS)

**

INTERNATIONAL - WORLDWIDE: LIGHTHOUSE WEEKEND A BIG HIT

Meantime, reports from the around the world indicate that there was allot of activity in this years International Lighthouse and Lightship Weekend operating event. Jeramy Boot, of the GB2RS News Service has the details:

--

Mike Dalrymple, GM4SUC, the organiser of the International Lighthouse / Lightship Weekend reports that a record number of stations - 369 - were established at lighthouses and lightships in 48 countries - another record -

over the weekend of the 16th and 17th of August.

The official list of participants can be found on the ILLW website. Next year the event will be on the 21 and 22nd of August 2004, and Mike invites individuals and groups to join in with a weekend of enjoying radio from a lighthouse or lightship.

Jeramy Boot, G4NJH

--

The International Lighthouse website is in cyberspace at http://illw.net. GM4SUC adds that as soon as you have your plans for participatiin in the 2004 Lighthouse Weekend made to let him know. You can contact Mike by e-mail to GM4SUC@compuserve.com (GB2RS)

**

DX

In D-X, word that IN3VZE will be active once more as 7Q7CE from Malawi through the 21st of September. QSL as directed on the air. (GB2RS)

And the K3EOD Contest Team will be active in the September VHF UHF contest September 13th to the 14th. The group consists of W3EFH, K3EGE, WR3P, W2SJ and K3EOD. They will be on all bands from 6 meters RF through visible light using SSB, CW and laser communications. For more information please e-mail k3eod@juno.com (VHF REflector)

Lastly, HL1IWD reports that he will be visiting Honolulu through the 12th of September, and will operate as KH6 stroke KB1AIM on 20 metres, mainly CW. QSL is via HL1IWD. (Modern DX)

**

THAT FINAL ITEM: NO MORE USE OF THE WORD E-MAIL IN FRANCE

And finally this week, a note from France where the governmet has said goodbye to the term e-mail in favor of the native language term courriel. A word that linguistically sensitive France is now using to refer to electronic mail in all official documents and hopes that the public will adopt as well.

Frances’ Culture Ministry announced a ban on the use of e-mail in all government ministries, documents, publications or Web sites on July 18th. This, as the latest step to stem what it sees as an incursion of English words into the French language.

Courriel is a contraction of the two words and is a term that has often been used in French speaking Quebec Canada. The ministry's General Commission on Terminology and Neology insists Internet surfers in France are broadly using the term “courrier electronique'' instead of e-mail - a claim some industry experts dispute.

And we thought that you would like to know! (Published reports)

Sure,,,,,here we have N3CVJ not only intentionally, wanton, willful,
breaking of federal communication law as set forth and defined by the
FCC (shouldn't a hammie of his status know better?) but committing
behavior that is construed by many LEOs to be of pedophilia-like nature,
of which ALL experts believe there is NO cure, only a time span until
they approach another child.
I mean, Frankie,,you just claimed in another thread that there is NO
excuse for breaking the law pertaining to the airwaves....according to
Hall himself, you condone this type behavior he commits...hmmmm,,,but
you have a problem with DX and freebanding.LOL....your priorities are
whacked, Frankie, and I am certain beyond any doubt whatsoever, not one
person in this group would want either of you near any children.

–
>When not taken out of context,

Out of context? LOL...his statement admitting breaking federal
communication law stands alone.

>Yes it does. You brag about breaking federal

>communication law yourself.

I don't. That you misconstrue and misinterpret talking about skip and
freebanding as bragging is your problem.

>I guess that makes him no better than you,

>huh?

See what type truth you are capable of when forced.

>So what are you complaining about?

LOL,,,,once again, replying to your directives and inquiries isn't
contrued as complaining except by those with deficits in communication..

>it doesn't sound like pedophilia to me

No surprise there. You two are quite alike.

>Are you an expert on pedophiles?

I'm not the issue.

>Or are you renewing your accusation that I'm

>a child molester?

Poor Frankie..in such great agonizing pain..LOL..really pains you that
you have nothing to back you these days,,no posts, no headers, no
nothing. Just like KC8LDO forging me,,nothing in any archives, no

headers. Liars hang tough together.

_
>or to any other reasonable person, which is

>clearly why you have pulled it out of context

>and interpreted it as such.

Feel free to ask anyone at all that you cite, or feel is "reasonable" if they feel listening to minor children talk of their sexual liasons is "juicy" let alone healthy, conducive behavior of one that continually spoouts off about other folk's morals,,go on now, do as your told.

>Since you have no brain,

Temper-temper, Frankie,,,,my brain is much more tangible than your claims. Nevertheless, I am not the subject. Keep trying

>I guess I have to do all the thinking around

>here.

Internet Lawyering? Hoo-boy! (chuckle) I think not,,,,,

>Did he say that he sat there and jacked off to

>the conversation? No. All he said was that he

>heard the conversation. He didn't even

>describe the details of the conversation.

Sure he did. Your communication deficit prevents you from interpreting it correctly.
Sex. Their first time. Children. What more do you want?

>He didn't say if the girls were saying, "It was

>SO big and hard, and it hurt so BAD", or if it

>was more like, "...and when I woke him up he

>copped an attitude, drove me home and didn't

>even open my door! I don't think he respects

>me AT ALL!"

No,,that's not in his post anywhere,,LOL.
In fact, he even claimed that listening to the children speak of their first time of sex was "juicy". He's a pervert, and so are you for attempting to claim listening to children talk of sex on a private telephone is somehow innocent.

>Well, I grew up with two older sisters, and let

>me tell you

No Frankie,,tell someone who cares what yout think about such matters.

> He also said that he heard other

>conversations, such as people making a drug

>deal.

He didn't say it was "juicy".

>Does that make him a drug addict? Of course

>not, but according to your "logic" it does.

Not my logic, Frankie mah boy,,Davie's OWN logic. He is the one that claimed that since I DX and freeband, it's a good chance I break other laws pertaining to society. His hypocrisy bullshit is how this entire matter with him began. Why didn't you shed some light on his bullshit when he said it instead of waiting until I used his logic?

>Now go finish your chores before your hubby

>comes home.

LOL,,,,always in search of a a bit of power, no matter how slight...

_
>While there is no doubt that eavesdropping on
>private conversations is illegal (and if you

>have ever read my website

LOL...there it is again,,,,that ego,,,,I'm not interested in anything a confirmed and self-admitted liar sets forth.

>Which is worse -- a person that can admit his

>lies, or one that continues to stack lie upon lie

>upon lie?

A liar is a liar is a liar, frankie, all your spin in the world won't change the fact that you are a confirmed liar, lid, and hypocrite, just like Davie and Nad.

>Oh, I forgot, truth is your friend, and

>everything you say is the truth.

Everything I post is the truth.

>I don't suppose you have told a lie in your

>entire life, have you, Twist?

Try to follow, Frankie,,,I'm not the issue..I'm merely *your* issue.

_

>Iyou would know that I'm not a big fan of

>cordless or cell phones for just that reason), it

>doesn't interfere with the conversation or

>cause any harm or inconvenience.

Nevertheless,,,you're intentionally glossing over Davie-son's wanton, illegal behavior. He has called several others here a criminal for no less than freebanding. By your own words, he is "selecting what rules to disregard" and, man, have you posted a ton of ignorance concerning how you feel about such behavior. Not only is Hall's behavior hypocritical, but your selective whining about WHO breaks laws is laughable in the face of your ire.

>I'm "glossing over" nothing.

Denial ain't a river in Egypt.

>Freebanding is necessarily illegal.

So is monitoring private phone conversations.

>Using a

>scanner isn't.

Using a scanner to listen to phones on the old 46/49 analog band is not illegal. You are confusing it with cell reception, which is illegal.

> the IP number and they can see it can't be coming from
> comcast but they are too stupid to figure that out LOL.

Can you try to emulate twisty for a while I need a good laugh.
funniest part is they are supposed to be expert header readers any othertime

3585. Re: Amateur Radio NewslineT Report 1360- September 5 2003

Newsgroup: rec.radio.cb
Date: 2003-09-06 13:43:40 UTC
From: David <medtools@earthlink.net>
Message-ID: <gwl6b.5607$_26.5395@newsread2.news.atl.earthlink.net>
Source record: 165068

If the pro coders want to decrease the numbers of people becoming hams, then
they should carry on. When all the older hams, {most of the pro group}die,
there will be NO ham community. Is that what you want?
If the broadband thing happens, HF will be dead anyway, so carry on,
continue to push new people away, yea that's the ticket......

>
> RESTRUCTURING: PRO CODE PETITION FLED WITH THE FCC
>
> The proponents of retaining Morse testing for all candidates for a United
> States Amateur License with high frequency operating priveleges are
striking
> back. This, with a petition that not only asks the F-C-C to retain the 5
word
> per minute C-W exam, but to also require that Extra class pass a 12 word
per
> minute test. And the organization that I sponsoring the measure also
wants
> written exams stiffened as well. Amateur Radio Newsline's David Black,
> KB4KCH, has more on this attempt to row against the deregulatory tide:
>
> --
>
> For the past couple of months, more and more countries have been steering
> toward making amateur radio code-free. That follows the July abolition of
Morse

> code testing by the World Radiocommunications Conference. In the United
> States, the Federal Communications Commission has before it six petitions
> essentially seeking to remove Morse code from amateur radio in the U-S.
> Supporters of the code have been quiet--until now. A group called
FISTS--said
> to be the largest code advocacy organization in the world--is leading an
effort
> to make Morse code a more prominent part of ham radio and the licensing
> process.
>
> FISTS is an international Morse code preservation society based in the
United
> Kingdom with chapters world-wide. Its stated objective is to further the
use of
> the Morse code in Amateur Radio communications. The group's north American
> chapter has delivered a detailed rule-making request to the FCC that seeks
more
> than just making sure that Morse code testing is retained.
>
> FISTS asks the Commission to raise the standards in other areas of
testing,
> too. Nancy Kott, WZ8C, is U-S Chapter Manager for FISTS, and is Editor of
> Worldradio Magazine. She wrote the rule making request. Among the
proposals
> are keeping code as a mandatory testing element for the General and Extra
class
> licenses. General licenses would require 5 words per minute and Extra
class
> licenses would require 12 word per minute code proficiency.
>
> FISTS says passing a 5 word per minute code test is no hindrance to people
> wanting to upgrade, and cites the large number of Technician class
operators
> upgrading to General as proof.
>
> FISTS also says that those aiming for the Extra license should be able to
> demonstrate Morse code skill at 12 words per minute.
>
> Today's written exams are too easy. At least, that's what FISTS seems to
> suggest in noting that the FCC sought comments before amateur radio's
> restructuring about whether fewer morse code requirements should be offset
by
> increased technical content on written questions. FISTS notes that nearly
> every commenter said yes, but the Commission's Report and Order failed to
> address the issue.
>
> FISTS says the commission has a chance now to make General class written
tests
> equivalent to the Advanced class written tests before restructuring. In
other

> words, go back to the way it was, with tests that are harder and more
thorough.
>
> FISTS wants the Extra class exam to be more thorough, as well. It wants
the FCC
> to require written knowledge of circuit design, information theory,
digital
> methods and encoding schemes and software radio. FISTS says candidates
for the
> Extra class ticket need to show a more thorough knowledge of propagation
and
> geophysics than current tests require.
>
> For the Technician class operator, FISTS suggests merging the Technician
and
> Tech-Plus classes and not require a Morse code exam. But FISTS says
technical
> content should be emphasized and should include the digital modes. FISTS
> advocates extending Technician Class privileges to include digital modes
within
> the current Novice subbands, which it says should be kept. The group says
that
> would let Technician Class operators participate in the explosive growth
in
> digital applications occurring within the Amateur Radio Service on the
high
> frequency bands.
>
> But when it comes to giving Technicians even limited phone privileges on
HF,
> FISTS says no. The group says the rush of upgrades by Technicians to
higher
> classes following restructuring indicates that the barrier between General
and
> Technician classes has already been lowered enough without needing to go
any
> further.
>
> FISTS also suggests one other big change and that involves taking license
> tests. Right now, if you fail an exam, you can go back and try again at
the
> same session. FISTS is asking the Commission to impose a 24-hour waiting
> period before being able re-take either a failed written test or a failed
code
> test.
> For the Amateur Radio Newsline, I'm David Black, KB4KCH.
>
> --
>
> There's 14 pages to the FISTS filing. You can read it on-line at

> ftp://ftp.qsl.net/pub/n1ea/FIST_FCC_Petition_8-30-303.pdf. As we go to
air, no
> Rule Making designation has been assigned to the FISTS request.

> RESTRUCTURING: ACA PAPER SUGGESTS TOTAL RESTRUCTURING OF VK HAM RADIO
>
> Meantime, down-under the Australian Communications Authority has surprised
that
> nations ham radio community with a proposal to totally restructure that
nations
> Amateur Radio service. Jim Linton, VK3PC, has the rest of the story.
>
> --
> Radical changes are being proposed for the Amateur Service in the just
issued
> ACA discussion paper entitled "A Review of Amateur Service Regulation."
The
> paper is sure to stimulate debate, particularly its reference to
interference
> experienced by domestic television and radio receivers, and a suggestion
that
> radio amateurs should take full responsibility to resolve these problems.
>
> A major purpose of the paper is to discuss the implementation of the
changes
> arising out of the World Radiocommunications Conference held in Geneva
this
> year. These changes include the end of mandatory Morse code tests for
amateur
> licences, amateur callsigns, third party traffic, communications during
> disasters, and reciprocal and visitor licensing.
>
> The ACA, as expected, has also taken the opportunity to discuss
restructuring
> of amateur licensing, the regulatory controls and administration of the
> Amateur Service in Australia. The paper acknowledges the WIA's proposal
for a
> new entry level licence, and the potential for it to replace the current
Novice
> licence. It discusses restructuring of the current system of seven
different
> amateur licence types (five operator, plus repeater and beacon), to create
only
> two operator licence types - Unrestricted and Novice.
>
> On a positive note the paper hints that the removal of Morse code tests
for

> amateur licences may occur earlier than the ACA's current timetable. It
states
> that if there is sufficient public support, the code requirement could be
> removed prior to its proposed implementation of regulatory changes
flowing
> from its discussion paper in early 2005.
>
> In a controversial proposal, the ACA is to consider the introduction of a
"no
> interference" policy for radio amateurs. It states "The operation of an
> amateur station, which is essentially a hobby, should not disturb another
> person's activities, such as television viewing or radio listening, or
affect
> commercial activities." Should the "no interference" policy be
introduced, it
> would be a major shift from the current ACA policy that provides for a
shared
> responsibility between the radio amateur and his neighbour for the
resolution
> of an interference problem.
>
> To make it clear, the ACA explains "This would mean that an amateur must
not
> cause interference to other radiocommunication services. If causing
> interference to another service, the obligation will be on the amateur to
> resolve the problem."
>
>
>
> --
>
> The Australian Communications Authority has set a deadline of October 31st
as
> the last day for hams to file responses to its discussion paper. The

> RADIO LAW: MARYLAND COUNTY FILES RFI CONTROL APEAL TO FCC
>
> Still with regulatory news, the CGC Communicator reports that Anne Arundel
> County, Maryland has filed an Application for Review before the full
> Commission. This, in the hope of reversing an order by the FCC's Wireless
> Telecommunications Bureau that prevents the County from entering into the
radio
> frequency interference control business through zoning laws. Laws that
could
> even impact on ham radio, C-B and GMRS operators.
>
> In 2001 Anne Arundel County, Maryland, had enacted legislation requiring
that,
> prior to receiving a County zoning certificate, owners and users of any
sort of
> telecommunications facility had to show that their installation would not
> degrade or interfere with the County's public safety communications

systems.
> The ordinance also permitted the County to revoke a zoning certificate
where
> degradation or interference was found.
>
> Alarmed, telecommunications providers took the ordanance to the FCC asking
that
> it be overturned. Last July it did just that. It In considering the
case, the
> Commission found that the challenged provisions of the Anne Arundel County
> zoning Ordinance infringe on the Commission's exclusive jurisdiction over
RFI
> and are preempted under the doctrine of field preemption. Now the county
is
> upping the antie.
>
> In its pleading, Anne Arundel County maintains that reversal of the
Bureau's
> decision is required because the Order conflicts with a controlling
statute of
> the Communications Act. The County further states that, pending
implementation
> of the Commission's 800 MHz proceeding, the Bureau's decision leaves
public
> safety systems of local governments such as the County's vulnerable and
> powerless to deal with what it terms as -- quote: " potentially deadly
radio
> frequency interference from wireless systems of commercial mobile radio
service
> providers operating in the 800 MHz band."

> RESCUE RADIO: CELL PHONE HELPS RESCUE FCC OFFICIAL
>
> A cellular telephone has helped to rescue two men dangling in a gondola
> buffeted by severe winds near Aspen Colorado. One of them is the chief of
the
> Federal Communications Commission's Wireless Bureau who turned to the
phone
> during an ordeal where he was trapped for more than two hours. Amateur
Radio
> Newsline's Bruce Tennant. K-6PZW, reports:

>
> --
>
> According to news reports John Muleta leaned on the technology he oversees
when
> he and Robert Pepper, an adviser to FCC Chairman Michael Powell, got stuck
in
> the gondola on Monday, August 19th. The two men had used a break in a
> telecommunications summit to take in the view from atop of 11,000 foot
Aspen
> Mountain.
>
> Their sightseeing trip turned into an ordeal when the tram service
abruptly
> shut down during their return. It stranded Muleta and Pepper n the
enclosed
> gondola part way down the mountain. When help was slow to arrive, Muleta
used
> his cellular phone to call for assistance. But the local service provider
> provider apparently did not have the latest "enhanced" 911 technology and
could
> not locate him precisely. So Muleta simply directed the rescue effort
over the
> phone.
>
> Once off the mountain Muleta told the press that he was very happy that he
had
> remembered to carry his cellular telephone with him. He added that had he
not,
> that it would have been a much different scenario. This, if they had been
> trapped all night with the weather getting getting colder.
>
> For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.
>
> --
>
> Ironically, just before he left for the trip Muleta told an interviewer
that
> the FCC is looking at ways to accelerate the deployment of Enhamced 911
> service. This is the system that uses G-P-S technology to more precisely
> locate callers. (Published News Reports)

> HAM RADIO IN SPACE: ARISS PACKET UPDATE
>
> An update to last weeks story on the wayward packet radio system on board
the
> International Space Station. Those of you who were on the air on Sunday,
> August 24 are aware that the packet system was re-activated around 12:00

UTC.
> Shortly thereafter, the ARISS team received reports from the general ham
> community that the packet system was operational.
>
> Over the next 9 hours, many hams around the world sent digital signals
through
> the packet system. But later that day, at around 21:22 U-T-C, the packet
> system abruptly stopped operating while traveling over the Western part of
the
> U.S.
>
> According to AMSAT's Frank Bauer, KA3HDO, the ARISS team has had several
> discussions on next steps to get the system back up and running properly.
But
> it may be some time before this can be accomplished. This is because the
debug
> efforts may be delayed further due to the arrival of the Progress 12P
re-supply
> ship which will be keeping the two man crew very busy.
>
> Once time is available, the plan is to have the crew report out on the
status
> of the packet module and then to recycle the power. This should bring
the
> packet system back up. If the system abruptly shuts down again after a
few
> hours the ARISS team will then ask the crew to attach a computer to the
packet
> module, download the current parameters to the ground and reset the
module.
>
> Stay tuned. ARISS promises to pass along word of progress as it happens.

Hi Frank.

The way I see it, it's a question of interpretation and intent.
For example...

If someone said that they are going to kill Superman, it is clearly not a
threat to a person... he is a totally fictional charater.

However, if someone on this newsgroup said that they was going to find
"Sparky" and kill him... I would consider that as a threat on the person
known to use that nicname - you.
Sure, they may not know where you are, but can you be sure that they will
not find out? If somebody is determined enough, they may just find out.
A little piece of info here, a little bit there... it can add up.

"Sparky" may not be your real name, but you are a real person.
When someone is only known to us as "Twistedhed", then how would you expect
someone to threaten him, except by using that name?

Brainbuster.

Maybe not as obscure as you may think.
People only need to be doing a Google search, and any newsgroup posts can
appear in the list of links.

While some of the things said and placed on Web pages should not be a worry,
accusations of crimes that are as hated as child abuse can cause serious
problems.
If it is not true, such things are not funny and can only serve as a
smokescreen for the real offenders.

Regards,

Peter.

While I agree with your right to speak your mind, I think that he is trying
to express an opinion that the page design sucks out loud.
As for the home page, telling people to get a real browser :~)
It doesn't seem to like IE4, which is what I mainly use at the moment. I
sometimes use OB1, as some Google search functions seem to crash the whole
system when using IE.

>>from "keyclowns" about me speaking my mind... not even from Twist.
>
>meaning, he is the queen of the keyclowns and if he doesn't complain
>then it must be ok?

What must be OK... me speaking my mind?
So, who do you think has the right to speak their mind...
1. Just you.
2. You and anyone who agrees with you.
3. Any "akc".
4. Any "akc" and his socko.
5. Any newsgroup Troll.
6 Anyone.

> wrong, dickbreath.

I see that you still have to resort to the usual childish insults.
And there have been suggestions that "Twisty" is a child... they need to
take a closer look at your attitude.
Strange how it matches the attitude of Georgina, and you jump to his
defence.
Does using another name allow you to reply to someone you have
"killfiled", without being a liar?

>bla bla bla

Feeling sheepish?

>still angry about Voob.

No... why should I, he seems to have gone.
I was just giving you a history lesson, as you seem to have selective vision
and memory. The facts may not suit you, but you really should take your
head out from the sand.

Are you still angry about "Voobie"?

>yes your five angry posts

Angry?
Look back at the angry insult you made in response before you accuse
other people.
Selective vision and memory.

>in response to my one

Which one of your posts?
If you are referring to the one on the 2nd Sept, I have only posted 4
messages to this group after you posted that... how can 5 be replies to
you?. If you are referring to other recent posts of your's, I have not
replied at all.

Do you not have eight fingers and two thumbs to use when counting?

> LOL that really is helping conserve bandwidth huh

Try counting the posts... who takes up the most bandwidth on this
group?
Look at the posts over the last 3 to 4 weeks... you will see that my posts
really are just a tiny part of the bandwidth, with some posting over 150
messages in the same time as I post about 24. Some use different names to
cover up their obsession, but their attitude and phrases give them away.

As I say, selective vision and memory.

>right so shut up already brummy

What was that you said about "angry" posts?
I would consider the above to show anger and despair... desperate to silence
any voices that show you for what you are.

Why don't you take some of your own advice?

How about the "George" character, try telling him to "shut up already".
That would be something, being told to shut up by his own socko.

From: Jim Hampton <aa2qa@frontiernet.net>
Message-ID: <Rhp6b.1229$Ge3.775@news02.roc.ny>
Source record: 165072

I shamelessly copied this from another post in another group. A question begs asking: why didn't the codeless techs renew? Perhaps there is no respect for something that is, essentially, given away? As far as age goes, things have changed considerably since the 60s and 70s. Often, married couples find that *both* have to work to enjoy a reasonable standard of living. Such was not the case 30 or 40 years ago. Between jobs and kids, often people won't have much time to pursue (and use) amateur radio licenses. Usually, after the kids are gone from the household, it is later in life that people have the time to become active amateurs. That aside, the question still is begging an answer: *why* didn't the codeless techs renew or upgrade?

Kind regards from Rochester, NY
Jim

****** post follows ******

Between February 14, 1991 and July 5, 1991, the Commission granted 1,925 new Technician class licenses under the no-code provisions. A couple of guys have done research which shows that 1,880 of those licenses have not been renewed or upgraded to a higher class license and are beyond the two year grace period. That equates to a retention rate of only 2.3%.
****** end of post ******

I am certain beyond a doubt whatsoever, no one hammie or upperclassmen for that matter would give a rats azz if barefoot DXers employ the unused and abandoned 11 meter frequencies above 40. Yet,,,,,there exists a certain core of pedophialic lid-types that construe a slight overlooking of minor rules as capitol crime. As prime example Frankie,,Davie Hall, WA3MOJ, KC8LDO,Hypocrite N3CJCV,,,,and the remainder of lid posse infer by proxy vote and mental intrusion on my thoughts that there is NO excuse for breaking the law pertaining to the airwaves....according to Hall himself, and Frankenstien,,,to whom communication deficits abound....amends to condone this type behavior he commits in a wanton and willful act of pedophilia-like nature...hmmmm,,,but the same ego-wracked penitents have a problem with 11 meter DX and freebanding. Hyuk! Furthermore,,,this Voob-named loose kennel of lid-induced guardians of federal law-upholders proffer to make inquiries of another man's underwear, shooting cbers, and insults about molesting children. Proof is what these wet faced ARRL Lids cry for,,,,and here I proffer only the truth as evidence of my sincerity,,,,

Found a Shakespeare "The Fortress" Radio at a yard sale this morning.
Can anyone tell me anything about it as to year of manufacture, were
they any good. etc.?

Thanks,

Dave

anyone care to share experiences on this antenna

i've been unable to tune it to resonance, without the impedance being rather high, at about 90 ohms. mounting dosen't seem to change things, other than small variations in the whip length.

"Jim Hampton" <aa2qa@frontiernet.net> wrote in
news:Rhp6b.1229$Ge3.775@news02.roc.ny:

> I shamelessly copied this from another post in another group. A
> question begs asking: why didn't the codeless techs renew? Perhaps
> there is no respect for something that is, essentially, given away?

One of my customer's helpdesk techs in the IT department got his nocode
Tech a few years ago. He was kind of pressured into it by his uncle. He
studied, easily passed the test and bought a Kenwood 2M HT of some sort.
He quickly lost interest.

Chew on this theory: Amatuers love their hobby and just plain love radio.
They don't NEED to convince themselves that their hobby has some sort of
utilitarian purpose (i.e. "What's is good for?"). They want others to
share their passion. To get others started, they suggest taking a simple
test that just about anybody can pass. The hope is, this will wet the
budding amatuers palatte and leave him wanting a little more. Eventualy
they hope, he will pass the code test and at least become a General.

The budding amatuer gets his ticket. Months later, he begins to wonder
why he's going to all this trouble just to talk to people. "Why not just
pick up the phone? Why not chat with people all over the world using the
internet?" and so on.

See, he sees ham radio as a communication tool, which it certainly is.
The problem is, he doesn't have a fundamental love for radio. If the goal
is simply to meet people and chat with them, there are many alternatives
that work just fine with out all the bother. So they lose interest.

Consider this analogy: I like motorcycles. I own a built-from-the-ground-
up one-off custom softail. It's cool. Some folks dig it, some folks
don't. If the purpose of getting a motorcycle is purely utility, i.e.
great gas mileage, easy parking, lane splitting <g>, etc, then one could
accomplish all of that with a $3000 used Jap bike of some sort. Of those
that already own a motorcyle of the sport variety, some may scoff at my
ride. "My such-and-such is faster, handles better, get's better mileage,
brakes better, is more reliable and costs less than half as much".
They're right, too. They have different expactations. I might reply with
"Point taken. Mine gets me laid." Different expactations :)

Or how about this: My friend and I both own GPS receivers. He uses his to
go geocaching (a pointless activity who's appeal escapes me) and I use
mine while I'm backpacking. He LOVES the technology, knows all about how
everything works, discusses map datums... I just want to find my way out
of the woods.

As to the repect given to a license that is practically given away, I have this to say: You can make the test questions as difficult as you want. Shoot, throw in some neat 3rd year calculus or number theory. None of it matters as long as the FCC continues to make the entire question pool (and answers) available. It has always amazed me that they did this. I'm in the middle of updating a few certs and obtaining a few new ones (all networking/IP Telephony related). If I had the answers available, what would that say about my certification? It wouldn't prove a damn thing. It would render the cert worthless.

One more things bears mentioning: In my line of work, exclusionary tests that separate the men from the boys are welcomed. Right or wrong, certain customers won't even let us touch their network unless we employ x number of engineers with certain difficult to obtain certifications. This is good, as it gives us a huge leg up on the competition in the area. Amatuer radio is different. It's a hobby. If the goal is to attract as many people to the hobby as possible I see two requirements to meet this goal:

1) Don't go overboard WRT the difficulty of the tests.
2) Inspire prospective amateurs by fostering a love for radio itself in all it's forms as opposed to telling them that they can talk to astronauts, send faxes, surf the internet, talk to BabuBabu in Zimbabwae, etc.

After all, who among us hasn't had difficulty in explaining why we love CB to cynical co-workers/friends/family? I for one don't like it simply because it serves some useful purpose. I just like it 'cause...it's CB, man! :)

Comments welcome.

FWIW

Since KG6AOH is supposed to be a broadcast engineer,
(incidently that only requires you to be hired by a station
owner, not have any special knowledge), he should have at
least used standard representation of the graphs and
information. While I'm sure his data is 'correct', it is
also misleading. After wadding through all the opinion and
nonsense, the difference between using a ground plane with
the Imax and not using one amounts to less than 2dbi. A
difference of 2 dbi can't be seen on a meter or heard by ear.
If you want to waste your money on a groundplane kit, be my
guest. I'd rather spend it on gumdrops and beer...

Yes you have two problems. I can't imagine the Arizona summer killed your antenna. It's hot, but it isn't the surface of Mercury. Borrow or buy an MFJ 259/259B antenna analyzer and check the resonant frequency of the antenna, and make the appropriate adjustments. Do this when the antenna is located where it is normally used. If you have it stuck on top of your radio, and I can think of a few reasons not to do that, then check it there. If it is on top of the car, check it there. The readings will be different every time you move it.

Unscrew your coil from the base and check for continuity. Check the coax base, then check the coil.I just found out last night that there is a dead short in the coil on mine. If that's the case you need to replace the coil. I went through 2 PL-289 ends thinking it was my soldering skills until I checked it with a multimeter. Let us know what you come up with!

Glad I missed it, a friend of mine who I worked with when I was
helping out up there sent me a cd he made as a tribute to those who
lost their lives, pictures and video clips set to music. I can't watch
the damn thing. And to top it all off, I used to love listening to
bagpipes, but after all the funerals I attended in NYC , bagpipes
especially "amazing grace" tear me up.

Ok, I never use measurements so it's not going to be exact.
and I use absolutely no chili powder or canned items.

I usually make huge batches so I'll try to adjust down (from 20 lbs.
of meat to a more family oriented size)

Start with 2 pounds of italian sausage and 2 pounds of ground beef.
put them in a iron skillet with 2 large fresh chopped onions, 2 cloves
of fresh crushed garlic, fresh green bell peppers diced, fresh
jalapeno peppers dices, fresh thai chili peppers diced. Cooking the
peppers, onions, and garlic together with the meat brings out the
flavors. When the meat is just about completely cooked I pour in about
2 ounces of jack daniels, the alcohol cooks off but leaves a good
flavor.

While the meat is cooking I have a stock pot going at a slow simmer
with the beans (I use a combination of pinto, black, and kidney beans,
there were dried beans that I soaked and cooked) tomato sauce, and
diced tomatoes.

When the meat is completely cooked I put the contents from the skillet
into the stock pot, and as a finishing touch I put just a pinch of
brown sugar and shave just a bit of cinnamon, some sweet to go with
the heat gives it that extra touch.

You'll have to experiment with the ammount of peppers to use depending
on how spicy you like your chili.

I slow cook mine for about 3 days, I like it thick.

Ya, busting that huge page up into a few smaller ones would make it less
tiresome to read.

I like the "More proof that he pope is a joke.." line, mostly because it
rhymes. Reminds me of the Black Sabbath tune "After Forever", in which Ozzy
sings:

"When you think about death do you lose your breath or do you keep your
cool?

Would you like to see the Pope on the end of a rope - do you think he's a
fool?"

Hee Hee. Man, I'm in the mood for some Sabbath all of a sudden.

Would anyone be so kind to e-mail me the modifications for CB radios:
General Electric Model: 3-5825A Mobile unit.
Royce 639 Mobile Unit and and Royce 642 Homebase.

I need the mods for extra channels like 27.555 ad if possible to put
a 5Kc slide on the clarifieer.

If possible also a copy of the circuit boards pse....

Thanks

Alan,

You make good points; yes, it is love of radio that keeps the renewals coming. You're right about the co-workers. I used to take the HT once in a while to work for something to do during lunch at perhaps 1:00 AM. One time, the telephones went out in the company. Why, I have no idea. Folks were scrambling to borrow cell phones and I couldn't resist. Punched into the autopatch and placed a call. Hehe ... but, of course, if there isn't some underlying interest in communications, there is a fair likelihood that a new licensee will not renew his/her ticket. There are certain circumstances that the radio will serve better than a cell phone; if you need communications between several folks at once, this becomes quite a feat with cell phones. I believe this was discovered when one organized run tried replacing hams with cell phone users. They quickly discover that they can't maintain constant communications between all users. They have to place call after call. Also, the repeaters are designed (in height, antenna gain, power) to allow HTs to reliably communicate for 20 miles or more to the repeater. Cell phones depend upon a lot of towers and there are areas with spotty communications.

As far as being CB, nothing could be further from the truth. Try and maintain solid 24/7 coverage for 50 or 100 miles in any direction with a stock rig. Try and maintain even 15 miles of reliable communications with a stock rig. Won't happen (except, perhaps, in Alaska or North Dakota, depending upon local terrain). I won't get into television or other modes since I suspect you planted a hook on that comment :)

As far as testing goes, I, for one, don't want to make it exceedingly difficult to pass an exam, but I agree that publishing questions/answers used in the pool can delude some folks into thinking they know more than they actually do.

You make some good points, however, and I appreciated them.

73 from Rochester, NY
Jim

Oops. My comments must've come out wrong. I didn't mean to imply that the two radio services were the same. You're right, they're very different. When I said "It's CB man!" I meant that as a reply to a person who asks me "Why do you like CB so much?". It's hard to answer, so I usually just say "'Cause it's CB, that's why". Lousy answer, I know. Maybe the phrase "If I had to explain it, you wouldn't understand" would be a more appropriate answer to my friends inquiry.

CB is certainly not ham radio, and one is not better than the other. There. Confusion cleared. :)

Hey, say a prayer for your local Buell-powered neighboor while you're out
riding! I can't ride until my bike gets out of the shop, probably today or
tommorow.

FOR SALE- 4000 VAC with a center tap- 2.1 amps CCS, 175lbs. This transformer is very big and has alot of duty cycle. It was removed from a 5KW HF Jammer used by the military. It has multiple taps from 208VAC to 240VAC so voltage can be changed + or - a couple hundred volts to suit your needs. It also has a center tap. $300- It weighs 175lbs so pick up near Philly is required. I will be at the DVRA Hamfest in Jersey next week so I can meet someone there with it also. Thanks for looking,
Jim

have to ask keith but is it jar tomato sauce or home brew? coming from a
heavily italian background (cant tell by my surname eh?) it does make
a difference what type of 'gravy' is used. mighty tasty recipe you have...

Just remember what goes around comes around. You
jam somebody else, then they find out who and do
the same to you. Its people like you that made 11m
the mess that it is. If you don't like what's
going on on the air then report it to the FCC
field office, or now more recently to your local
police. The local PD now has the power to
investigates cases of illegal CB operations and
take action against the operators.

Alan,

You got me on that one :)
How many times has that happened .....
Usually, I now simply avoid the issue at work and simply say "let's grab a cup of coffee" LOL
BTW, am looking forward to going back to work. I dodged the bullet with 3 1/2 weeks to spare. I was off for a week (with pay :))

Wrong...

The Wilson antennas have a dead short to DC in the coil, and they're SUPPOSED to.. AT RF, the impedance is close to 50 ohms. It's a hard concept to wrap your head around, but a short at DC in a tapped coil matching network is perfectly normal. You do NOT need to replace your coil.

|
| Keith, it sounds really good.....but can it really be chili without chili
| powder?
|
|

chili powder is ground up dried chili peppers. I prefer the taste of fresh ingrediants. Jalapeno peppers are a chili pepper, so is the thai chili, so I use fresh peppers, and it tastes great.

Leland,
I posted asking for a low-power CB jammer schematic - actually here is a quote:

>> I am interested in "jamming" reception on my
>property only, so the "jamming
>> device" needs to be really low power - only
>capable of "jamming" an area about
>> half the size of a 'small' city block.

Your reply to me asking about a device capable of only jamming signals on my
own property is WHAT GOES AROUND COMES AROUND?
What does this mean? That after I jam myself I might get mad at myself and jam
myself?
I am willing to take that chance!

Thanks for your insightful advice though Leland!

I would much rather have someone jam me than pin my coax. I like to think that other people feel the same way.
To me trying to jam someone instead of potentially costing them a lot of money in repairs is actually being rather nice.

Plus he missed the fact that the post he was replying to was asking how to jam CB signals on my own property! I am afraid under these circumstances his veiled threat 'what goes around comes around' holds no water - as I happen to know that I will not retaliate against myself.

ASSuming for a second that I did not know myself as well as I do and I in fact did end up jamming myself back as a sort of revenge - it wouldn't really irritate me as I had started it in the first place and deserved to be jammed by myself.
I mean - what goes around comes around, right Leland?

>www.copper.com,

If he wants a dealer more local, there are some in the UK... even one I know of in Scotland.
On the "CitizensBand.co.uk" UK CB website, there is a dealer and club database, with search function...
http://www.citizensband.co.uk/

You can search by name, town, county, postcode, etc.
Two of the biggest dealers in the UK also do mail order... Knights and Truck King. I have dealt with both without problems.

He could also try the UK CB newsgroup "uk.rec.radio.cb". I believe that there is at least on person on there from Scotland, who may know more local dealers, clubs, or even CBers who may help with fitting it up.

Regards,

Peter.

If he wants a dealer more local, there are some in the UK... even one I know of in Scotland.
On the "CitizensBand.co.uk" UK CB website, there is a dealer and club database, with search function...
http://www.citizensband.co.uk/

You can search by name, town, county, postcode, etc.
Two of the biggest dealers in the UK also do mail order... Knights and Truck King. I have dealt with both without problems.

He could also try the UK CB newsgroup "uk.rec.radio.cb". I believe that there is at least on person on there from Scotland, who may know more local dealers, clubs, or even CBers who may help with fitting it up.

I doubt if they would see it the same way. Have you heard how p*ss*d off CBers can get at being "keyed over" or jammed? You also suggest TV blocking... have you ever had to deal with a woman who has had to miss her favourite soap opera?

>Plus he missed the fact that the post he was replying to was asking how to
jam
>CB signals on my own property! I am afraid under these circumstances his
>veiled threat 'what goes around comes around' holds no water - as I happen
to
>know that I will not retaliate against myself.

I don't get it... are you actually trying to block signals from your own receivers?
You would be blocking signals with another, stronger signal... so you are making the receivers useless while it is on.
I fail to see the point... unless, although you own the property, someone else is involved in some way. If it involves a second person in any way, they could decide to either report it or do the same back to you.

There is another problem. To be sure to block signals fully, you need to create a signal stronger than any being received. You cannot fully block signals in a selected area without some signal going beyond that area. The signal cannot just travel so far, then stop dead... although the CB DX rule seems to suggest that someone thought they could.
Unless you have plenty of land around the area being blocked, you could easily interfere with people outside that area being blocked.

>ASSuming for a second that I did not know myself as well as I do and I in
fact
>did end up jamming myself back as a sort of revenge - it wouldn't really
>irritate me as I had started it in the first place and deserved to be

Exactly! There can be no expectation of privacy or the protection that
comes from it, due to the "open" nature of unencrypted radio
transmissions. It's no more private than CB radio.

> > >But some people's stupidity, are other people's entertainment..... ;-)

>
> >scanner isn't.
>
> Using a scanner to listen to phones on the old 46/49 analog band is not
> illegal. You are confusing it with cell reception, which is illegal.

Right. And the only reason that listening to cellular has been reclassified as illegal, came as a result of powerful lobbies by the cellular companies. At the time of the ECPA, digital technology was not quite "there" yet, and the cell companies die not have a technological means to prevent people from listening. So they lobbied the FCC, to remove the cell "chunk" from the 800 - 900 Mhz bands included with most scanners. Since this frequency range was no longer considered a "common" radio band, it could therefore be argued that listening to it, could be viewed as deliberate eavesdropping.

But as far as anything else, if you can receive it, you can listen to it. The only stipulation (And the only way that the law can prove you actually did it, other than catching you in the act) is that you can't devulge any specific information that you heard, or use it to your advantage.

> renew or upgrade?

These are good questions. The answers are probably more dynamic that
what a single answer could provide. Things like the internet, cell
phones, computers in general, and more demanding lifestyles are all
likely factors in why ham (and CB) radio have lost much of the appeal
that it once held. Someone growing up with the internet today, with IRC,
IM, and real time audio (and video!) chatting, would probably find
analog radio to be antiquated. The people who still enjoy radio for the
most part, are of the age, where radio was a significant influence on
their lives, either ham, CB or broadcast.

It's not going to get any better. As technology advances, certain older
forms become relegated to nostalgia status, and then eliminated
altogether.

If ham radio is to survive, it needs to become in sync with current
technologies. There will always be a need for a wireless communication
service (or services). What is different, is the content that is carried
on the RF.

Gee Davie,,the more you blow smoke out your ass, the more ignorant you become, but I don't mind educating lids like yourself and Gillinad,,,now, before you react and go to pieces, try educating yourself on the law of communication,,,you know,,,the thing in which you hold a license but still seem unable to learn anything concerning it.....

_
9th Circuit Decides Wiretap Act Case
8/14.
  The U.S. Court of Appeals (9thCir) issued its opinion [PDF] in Price v. Turner, a civil suit alleging violation of the Wiretap Act in connection with the monitoring of cordless phone conversations. However, since the events giving rise to this case occurred ten years ago, this appeal was decided according to state of federal law prior to the 1994 amendments to the Wiretap Act.
Frank Turner used a radio scanner to listen to and record conversations of his neighbors who used cordless telephones. These phones used analog radio signals at fixed frequencies, and hence, were easy to monitor. He heard discussions of criminal activities. Turner also informed the El Dorado County Sheriff's Department, which told him to continue, and provided him assistance. All of the intercepted phone communications at issue in this case took place prior to the 1994 amendments to the Wiretap Act. One person whose conversations he monitored was Leora Price.
Price filed a civil complaint against Frank Turner and El Dorado County alleging, among other things, violation of the Wiretap Act, invasion of privacy, and a civil rights claim under 42 U.S.C. § 1983. The District Court granted summary judgment to defendants on all of Price's federal claims. Price appealed.
The Appeals Court wrote that "At the time of its original enactment in 1968, the Wiretap Act did not expressly refer to the monitoring of radio transmissions. When Congress enlarged the Act's coverage in 1986, Congress explicitly excepted protection for the 'radio portion of a cordless telephone communication.' ... It was not until 1994 that Congress amended the Act to prohibit the interception of cordless telephone communications." The Appeals Court affirmed.

_
Gee.....(caw.......caw........caw)
Delivered-To: twistedhed@webtv.net From: twistedhed@webtv.net (Twistedhed) Date: Sun, Sep 7, 2003, 8:17pm To: twistedhed@webtv.net Subject: Cordless Phone law
Cordless Phone Conversations Can Be Private. Eavesdropping Can Be Prosecuted!

_

Gee Davie-son,,,and here we have one but of MANY examples of a state upholding the federal law. There's more but this is enough t illustrate you, a hammie operator, know jack about communication law in the US as it pertains to your illegal behavior that constitutes a felony that you and Gilliland claim is legal.

_
The Michigan Supreme Court held this year that cordless phone conversations may be considered "private conversations." In People v. Stone, the Court approved a criminal prosecution against a husband who had intercepted and recorded the cordless phone conversations of his estranged wife. The Court decided, in a unanimous decision, that even though a person may know that technology makes it possible to overhear cordless phone conversations, that person can also presume that others will obey the criminal law.
The Court ruled that such interception is a violation of the Michigan eavesdropping statutes, and is also a felony under federal law. A person therefore has what is known as a "reasonable expectation of privacy" as to such communications. To what extent a "reasonable expectation of privacy" may apply to a given case is a question of fact. Cordless telephones apply; party lines do not. The inquiring husband in Stone, therefore, was properly prosecuted under Michigan law.

-
Gee, let's see again an active communication's law firm interpretation:

>"and is also a felony under federal law. "

Hmmm,,,but we should believe Frankie and Hall, NOT the lawyers who have been involved with such cases.
So, we now have Hall, who admitted to committing this FELONY, and Gillinad who claims it isn't illegal to intentionally monitor a private phone conversation.
Keep entertaining us, Frankie,, with the felonious N3CVJ..
You're quite welcome.
You guys really shouldn't shoot your mouths off about things you know nothing of,,,like communication and communication law.

> cordless telephone communication.' ... It was not until 1994 that
> Congress amended the Act to prohibit the interception of cordless
> telephone communications." The Appeals Court affirmed.

Maybe you should read the things you cut and paste before offering them
up as a some sort of confirmation for your deficits in comprehension.
You should note that this case was thrown out because at the time of the
alleged infraction, that the defendant's actions were NOT illegal. Since
in my own case, the conversations which I overheard, that you are so
fond of convoluting, occured in 1984, which is also before the passage
of the ECPA, therfore like in the case above, I am guilty of nothing
illegal. Also note that wiretap laws vary from state to state, and
what's true in one state, may not be in another.

Legislation which attempts to give the illusion of the expectation of
privacy over unencrypted wireless phones, is equally ludicrious, as it

is basically unenforcable, unless one reveals the content that they intercepted. The only true expectation of privacy comes with a technological solution to the problem.

Mr. Randi W. Owen
902 W Veterans Street
Tomah, WI 54660

Re: Amateur license N9UOM Application for Renewal;
Non-Certified Radio Equipment Marketing Case #2002-312
I was just wondering--hasn't this guy been cited before. No biggie, just curious.

Jerry

Dear Mr. Owen:

Your application for renewal of your Amateur Radio license, filed July 14, 2003, has been forwarded to this office for review.

On June 18, 2002 the Commission notified you that it appeared, based on Internet Web site www.tomah.com/n9uom/magnum.htm that through Roper Electronics you are marketing non-certified CB transceivers (such as the Connex model 3900) and non-certified HF linear amplifiers in violation of the Communications Act of 1934, as amended, and Commission rules. Information before the Commission indicates that you are the owner of Roper Electronics.

The June 2002 letter advised you that Section 302(b) of the Communications Act provides that "[n]o person shall manufacture, sell, import, offer for sale or ship devices or home electronic equipment and systems, or use devices, which fail to comply with regulations promulgated pursuant to this section". Section 2.803(a)(1) of the rules provides that "...no person shall sell or lease, or offer for sale or lease (including advertising for sale or lease), or import, ship or distribute for the purpose of selling or leasing or offering for sale or lease, any radio frequency device unless: (1) In the case of a device subject to certification, such device has been authorized by the Commission in accordance with the rules in this chapter and is properly identified and labeled..."

We requested information regarding the marketing of such devices from you pursuant to Section 308(b) of the Communications Act of 1934, as amended, and advised you that violations of the Communications Act or the Commission's rules may subject you to monetary forfeiture of up to $11,000 for each such violation or each day of continuing violation, seizure of equipment through in rem forfeiture action, and criminal sanctions including imprisonment. Finally, the June letter notified you that the Commission may refer for criminal prosecution any violation of its equipment certification prohibitions; and it will initiate enforcement action against your Amateur

license, including revocation and suspension as well as monetary forfeiture. Your response to that letter was unspecific as to what actions you were taking to make certain that you were in compliance with our marketing rules.

In order to determine what action to take on your application, we need more information regarding the types of equipment you may be marketing and the certification numbers of any devices required to be certified. In accordance with Section 308(b) of the Communications Act, you are requested to furnish this information within 20 days. Failure to respond will result in the dismissal of your application. We are required to advise you that a willfully false or misleading response to a letter of this type has been made punishable by Congress.

That kind of "jamming" requires the insertion of
the
keyboard in the victim's mouth, or using it to
bust the fingers
thus precluding the victim from typing. 8-) Other
wise it doesn't
do a darn thing.

Radio waves don't stop at property lines, or
country borders etc. To do what you want with any

degree of success without jamming somebody else by accident requires a rather elaborate antenna system, and RF power control, that I seriously doubt anybody has, or can afford, outside of a major government agency.

> myself?
> I am willing to take that chance!

You my be willing to take a chance but I doubt
that you're going to be successful in keeping the
jamming signal totally confined to your property.
And that's where the problem starts, and the point
I want to make. People along side of your
property, or driving by, may experience the
effects of your jamming and take action in kind
against you. Also don't forget that when the skip
is in it doesn't take much power to span miles
across country. Major government agencies have
tried to jam signals from the likes of VOA etc in
Cuba, the old USSR etc. The side effects have been
that countries adjacent to the ones doing the
jamming also experienced jamming to their local
signals as well. So if you're going to jam. well
you had better be willing to take the heat from
the unintentional jamming that will occur as well.
And of course jamming isn't legal either.

> Thanks for your insightful advice though Leland!

Just some points for you to think about is all.

I feel the same about some of the linked pages, those pages take a while to download and display. They could have had one or two pictures per page, with a link to the next part of the story.

>I like the "More proof that he pope is a joke.." line, mostly because it
>rhymes.

I didn't get too far down it, the links just took too long.
Personally, I would have thought that the recent revelations would have been enough to shake anyone's faith in the Catholic church.

It has been known for some time that some priests and vicars were shirt-lifters and some were into litte boys - some possibly using their position to gain trust. But, to find out that the Catholic church has long known about the child abuse... and their policy has been to cover it up, I would expect many Catholics to re-consider their position.

Regards,

Peter.

My very angelic looking 7 year old daughter has just picked up a new insult
to use at people...
Dickweed.

My 11 year old Son - who is quite tall for his age and built like a
tank - will not get involved in fights, yet my daughter - who is rather
small for her age and lightweight - will punch someone's lights out
just for looking at her the wrong way.

It seems that she has given children as old as my Son some serious
lip, and even the odd beating. They don't mess with her, and the
teachers at school just see her as a quiet little angel.
If only they knew.

Regards,

Peter.

As much as it pains me I am ashamed of the behavior in rec.radio.cb. Hams like N3CVJ and WA3MOJ are ruining it for all of us. Hall has been geting his cyber ass kicked by twistedhed and how. George is having kaniption fits. Frank is Frank a trolls troll. Not part of the solution is part of the problem. I agree with twist here. He is right on the money these guys have deficits. Hey Twist drop the freeband and you can be a positive force against the scum that ruin radio. Theres one in every crowd. They just happen to like you.

Fifty bucks plus shipping is almost what they cost brand new wholesale, give or take 10 or 15 bucks. An "as-is" older model may get you 50 bucks total. Try yahoo auctions. The auctions usually bring better prices than merely listing the item on a ng. Good luck.

Nothing admirable. Davie has issues. He's a hypocrite and a liar and has personal problems..he chose me as his major malfunction for all that is wrong with his pathetic life.

> George is having

>kaniption fits. Frank is Frank a trolls troll.

Yea,,,,Frankiestein Gilliland's motor mouth running at a million miles per hour claiming how legal it is to commit what the feds call a "felony". See, Frankie talks out his ass and says things he wishes were true, same with Hall.
They attack the messenger when the truth is shown by a credible source such as the archives of congress or a law firm who was involved in crafting the laws.
When it comes down to the wire,,,well, you see it as the majority of well intentioned radio ops do.

>part of the solution is part of the problem. I

>agree with twist here.

Only I didn't say that.,,but it's good to see folks recognize the fecal matter amongst us.

>He is right on the money these guys have

>deficits.

Yea,,,,but you forgot Lelnad...LOL.

>Hey Twist drop the freeband and you can be a
>positive force against the scum that ruin radio.
>Theres one in every crowd. They just happen

>to like you.

I dont sweat the smal stuff, never did. Freeband is but a small part of my radio endeavors.
I have no problem illustrating the ng punch-clowns for their deficits and will continue to do so at every opportunity. Hall can't comprehend the act of Congress relating to the illegal monitoring of cordless phones governs all states,,he somehow misinterprets that individual states need not abide by federal law and are free to enforce it say they see fit. So goes the hammie upperclassman who admits listening to children talk of sex for his personal pleasure, broke more laws than anyone he has ever accused in his insolent life, lies about everything, and provided the FCC with an improper physical address (as did Lelnad C. Scott) in violation of their law regarding amateur operators.

Mid-late seventies vintage. Nothing special that I recall. Was a Shakespere
23 mobile (cybernet?) slapped in a heavy duty cabinet. Rare radio that
didn't sell well.

I am. That "Twistedhed Humor" site needs a good
comic strip staring, of course, a character called
"Twisted-Headed-Troll". A short green trollish
figure with its head on backwards. The character
stumbles around because he can't understand why he
only sees things going, and not head on when they
smack him square in the back of the head. Could be
real funny you know. The site's owner may even let
you use your "professional" writing skills to come
up with the script. Nothing works better than
first hand experience from the resident expert
Troll and self-professed professional writer, you.
This would be a good career enhancing experience
for you Twirt. Something you can be proud to put
on your resume.

Whatcha mean? This NG sounds almost like I'm listening on my CB radio.
I thought it's all just typical CB'er banter.

3733. FREE CB CRYSTAL MIXING CHARTS

Newsgroup: rec.radio.cb
Date: 2003-09-10 04:01:19 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <4g8tlvs7u7u7c4b6pcddc4knrkt45hft1o@4ax.com>
Source record: 165267

We've now added all our crystal charts for free download/printing
(PDF) on our site. These 36 charts cover about 95% of all American
mobile & base CB models, and show exactly which crystal(s) affects
which mode or channel. Very useful for troubleshooting "dead
channels" symptom, or for modification to 10M or other freqs.

Check 'em out at: www.cbcintl.com/xtals/xtals.htm

We specialize in CB books, plans, kits, and high-performance CB
accessories. Please visit our Web site to see all those "goodies" you
just can't find anywhere else!

www.cbcintl.com

You can also download our complete CB catalog, or just the Order Form
from the home page. We've also got a new Email Order Form (for
VISA/MC) if you're in a hurry.

* *
In case you didn't already know...

Who are we? Since 1976 we've been the leading supplier of books,
plans, and kits just for CB radio. Do-it-yourself repairs and
modifications, 10-Meter Ham conversions, amplifiers, FM converters,
bleedover filters, adding new frequencies, etc. Secrets of how to
increase your power, range, and privacy.

For product questions or additional details
on what we offer, please email us directly at:

Ya, all of the images hosted on yahoo are dead. Some of the links work,
though. The ones that do are amusing. I particuarly like the top 5 most
wanted one. That gave me my chuckle for the day.

I hope he has thick skin. If he does, he should get a good laugh out of the
site. I know I did. Somebody spent ALOT of time on some of those...wow.

To the best of my knowledge, that started with "Beavis and Butthead". I
could be wrong. I recall first hearing 'dickweed' about the same time that
I discovered the cartoon. Either the cartoon took an existing insult and
made it popular, or Mike Judd conjured up a new one. Who knows?

There were a few others, including dill hole and ass munch. When Mike Judd
made "Office Space" (one of my all time favorite movies, BTW) he introduced
the world to "Ass clown". Heh.

"What is wrong with Michael Bolton? There is nothing wrong with that name"

"There WAS nothing wrong with that name, until that no-talent ass clown
started winning grammy's".

Blame it all on Mike Judd, I guess.

Oops. I need to learn to drink my coffee in the morning before I post anything. The links aren't dead per se, it's just that the site has exceeded it's bandwidth limit. It happened while I was browsing the site a few minutes ago.

It's times like this that I'm glad I own a webserver. I hate geocities. :)

Hey, here's an idea: maybe I could mirror some of the rec.radio.cb parody sites somewhere on my webserver. Hmmmm....

...then again the guy that co-manages that box with me has issues with pornographic material. It drives him nuts. Hmmm...Oh well. It was a nice idea there for a second.

apostle, a trollish monster disguised in the robes
of virtue, with delusions of Witches everywhere he
looks, must be stopped before he has a chance to
exercise his demented version of hate"

3746. Cobra 19XS no TX or RX

Newsgroup: rec.radio.cb
Date: 2003-09-11 03:18:06 UTC
From: Alan Strawinski <rec.radio.cb@strawinski.net>
Message-ID: <Xns93F2CE89ABCE6recradiocbstrawinski@216.168.3.44>
Source record: 165280

Ok guys, put on your thinking caps. This should be fun and a wonderful learning experience for alot of people, particuarly myself :)

I've got a Cobra 19XS that I've had for quite some time. It hasn't worked since it was given to me by my father. I thought it would be fun to try and get it working again for no other reason than "I've got nothing better to do". It'll be cool.

The radio lights up, but has no RX or TX. If you crank the volume, you can hear a very slight hissing sound with your ear up against an external speaker. REAL quiet. Attemping to transmit illuminates the TX light, but alas...no carrier. Connecting the RF siggen to the antenna terminal doesn't help. I'm having trouble tracing the signal back from the antenna based solely on the schematic I've obtained (purely a skill/experience issue).

I suspect there's a problem in the PLL synthesizer circuit, as a failure here would make the radio behave as observed. There could be other things wrong, I'm sure.

The only data I've been able to obtain on the radio thus far is a schematic from cbtricks.com. It's helpful, but I don't have the skills necessary to identify various circuits in the radio or determine proper test points based on the schematic alone. A service manual would be nice, but I don't have one. This is where some of you REAL techs might help me understand things a little better. I can't tell what voltages/frequencies/etc to examine at what points based soley on the schematic. Perhaps some of you can? I do have the data on the PLL (Sanyo LC7131).

I do have some nifty equipment available to help us troubleshoot this at this very moment on my bench:

1.) 8 digit benchtop frequency counter (10Hz - 2.4Ghz)
2.) BK Precision RF Signal Generator model 2005 (100KHz - 150MHz, Internal 1KHz audio gen, provisions for external audio gen, variable RF and Mod levels, provisions for external FREQ. counter). Checked this with my freq counter, and it's suprisingly stable.
3.) Fluke 8060A DVM. (It's old, but it works!)
4.) Soldering goodies.

The schematic is available here:
http://www.cbtricks.com/Cobra/19xs/cobra_19xs_sch.pdf

I don't have a scope available at the moment, though I'll be purchasing one shortly.

If I NEED any additional equipment to get this radio working and/or provide feedback to your questions I'll purchase it. I want this to be a fun learning experience.

That being said, let's start troubleshooting! This is what this group is all about. :)

> Check the crystal and check for cold solders in the VCO area.
>

For the crystal: How do I check that exactly? Can I do it in circuit, or do I need to pull it out? Either way, how would I go about checking it? My Freq counter has a spot to plug crystals in, but the leads on the crystal are going to be too short to plug in.

I checked the data for the LC7131 PLL, and it shows the Reference Oscillator Input (RI) as pin 11. Since this is where the crystal is connected, I assume that probing it with the freq counter SHOULD show a 10.24 MHz signal. I get nothing. Does this mean that the crystal has failed, or am I checking it incorrectly?

I did do some other checks. The Reference Oscillator Output (RO, pin 12) shows nada as well.

I can't tell where the VCO area is by looking at the schematic. Perhaps you can? :)

I looked over the PCB anyway, and couldn't find any cold solder joints. They look nice and shiny to me.

Fifty bucks plus shipping is almost what they cost brand new wholesale,
give or take 10 or 15 bucks. An "as-is" older model may get you 50 bucks
total. Try yahoo auctions. The auctions usually bring better prices than
merely listing the item on a ng. Good luck.

>50 bucks is a steal

Maybe when you see the thing work in front of you it's worth 50 bucks.

>.....let the guy sell it for what he wants too

>   Thatz-me-JP

Pointing him to yahoo auctions will more than likely net him more than
the 50, plus it gives both parties assurances not attainable here.
Buying from an unknown on a ng isn't the wisest thing to do.

Oh yea,,,,,Stallone's ugly mugg was all over the pre-game show between the Philthadelphia "Iggles" and the Super Bowl Champs,,,he was in the end zone trying to get the fans rocked....instead, they had a cleaning...of their clock..LOL. Tidibit: No team that was shut-out in their season opener has EVER won a superbowl.
Philly has a new master. Tampa not only closed down the Vet's stadium (last game played there) by handing the Iggles a loss and knocking them out of the run for the Superbowl, but opened their new stadium (first game played there) by shutting Philly out. Everyone is aware of the reputation of Philly Fans (Baaaad) and everyone is aware of team-Gruden (Good),,,in fact, he's the darling of the NFL.
Go Chucky!

Geez Keith, that recipe is almost identical to one I lifted straight out of "Easyriders" in the seventies. It's one recipe I won't let go, only the Easyriders recipe had a tad more hot (really freakin' hot) peppers and a little JD coupled with a can of beer. Do not pass gas around any open flames.

> You've just determined you have no 10.24 MHz. Make it oscillate and
> try it again. I toss Cobra 19's in the trash, working or not.

I tried something else. I probed pin 13 of the PLL (Vss, ground) and found 10.17MHz present. That seems odd to me. Why would I see 10.17MHz THERE of all places? And why is it 10.17MHz as opposed to 10.25MHz?

As far as making it oscillate goes, I tried injecting a 10.24MHz signal at the Reference Oscilator Input (RI) and got nothing. There isn't even a measurable output at the Reference Oscillator Output (RO) pin of the PLL while I'm injecting one at the RI pin. I would expect there to be one there, but I could be wrong.

I know that alot of people don't like Cobra 19's, but I still want to get this thing working. I'm not sure why people don't like them, they're perfectly fine radios. I don't want to give up.

Dear sir,
You may surprise to receive such letter from me, since I do not know you personally. I am Iwanna B Frito Yupgrade.
Voobed, the eldest son of Igotta Kry and Whywonchoo Lis'na mi, was recently laid to rest in the threads on rrcb.
I write you for was looking for reputable and reliable people to assist I with you for a very confidential money making opportunity. Such endeavor will cause I the transfer of a very large sum of money to anyone who can provide me with information on twistedhed including foreign recipients as yourself. I decide write you for this. My dead and late father is among the small clique of flamers and lids who wanted attempt rule rrcb. Deposed by Generalissimo
"Twiztid mzt di" for not acting swiftly and violently enough to rules said by Voobed, sympathy and oppositional support for twistedhed must be stopped at any cost.
Alleged sympathizers have defected from the Keystone party. Prior to our father's death, he was fortunate to have traveled your far away land to the town of Timz Budds Two and deposited the very smelly sum of several hundred thousand freeband radios with truck stops, golden screwdrivers, and cb hacks all over the country. The radios are now being held for inspection by cbers to purchase across the United States. Those not making the grade will be shipped aboard the very old and out of shape "USS Busch." These radios wil be allocated for the needy cbers who for their own sanity, claim only a hammie call, deny all use of cb, and live in rec.radio.cb
Such diversions will go to reduce the deficits suffered by many infinitely smaller countries and lands, affectionately nominated by Voobed.
Schools may be need erected to unlearn
years of oppression, rhetoric, hyperbole and suffering .
The old schools were closed when self-declared Emperors-for-Life of rrcb were
in charge and left to their own devices.
Freebanders and good ol boy cbers
introduced a new radio act, one that adversely affected such past recreation in their fascist controlled waters.
Such behavior resulted in rampant off-topic posting hysteria.
Sock-puppet mob action by the veterans of self-professed pschological wars. More than ten thousand posts from the former rulers in less than six months.
Heads of radio government from the west, The Prime Minister of the land, from the east: President Black Shadow, from the South: His Highness Lucky 13,,from the north: Still undercover by request,,,all uniting on the airways as always, overcoming posted conflicts with ease,

condemnation of evil by dropping the maul.
It is this current area of conflict which my relatives have unanimously voted to transfer father's wealth to the US. Upstream providers employ wonderful, trusting souls. As a family of business owners I trust you with our radios and hearts.
This transaction is risk-free for we must know the ARRL is our support and we are free to abuse it. For your assistance, we are offering 40% radios to you and great deal more for information on twistedhed. That is 60% my family 40% yours for doing nothing. You are part of problems or solutions only no other.
In close I demand you not use radios for subversive use but proper only. Information on Twistedhed must be certfied and credible, sender certifiable. Please act send now confirm interest. Send fax or email to

Little Feat are coming here soon...pity George isn't still live.

>They just don't look showroom after about 7

>years, but it still shines!

The secret is never use soap,,no matter, no how. Wax, but when it comes
to washing it, a soft, cotton cloth diaper and water only does wonders.
Dampen the corner and clean as needed,,,gently. If you stay out of the
mud and dab at it a little each day, the wax job will shine for a long
time. Do this only in shade ot after the sun goes down. I haven't waxed
mine since last year and you can still see yourself in the reflection.

I forgot more than you know about radios. Fact#1

> you have already made a fool out of yourself,

Your dilemma.
****
Not my dilema you have to live with it.

> the True Ham amplifiers that are sold on the market are certainly not
Class C bleed boxes

Who said they were? YOU are the only one reaching..
****
I said they are, so you go out and find a class C amp sold for amatuer radio
use then report back with the IMD figures, if you can even find one.

>. Ham amps are Biased ab1 which is much cleaner less distortion, less over
drive.

Point, besides the one on top of your head?
****
The point is your a joke when it comes to technical aspects of radio, I just
gave you the point and you failed to realize it
What is a properly tuned amp? Your trying to albeit not so good of comparing
a 11 meter splatter amp to a ham amp which is used on 10 meters. In reality
you try to say they will act the same when they won't the 11 meter amp will
cause more interference, known fact as eitner or another tech you trust
since you are clueless.

Did you forget you said this little tidbit?
"a properly tuned amp married to the right radio on eleven meter
or the freeband will do nothing that one on ten meter won't do,,period.

> So please nutcase don't talk about things you don't know.

Hmmmm. All I did was apply water, used a cloth to loosen the dirt, and
rinsed it off. Wax is applied with a wet terry cloth in a circular
motion to remove the rest of the dirt. (use a cleaner/wax) The main
portion of the haze is removed with a terry cloth and then polished
to a shine with the nice, soft fuzzy stuff on the inside of a sweatshirt.
You need to push REAL HARD. This method makes a swirl free shine IF you
stay in the shade. I add water to the rag when I add wax to keep it
from being a thick layer. If more wax is needed, repeat. Don't leave
the stuff on for more then 10 or 15 minutes or it gets too hard.

Never wipe your vehicle dry without washing as the grit will act like sandpaper.

Paper towels are made from wood and will scratch plastic and paint.

>wrong, I'm sure.

I would also go for that area.

First, check that the supply is getting to the PLL on pin 18. Regulator circuits have been known to go down.

Check the voltage going from the PLL to the VCO, and the VCO frequency. The voltage should change with the channels, but should usually remain between about 0v8 and 4v5.
If the frequencies and voltages are correct, then there is not a problem with the PLL.

If the voltage is high, the PLL is seeing a low VCO frequency. If the voltage is low, the PLL is seeing a high VCO frequency. If what it sees is correct, then the PLL is most likely working... has the VCO core been messed with?

If what it sees is not correct, first check the reference (10.24MHz). Also, check that the VCO signal is getting back to the PLL, on pin 19.

If the frequency is a standard bench one, with probe input, then it will most likely be good enough to test these signals without problems. The digital meter should be fine for the voltage readings, better than an analogue one.

If you are planning to get more involved in the tech side, the 'scope should prove very useful.

Regards,

Peter.

I believe that my daughter picked up "Dickweed" from one of the boys at
school, it is possible that he is exposed to such cartoons. She must have
only just picked it up, because she was calling me it all weekend.

I have seen the Bevis and Butthead film, but that's all. Cartoons seem to
be more for adults than children now. The Simpsons is really adult humour,
but the adult parts are usually done in such a way that children would not
even notice, they just wouldn't see the joke.

>happen again.

Only those at the top can ensure that "cover-ups" are not the church policy. Unless those who decided on or agreed such a policy are removed from the church, then it will certainly happen again.

With the present pressure for churches to embrace modern ways of life, and hold modern (man made) standards above the standards of christianity, it is doubtful if some of the main religions will kick out those who's ways of life and beliefs are incompatible with someone who is preaching and teaching the morals in the Bible.

Unless they are willing to do as the Bible says, and remove such people from the church, then public trust and belief could drop further. To stop the churches from doing their duty, people will try to claim that it is "unfair" to discriminate against some people, but the Bible says that they should, and are even helping such people by expelling them.
Even clubs discriminate, as they are for certain types of people. For example, can just anyone get into the Magic Circle? I don't hear people screaming that all clubs should be open to anyone.

Would you accept religious advice from someone who does not even follow the ways set out by their guide (The Bible), and may even believe that the religion (or even God) should change to suit him?
Would you be happy letting a child or Grandchild of yours be in the choir of a church known to allow or even cover up abuse?

>all faiths run through trials and come out stronger.
>sadly some zealots take it to an extreme...

Each religion seems to believe that their members will go to Heaven, while those outside their church will go to Hell. As I am sure Chuckie will agree, going to church makes no difference to whether someone will go to Heaven.
Going to church, giving yourself a label, or following other men will not get you to Heaven. People need to get past this labelling scheme, and see the real issue - who are they following, a priest, a vicar, the pope, Mary, or Jesus. If they are christians, then they should be following Jesus - no

other division or label is needed.

Following church leaders too closely is like driving too close to the car in front. You are fine as long as they know their way, are going where you want to go, and keep going in the same direction... but can you guarantee that? If they drive off a cliff, you will not see it until it's too late - and you follow them.

Regards,

Peter.

Got it back, still screwed up the drivers
door, he'll take care of that after I get the
rest done. Called around for a quote on
getting the seat reupholstered, fricken expensive! $350.00 to $500.00! I'm supplying the
covers
too! Needs a new carb, Tuffy center consol, new tires, front end alignment, heater hose's,
have
to put the molding on, roll bar,etc etc. So I'm going to step back from her
for a week and get some rest and relaxation instead.

Oh I'm not that bad, it just got shitty
last night when I drove it home for the
first time. I told the wife I was bringing
it home, she thought I meant it was done.
I wanted to be able to work on it straight

for a few hours instead of leaving the house
early every morning and working on it for
only an hour before work.
UGgggggggggghhhhhhhh.

If I may,

When I run across posts or threads that I don't like, I tend to ignore them. Since this is an umoderated newsgroup, there will always be people posting things others find offensive/inflammatory/OT/whatever.

A newsgroup is what you make of it. Take this one as an example: if the people who aren't discussing cb radio were to leave, the number of posts would drop dramatically. The group looks fantastic right now when posts/threads I don't like are ignored. Dare I say, it looks just like my version of a perfect rec.radio.cb. Why? Because I made it that way by selectively reading posts. It's easy. Your version of a perfect rec.radio.cb will look different than mine. The cool thing is that we can selectively read different threads, in effect having two different newsgroups in the minds of two different people. Neat, huh?

This has been a problem on USENET for ages. Any decent newsreader has the ability to ignore posts from people you don't like. If you don't like Twistedhed, just put him in your killfile. As far as your concerned, he won't exist. Again, ignore people/post/threads you don't like.

I personally don't use my killfile. I like the entertainment value. It's also facinating to observe the debating techniques of others. Some are good at it, some really suck at it. When I get bored, I occasionally analyze the merits of each argument in a debate and discuss them with people who don't even read this group. My brother loves a good excersize in logic and reasoning, regrdless of topic.

Just my 2 cents. Try it out and you might just notice an improvement in
the newsgroup.

Source record: 165382

From: radio@ptt.edu (Radioman)
  The secret is never use soap,,no matter, no how. Wax, but when it comes to washing it, a soft, cotton cloth diaper and water only does wonders. Dampen the corner and clean as needed,,,gently. If you stay out of the mud and dab at it a little each day, the wax job will shine for a long time. Do this only in shade ot after the sun goes down. I haven't waxed mine since last year and you can still see yourself in the reflection.

–
(Hmmmm. All I did was apply water, used a cloth to loosen the dirt, and rinsed it off. Wax is applied with a wet terry cloth in a circular motion to remove the rest of the dirt. (use a cleaner/wax) The main portion of the haze is removed with a terry cloth and then polished to a shine with the nice, soft fuzzy stuff on the inside of a sweatshirt. You need to push REAL HARD. This method makes a swirl free shine IF you stay in the shade. I add water to the rag when I add wax to keep it from being a thick layer. If more wax is needed, repeat. Don't leave the stuff on for more then 10 or 15 minutes or it gets too hard.
Never wipe your vehicle dry without washing as the grit will act like sandpaper.
Paper towels are made from wood and will scratch plastic and paint.)

–

Papertowels,,,,,yea, I learned that as a kid with a dirtbike. Brand new RM 125 back when Back when Roger DeCoster was in his prime racing Motor-Cross, I had a RM 125 that glistened in the sunlight with paper towel scratches.
Been trying to go do the jam thing but tourist season is in full swing and we just can't get away. Atlanta is as good as it's gonna get this fall. Still trying to plan for that New Years gig. Mopar mentioned Warren Zevon.....just bought "The Wind". Best stuff he ever did. "Disorder in the House" indeed. That jam band in the sky keeps getting bigger and better. Pity.

Yea,,you get upset realizing you know less than the lowly cber.
****
>I forgot more than you know about radios.

>Fact#1

--
It's only a fact when backed by credible verifiable posts. That you take
issue with my claim that a properly tuned amp and radio on eleven meter
will do nothing that one on ten will do, is testament to the part of
"knowledge" about radios you apparently forgot.

-
>you have already made a fool out of yourself,
Your dilemma.
****
>Not my dilema you have to live with it.

-
Only you are the one having difficulties "living" with others. Me, in
particular. You have issues,

-
>the True Ham amplifiers that are sold on the

>market are certainly not

>Class C bleed boxes

-
Who said they were? YOU are the only one reaching..
****
>I said they are,

Wasn't in the topic and it has nothing to do with my claim..period.

-
> so you go out and find a class C amp sold for

>amatuer radio use then report back with the

>IMD figures, if you can even find one.

There you go again mentioning a class "c" splatter box. Try again when
you can remain focused and on topic.

-

>. Ham amps are Biased ab1 which is much

>cleaner less distortion, less over drive.

Point, besides the one on top of your head?
****
>The point is your a joke when it comes to

>technical aspects of radio, I just gave you the

>point and you failed to realize it

No, you made no point other than illustrating the part of radio you
forgot.
–

>What is a properly tuned amp? Your trying to

>albeit not so good of comparing a 11 meter

>splatter amp to a ham amp which is used on

>10 meters.

Nope,,I did no such thing,,,YOU did.
–
>In reality you try to say they will act the same

>when they won't the 11 meter amp will cause

Again,,YOU mention an eleven meter amp. Whatever you mean by that term,
has nothing to do with my comment.
–
>more interference, known fact as eitner or

>another tech you trust since you are clueless.

Well, we certainly don't trust you, as Toll has put you in your place
more times than you can shake a stick at.,,illustrating yet MORE of that
"knowledge you lost and forgot.
–

>Did you forget you said this little tidbit? "a

>properly tuned amp married to the right radio

>on eleven meter or the freeband will do

>nothing that one on ten meter won't do,,period.
>So please nutcase don't talk about things you
>don't know.

As usual, you can not attack the topic,
It stands alone.
****
>I tore your topic apart you cant answer my

>reply since you are stumped and clueless.

They were YOUR questions, YOUR topic, not mine, You're wrong,
incorrect, and beside yourself. Try and deal withit without the anger.

What is known is that when you are not here on the weekend there is no strife, except for what moped and brainbusted try and stir up by posting their antilegal troll posts. No twirted, no strife. Soon as twirted appears, there's strife. Therefore Twirt must leave. It's a no brainer. A three year old could figure it out.

There you go, proving my point that you will start on someone else.
When "Twisty" is not here, it comes down to someone else to take your crap.
So, I suppose that Mopar and I must take our turn along with anyone else who
has disagreed with you at some time.

Let's face it, your only happy when you feel you have something to whine
about.

> try and stir up by posting their antilegal troll posts.

What "antilegal" posts from me... where do I speak out against legal CB?
Not only do you refuse to see any posts that do not suit you, but you are
now imagining things.

> No twirted, no strife.

But you just said that there was... and named two more people on your hate
list.
Make up your mind... is it just Twisty or not?

> A three year old could figure it out.

Sounds you are that three year old, trying to work it out and getting lost
in your own words.

> Therefore Twirt must leave.

Sorry, this group is not run by a three year old ADD sufferer... it's not
your decision.

I know no such thing.
I have seen you harass many people on this group, including myself. If Twisty was not there to draw your attention, then you would have more time for the rest of us. You would have to find another person to hate as you hate Twistedhed... should we all pick straws?

> have you READ any of TW's stuff lately?

Do you mean the forged posts... which YOU posted?

> it's inflammatory.

Those forged posts certainly were, and they were cross posted just to make sure they would start a CB vs Ham war.
You clearly set out to cause anger and hatred between people.

> Time for him to go for the betterment of the ng.

Have you considered how much more quiet this group would be without you, including all your other names?
Didn't think so.

Because some wanna be junior police types have informed e-bay that
a amp that can be used on CB is against e-bay rules. Technically your
item is against e-bay rules.

Just sell it here or go to Yahoo groups and sell it.

P.S. The same people that turned your sale in are the same people
that use illegal equipment hypocritically, troll the newsgroup, and
try to make your life just as miserable as theirs.

FCC rule 2.815(b): After APR 27, 1978, no person shall manufacture,
sell or lease, offer for sale or lease (including advertising for sale
or lease), or import, ship, or distribute for the purpose of selling
or leasing or offering for sale or lease, any external radio frequency
amplifier or amplifier kit capable of operation on any frequency or
frequencies between 24 and 35 MHz.

RULE 11 - Linear Amplifiers
{A} You may not attach the following items (power amplifiers) to your
type-accepted CB transmitter in any way:
[1] External radio frequency [RF] power amplifiers, also called linear
amplifiers, or linears;
or
[2] Any other devices which, when used with a radio transmitter as a
signal source, are capable of amplifying the signal.
{B} There are no exceptions to this rule and use of a power amplifier
voids your authority to operate the station.
{C} The FCC will presume you have used a linear or other external [RF]
power amplifier if-
[1] It is in your possession or on your premises; and
[2] There is OTHER EVIDENCE that you have operated your CB station
with more power than allowed by CB Rule 10.

3818. Too Funny!

Take a look at this:

http://www.popularwireless.com/gmrsad.html

Particularly:

"GMRS Web reserves the right to refuse service to anyone without explanation. Banner ads should be related in some way to the two-way radio, wireless products, or the personal communications industry. No adult oriented ads or ads encouraging illegal activity are permitted (including ads for export CB radios that are really intended to promote the illegal CB radio market in this country.) Communications companies that specialize in selling illegal radio equipment in U.S. markets or in making illegal radio transmitter modifications should look elsewhere."

...and then this:

http://www.popularwireless.com/ubb/Forum9/HTML/000188.html

Talk about one's chickens coming home to roost. LMAO!

You got that right. Alternator quit Thursday afternoon on a trip to a friends. When I got there, I opened the hood and decided it isn't like those old 56 Chevies and Fords I used to work on. They pack that stuff in tight these days. Besides, I was 10 miles from home so ... called the service station (he gave me a break when he heard "alternator" ... I think the dollar signs appeared ... and only charged me $50.00 to tow the car 11 miles to his station). Ended up $50.00 for the tow, 1 hour labor, and $169.00 for the alternator. Total bill including 8.25% sales tax was $302.00 plus a few pennies. I'd have been out over $200 plus tax to do it myself. Nah, I'll stick with the rods & reels LOL (besides, he had it fixed and ready to go by 1:30 in the afternoon the next day whilst I was at work - did I want to be without the car an extra day and work my fanny off to save $65.00?)

Oh no, you had problems too? (see my post in this thread about the alternator - plus the friend I was on my way to see had just purchased a used motor home - and he had the axle out, wiring exposed, and other assorted problems. I didn't ask.) Was it a full moon, or was it the proximity of Mars?

OK, I didn't know anything about this thing so now I know. But is there any legal, legimate purpose for this amplifier or was it strictly made as an illegal item? Just curious.

Strictly made to be used on Cb......and therefore illegal. Best thing
you could do is smash it up with a ball peen hammer.

OK, last question. Is possession of this amplifier illegal, is selling it illegal, or is it only illegal once it is being used? I don't even have a cb, so there is no way for me to possibly use it. Thank you.

3836. dx33hml ,,blows fuses

Newsgroup: rec.radio.cb
Date: 2003-09-14 14:13:17 UTC
From: dlnpc@aol.com
Message-ID: <61f775aa.0309140613.1377ad62@posting.google.com>
Source record: 165318

hello group
i have a galaxy dx33hml,its an older one
has a date under the cover " volt con 9-15-93"
anyways,,this thing started blowing fuses as soon as power is applied
directly behind the pa speaker jack on component side of board
i was able to see the remnants of a burnt component down there
i figured this was the problem
to gain access to this location i clipped the leads at the power
connector
and removed it
there is no markings for this burnt component,,and i can only locate
the one end of it
maybe it went up to the power connector
but in any case the power connector itself has a dead short
no resistance at all between pos and neg side
there is a ceramic disk type cap going from ground con,
to the bracket for the power connector
as well as another going from pos to neg side
and what i beleive to be a diode going from pos to neg side
i woukld like to replace all these components while it is out
anybody know the values of them all
and what the mystery part is on the board
maybe im thinking these parts are not necessary
as the solder work is pretty shoddy
they appear to be an after thought,,,or previous repair
thanks in advance
don

yes they were manufactured during the seventies before the fcc rule changes by hamsters who made them so they could easily be used on the cb band.... all the while these illegal hamster manufacturers, publically stated, they were for ham use only.....just another case of hamsters making money on cbers by selling them amps. now some of our little hamster buddies get on here and whine about the use of such amps on the cb band and they get real pissed when we have the audacity to use the very things we buy from them.....makes you wonder doesn't it????? ps. don't worry about me.....it might appear i was giving you a hard time, but i was just illustrating hamster hyprociy and idiocy by being silly.....hope this helps.....next time you list it, just say it is for ten to forty meters , don't mention cb and sell it on feebay under the hamster listings.....no problem.....

Did you miss the fires that were burning in the building ? The planes weakened the structures AND stripped the fire retardent from the support members. After that, the fire softened the supports and sheared the bolts holding them. With nothing to tie the inner structure to the outer shell structure, down they fell.
P.S. I gotta ask.....What is with the period abuse you always use in your sentences ?

All I want to do is get it working cuz I paid 10$
for it..... here's the breif version
of the story..... I was keyed up in bad SWR
keyed a little to long and a loud sqeul came from
the speaker.. all the diodes test fine in the unit
(I think I got them all).... what else do I check
for or should I throw it in the trash..... I figure
it may be an easy fix ...and i could learn from it..

Radio has no audio out put... even with a differn't
speaker..... PA works though...

Replace the audio IC. These cheap radios use the same AF amplifier
for transmit and receive.

Exactly. They are funded by the regular church members.
I believe that members of a church which allows such things should make it
clear to the church that they will leave the church if it does not sort out
the problem. If the church threatens them with damnation for not staying
in their "one true church", they only need point out that the Bible clearly
says otherwise.

> all this religious crap eventually comes back to money. cynical? you
bet....

It does for the big, well known churches. Look at how much money some of
the big churches have, and the fine posessions owned by those churches.
However, there are small churches and groups that meet up, just having
enough to cover the cost of hiring the meeting hall with some meetings in
members houses.

Thanks for all the replies guys. Turned out to be a bad crystal. I replaced t with one out of a parts radio, and voila! Works like a champ.

That was fun. I've got a few other busted radios lying around here that I'd love to attack as soon as I get proper service data for them. I just bought these at the flea market yesterday. I fully expected that none of them would work, which is what I wanted. If any of them did work, I wouldn't have much fun fixing them :) If anything, I've got tons of parts now. I paid 5 bucks (total) for:

Montgomery Ward 775 (40ch)
Pace 2300 (23ch)
Realistic TRC-24c (23ch)

All are mobile, and AM only. I'm getting to love fixing this stuff. What a hobby.

Thats just BS. No such film showed anything of the sort. There were signs of people on the upper floors above. See all that thick smoke? That meant fire. Did you see the films of some of the recovered beams showing how distorted from heat they were?

> that i think explosive charges were
> strapped to the main columns in the basement to bring them
> down.

Hmm....you saw films of people walking around the blown out floors but failed to see the films of recovered beams and now it is evident you failed to see the films showing the buildings collapsing from the top down, not the bottom up.

Joe wrote:

> I'm looking for a new cd (that's in a different thread) but
> I forgot to ask... I've never owned an SSB unit. What exactly
> will an ssb unit do for me? Does that just give you more channels?

SSB stands for Single Side Band, suppressed carrier. It is amplitude modulated. AM--Amplitude Modulation, transmits the carrier and two side bands, which result from mixing the carrier signal with the audio from the microphone. This process of mixing is called modulation. The resulting sidebands reside above and below the carrier frequency at frequencies equal to the sum and difference between the carrier and audio frequencies. In SSB, the carrier and one of the sidebands are removed. Then all of the power is used to amplify the remaining sideband before being transmitted. Thus, there are two modes of SSB, USB--Upper Side Band, and LSB--Lower Side Band.

SSB has advantages, such as much narrower bandwidth (takes up less frequency space) and as such is more resistent to certain types of weak signal fading. Also, since all of the power from the amplifier is concentrated in one sideband, that narrower signal carries a bigger punch than an equivalent signal using double-sideband AM.

It does not give you more channels, but with proper filtering and detection, two contacts can be conducted on the same "channel", one using USB and the other using LSB, without interfering with each other.

Keith Hosman wrote:
> When using SSB there is no carrier unless you modulate
> (talk).

Actually, there is no carrier, even if you do talk. The carrier is not a result of modulation. It is created in the circuitry of the radio. It is the sidebands that are a result of modulating the carrier with the audio from the microphone. After modulation takes place the carrier and one of the sidebands are removed before amplifying the remaining sideband for transmission.

Joe wrote:

> Under ideal conditions what kind of range are we talking?
> AM = 4-5 miles?
> SSB = x miles?

Your range is really dependent more on your antenna than on your mode of transmission, differences in legal power output aside.

Although there are height limitations for CB (20 feet above existing structures at the antenna sight), there is nothing stopping you from putting up an antenna that concentrates its radiated signal in one direction, or in two directions.

Most CB antennas are omnidirectional. They radiate power equally in all directions. Beam antennas, such as are used in outdoor TV antennas, concentrate their power in one direction and also suppress reception of signals coming from directions other than where they are aimed. They also amplify signals received from the direction they are pointed in.

This results in a greater signal-to-noise ratio in the receiver and much greater concentration of your signal in the direction of transmission, greatly increasing your effective radiated power.

The people you saw "walking around" were the ones stranded above the impact, and had gotten as far down as the stairs would let them. The only reason you saw them at all, was they were slowly roasting and suffocating from the massive fires and hanging out the windows. Did you not see them jumping from a height of 70 stories or so ?
As far as bombs in the sub-levels bringing it down, hogwash.. Did you also miss the TOPS of both buildings collapse onto the damage, and pile the rest into dust ?
The building was designed to take a hit from aircraft such as a 707, but the thousands of gallons of diesel that burned were never really thought about, especially from larger, modern jets. If the building had just been lit on fire on its own, it most likely would never collapse. But when tons of debris strips fire retardant from the crossmembers, the steel got hot and sagged.
I'm sorry you dont believe it, but its the truth. Seems like everyone out here wants your side of the real conspiracy. So do I..

Sorry if I am redundant, this is the fist time on this group, I am using Central Florida Road Runner and their NG retention is about 48 hours, so I can't search the old posts.

I bought a RS TRC-458 Navaho base station at a garage sale this weekend for ten dollars and I have a twenty foot mast and I would like to build my own antenna, to save $$$.

The pattern needs to be at least 180 degrees as I live on the coast of Florida. I plan to run barefoot (till I can buy some power) so I need some efficiency.

Thanks,

BR549

"Trainpuppet Bear"

I was on the outskirts of a little Jersey town,
Trying to get a blowjob from trainfag the keyclown.
The old CB was blaring away on channel one-nine
When there came that fag assed voice on the radio line.
And he said, "Breaker, one-nine, is anyone there?
It's train the queer, truckers, and I've got my asshole bare."
Well, I keyed the mike and I said, "Well, you got it,Train queer."
And the little punk's voice came back on the air.
"'Preciate the break. Wanna stick yer pekker in my end?"
We discussed his pricing, and then he began:

"Now, I shouldn't bug you with my faggot assed fluff,
Mom said "I suck off the truckers, son, and 1 slut is enough."
But, you see, I get horny and I crave truckers dicks
'For a very low fee, I'll give a great suck and lick.'
I came back and told him to fire up that mouth
And I'd pump his gay lips as long as he'd like.

"This was my dad's radio," the little boy said,
"But he's doing five to seven for making 9 year olds give head.
Dad was turned out about a month ago.
Now he's trying to survive gang rape of his asshole.
Mom has to whore now to make ends meet
And I wanna help out and suck on your meat.
She says not to worry, that her cunt is still tight,
But I hear her crying sometimes late at night.
You know, there's one thing I want more than anything else to see.
Is a dripping and throbbing truck driver's pee pee,
Cuz, you see, my dad used to take me for rides on his bone
But I guess that's all over now since my daddy's gone."

Not one breaker came on the old CB
As that little faggot train talked gay sex with me.
I tried ignoring my hardon, but the lump just wouldn't stay down
As I thought about my gay lover back in Keyclown town.

"Dad was gonna pimp Mom and me later on this year.
Why, I remember him saying, 'Someday you will be a big faggot too, little train.'
But I know I'll never get to ride a trucker again,
But this old base will keep me in touch with my gay keyclown friends.
Trainedpuppet's gonna back on out now and leave you alone
'Cause it's about time for me to massage my bone.
But you give me a shout when you're passing through
And I'll sure be happy to talk gay sex with you you."

Well, I came back and I said, "Before you go ten-ten,
What's your home-twenty, little CB friend?"
Well, he gave me his address and I never once hesitated
'Cause this hot load of jizz wasn't gonna be masturbated.
I turned that truck around on a dime
And headed straight for Jackson Street, 229.

And as I rounded the corner, boy, I got one heck of a shock--
Eighteen-wheelers were lined up for three city blocks!
Why, I guess every driver for miles around had caught Faggottrain's call.
And that little gay boy was licking their balls.
For as fast as one driver would get off in his ass,
Another would carry him to his truck and pump him again.
Well, you better believe I took my turn at riding Trainedpuppet.
I carried him to the sleeper, and pounded his tuffet.
And, buddy, if I never live to see happiness again
I want you to know I saw it that day, in the face of that little fag.

We took up a collection for him before his mama got home
And each driver said "Thank you for licking my bone".
He shook my hand with jizz on his chin
And said, "So long, trucker, I'll blow you again!"
I hit that interstate with shit on my dick
Smiling and remembering little trained puppet's lick.
"Breaker, one-nine," came a voice on the air,
"Just wanna say "fuck you" from Mama gay train.
That bastard little queer won't split all that cash.
'And now I can't pay the rent from selling my gash.
I'll sign off now before I start to cry.
Next time please fuck me. Ten-four, and goodbye."

if you're interested in saving costs, antenna gain is way less expensive
than amplifier gain.

a simple dipole would be a good start, two 10' wires, and a balun.
suspend from 10' poles in the yard, and trim the wires to best match, or
best resonance, if you can borrow an analyzer.
people do it without the balun, but it's no longer a dipole, and the
radiation pattern is different.

a two element beam can be made with wire, if you don't have to turn it.
it's not too directional, but it may serve your needs.

a full wave loop is another low cost, gain antenna. a bit harder to support
though, since it's 9' on a side, and ideally should be vertical. this is
another one that wants a balun on it's feed.

no. . a beam antenna is more similar to a lens.
lasers have an excited medium, that is made to dump out photons in sync.

masers do this in the microwave region, but i'm not aware of anything
reaching down anywhere near this far.

Granted, but what is the point of asking such a question. The properties
of radio frequencies below UHF prevent focused beams of energy as
narrow as a maser. Even if there were a way of generating radio waves
in the same fashion as masers, they wouldn't propagate the way maser do
anyway.

I got kl200(rebuilt, new transistors) 100watt SOLD
predator 150 bi linear w/ pre amp, three stages (all original parts, works good) 175 watt
kl300p with fan kit (all new) 250 watt SOLD
texas star 350hdv (meter and meter light out, but works great) @400? power SOLD
supply not handle it for testing
texas star350dx (all original parts, works great) same as above
kris boomer (two tube, works fine) @225 watts
alan1313 (one tube that is brand new!, great condition) 110 watts TRADED
Power Pump 200 base (transistor) 300 watts SOLD
Cobra 138 23channel am,usb/lsb (works like new) 10 watts
freshley restored D104 base mic, amplified, shinny bronze finish, Loud !!!
battery included, wired standard Cobra,
using with 138 as of last night for the heck of it..
make offer.. I live in North Alabama, email if interested, please dont insult with 10-20 dollar offers etc, I do not need the money, but I will not give them away. If you need them, great ,

The people you saw "walking around" were the ones stranded above the impact, and had gotten as far down as the stairs would let them. The only reason you saw them at all, was they were slowly roasting and suffocating from the massive fires and hanging out the windows. Did you not see them jumping from a height of 70 stories or so ?
As far as bombs in the sub-levels bringing it down, hogwash.. Did you also miss the TOPS of both buildings collapse onto the damage, and pile the rest into dust ?
The building was designed to take a hit from aircraft such as a 707, but the thousands of gallons of diesel that burned were never really thought about, especially from larger, modern jets. If the building had just been lit on fire on its own, it most likely would never collapse. But when tons of debris strips fire retardant from the crossmembers, the steel got hot and sagged.
I'm sorry you dont believe it, but its the truth. Seems like everyone out here wants your side of the real conspiracy. So do I..

ok bud you are factually wrong on some points. a staircase was still
viable on the south tower to let people escape.
where did you get the idea that planes use diesel? jp5 maybe but
certainly not glow plugs in a fanjet...
lastly, there were very few 'cross members' as you stated because the
supporting steel was actually the exoskeleton of the building. in other
words the outside of the building supported the entire structure. unique
yes but that was the wtc....

Dave,
Just so you will know in the future, the dipole is
a dipole, balun or no balun. It's still a balanced
antenna, but fed with an unbalanced feed line.
Both the dipole and a vertical full wave loop will
work just fine without a balun. It does make a slight
difference in the shape of the radiation pattern but
you will never know it. Do you really mean a balun,
or do you mean a coaxial choke? At HF either will work.
'Doc

That is flat out false. The building was supported by a rigid central core. The exoskeleton was designed to absorb wind loads and not apply those loads to the central core. The gravitational loading of the building was supported by the central core.

no, it's not.

in order to be a dipole, it has to be fed with two signals, 180 degrees out
of phase, and equal ampliude.

otherwise, it's a monopole, with a counterpoise.
do you not see the difference between a driven, and a passive element

Do you really mean a balun,
> or do you mean a coaxial choke? At HF either will work.
> 'Doc

whichever way you do it, you need to feed it balanced.

Obviously, those who could make it to a staircase did. Those planes tore up 6 floors when they banked going in. Not everyone was lucky enough to be able to make it to access down. I wasnt trying to be absolutely perfect in my reply, just explaining. Jet A and diesel burn pretty much the same, i was using it for example only (i will be anal retentive and explain things excessively next time), sorry for that too. As for the crossmembers, look again. The "crossmembers" that tied the inner core with the outer exoskeleton, were the floor joists that ran all around the core and were tied with just a couple or few bolts on each end. And even those were only 1/2" or 5/8" bolts. When the floor joists sagged, the bolts were ripped apart by tension. Those bolts were never intended for tension, just shear. Thats when the outer exoskeleton buckled, and the collapse began.
Unique is right too Jim. They dont build em' like that anymore. And i bet they never will again either ;>)

Re: The Grandaddy of All Conspiracy Theories!

THE STORY THAT WON'T GO AWAY. WITH THE MEDIA WAR FRENZY NO CHANCE TO
FIND OUT WHY THE PUBLIC INQUIRY ON THIS CALAMITOUS EVENT ISN'T GOING
ANYWHERE. AND YET THE CONQUEST OF IRAQ'S BARELY TAPPED OIL FIELDS IS A
DIRECT RESULT OF THE 9-11 HOAX

From: http://www.rense.com/general36/hoax.htm

The Official Version Of 9/11 Is A Hoax

By John Kaminski
skylax@comcast.net
3-22-3

Opposed by everyone in the world who was not bought off, the illegal
invasion of Iraq was undertaken for many reasons - the imminent

replacement of the dollar by the euro as the world's primary currency, the tempting lure of untapped oil reserves, the desire to consolidate U.S. / Israeli military hegemony over a strategically vital region - but the most important reason was to further obscure questions about the awesome deception staged by the American government that has come to be known as 9/11.

9/11 was a hoax. This is no longer a wild conspiracy assertion; it is a fact, supported by thousands of other verifiable facts, foremost of which are:

The attacks of 9/11 COULD NOT HAVE HAPPENED without the willful failure of the American defense system. In Washington, Air Force pilots demanded to fly but were ordered to stand down. Yet instead of prosecuting the president and military leaders for this unprecedented dereliction of duty, military leaders were promoted and the president was praised for presiding over a defense system that suspiciously failed the most crucial test in its history. None of the deaths would have happened without the deliberate unplugging of America's air defenses.

Planes that lose contact with control towers are usually intercepted by fighter jets inside of ten minutes, as the incident with the golfer's plane a few months earlier so clearly demonstrated. Yet on 9/11, the jetliners that struck New York were allowed to proceed unmolested for more than a half-hour, and the plane that supposedly crashed in Washington was not intercepted for more than an hour and forty minutes after it was widely known that four planes had been hijacked.

The twin towers could not have collapsed as a result of burning jet fuel. Most of that fuel was consumed on impact. In the south tower, most of the fuel was spilled outside the building. Heat caused by burning jet fuel does not reach temperatures needed to melt steel. What does stand out as particularly suspicious and still unexplained is that fires raged out of control beneath THREE of the collapsed towers for ONE HUNDRED DAYS, clearly indicating the presence of some kind of substance utilized in the demolition of the structures.

The Twin Towers did not fall because of plane impacts or fires. Most likely explosives were placed on structural supports in the towers (as was done in Oklahoma City), and these controlled implosions snuffed out the lives of three thousand people.

FBI Director Robert Mueller insisted officials had no idea this kind of attack could happen when in fact the FBI had been investigating the possibility of EXACTLY this kind of attack for almost TEN YEARS. Numerous previous attempts at using planes as weapons, intimate knowledge of terror plans called Project Bojinka, and knowledge of suspicious characters attending flight schools who were being monitored by the FBI make his utterance a clear lie on its face.

In the weeks before 9/11, the U.S. received warnings from all over the world that an event just like this was about to happen, but FBI investigations into suspected terrorists were suppressed and those warnings were deliberately disregarded.

The names of the alleged hijackers, all ostensibly Muslims, were released to the public only hours after the attacks, despite Mueller saying we had no knowledge this would happen. This is an impossible twist of logic. If he didn't know of a plan to strike buildings with planes, how would he know the names of the hijackers? Various artifacts were discovered in strategic places to try to confirm the government's story, but these have all been dismissed as suspicious planting of evidence. Since that time several names on that list have turned up alive and well, living in Arab countries. Yet no attempt has ever been made to update the list. And why were none of these names on the airlines' passenger lists?

Much like the invasion of Iraq, the anthrax attacks were designed to deflect attention from unanswered 9/11 questions in the patriotic pandemonium that followed the tragedy. In addition to making large amounts of money for the president's father and his friends from the hasty sale of inefficient drugs to a panicked populace, the investigation into these killings was abruptly halted when the trail of evidence led straight to the government's door, and has not been reopened. The anthrax attacks also amped up the climate of fear and deflected attention from the passage of the government's repressive Patriot Act.

The Patriot Act was presented in the days after the tragedy supposedly as a response to it, yet it was clear that this heinous act, drafted to nullify provisions for freedom in the U.S. Constitution, was put together long before 9/11. In addition, testimony by Rep. Ron Paul (R-Texas) revealed that most members of Congress were compelled to vote for the bill without even reading it. This was a vote to eliminate the Constitutional Bill of Rights, which has defined American freedom for 200 years, and it was accomplished when legislators voted for the bill without even reading it.

The invasion of Afghanistan was presented as an attempt to pursue the alleged perpetrators of 9/11, yet it had been discussed for years prior to the tragedy and actually planned in the months before the attacks on New York and Washington. Statements by Zbigniew Brzezinski and the Republican-written Project for a New American Century have stressed that America needed a formidable enemy to accomplish its aggressive geopolitical aims. The supposed enemy we attacked in Afghanistan was a diverse group of men from all over the world who were initially recruited, encouraged and supported by the American CIA.

The hole in the Pentagon was not made by a jumbo jet. Damage to the building was simply not consistent with the size of the hole nor the absence of debris. At the supposed point of impact, a whole bank of windows remained unbroken and there were no marks on the lawn. No

airplane debris (except what was planted on the lawn) nor remains of passengers were ever found.

The president has admitted that he continued to read a story to schoolchildren in a Florida school for 30 minutes after being informed that two planes had struck New York and that the nation was under attack. He has never explained this puzzling behavior, nor how he saw the first plane hit. It was never televised, only recorded by a French crew filming firemen in New York. In that film, the plane in question does not appear to be a passenger airliner.

The plane in Pennsylvania was shot down and broke apart in midair. No other explanation can account for the wreckage, which was spread over a six-mile area, or the eyewitness accounts that describe debris falling from the sky.

Cellphone calls cannot be made from airliners in flight that are not close to the ground. As research by Professor A. K. Dewdney has shown, the emotional conversations between hijacked passengers and others would not have been possible under conditions that existed at that moment. These calls were cynical fabrications, exploiting the distraught emotions of those who lost loved ones.

Radio communications from firefighters on the upper floors of the Trade Center towers clearly indicate that fires were under control and the structure was in no danger of collapsing.

These are merely a few of the deliberately false statements made by U.S. officials about 9/11. They provide crystal clear evidence that our president, his staff, and many legislators should be indicted on charges of treason, obstruction of justice and mass murder. Above all, these evil men should be removed from their positions of authority before they implement more of their moneymaking murder schemes like the one they are now perpetrating on the innocent people of Iraq.

Otherwise, we face a future of endless war abroad and merciless repression at home.

Consider just a few more of the other unanswered questions from among the thousands of unexplained loose ends that all point to 9/11 being an inside job.

Who benefited from the suspiciously high numbers of put options purchased prior to September 11 for shares in companies whose stock prices subsequently plummeted, on the supposition that whoever was behind the hijacking was also behind most of the purchases of these put options? And what was the role of the new executive director of the CIA, Buzzy Krongard, who handled these transactions ?

Why was the debris from the collapsed Twin Towers removed from the site with no forensic examination? Why was almost all of it sold to scrap merchants and shipped abroad where it would not be available for scientific examination?

Why does the government refuse to release any transcripts of communications or any records at all relating to signals of any form transmitted by those jets?

Why did so many people, from San Francisco Mayor Willie Brown to many employees of companies in the World Trade Center who failed to come to work that day, know in advance that something bad was going to happen on Sept. 11, 2001?

Why do all the major U.S. media continue to act as if none of these questions is legitimate or relevant?

Today, millions of people around the world are protesting the criminal destruction of the nation of Iraq. But these protests won't change the number of minds necessary to stop America's criminal madmen from continuing with their genocidal aim of enslaving the entire world.

What WILL stop them is spreading the realization that President George W. Bush and his billionaire accomplices in the oil industry perpetrated 9/11 as an excuse to begin the militarization of America for the purpose of world conquest.

History has shown all too clearly the deceived American people WILL support the destruction of faraway countries on phony pretexts of defending so-called freedom.

Thus the needless wars continue. Right now we watch high-tech weapons slaughter the defenseless people of Iraq. Soon it will be Iran, Syria, Colombia, Venezuela, North Korea, Egypt, Libya, Nigeria, North Korea, Pakistan, Saudi Arabia, and who knows where else. All these misguided atrocities will be possible because of the hoax known as 9/11.

But the American people will not - and cannot - tolerate leaders who kill our own people merely to invent a pretext - the war on terror - to go around killing anyone they like.

If the American people DO tolerate such an insane strategy, then they clearly do not deserve to survive as a nation or a people.

John Kaminski is a writer who lives on the coast of Florida and can't understand why the president hasn't been arrested for his obvious lies and crimes.

>

Take a look at any standard text (Kraus's "Antennas" for
example) and
you will see your definition isn't correct. Among other
characteristics,
a dipole antenna (also called a doublet) has two 'elements'
which are
equal in length (and commonly accepted to be 1/2 wave length
long). Doesn't
really matter is it's horizontal, vertical, an 'L', or some
randomly shaped
thingy, it's still a dipole.
Having used dipole antennas for over 30 years, I can't think
of a single
instance when I've fed one with two signals, no matter what mode
of use. I
~have~ fed them with a single signal and each 'element' of the
antenna be
180 degrees out of phase, but that's normal with any antenna fed
in the center.
Except for commercial and military applications, I can't think
of a single
multiplex amateur or CB example (two signals to the same
antenna).

> Do you really mean a balun,
> > or do you mean a coaxial choke? At HF either will work.
> > 'Doc

>
> whichever way you do it, you need to feed it balanced.

Also not true. At HF there is very little reason to worry
about using
a balun unless you have to do impedance transformations or are
feeding a
directional antenna. The primary result of an unbalanced signal
to a
balanced antenna is a very slight skewing of the radiation
pattern. Except
for directional antennas (beams) that 'skewing' of the radiation
pattern
isn't noticable (and not very noticable even with a directional
antenna).
If you will notice, I qualified all of the above to HF. At
higher frequencies
there is a more noticable change in radiation patterns because
of a balanced
to unbalanced condition. The example you furnished for baluns
is for the
VHF/UHF spectrum where pattern skewing ~is~ more noticable and
important.
Baluns are fine for when/where they are of use. At HF they are
at best
just another point of failure that isn't strictly needed.
'Doc

You really think that everyone is in love with you?
If so, you need the help of a good shrink.

Personally, I believe you know the truth... we would all cheer if you went.
Hell, there would probably be a big event to celebrate.
You know it, and you keep changing your header to make sure that people see
your crud.

In fact, I believe that YOU are "enamored" with us. Not only are you so
desperate to work out where some of us are, but you seem to be so turned on
by Brummies that you have to imagine me as one.
You even claim to put me in your killfile, just to hide your twisted love.
Using another name does not change the fact that you are a liar.

>>What "antilegal" posts from me... where do I speak out against legal
>>CB?
>>Not only do you refuse to see any posts that do not suit you, but you
>>are now imagining things.
>
>do you deny you post in defense of keyclowns

The law you claim to have so much respect for says innocent until proven
guilty.
YOU claim that I make anti-legal posts... PROVE IT.

Post the proof, or stop making such claims.

>IF there was no Tworted there would be no strife.

There would, he is not the only one you whine at.
You have to make false claims about what I post and you even post forged
messages to start trouble.

> learn to read

I can read... which is how I know about your harassment of so many people on
this newsgroup.
How about you learning to spell, punctuate, and use uppercase?

Until you master the English language, you are rather less than qualified to
advise other people on the subject.

>assmunch.

Speaking of the English language, that is not in my dictionary.
And you still act like a child.

>sounds like you ignore Landqueers harassment

Landshark is not harassing or bothering me... you have even used another
name just to argue with me, after claiming to "killfile" me.

Who is he harassing... you? Have you thought that he may just be responding
to your crap, you have made it clear that you like to anoy people.

>Bite me,

No thanks, I'de probably catch something rather nasty.

Seen a couple of good documentaries on this. The cross trusses between the inner core and the outside structure had defective heat insulation on the floor truss webbing even before the strike as a building fault. As the massive amount of fuel burnt and raised temperature these trusses supporting a 4" concrete floor buckled and caused the end supports to fail. As they fell one by one the vertical structures also very weakened by heat buckled and contorted until as all the floors above started moving down that momentum could not be withstood and the vertical domino effect of collapse happened as it did.If the steel had have been far better insulated there's a good chance they may have stood. there is no conspiracy here. A Terrorist attack with devastating effect. If the planes had a light fuel load, things may also have been very different.

> Having used dipole antennas for over 30 years,

have you measured what you're doing, or are you just hanging stuff in the air, and seeing if it 'gets out'. there is a difference.

I can't think
> of a single
> instance when I've fed one with two signals, no matter what mode
> of use. I
> ~have~ fed them with a single signal and each 'element' of the
> antenna be
> 180 degrees out of phase, but that's normal with any antenna fed
> in the center.

and that's exactly what i said.
each element is fed with 1/2 the transmitter power, exactly out of phase.
you can think of them as a single balanced signal, or as two signals, at 1/2 the total power level, and exactly out of phase, it makes no difference either to nec, or to the antenna.
the point being that in order to function as a dipole, both elements must be driven.
if it's not fed that way, then it's no longer functioning as a dipole.

> Also not true. At HF there is very little reason to worry
> about using
> a balun unless you have to do impedance transformations or are
> feeding a
> directional antenna.

if that were true, then jerry sevick has done a lot of work for nothing.

a coax fed 'dipole' without a balun, will certainly radiate, and if you're lucky, your coax will be an odd multiple of 1/4 wavelengths long, and present a high impedance point at the feed, avoiding much of the current going back down the feed. however the balun makes the difference between working by design, and working by luck. in a proper system, you'll have almost no rf on your shield, and the length of the coax won't matter, except as it roates the reactive component of the antenna impedance. if your antenna is resonant, as it should be, there won't be much of that.

so to summarize, you claim that the elements can be any length, and any shape, and fed balanced or unbalanced, and nothing significant changes? nec modeling, and actual results on real antennas disagree with you.

boy, i'm glad you're not doing my part 15 certs.
the lab uses tuned dipoles, carefully adjusted to length, and fed with a balun, for any tight measurements.

At HF they are
> at best just another point of failure that isn't strictly needed.
> 'Doc

this is a lot like the folks that argue with me about noise and grounding in pcb layouts.
if you do it badly enough, then even filters with 50db notches, 'don't make a difference'.
when you have a system, that needs three things done right to work, you can do any single one right, and get the observation that it dosen't make a difference.

when you make the feedline part of your antenna system, then you make it pretty difficult to figure out what's really going on.

for example, one fellow brought an 'antenna' to field day, that he built off instructions on the net.
a small coil, about 6 inches diameter, and about 6 inches long, with two coffee cans on each end.
this is coupled back to the transciever by a few turns of bell wire, connected to the end of the coax. this is supposed to be a 20 meter antenna.. and, it does tune up.. and he did make contacts..

of course all the antenna work is being done by the coax shield.

the funny part was the claim that unlike 'normal' antennas, 'it even works better on longer feedlines.' /clue alert/

of course it does. drop a balun out there between the coax and the coupling coil, and now you get to see what the 'antenna' itself does.. damn near nothing. you'd be better off using a lawn flamingo.

of course, you could make the claim that due to mystery physics that nobody understands, the balun broke the wonder-tenna.

Yup. I work on it when I can. It's a hobby, not a profession. I've been extremely busy with various work related studies, so the CB radios take the backseat sometimes. Nonetheless, it's really fun working on them when I can. I don't see how the time makes any difference. If I was charging somebody by the hour to repair the radio, that would be a different matter altogether. I'm a network engineer, not a radio tech. If I was helping a friend by giving him advice on routing, I wouldn't bust his balls because it took him 3 days to configure access lists on a Cisco router, even if I could do it in a couple of minutes. I would say "Hey man, that's great. Good job". If he was a well compensated coworker, I'd read him the riot act.

> Have fun fixing the rest of them. Bad caps and cold solder joints
> are about to found.

I bet you're right! :) I haven't powered any of the radios up yet, but I did pull a couple apart. One has two completely blown caps, and another has a charred pcb near the power connector and a couple of missing diodes. This should be fun. There's just something really cool about fixing radios others have discarded. For me it's very challenging, much like a good puzzle. When it ceases to be a challenge, I'll either look for REALLY busted radios, or perhaps try my hand at repairing other types of radios. CB's are kinda fun because I can pick them up all day long at the flea market for a couple of bucks. I've also wanted to understand them (and radio in general) since I was a kid. Lately, I decided that I should quit wondering and start learning. I'm having a blast so far.

If/when I get really good (and fast) at it, I was thinking of fixing other people's radios around here at no charge in my spare time. It's a hobby. There really aren't many reputable shops around here. The couple that I'm aware of are always backed up and charge ridiculous rates. Naturally, there is no shortage of guys working out of vans and camper shells willing to turn screwdrivers and "tweak and peak" radios. Every one that I ever ran into seems to have no clue as to what he's actually doing. That's fine, until they start charging guys like my dad 50 bucks (true story) to nock the carrier power on an otherwise good radio down to two watts, and turning the modulation up high enough to make my meter go "ding" when it smacks the right side of the case. (OK, I'm exaggerating a little) And don't get me started on how he managed to turn a once spectacular old Royce into an off frequency splatterbox. Nope. I'd like

to someday be able to do a fantastic job free of charge. What better source of broken radios is there than people bringing them to me? :) Ahhh...someday when I'm better at it and much faster...

Incidentally, now that the Cobra is fixed, I'm thinking of giving it back to my dad. I don't think he ever thought it would work again. Neat huh?

Thanks again for the help man, I appreciate it.

> > from old pinhead when he used to be on here, but he died in a drug
> > deal gone bad along with some byu negro.......so i celebrate his
> > memory by using a lot of dots doncha know............

ok fine.......you don't believe that point then how about
this........the guy that supposedly taught those idiots to 'fly'
jets.........said they couldn't fly by the seat of their pants much
less fly a jumbo jet into the side of a building..........you have to
make intricate maneuvers that would be hard even for a experienced
pilot..........it is like hitting a needle in a haystack.......and yet
guys who had never actually flew a plane before somehow were able to
make these planes fly into the side of a building......makes no sense
to me............

again on point 1.......i reiterate......the blast from the planes went
out the other side of the building and that includes most of the fuel
associated with these planes..........all that was left was a
smoldering ruins......i ask you.........tell me how hot was it in
there.????? what we are talking about here is aluminum and titanium
tubes full of jet fuel......on impact, naturally it disintegrated. and
the force of the impact went out the other side of the
buildings........review your tapes........

you have to understand......in order for 'them' to take your rights
away, 'they' needed a catastrophic event to take place........and so
it did.....and so they are or trying to do just this. it is plain and
simple...the constitution has been trashed all for the price of
rounding up 'terrorist' among us........make no mistake about
it......this will come back to haunt the american people.....it is a
travesty and a injustice....and anyone paying attention surely will be
affected by this and troubled....they will not stop until most of your
freedoms you hold dear now are forfeited because you let them do
this..........for what you say??? for the new world
order.........that is the case, no doubt about it....the writing is on
the wall for all to see........

>
>no, it's not.

Yes it is.

A dipole antenna is a straight electrical conductor measuring 1/2
wavelength from end to end and connected at the center to a
radio-frequency (RF) feed line. This antenna, also called a doublet,
is one of the simplest types of antenna, and constitutes the main RF
radiating and receiving element in various sophisticated types of
antennas. The dipole is inherently a balanced antenna, because it is
bilaterally symmetrical.

Ideally, a dipole antenna is fed with a balanced, parallel-wire RF
transmission line. However, this type of line is not common. An
unbalanced feed line, such as coaxial cable, can be used, but to
ensure optimum RF current distribution on the antenna element and in
the feed line, an RF transformer called a balun (contraction of the
words "balanced" and "unbalanced") should be inserted in the system at
the point where the feed line joins the antenna.
>
>in order to be a dipole, it has to be fed with two signals, 180 degrees out
>of phase, and equal ampliude.
>
>otherwise, it's a monopole, with a counterpoise.

So I can feed my Ground plane or quad with a balun, then its a
dipole?

>do you not see the difference between a driven, and a passive element

You think the end thats fed with the shield of the coax is passive?
Come on over and grab the end of my dipole, (fed with coax and no
balun), when I have 1Kw running to it. You will change your mind
about it being passive.

>
>

> Do you really mean a balun,
>> or do you mean a coaxial choke? At HF either will work.
>> 'Doc
>
>whichever way you do it, you need to feed it balanced.

You will notice very little, or more likey no difference between a
dipole fed with or without a Balun.
